SIR,—Now that the French have commenced operations in Madagascar by bombarding a defenceless village, and our papers are full of comparisons between their Navy and our own, it may be interesting to examine their chances of success, first with regard to Madagascar, and next in the event of a war with England. To subdue Madagascar—an island, be it observed, as large as Great Britain, a mountainous, thickly wooded, and notoriously unhealthy country, inhabited by a semi-barbarous and warlike race—would require a force of 25,000 men; to hold it, a great many more, besides a fleet of men-of-war and transports to keep up their connection with the base of operations. The capital of the Island would have to be invested, no easy matter when the difficulty of transport, in the face of a hostile force familiar with the country, is considered, to which may be added the utter absence of roads and the prevalence of fever, &c. But allowing that all these difficulties are overcome, how do they propose to maintain their hold upon the island? Seventy years ago the French were compelled to evacuate Hayti, an island similar in many respects to Madagascar, but less remote than that island, and with a far less numerous population. The Haytians, although professedly Christians, and claiming a high standard of civilisation, are in reality barbarians, with a thin veneer of French polish; their religion is the religion of the West African, they are cannibals, serpent-worshippers, and child-slayers. And yet these people, badly armed, unpaid, and half-clothed, with no sort of discipline, but assisted enormously by the unhealthiness of the climate, proved too much for the French. It is not impossible that the "Malagash" will prove at least equal to the Haytians, and that the French will find to their cost that the game is not worth the candle. Next, with regard to ourselves. The French have, it is true, as many ships as we have, possibly more, and better armed. Whether they have the men remains to be seen; at any rate, we are not deficient in the latter respect. In the event of war, our Coastguard men would be called out, and a better body of men could not be found in any part of the world. Beyond that we have our Reserve men, numbering probably some 30,000 able-bodied men, thoroughly drilled and familiar with ship life. These men, though unaccustomed to man-of-war routine, are perfectly at home in the matter of gun, rifle, and cutlass drill, and would do admirably to man our mastless turret-ships, and the numerous craft suitable for home defence. They would also prove very efficient in manning the large fleet of first-class merchant steamers, which we should at once fit out. These latter would very speedily dispose of privateers and such-like craft (if the enemy availed themselves of this form of warfare, and in all probability they would), and would also protect our commerce from the enemy's cruisers. As a matter of fact, all English sailing-vessels would be laid up or change their flag at the first alarm of war, so that there would not be much commerce to protect. Our ironclads, alas! too few in number, are sufficient to protect our shores from invasion, although possibly not strong enough to carry the war into the enemy's country. The French could gain nothing by a war with England; they could never attempt a landing on our shores so long as our Fleet, backed by torpedoes, did their work; whilst we, on the other hand, could do no more than blockade their ports. The one who had the most endurance, the better resources, and the longest purse would win in the end. But this surely is a humiliating position for the so-called "Mistress of the Seas!" Until, however, the nation is aroused to the condition of our Navy, and the Treasury advance the money necessary to place it on a more secure footing, I fear we must be content with it. It is ships we want, and plenty of them, if we are to maintain our supremacy on the seas. Our obsolete ironclads in the first reserve should be exchanged for ships like the Dreadnought, Edinburgh, and Collingwood type as fast as they can be got ready, and others built without delay, short, handy ships, not like the Duilio and such-like monsters, which can be destroyed by a single torpedo. The very comparison drawn between the French and ourselves is a reflection on our weakness. There should be no question on that score. A word about the officers, and I have done. There are plenty of first-rate officers, high in rank, anxiously awaiting employment, and meantime struggling on, on a miserable pittance,—sarcastically called "half-pay." These officers, in contradistinction to those who have no intention of serving, should at once be placed on a scale of pay similar to the American system of "waiting-pay,"—about two-thirds of full. They would then be able, at all events, to live like gentlemen until their turn for a ship came round. Lieutenants, after a certain time—say, 12 years—should either be promoted or retired, to relieve in a measure the present hopeless state of stagnation and discontent. But these reforms cost money, and money, alas! is not forthcoming, nor will it be until it is too late.—I am, &c.,

ONE IN COMMAND.

"Staff Corps" writes:—"Referring to your article on the rates of promotion of Staff Corps Subalterns, no mention is made in it of the case of Captains in the same corps. Twenty years is the time fixed as qualifying for promotion to Major, a period far longer than that in which captains of British Cavalry and Infantry, as a rule, obtain their majorities. Personally I am a Staff Corps Captain of over 18 years' service, so have nearly two years more to run in my present rank, and at the present moment, in Bengal alone, I have been superseded by over 30 officers of the British service, who entered the Army subsequently to me. When the Staff Corps was first started, doubtless the rates of promotion now in vogue were few enough, but under present circumstances, we are being continually superseded, which naturally does not conduce to contentment, nor towards the efficiency of the service. Leaders often appear in the Indian papers on the subject, but as the chance of their being seen by those in authority at home is almost nil, I write in the hope that you will kindly publish this communication, and thus attract the notice of those who have the power to help us."

POSITION OF REGIMENTAL MAJORS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Six years ago, after very long service, all spent in one battalion, I reached the respectable position of senior captain and brevet major, and if no reorganisation of the regimental ranks had taken place on July 1, 1881, I should have been promoted to a regimental majority a few months after that date. The monster gazette of the above-mentioned date turned me into a mud-major, that is my rank at present, and I see no prospect of promotion to lieutenant-colonel for some years to come. I am many years senior in the service to "Disgusted Mud-Major," but have to undergo all the miseries that he so accurately describes. The position of those "Mud-Majors" who were senior captains of their battalions on July 1, 1881, is intolerable, and for very pity's sake appeals for relief at the hands of the new Secretary of State for War. My company purchase-money is still retained by the State, and I cannot bring myself to think that it is just, that after my service I should have inflicted on me those subaltern duties that my money was paid, in due course, to relieve me from. The organisers could not have had much practical knowledge of regimental detail, or they never would have hatched such a ridiculous rank. It is possible that they at one time had running through their brains the adoption of the four-large-company-per-battalion system, after the Continental model, but in consequence of divided opinion, they at the eleventh hour agreed to a compromise, which would have the merit of saving enormous sums for compulsory retirements. If this is so, then, contrasting great things with small, they have again undertaken to perform the tragedy of *Hamlet*, omitting the character of the Prince of Denmark, for in one case they have adopted the short service without any sort of compulsory enlistment for its basis, and in the other they have appointed four field-officers to each battalion, without making the company the independent unit, which it is abroad, or giving those officers any regimental field functions to perform. The plain English of the change is that the old junior major has been suppressed, and the senior captain mounted. I also am intensely disgusted, and consider that I should be relieved of my company.—I am, &c.,

RUNNING MAJOR.

SIR,—Allow me, through your columns, to confirm the unsatisfactory state of things as detailed by "Mud-Major" and "Muddier Major." No position could be more unpleasant than ours is, and I consider that our principal annoyances are entirely caused through the jealousy of colonels, and the bad spirit in which they construe the Queen's Regulations, which the authorities give them the power to do by the loosely-written para. 17, sec. 7, which says that "Majors of Cavalry and Infantry who attain that rank on and after July 1, 1881, will command troops or companies, and will perform all regimental duties as captains, &c." The original intention of this paragraph, I have no doubt, meant the regular duties of captains, such as court-martial Boards and captain of the week, and not the duties which captains are now forced to do by colonels, in common with subalterns, such as orderly officer of the day, marching parties to church or chapel, &c., and which colonels well know are not "captain's duties," according to the spirit of the Queen's Regulations or the custom of the service, until a very recent date. I am theoretically supposed to be commanding at a depôt, but my duties are performed on the same roster with the youngest subaltern. I have no authority over the depôt, except the ordinary command of my company of ten or twenty men, and the subalterns or captain are not even expected to have the courtesy to inform me, when applying for any kind of leave to the colonel. As for the social part of the question, it is amusing to see the compromise which our juniors make between keeping within the letter of the law and showing us their idea of our rank. You are occasionally called "Major," generally when you first know a man; but after a little, when you have probably been asked several times to exchange duties with most of the subalterns, you are called "Smith," and the ice having been broken, the "major" has gone, to return no more, unless, indeed, you pull up the offender when, from the colonel down to the last-joined subaltern, you are looked upon then as the "offender" yourself. As I think it a useless labour to expose a grievance without suggesting a remedy, I now do so, and that is to ask the authorities to cancel that paragraph of the Queen's Regulations which allows commanding officers to degrade our rank as they do; and instead to specify the duties to which majors of July 1, 1881, and subsequently, are liable when serving regimentally.—I am, &c.,

FALSE POSITION.

RELATIVE RANK.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have this moment read in the *Army and Navy Gazette* of June 16 that Warrant officers of the Army have been assigned a superior relative rank to the far older established and well-tried Warrant officers of the sister service. I think I may safely say that I have the whole Navy on my side in protesting against any such arrangement. Warrant rank is the highest which a seaman can attain, and the highest to which he can aspire. That alone should be a sufficient reason for not giving a rank in the Army—which will often be only a stepping-stone to a commission—a higher status than Naval Warrant rank. I know Naval Warrant officers well, and I know their value, and I look upon it as almost tantamount to an insult to the Naval service that such a General Order should be promulgated. If it has been done with the consent of the Admiralty, all I have to say is, "the sooner we get a more capable Board to administer Naval matters, the better." I trust this slight will be removed from the Navy.—I am, &c.,

NAVAL ESPRIT DE CORPS.

[Most unfortunately, "Naval esprit de corps" has been found to be at best but "a rope of sand" whenever any strain has been put upon it, and that is the reason why the authorities care so little about wounding the feelings of those who serve their country so loyally in the Navy.—ED. *A. & N. G.*]

THE ALDERSHOT ATHLETIC MEETING.

This meeting took place on Wednesday and Thursday, and thanks to the careful management of Lieut.-Col. Cleather, D.A.Q.M.G., was an undoubted success. In the tug-of-war, the Royal Horse Artillery pulled over the 84th Regt.; the Royal Marine Artillery pulled over the Royal Artillery, Aldershot; the 85th Light Infantry pulled over the Plymouth Division, R.M.L.I. Final: Royal Horse Artillery pulled over the 85th; Royal Marine Artillery pulled over the Royal Horse Artillery, and won. In the 100 yards' flat race for officers, Lieut. Bolton, 62nd, came in first, and Lieut. Woodyatt, 39th, second. In the ¼-mile flat race for officers, Lieut. Bolton, 62nd, again took first place, with Lieut. Woodyatt, 39th, second. In the 1-mile flat race for officers, Lieut. Molony, 19th, took first place, and Lieut. the Hon. E. B. L. Stopford, 87th, second. In the mounted competition, sword *v.* sword, Troop Serjt.-Major Short, 4th Hussars, came in first, and Serjt.-Instructor in Fencing Maxted, 15th Hussars, second. In the 120 yards' hurdle-race for officers, Lieut. Carruthers, 11th, came in first, with Lieut. Bolton, 62nd, second. In the 100 yards' flat race for officers of over 20 years' service, Qrmr. Keeble, 31st, ran first, and Major Savile, 18th, second. The polo race was won by Lieut. Wogan-Browne's, 3rd Hussars, Gladys. The mounted competition for officers was won by Rdgmr. Stevens, R.A. In tent-pegging for officers, Major West, R.A., took the honours; and in the same competition for non-commissioned officers, Lance-Corpl. Earson, Military Mounted Police, came in first, and Corpl. Longsborough, Riding Establishment, R.A., second. The lemon-cutting competition for officers was won by Major West, R.A. Lady Lysons presented the prizes at the close of the meeting.

The *Daily News* says there is no foundation for the statement that the Duke of Cambridge has resigned, or is about to resign, the office of Commander-in-Chief.

Mr. W. Harding writes from Upcott House:—"Having seen in your issue of the 23rd inst. a list of some of the surviving officers who were present at the battle of Waterloo, fought June 18, 1815, some of whom 'still draw pensions from the war funds,' and as 'W. Harding, 5th Foot,' is mentioned as appearing in *Hart*, I think it right to observe that I was not at the battle of Waterloo. This mistake may have arisen from my brother, R. Harding, Royal Horse Artillery, having been present on that memorable occasion, and I am still in possession of his medal. He died some years since, and I may further observe that I never received any Government pension in my life."

Mr. E. J. Physick, sculptor, has this week completed the erection of the memorial to the late Com. Wyatt Rawson, R.N., who fell at the battle of Tel-el-Kebir, in the Garrison Church, Portsmouth. The memorial has been raised as a token of affection and esteem by Lord Wolseley and the members of his personal Staff.

A large number of unarmoured ships, condemned as of no further use as ships-of-war, are about to be removed from the list of the Royal Navy. The Galatea, the frigate at one time commanded by H.R.H. the Duke of Edinburgh, is being broken up at Chatham; the Royal Albert, the Carnatic, the Hunter, the Salamander, the Ringdove, the Thrasher, and the Spiteful, are to be sold out of the service.

"A Retired Officer" writes:—"I shall be glad if you will bring to the notice of the authorities the marked injustice which is shown to Purchase ensigns at present in her Majesty's service when Purchase was done away with in the Army in 1871. These ensigns, who had passed the qualifying examination, but still were called upon to purchase their ensigncies for £450, were then serving (the number was not large), but as the rank of ensign was done away with they were given the rank of lieutenants to put them on a footing with the non-purchase lieutenants then joining the service. Well, in justice, these young officers should have received back their purchase-money, as they derived no benefit from it, and received the same pay as the non-purchase officer; but no, their £450 was kept by the Government, for which sum they receive no interest or no benefit whatever; if they die or are killed in action, their parents or family receive nothing. It would take a very small sum to clear off these officers' claims, and would be an act of justice to the service. If you will give this letter a place in your valuable journal, you will oblige an old officer who served in the good old days of purchase and long service in the ranks, and passed through hard service and sickly seasons."

Some experiments recently made in Portchester Creek demonstrated, somewhat to the surprise of most Naval men, that a steam-launch or pinnace will suffer no ill-effects to her machinery from the shock of the explosion of 250 lb. of gun-cotton, at a lateral distance of 50 feet from the boat's side, and submerged 30 feet. Perhaps the comparatively small weight of such a craft may account in some measure for her immunity from injury.

"Extra First" writes from India:—"With reference to the last long-needed General Order on this subject, it is curious that the reforms therein contained follow almost in their sequence the suggestions given in a lengthy communication which appeared in your columns of Aug. 13, 1881. But whilst abolishing musketry instructors, and thus giving the immediate instruction of the men to the captain of a company, out of whose hands it was before taken, simply because an officer was proficient in the preparation of most elaborate returns, would it not be an appropriate sequel to abolish, as regards officers in European regiments serving in India, the compulsory examination in Hindustani required before they can fill a musketry Staff appointment? This qualification can never add one point to the average shooting of a brigade, and officers are excluded from holding these appointments who have made musketry a speciality, and who take a keen interest in this important branch of a soldier's training."

The Army.

6th Dragoons. A correspondent writes from Pietermaritzburg:—"There was a rumour that the Imperial Government had made a grant of money for the purpose of erecting married quarters for the 1st Batn. Welsh Regt. and 6th Dragoons. We have waited day after day, week after week, and month after month, and no site has been selected for the purpose and no material collected. And now another rumour has taken its place, to the effect that the Imperial Government had suddenly recalled the grant of money. Why are the married men of these gallant regiments to be punished more than other regiments in H.M.'s service? Have they done anything wrong, that they should be separated from their wives and little ones, for over two years? Are the Government awaiting for another outbreak? If such is the case, why do they not let us have it at once, and be done with it, for this suspense is even worse than death? We have been kept alive by the hope that we should soon see our dear children and wives. But we have hoped, till hope is dead; and those who have been good soldiers have become disgusted with the service. They know the first duty of a soldier is obedience, but are disgusted with the reward obedience brings, viz., 'punishment.'"

11th Hussars. Mr. C. H. Currey, late of the regiment, died at Lismore Castle, Ireland, on the 16th inst., aged 36 years.

15th Hussars. The death has been reported of Major J. Mann, who was for many years Adjt. He joined the ranks in 1857, and retired on a half-pay captaincy in August, 1876.

18th Hussars. The regiment will proceed shortly to the Curragh. Lieut. Miles is about to retire.

19th Hussars. Lieut.-Col. Coghill, C.B., has arrived home from Egypt on sick leave.

20th Hussars. Capt. and Adjt. Courtenay is suffering from an attack of scarlet-fever. This officer volunteered for service in Zululand, and was shut up in Ekowe till the garrison was relieved. Capt. Irwin has succeed Capt. Hernam, 18th Hussars, as Superintendent of Gymnasia at Canterbury.

ROYAL ARTILLERY.

Gen. Sir Edward Sabine, K.C.B., Colonel Commandant, has died at Richmond, at the advanced age of 94 years. He was born Oct. 14, 1788, his father being a member of an ancient Italian family which settled long since in England. At the age of 15 Edward Sabine became 2nd lieutenant in the Royal Artillery, and 11 years later, as captain in that service, he took part in the second war with the United States, commanding the batteries at the siege of Fort Erie, on the Niagara frontier. He first became known as a skilful student of physical science, and a careful and accurate observer, through the part which he took in the explorations conducted by Ross and Parry in the Arctic Seas in 1818 and 1819. It was through these voyages that the attention of the scientific world was first properly directed to the importance of a systematic observation, in many widely-separated regions, of the peculiar phenomena of magnetic action. He accordingly undertook in 1821 a series of voyages over regions extending from the polar circle to the equator, accumulating a vast array of facts not only regarding terrestrial magnetism, but also with respect to the oscillation of the pendulum in different latitudes. The results of these researches were published in 1825, and they at once brought him into a prominent position in the scientific world. He was elected in 1827 secretary of the Royal Society, and discharged the duties of that office until 1830, when he was sent on military service to Ireland. He was one of the earliest members of the British Association for the Advancement of Science, and at the meeting held in 1852 at Belfast he was its president. In 1836, 1837, and 1838 Gen. Sabine published some valuable reports on magnetic forces. In 1848, Herr Schwabe, of Dessau, announced, to the surprise of the astronomical world, that the spots on the sun wax and wane in frequency in a period of about ten and a half years. Shortly after the publication of this discovery, Gen. Sabine conceived as the result of his researches that the magnetic variations on the earth were intimately associated with the disturbances which take place in the solar atmosphere. The idea was at first scouted, even Humboldt openly ridiculing it; but a careful examination of the two series of changes sufficed to prove that the association suggested by Gen. Sabine actually exists. While thus studying annual variations, Gen. Sabine detected a monthly variation, and he was able before long to announce confidently that the moon, minute as she is, and relatively insignificant in the solar system, yet exerts magnetic influences on the earth which can be estimated and measured in our observatories. Gen. Sabine was elected President of the Royal Society in 1861, and held this office until the autumn of 1870, when ill-health compelled him to resign it. He was created a Knight Commander of the Bath in 1869, in recognition of his scientific discoveries. He married, in 1826, Elizabeth Juliana, daughter of Mr. W. Leeves. She died in 1879. He has left no issue.

Major-Gen. H. P. Christie, Col. on the Retired Full-Pay List, died at Cheltenham on the 23rd inst., aged 66 years. The deceased joined the Army Dec. 18, 1835; became lieut., June 11, 1838; capt., April 1, 1846; lieut.-col., June 14, 1856; col., June 14, 1861; and retired with the hon. rank of major-gen., July 6, 1867.

Capt. H. W. Ind goes up for the entrance examination to the Staff College.

Lieut. W. E. Brereton, 4th Brig., has applied to resign his commission.

ROYAL ENGINEERS.

The *Bombay Gazette* says:—"The case of Major Firebrace, R.E., recently discussed in the House of Commons, has considerable interest for Indian officers. Major Firebrace, who is Under-Secretary of the Railway Branch of the P.W.D., is now at home on furlough. Instead of taking his furlough as a holiday, he has accepted the post of secretary to an Indian railway, and the question Mr. Carbutt put was whether an Indian officer at home on furlough should accept employment from a private company, the more particularly when, as in the present case, the interests of that company might clash with those of the Government whose servant the officer was. Mr. Cross, in reply, stated that in this particular case Major Firebrace was acting with the concurrence of the Government of India, and that, as a general rule, there was no objection to Indian officers, whether in civil or military employment, utilising their furlough by taking employment with private companies. This decision seems to settle what has long been a moot point amongst military men. It has been generally supposed that an officer on full pay was not at liberty to publicly take employment as secretary, or in any other capacity, to a trading company. Suppose, for instance, an officer on furlough were to appear in the London advertisements as 'Col. Blank, Secretary to the Bottled Porter Company,' or other mercantile association, would the Secretary of State for India approve? Possibly not, but the principle is the same in both cases, and we should not be surprised if the decision we have quoted led to results not altogether contemplated."

Scots Guards. The *Times* has the following obituary of Gen. Sir William Knollys, K.C.B., Colonel of the regiment, and Gentleman Usher of the Black Rod, who died at his official residence in the House of Lords on Saturday afternoon shortly after 1 o'clock. Sir William was born on Aug. 1, 1797. He was the eldest son of the late Gen. William Knollys, who for many years held the title of Earl of Banbury, and in his early youth Sir William bore the title of Viscount Wallingford. He was educated at Harrow, and commenced his military career as a cadet at the Royal Military College, Sandhurst. It was while he was undergoing his education there that the Committee of Privileges of the House of Lords, having decided against his father's claim to the title of Earl of Banbury, Sir William had to drop that which he had hitherto borne. The order-book of Sandhurst College contains the following note:—"Gentleman Cadet Viscount Wallingford will henceforth be designated as Gentleman Cadet Knollys;" and it was from the reading of this order on parade that Sir William first learnt that the House of Lords had decided against his father's claim to the title and estates of the earldom of Banbury. Sir William joined his father's old regiment, the Scots Fusilier Guards, and at once proceeded in company with a draft to the head-quarters of the regiment, then serving in Spain. Among those who accompanied him was Ensign Forster (late Gen. and Military Secretary at head-quarters), whose life was despaired of on the route from a supposed fatal swelling of the knee. During the peace which followed immediately after the sortie of Bayonne, he returned to England with his battalion, which, though not sent to take part in the Waterloo campaign, was despatched to Paris to reinforce the army of occupation there. On returning to England, he became adjutant of his battalion, which he subsequently commanded. In 1854, he was made Governor of Guernsey, and in 1855 he was appointed to the command of the division then forming at Aldershot, and under his supervision the camp there was organised. From April, 1861, to July, 1862, he was Vice-President of the Council of Military Education, and he resigned that appointment to enter the service of the Prince of Wales as his treasurer and controller of the household. In 1877 he received the appointment of Gentleman Usher of the Black Rod, and he became Groom of the Stole of the Prince of Wales. A few days before he died he was gazetted, in succession to the late Lord Rokeby, Colonel of the Scots Guards, the regiment in which his father had served, and which he himself had entered 70 years before. The honour thus conferred upon him he highly appreciated, and, when it was offered to him, he is reported to have declared that he preferred it to the peerage which as a youth he had lost. The funeral took place in the new ground at Highgate Cemetery on Thursday. Among those present were H.R.H. the Prince of Wales, Lord Colville, Sir John St. Aubyn, M.P., Lieut.-Col. Knollys (eldest son of deceased), Mr. F. Knollys, C.B., Mr. Cyprian Knollys, Major Knollys, and Mr. Frederick Knollys. The funeral service was performed by the Rev. Canon Knollys, rector of Wrotham, Kent, and brother of the deceased. The Queen and the Princess of Wales sent some beautiful wreaths.

5th Northumberland Fusiliers. The *Pioneer* says:—"Lieut.-Col. FitzRoy, 5th Fusiliers, now on leave to England, is not expected to return to this country; but should he not get posted to the 1st Batn., he, in all probability, will leave the service. The old 5th Fusiliers are, as regards promotion, the most unlucky corps in the Army. Col. FitzRoy is senior major, having held that rank since Jan., 1880; he, however, was a captain for 22 years out of nearly 29 years' service. He has also one year's service to count for Lucknow. Under present circumstances, Col. FitzRoy will not obtain his regimental lieutenant-colonelcy before May, 1885, when Col. Rowland completes his five years in command. Col. FitzRoy was in command at the fort at Allahabad when the Prince of Wales visited it, by whom he was condoned with for having had such ill-luck."

9th Norfolk Regiment. By late accounts from head-quarters, Morar, the 2nd Batn. was pulling through the hot season. The departure of Col. Daunt, C.B., for England, after an uninterrupted service of over 35 years in the 9th, was regretted by every individual in the battalion, and he is the last of the real old "Holy Boys,"—"ne'er shall we look upon his like again!" It is expected that Col. Daunt will be appointed to the command of the Yarmouth Brigade Depôt at an early date. We understand that Lieut. Percy, 2nd Batn., has been appointed acting D.A.Q.M.G. of the Gwalior command. Major W. B. Drinan, late of the regiment, died at Obel Street, S.W., on the 21st inst.

15th East Yorkshire Regiment. A handsome tablet has been placed in Beverley Minster by the officers, non-commissioned officers, and men, in memory of their comrades who fell during the late campaign in Afghanistan.

25th King's Own Borderers. Capt. C. H. Layard, late of the regiment, died in London on the 25th inst., aged 45 years.

29th Worcestershire Regiment. Capt. Atkinson has been appointed adjt. of the Bombay Rifle Volunteers.

35th Royal Sussex Regiment. Lieut. Burnett arrived home from Malta on Monday in H.M.S. Himalaya.

38th South Staffordshire Regiment. The recent restoration, by the Earl of Dartmouth, of the colours of the regiment, which were carried through the Peninsula Campaign, and were replaced on Feb. 13, 1839, by those now borne by it, which will soon be replaced, has suggested the idea of a meeting of all officers who have served in, or are now serving in, the regiment (and who may happen to be at home), to discuss the subject of placing these two sets of old colours in the cathedral of the county at Lichfield, with the permission of the dean and chapter; and also a memorial of the officers, non-commissioned officers, and men of the regiment who were killed in action, or have died of wounds or from other causes, on active service, during the periods of the Crimean Campaign, the Indian Mutiny Campaign, and the recent Egyptian Campaign. The subjects proposed to be discussed are:—1. Form of memorial. 2. Nomination of a committee to carry out the wishes of the meeting. The Committee of the Royal United Service Institution have kindly granted permission for the meeting to be held in their theatre on Tuesday, July 3, at 12 o'clock noon. All old officers are earnestly requested to attend, or, if unable to do so, to express their views on the proposed subjects to Lieut.-Col. P. H. Eyre, United Service Club, Pall Mall, S.W., who will gladly receive them, and make them known to the meeting. Lieut. Heath arrived home from Malta on Monday in H.M.S. Himalaya.

41st Welsh Regiment. See 6th Dragoons.

46th Duke of Cornwall's Light Infantry. Major Disney-Roebuck arrived home from Egypt on Monday in H.M.S. Himalaya.

51st King's Own Light Infantry. Col. Ball-Acton, C.B., is *en route* to Bareilly, to resume command. Lieut. Row is a candidate for the Indian S.C., and has been appointed to the 44th Bengal N.I., on probation.

54th Dorsetshire Regiment. Lieut. Gordon is a candidate for the Indian S.C., and has been appointed to the 29th Bengal N.I., on probation.

67th Hampshire Regiment will, it is understood, proceed from Cannanore to Burmah next cold season.

73rd Black Watch (Royal Highlanders). Capt. Gunter has been granted an extension of his period of Staff service as garrison-instructor in India for two years.

75th Gordon Highlanders. Lieuts. Jennings-Bramly, Denne, and Millner-Wallnutt arrived home from Egypt on Monday in H.M.S. Himalaya.

77th Middlesex Regiment. Lieut.-Col. Gatacre has rejoined his battalion at Rangoon. The regiment will probably proceed from Rangoon to Secunderabad before the hot weather of 1884, as it will have completed its three years' service in Burmah about next February.

81st Loyal North Lancashire. Major Batts, late of the regiment, died at Wortham Hall on the 23rd inst.

Rifle Brigade. The *Pioneer* says:—"Lieut.-Col. Lane, of the Rifle Brigade, who has been appointed Assistant Military Secretary to Lord A. Russell, who takes over command of the troops in Canada on the 24th inst., belongs to the battalion at present serving at Ferozepore; he will in due course be seconded, but the step will not go to one of the captains, his substantive rank being major, as Major Brownrigg, on the 1st prox., will revert on completion of his five years' tenure, and in all probability will be posted to this battalion, which was the one he left for Staff employ in 1878. Lieut.-Col. Lane served in the Zulu Campaign, for which he got a brevet majority, and for the Egyptian Expedition he received a brevet lieutenant-colonelcy and numerous decorations. Considering he only entered the service in 1867, he may be considered exceedingly lucky."

Medical Department. The death is announced as having occurred at Tenby, South Wales, of Inspector-Gen. S. Paynter, C.B., on the Half-pay List, and formerly of the Prince Consort's Own Rifle Brigade and the 13th Light Dragoons. Dr. Paynter served with the Rifle Brigade in the Kaffir War of 1846, being awarded a medal. He served also throughout the Crimean War, and acted as first-class staff surgeon in the 3rd and 4th Divisions during the siege and at the fall of Sebastopol. For his services in the campaign he was awarded a medal with four clasps, 5th Class of the Medjidie, and Turkish medal. He was nominated a Companion of the Order of the Bath on May 20, 1871.

Pay Department. During the current month, three paymasters, having completed five years' service in that grade, have been promoted to the honorary rank of major in the Army. They are Major C. F. Carey, from June 3, 22 years' service, formerly served in the 54th Regt.; Major B. K. Whiteford, from June 11, 24 years' service, formerly of the 20th Regt.; and Major T. Bell, June 22, late of the 1st West India Regt., and prior to that he served with the 14th Regt. in the Crimea, and in the Ashanti War of 1873-4 (medal with clasp).

Veterinary Department. First-class Vet.-Surg. R. Poyser has been appointed to officiate as Inspecting Vet.-Surg. of the 2nd Circle in the Bengal Presidency, in succession to Inspecting Vet.-Surg. E. Batt, who has proceeded to England on two years' furlough.

The Auxiliary Forces.

MILITIA.

Scottish Division, Royal Artillery. We are asked to publish the remarks of Col. Hope Johnstone, R.A., at the recent inspection:—"They had now come," he said, "to the end of their annual training and inspection, and therefore he wished to express to them his opinion regarding their behaviour and condition. As they all knew, he was at Easter Road yesterday (Thursday), from eleven o'clock till about half-past five o'clock in the afternoon. Their turn-out and training in marching order were very creditable indeed. As regards their arms, they were in excellent condition. He examined the arms of every man, and out of 400 odd he did not think there were two that he could legitimately find fault with. On Thursday afternoon, he inspected them in repository drill, gun drill, and machine drill. He tested as far as he possibly could the knowledge of each man, and he found there was hardly a single mistake in any case. What he wished to notice particularly was their great improvement this year in artillery work, which was their legitimate work. That, he considered, was greatly owing to their commanding officer, and to the fact of their having most of their time devoted to artillery work. It is all very well marching past and so on, but they must remember they were garrison artillery now, and what was required of them was skill in the service of the gun and in the mounting and dismounting of the same. The marching past of the regiment that day was excellent. Honestly and truly he thought it would have been a credit to any brigade of artillery. The manual and battalion drill was also very good. He had extreme pleasure in congratulating Col. Carter on the conduct of the whole brigade; it was very much better than last year. On Thursday he went over the defaulters' book of each battery, and he assured them it was with great trouble that he could find any entry bearing the date of 1883. The commanding officer had told him that there had only been one civil conviction."

Royal Irish Fusiliers. The sports of the 3rd Batn. (Armagh Militia) came off at Armagh on Saturday last. The weather was beautifully fine, and the ground was in capital order. Three large tents were erected on the grounds. The committee consisted of Lieut.-Col. Simpson, Capts. Lemon and Synnot, Lieut. Nicholson, and Qrmr. Druin. The judges were Capt. Lemon and Lieut. Segrave, and the starters were Capt. Synnot and Lieut. Bulfin. The most amusing event of the day was the donkey race, open to officers only, for a prize given by Lieut.-Col. Simpson. The mishaps from beginning to end of the course were numerous, but eventually Lieut. Kaye, who rode Edgar's Smasher, won, Lieut. Nicholson a good second, and the others nowhere. The prizes were distributed by Miss Stanley, assisted by Mrs. Cuming.

The next military competitive examination of lieutenants of Militia for commissions in the Line will be held on Sept. 19 and 20. Forty vacancies will be offered for competition.

The under-mentioned regiments will be dismissed, after training, to-day:—2nd Brig. Cinque Ports Division (Kent Artillery), at Dover; 2nd Brig. Scottish Division (Haddington, &c., Artillery), at Dunbar; 3rd Batn. Gordon Highlanders, at Aberdeen; 7th Batn. King's Royal Rifle Corps, at Barnet; 5th Batn. Rifle Brigade, at Victoria Park; 5th Royal Fusiliers, at Hounslow; 3rd and 4th Batns. Royal Sussex, at Chichester; and 3rd Warwickshire, at Warwick.

YEOMANRY CAVALRY.

Royal Staffordshire. Regimental Orders by Col. W. Bromley-Davenport:—Head-quarters, Lichfield, June 21, 1883.—I. The following Memorandum by Col. Lord Ralph D. Kerr, C.B., Inspector of Auxiliary Cavalry, Northern District, is published for information:—The officer commanding Queen's Own Royal Staffordshire Yeomanry.—I cannot take leave of the Queen's Own Royal Staffordshire Yeomanry without expressing to Col. Bromley-Davenport, officers, and yeomen, the very great pleasure I have felt in making the acquaintance of so fine a regiment. To mention the points which I noticed with special satisfaction during my short visit:—1. The good and zealous spirit which, notwithstanding bad times, has induced so large a number of men to join the corps as recruits, a number far exceeding that of any other regiment I have visited. 2. The very superior quality of the horses, and the trouble taken to bring a thoroughly serviceable class of horse to the training. 3. The praiseworthy manner in which the saddlery is kept and fitted on the horses. 4. The manner in which the drill was performed, especially in the following points: Smartness in mounting and dismounting; attention in the ranks and absence of talking on parade, and the smartness of pace with which the manœuvres were generally executed. I was also much pleased at the turn-out of the regiment on foot parade, and the manner in which the marching and the sword and carbine exercises were carried out. The increasing interest which is yearly shown by the attendance at rifle-practice is worthy of much commendation, as is also the desire evinced by the yeomen to qualify themselves for promotion to the higher grades as non-commissioned officers. I wish to call the attention of the men to one point which mars the general smartness of their appearance in billets, viz., the practice which I noticed in some cases of appearing in the streets in mixed uniform, *i.e.*, wearing great-coats not of a regimental pattern. I trust that in future great attention will be paid in this respect to soldierly bearing in quarters as well as in the field. I must congratulate both officers and men on the manner in which the Queen's Own Royal Staffordshire Yeomanry have maintained the high character they have always held, and on the steady advance which they are making in military progress. I look forward with pleasure in renewing my acquaintance with the Queen's Own Royal Staffordshire Yeomanry under more favourable circumstances as to weather next year.—(Signed,) R. D. Kerr, Col., Inspector of Auxiliary Cavalry, Lichfield, June 16, 1883. II. Col. Bromley-Davenport, in commenting on the remarks of the Inspecting Officer, wishes to congratulate the regiment on the high praise which they contain. This result could not have been obtained if officers and men of all ranks had not given thorough attention and hard work to their troop drills before assembly at Lichfield, where their behaviour in the field, silence in the ranks, orderly conduct in quarters, and soldier-like appearance, both mounted and dismounted, gave Col. Davenport the greatest satisfaction. The regiment was even better mounted than last year, and the drill was performed, in spite of the disadvantage of many new formations being required and a large number of recruits in the ranks, with a steadiness which Col. Davenport cannot regard without surprise, when he considers that three days is practically all the time at his disposal to prepare the regiment for the inspection of the reviewing officer. Col. Davenport has no doubt that officers and men, while dwelling with satisfaction on the highly gratifying expressions of praise contained in Lord R. D. Kerr's memorandum, will also duly mark and bear in mind that point where he considers improvement to be necessary, and that next year even this cause of very modified censure will be removed. Col. Davenport is extremely pleased at the large number of recruits who have joined since last training, and at the manner in which they have acquitted themselves in their first permanent duty service. He hopes, as he believes, that this accession to the regiment of young, active, and intelligent men will continue in the future. He must here state what the regiment knows very well, that the gratifying result of its late assembly at Lichfield is mainly attributable to the untiring zeal and ceaseless energy of the adjutant, Capt. Graves, to whom he here offers his congratulations and thanks, and also to the non-commissioned officers of the permanent staff, who are reported by Capt. Graves to have rendered him the most cheerful and efficient assistance. Col. Davenport deeply regrets that the rain, otherwise so especially grateful to the members of the regiment, should have occurred on the review day, as, although the inspecting officer was fortunately able to obtain a sufficient insight into the capabilities of the regiment on the previous day to justify the praise which he has conferred, Col. Davenport has no doubt that if it had been able to march past and perform its manœuvres on the Heath, as usual, Lord R. D. Kerr's favourable estimate of the regiment, which also would have been communicated from his own lips, instead of through this order, would have been much increased. Col. Davenport wishes to thank every man in the regiment for his behaviour while on permanent duty, and to express his own great pleasure and pride at having the honour to command so fine a body of men. III. The commanding officer is aware that the men were 'standing to' ready to turn out at a moment's notice on June 15, and that, therefore, the regimental capes were on the saddles. Men may, however, obtain a second cape (new) from regimental stores for 16s., and this being permitted, no excuse will be admissible in future for any deviation whatever from dress and equipment of regimental pattern. IV. Troop serjeant-majors will send in, as soon as possible, the names in full of the best shots in their respective troops, who are willing to compete at Wimbledon.—By order, Frank Graves (capt.), Adjt. Queen's Own Royal Yeomanry."

THE VOLUNTEERS.

3rd Middlesex Artillery. Col. Finch, R.A., inspected this fine brigade on the parade-ground of Wellington Barracks on Saturday. Eight hundred and fifteen of all ranks were present, under Lieut.-Col. Lord Truro, and there were two siege batteries on the ground fully horsed and equipped. Col. Finch intimated to Lord Truro that he would be enabled to make a favourable report to the War Office.

1st London Engineers. The camp of instruction at Hendon was the scene of the official inspection of this regiment last Saturday evening, when 574 of all ranks out of 600 were present, under Lieut.-Col. Drew. Col. Hart, V.C., R.E., the inspecting officer, spoke approvingly of the drill, but had to refer to the excessive talking in the ranks and the occasional want of proper attention to orders. We hope that Col. Drew is not sacrificing quality for quantity.

Liverpool Rifle Brigade. Col. H. J. Bell, Warrington District, inspected this battalion at Sefton Park last Saturday. Lieut.-Col. Crosbie was in command, and the number of all ranks on parade was 885. At the close of the drill, Col. Bell expressed his satisfaction with the muster, drill, and smart and soldierly appearance of the regiment.

3rd Manchester Rifles were officially inspected on the Salford Racecourse on Saturday last by Col. Vacher, commanding 20th Regimental District, the parade state showing 916 of all ranks. Col. Vacher at the close of the work spoke approvingly of the turn-out and drill, and said, with respect to the muster, that it carried his memory back to the days of the Crimea. They did not see such battalions in the Line now, and had to look for them in the Volunteer Service.

1st Lincolnshire Rifles. This battalion, nearly 1,000 strong, went into camp last Saturday, and was inspected yesterday.

London Rifle Brigade. The Duke of Cambridge, hon. col., who was accompanied by Gens. Higginson, Elkington, and Dillon, and other officers, inspected the regiment in Hyde Park last Saturday evening. The battalion stood in ten good companies, the field state showing an attendance of 630 of all ranks. Lieut.-Col. Lord E. Pelham Clinton was in command. At the close of the movements, the Duke of Cambridge spoke approvingly of the smart turn-out, but said he thought he had seen the battalion drill better.

3rd London Rifles. Saturday last was a red-letter day in the history of this battalion, which, 1,035 strong, in 12 broad companies of 34 files, under Lieut.-Col. Laurie, was inspected on the Horse Guards' Parade by Field-Marshal Lord Napier of Magdala, honorary colonel. This is, we believe, the largest muster which has been witnessed in the Home District since the early days of the organisation. The parade-ground is too limited for the movements of so large a number of men, but Col. Laurie's fine command overcame the difficulties, and passed a most satisfactory inspection, Lord Napier of Magdala (who was accompanied by Col. Davies, Grenadier Guards), saying at the close that the drill was good; and it was evident that officers and men knew their work. He congratulated Col. Laurie and the officers on having brought the regiment to its present efficient condition, and said he was very proud of being their honorary colonel.

13th Middlesex (Queen's Westminster) Rifles. This excellent battalion was inspected last Saturday evening, in Hyde Park, by Col. Moncrieff, Scots Guards. Under Lieut.-Col. Bushby, the regiment stood in 12 good companies, the total on parade being about 800. The inspecting officer complimented Col. Bushby on the fine turn-out and drill.

14th Middlesex (Inns of Court) Rifles. Major-Gen. Higginson, C.B., inspected the battalion last Saturday, on the Horse Guards' Parade, where Gen. Sir M. M. Munro (hon. colonel), Col. Sir W. Humphrey, Mr. Justice Keating, and a large gathering of the Bench and Bar were assembled. Lieut.-Col. Bulwer's command is not a large one—barely 300 officers and men were on parade—but there could be no question about the quality, and the drill was in all respects excellent.

15th Middlesex (Customs and Docks) Rifles. Col. Smith, Grenadier Guards, inspected the battalion last Saturday in Battersea, when 669 of all ranks were on parade, as against 793 last year. Lieut.-Col. Kennard was in command. At the close of a long and searching inspection, the inspecting officer said the results were very gratifying to him, and he would be enabled to make a favourable report.

19th Middlesex (Bloomsbury) Rifles. Col. Smith Richards had the gratification of seeing his smart battalion through another successful official inspection on Saturday last, when 887 of all ranks were on parade in the grounds of the Foundling Hospital, as against 875 last year. The present strength of the battalion is 960. Col. Fitzroy, Coldstream Guards, was the inspecting officer.

1st West York Rifles. The battalion, under the command of Lieut.-Col. Yorke, commenced its eight days' encampment at Redcar last Saturday.

3rd West York Rifles. This battalion, under Lieut.-Col. Hirst, C.B., returned to Bradford last Saturday after a week's encampment at Harrogate. Before leaving it was inspected by Col. Chichester, C.B.

2nd Volunteer Battalion, Yorkshire Regiment, went into camp on Ripon Racecourse last Saturday, Lieut.-Col. Sir W. C. Horsley is in command. The battalion was inspected yesterday and returns home to-day.

The following regiments in the Home District are ordered for inspection to-night:—12th Middlesex (Civil Service) and 25th Middlesex (Bank of England) Rifles in camp in the Old Deer Park, Richmond; 2nd Volunteer Battalion, Royal Fusiliers, Hyde Park; 22nd Middlesex (Central London Rangers), Hyde Park; St. George's Rifles, Hyde Park; 4th Volunteer Battalion, Queen's Royal West Surrey, Lambeth Palace grounds; and Tower Hamlets Rifle Brigade, Hyde Park. Col. Hart, V.C., R.E., will hold a brigade drill in Regent's Park of the 1st Middlesex, 1st London, and East London Engineers.

H.R.H. the Duke of Cambridge, K.G., presided at the Staff College annual dinner at the Freemasons' Tavern on the 21st inst. The guests on the occasion were Gen. Lord Wolseley, G.C.B. (Adjutant-General); Lieut.-Gens. Sir R. C. H. Taylor, K.C.B., Sir C. P. B. Walker, K.C.B. (Director-General of Military Education), Sir A. J. Herbert, K.C.B. (Quartermaster-General), and Sir E. A. Whitmore, K.C.B., Military Secretary. The Staff College officers present were Gens. F. W. George and W. C. E. Napier; Lieut.-Gens. J. W. D'Oyly, J. A. Ewart, C.B., and Sir P. L. MacDougall, K.C.M.G.; Major-Gens. Hon. W. Feilding and Creagh Osborne, C.B. (Commandant Staff College); Cols. G. D. Barker, R. B. Hollinshead-Blundell, E. H. Clive, C. J. East, Colville Frankland, W. H. Goodenough, C.B., T. E. A. Hall, R. Harrison, C.B., C.M.G., F. D. Middleton, C.B., Hon. G. P. H. Villiers, and S. W. F. M. Wilson; Lieut.-Cols. G. G. Beazley, J. C. Fife-Cookson, H. D'O. Farrington, C. Grove, R. H. O'Grady Haly, H. Helsham Jones, E. J. Lugard, R. J. Maxwell, W. C. F. Molyneux, C. W. Murray, and C. E. Webber; Majors R. E. Allen, Hon. F. Eliot, L. H. Gregson, E. Gunter, A. C. Hamilton, T. P. Hughes, E. T. H. Hutton, W. C. James, M. N. G. Kane, H. M. Moorsom, L. M. Carmichael, S. E. Orr, S. C. Pratt, J. S. Rothwell, F. S. Tidy, and H. G. Miles; Capts. C. F. C. Beresford, G. H. Bullock, E. J. Courtenay, H. D. Dunlop, R. F. Johnson, G. McDonald, N. L. Walford, J. C. Barker, and H. H. Crookenden; Lieuts. F. W. Bromfield, A. E. Codrington, and H. de H. Haig. In addition to the usual toasts, the Duke of Cambridge proposed that of the General who had lately returned victorious from Egypt, Lord Wolseley. He was sure that all welcomed his safe return. Gen. Lord Wolseley briefly replied.

The Bombay reliefs are not yet announced, but it is believed that they will include the following changes:—16th Native Infantry, from Poona to Baroda; 26th, Baroda to Quetta; and 28th, Sattara to Poona. The 22nd move from Aden, and it is rumoured that the 4th will probably take their place.

The annual fête of the students of the Royal Military Asylum (Duke of York's School) will take place in the grounds at Chelsea on Thursday next, commencing at 1 o'clock. H.R.H. the Field-Marshal Commanding-in-Chief will inspect the school on the previous day at 11 o'clock.

A correspondent writes:—"In your number of the 23rd inst., you gave a list of the supposed survivors of the Duke of Wellington's Army who participated in the battle of Waterloo on June 18, 68 years ago. Will you kindly allow me to ask you to add to that list another name, that of Jeffrey Samuel Prendergast, Esq., at present residing at Melville, Blackrock, county Dublin. This gentleman was gazetted in February, 1814, to the 2nd Batn. '3rd Foot Guards' of that day. He was present with his battalion of Guards at the battle of Waterloo, and was granted the 'Waterloo medal,' which proud decoration he has now in his possession. He retired from the Brigade of Guards on June 25, 1825, as lieutenant and captain. Capt. Prendergast was junior in the brigade to the late Sir William Knollys, who died last week, and senior to the late Lord Rokeby, both old brother-officers of his. Capt. Prendergast, although of a very advanced age, is in the enjoyment of good health, and until recently lived in the county Tipperary, in which county he at one time possessed a large estate, which he fortunately sold prior to the recent agitation."

VIRGOE, MIDDLETON, and CO.'S
[Patent No. 6,491, January 12, 1882.]
SIDE TAB COLLARS.

The SIDE TABS (Patented January, 1882) far surpass in utility and comfort all imitations recently introduced under other names. Being attached to the Collars, they allow sufficient space for cravat to pass under, and to be easily adjusted; yet they are invisible when waistcoat is on, and never ride over it.

See that the words "SIDE TABS" are printed inside Collars, as no others are genuine.

CAN BE OBTAINED OF ALL HOSIERS.
WHOLESALE ONLY of VIRGOE, MIDDLETON, & CO., LONDON.

SCHWEITZER'S COCOATINA
ANTI-DYSPEPTIC COCOA OR CHOCOLATE POWDER.
Guaranteed Pure Soluble Cocoa, without Sugar, Spice, or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper, a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "the most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and young Children. Samples per post.

Highly commended by the entire Medical Press.
Adopted as a Medical Comfort in H.M.'s Royal Navy.
In air-tight canisters at 1s 6d, 3s, 5s 6d, &c., by Chemists and Grocers.

NOTICES TO CORRESPONDENTS.

A SOLDIER'S FRIEND.—1. The application should be made to the commanding officer. 2. All depends upon circumstances.

Friday night's *Gazette* contains a list of Unclaimed Soldiers' Balances.

Several Naval and Military letters are in type, but are forced to stand over through want of space.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenschaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.
LONDON, SATURDAY, JUNE 30, 1883.

THERE has existed for some time past a widespread feeling of dissatisfaction not only in the Army, but among a large section of the public who take an interest in service matters, at the extent to which the cramming system is being carried. A young man, now-a-days, in order to secure a commission in the Army, has to set aside those pursuits which would best fit him for the profession to which he aspires, and to lay himself out for becoming a veritable bookworm. Unless he does this, there is no hope for him. And even after he has joined the service, the cramming must still go on. He may be ever so good a soldier, but unless he can scrape through successive examinations, each comprising a number of catch questions, there is no future before him. "The whole character of the service has undergone a change since the abolition of Purchase," we heard a War Office official contend a short time since. Indeed it has, and we confess that we do not think that the change has been for the better; so far at least as the system of promotion of officers is concerned. Whatever the arguments were against Purchase, under its baneful influences, as they were by some considered, the British Army was able to command the services of officers who invariably led their men to glory. The system was understood, and so long as it was in vogue, every young man gazetted to a commission knew pretty well what prospect he had of rising in his profession. If he was the happy possessor of money, he had a fair field before him; if he was a poor man, he only had to wait long enough, and, without spending anything himself, he was able to retire with a lump-sum sufficient to start him fairly in civil life. When Purchase was abolished, we were led to suppose that officers would be made happy and contented. But how does the new system work in practice? The *Gazette* of Tuesday last furnishes an example. In the 60th Rifles, Captain M. C. Boyle has been promoted to a majority. Major Boyle stood sixteenth on the list of Captains of his regiment. He has, consequently, made a jump over the heads of fifteen seniors. Thus we have all the evils of Purchase reintroduced, in an aggravated form. The case of Major Boyle must naturally create doubts in the minds of unprejudiced persons as to whether selection is, after all, an unmixed blessing. Here is a man who has been favoured, at the expense of fifteen of his brother-officers! He has been promoted because he has succeeded in passing the entrance examination to the Staff College. But what can be the feelings of the fifteen unfortunate seniors who have seen him suddenly pitchforked over their heads? The officers whom he has superseded, it may be presumed, have not qualified for promotion. We would like to know how many of them have been warned of their impending fate; and if they were made aware of the decision of the authorities, it would be satisfactory to know what opportunities were afforded them of qualifying. It seems to us that the new system opens the door to all manner of favouritism. It is alike an injustice to the officers of the Army and an injustice to the State. It does not necessarily follow that because a man is able to pass an examination which is purely theoretical, that that man is necessarily more fitted to command than one who has been unable to go through the ordeal to the satisfaction of his superiors. The superseded in this case may have laboured under disadvantages. They may have been on active or foreign service. They may have been most desirous of doing all that was expected of them, but the nature of their duties may have prevented them. Have any allowances been made? We cannot bring ourselves to believe that these fifteen officers could not have passed the ordeal, had time and opportunity been given them of doing so. If they could not, all we can say is that the Army, under the altered conditions of service, is in a more unsatisfactory state than we had anticipated. The subject is one that calls for serious consideration. If things are allowed to go on as they stand at present, if the case of Major Boyle is to be regarded as a precedent, parents will soon be induced to think twice ere they put their sons into a profession which is, to say the least of it, disappointing. The authorities have, no doubt, acted in perfectly good-faith. Yet, we cannot disguise the fact that to the Army at large the promotion announced in Tuesday's *Gazette* has created an uncomfortable impression that undue favour has been shown. There is no worse soldier, as a rule, than the theoretical Staff College man, the man who, like poor Captain Carey, of Zulu notoriety, is taught at the Staff College to do certain things under certain circumstances, and does them. These, however, are the men who are being encouraged now-a-days. In Captain Carey's case we always took the officer's part. We did so because we blamed the system under which the officer had been educated, not the man, who had proved himself to be a most gallant soldier on a previous occasion. But under our present "cram" system, there is reason to fear that theorists will become very common. We could point to several cases in which officers of undoubted ability have been passed over by men who, in a professional sense, are notoriously inefficient, only because the latter, being bookworms, have been able to "cram" for an examination which has not added to their military proficiency one little bit. We do not deny that there exists a necessity for some test to be established. Everybody must admit, however, that there must be something radically wrong in a system which enables a junior to take such a leap as Major Boyle has done, for no other reason than that he has shown himself able to go through the ordeal of a theoretical examination. If things go on in this way, the Army will soon be irretrievably ruined. We trust, therefore, that the subject may be taken up before it is too late.

Since the memorable *Gazette* of November 17, 1882, when Colonel Sir G. R. Greaves was selected for promotion over the heads of seven of his seniors, not a move has taken place in the lists of Cavalry and Infantry Generals, nor has a Colonel in those branches of the service been promoted. We give a list of the vacancies that have taken place on the Active List since November 17:—Generals Horsford, De Bathe, and Colborne have retired; Major-Generals Carey, Clifford, and Burnaby have died; Major-Generals Thomson, Lightfoot, Spurgin, Hawley, De Horsey, Tower, and Feilden have retired. Clause 20, II., of the Royal Warrant runs as follows:—"6. Of every three vacancies occurring among Generals which would give promotion to Lieutenant-Generals, the third shall be absorbed." Consequently, Lieutenant-Generals Taylor and Hardinge, and Major-Generals FitzWygram and Higginson, should ere this have been promoted, in succession to the three above-named full Generals. So much for the higher grades. The next paragraph says:—"The second vacancy in every two among General Officers remaining (on July 1, 1881) shall be absorbed, in so far as it would give promotion to a Colonel." It follows, therefore, that the following vacancies have, or should have, taken place in the list of Major-Generals, viz.:—By promotion due to Higginson and FitzWygram, 2; by deaths of Major-Generals, 3; by retirement of Major-Generals, 7; total, 12; promotions of Colonels consequently due, half, equal 6. We need not dwell upon the possible injustice done to the Colonels, whose promotion is retarded, in the matter of pay, and, in case of death, in the shape of pensions to their families; but we hope that the War Office and the Treasury will soon make up their minds to carry out the provisions of the Royal Warrant of 1882, and that the claims of the seven superseded Colonels will not be entirely lost sight of, though there are more pressing subjects which demand the attention of the Secretary of State for War.

We have reason to believe the Governorship of Jamaica has been offered to and declined by Sir Andrew Clarke, K.C.M.G., R.E. The greatest exertions are being made by Mr. Childers to secure a post for his old compatriot.

As we anticipated, Inspecting Veterinary-Surgeon G. Fleming, LL.D., has been appointed to succeed Mr. J. Collins, as Principal Veterinary-Surgeon of the Army, his name having appeared in Tuesday's *Gazette*. Mr. Fleming is so well-known that we need scarcely refer to his qualifications for the position. It must be a source of no small satisfaction to Mr. Collins, on his retirement, to feel that the mantle he has worn for seven years with so much credit to himself, and such great advantage to the service, has fallen on the shoulders of so worthy a successor. Mr. Fleming did not seek the appointment. It was offered to him quite unsolicited on his part, in recognition of his long and devoted services in the interests of veterinary science. It rarely happens that any Department sees two such sound men as Messrs. Collins and Fleming following one another at it head, but when it does its members have reason to congratulate themselves on their good fortune. Mr. Fleming served for some years in the 3rd Hussars, was afterwards in the Royal Engineers, and more recently in the 2nd Life Guards, from which regiment, it may be remembered, the late Mr. Wilkinson was transferred to the appointment of Principal Veterinary-Surgeon.

A battalion of the Line at Aldershot are said to have turned out lately, for a General's inspection, four companies, of 16 files each—that is, 128 rank and file. The General is stated to have been so shocked at their weakness, that, after careful inquiry, and finding that they were "all present," he, like General Bombastes, ordered them, in the well-known words, to "Begone, brave army, and don't kick up a row!" There were so few of them that they had no heart for rows, but quietly and despondingly retired to their huts.

With reference to Part ii., Sec. 9, Field Exercise, as amended by G.O. 37 of 1881, it has been intimated that in future the supernumerary ranks, as well as the rear rank, will invariably "lock-up" when marching past.

The Deputy-Adjutant-General, Royal Artillery, has delegated the burden of interviewing Artillery officers who go to the Horse Guards on business to Colonel Geary, A.A.G. Officers of rank and personal friends of the Deputy-Adjutant-General can alone obtain direct access to Sir Charles Arbuthnot's presence. This arrangement is inconvenient to officers, who naturally prefer transacting their business direct with the head of the office, rather than through the medium of an irresponsible subordinate. The patience, tact, and good-feeling, however, with which Colonel Geary discharges this difficult duty, even when unreasonable demands are made upon his time, is testified to by all who call upon him at the Horse Guards.

It has been found necessary to call attention to Queen's Regulations, sec. 12, pars. 48 and 52, and to point out that ribbons or miniature medals are not to be worn by officers in full dress.

It is reported that the 10th Hussars, from India, will relieve the 19th Hussars in Egypt during the next season. It seems probable that arrangements will be made for all regiments going to or from India to remain a year in Egypt on their way,—for health reasons chiefly. The 2nd Battalion, Highland Light Infantry, whose link, the 71st, is also at home, does not expect to proceed to India till next year.

Lieutenant-Colonel W. F. Gatacre, 77th Regiment, is the inventor of a new mess-tin, which has been sent to the Equipment Committee for trial. It is smaller than the regulation mess-tin, which is unnecessarily large and cumbersome.

The Permanent Committee on Dress, &c., have been very busy during this week at Aldershot, and will reassemble on Monday next, in the Prince Consort's Library, in the lecture-hall of which building there is ample room to carry out the necessary experiments. Changes have been recently made in the constitution of this committee, which is now composed as follows:—President — Colonel Harrison, C.B., C.M.G., A.Q.M.G. Members—Colonel Vincent, 3rd Hussars; Colonel Luck, C.B., 15th Hussars; Lieutenant-Colonel Hale, 26th Cameronians; Colonel Stevenson, 87th Fusiliers; Lieutenant-Colonel Magenis, R.A.; Lieutenant-Colonel Helsham Jones, R.E.; Assistant-Commissary-General Reeves, C.B.; and Surgeon-Major Gasteen.

Our new Deputy-Adjutant-General, who accompanied the Commander-in-Chief to Aldershot on the 21st inst., is not likely to overlook any small irregularities in dress, drill, &c. When Assistant-Adjutant-General at Aldershot, from 1874 to 1877, such matters as these had his special attention.

[Scene—Barracks at a Home Station. Time.—Last week.]

Lieut. B.—Colour-Serjt. C., the Colonel's orders about the vicinity of the barrack-rooms being kept clear of weeds are most peremptory; as there is no parade to-morrow, be good enough to turn out every available non-commissioned officer and man of the company at head-quarters, for weed-picking.

Colour-Serjt. C.—Very good, sir.

[Lieut. B., on proceeding the following morning to see how the weed-picking progresses, finds two serjeants, two corporals, and three privates, two of these being officers' servants in plain-clothes, picking weeds, and the colour-serjeant sweeping up with the broom.]

Colour-Serjt.—Every available man present, sir!

[Tableau.

The lax manner in which the Admiralty select transports in cases of emergency has been conclusively proved by the evidence brought forward in the Monarch Line arbitration case. As we recently reported, one witness did not consider the ships in question fit "to send a cat to sea in." The builders of the ships even admit that they were not constructed according to Lloyds' specification, and that strength had to be sacrificed to lightness for speed. The owners of the vessels, however, do not admit this plea, and have endeavoured to prove that the cause of the structural weakness of their ships was the fact that the price of iron went up immediately after the contract was signed with the builders. But with this dispute we have nothing to do. We merely desire to call attention to the fact that here is a case in which both the builders and the owners admit that the ships are structurally weak and unfit to encounter heavy weather. Nevertheless, these steamers were chartered by the Admiralty to convey thousands of our troops to Egypt; and, on the showing of the owners of these vessels and their witnesses, it is a great mercy that no catastrophe occurred, as certainly would have done, had they encountered heavy weather. Surely the Admiralty survey should be sufficiently strict to prevent the possibility of such unseaworthy craft being chartered.

The experimental trials of the Weldon range-finder, which have been going on at Aldershot for some months past, have been ordered to be continued by the Royal Artillery and Infantry for a further period of three months.

Lieutenant-Colonel H. S. Stabb, 32nd Light Infantry, attended at Aldershot during the week to explain to the Equipment Committee the merits of a valise equipment, his invention. The trials are still proceeding, and equipments of all kinds are arriving fast and furious. A Lieutenant of Engineers is among the latest inventors. His equipment is said by the Scientific Corps to be the valise of the future. Can it be wondered at, under the circumstances, if the unfortunate members of this Committee wear a troubled look?

The Pall Mall authorities have recently ruled that in a garrison where there are two or more regiments having Paymasters attached, the Paymaster of one regiment may, in the event of the Paymaster of another regiment going on leave, undertake the duties of the absent Paymaster in addition to his own. They have also asserted, with that profound ignorance of the interior economy of the Army which is characteristic of the genuine War-Office clerk, that the difficulty experienced by officers of the Army Pay Department in obtaining leave is owing to their failure to assist one another in this way. Now, as a matter of fact, the Paymaster who is attached to a regiment is, for the time being, practically a member of the Regimental Staff, and as such, is under the orders of the commanding officer. "No man," we have it on the highest authority, "can serve two masters," and certainly no Paymaster can serve two commanding officers. The Pall Mall scribe has thus evolved from his inner consciousness a Paymaster whom he has endowed with supernatural powers, to be exercised with a view to save to the State the half-crown a day paid to the combatant officer deputed to act, when no officer of the Department is present at the station. To take away with the left hand that which the right hand giveth is entirely consonant with War-Office tradition, but to reproach the Paymaster for failing to do that which is beyond the power of man is simply ridiculous.

In recent Army Circulars, it appears that an officer of the Army Pay Department has unqualified right to retire after 25 years' service. However, on looking into the matter, it seems that he will then only get a reduced pension, and that a higher rate of pension, which he would have become entitled to on reaching, say, 30 years' service, is not to be allowed. We, therefore, caution our friends of the Pay Department lest they may be caught in the trap which has been prepared for them.

The Navy.

EGYPT MEDAL.

Department of the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, Spring Gardens, June 27, 1883.

Notice is hereby given, that Medals for the operations in Egypt are ready for issue to the Masters of Transports employed in Egypt, in connection with those operations, between July 11 and Sept. 14, 1882. Application should be made, personally, or by letter, to the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, London, S.W. Production of certificates from the owners of Transports will be required.

ADMIRALTY, June 22, 1883.

Staff Surgeon Edward Julian Sharood, M.D., has been promoted to the rank of Fleet Surgeon in her Majesty's Fleet, with seniority of June 16, 1883.

ADMIRALTY, June 23, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Fleet Surgeon William Edney has been placed on the Retired List from the 15th inst., with permission to assume the rank and title of Retired Deputy-Inspector-General of Hospitals and Fleets.

ADMIRALTY, June 26, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and November 29, 1879, Lieutenant Arthur Hill Ommanney Peter Lowe has been placed on the Retired List from the present date, with permission to assume the rank and title of Retired Commander from the same date.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Lieutenant John Robert Aylen has been placed on the Retired List of his rank from the 22nd inst.

ADMIRALTY, June 27, 1883.

Royal Marine Light Infantry.—Captain Harry Montgomerie Clements to be Brevet Major, under the provisions of her Majesty's Order in Council of March 19, 1883 (June 23).

ADMIRALTY, June 29, 1883.

The following promotions have been made from this date:—

Commanders—Richard Evans, Edmund George Bourke, James Andrew Thomas Bruce, Henry Rose, and Pelham Aldrich, to be Captains in her Majesty's Fleet.

Lieutenants—Raymond Barron Needham, Herbert James Gilbert Garbett, Julian Alleyne Baker, Nathaniel Cotton, Lionel Fanshawe, George Augustus Giffard, Charles Lindsay, Francis Powell, and Arthur Barrow, to be Commanders in her Majesty's Fleet.

APPOINTMENTS.

Captain—Henry Hand, to the Malabar.

Commander—George W. Hill, to the Linnet, vice Harris.

Lieutenants—Ernest F. Brickdale, to the Repulse, additional, for the Coastguard, vice Hayes; Charles S. Elliot, Francis E. Groube, and Frederick J. O. Plumer, to the Orontes.

Navigating Lieutenant—Walter S. Chambré, to the Pembroke, additional, for service in the Caroline.

Sub-Lieutenants—Arthur D. Ricardo, Claud A. W. Hamilton, and William H. Nicholson, to the Victoria and Albert

---

Fleet Surgeon—Henry F. Norbury, C.B., to Plymouth Hospital, vice Edney.

Staff Surgeons—Alfred W. Whitley, to the Belleisle, vice Norbury; Robert Grant, to the Orontes.

Chief Engineers—George J. Weeks, to the Malabar; Lewis P. Lewis, to the Asia, additional, for service in the Crocodile; Samuel J. Bird, to the Nankin, for the Amphion; Henry D. Garwood, to the Orontes.

Surgeons—James T. W. S. Kellard, to Bermuda Hospital, vice Cox; George Bate, to the Ganges, vice Kellard.

Paymaster—C. H. Ceely, to the Nankin.

Assistant-Paymasters—H. A. Malaher, to the Malabar; W. S. Richardson, to the Orontes; G. T. Backwell, to the Duke of Wellington.

Engineers—Richard G. Willby and Josiah P. Thomas, to the Malabar; Robert Balcomb, to the Asia, additional, for service in the Crocodile; George Harding, to the Asia, additional, vice Whittaker; Thomas H. Harrup, to the Excellent, for service in the Kite, vice Harding; Richard H. Tregenna, to the Orontes; Cornelius Pitt, to the Euphrates, vice Graves; Joseph Organ, to the Indus, additional, vice Pitt; Samuel J. Robins, to the Indus, for the Albacore, vice Hulford; William Rabbidge, to the Asia, additional, vice Soper.

Assistant-Engineers—James Armstrong and Henry J. Oram, to the Malabar; William A. D. Whormby, Thomas Green, and David J. Bennett, to the Orontes.

Clerk—W. F. Horniman, to the Orontes.

Chief Gunner—William Sandercock, to the Pembroke (for service in Reserve, to superintend gunnery fittings of ships).

Gunners—George T. Baker, to the Duke of Wellington, for service in the Dwarf; George Frood, to the Cambridge, vice Neil; Theodore Bye, to the Hecla, complement incomplete; John W. S. Powell, to the Cambridge, vice Shea.

Boatswains—John Bradley, to the Pembroke, for the Caroline; Charles H. Chapman, to the Ganges, for the Sealark, vice Hammett; John A. Mahony, William Hurrell, Peter Bray, William Lyndon, William H. Hayman, and William Pyne, to the Orontes; James Steel, to the Pembroke (supernumerary).

Surgeon and Agent—Ogilvie Grant, M.B., to Inverness, vice Ross.

Algerine, Com. Arthur Fullerton, was at Cape Coast Castle up to June 1; would remain until relieved by Opal or Flirt. The Pioneer left on June 1 for Elmina to coal, and would leave on June 3 for Devonport, calling at Sierra Leone, St. Vincent, and Madeira. The Stork was at St. Paul de Loanda, and will remain until relieved by the Algerine at the end of June. The Bullfrog was expected at Cape Coast Castle on July 4. The Flirt was expected at Cape Coast Castle daily.

Audacious, Capt. Tracey, flagship of Vice-Admiral George O. Willes, C.B., Commanding-in-Chief on the China station, was at Shanghai on June 28, and would remain in the Gulf of Pechili for the present, in daily communication with Shanghai.

Comus, Capt. East, was at Callao on May 24; she was to leave for Coquimbo about June 12, should affairs on the coast of Peru permit. The Constance was at Guayaquil on May 17; would leave for the coast of Peru when affairs at Guayaquil were sufficiently settled. The Kingfisher was visiting the Islands; she is expected to arrive at Coquimbo about the middle of July.

Eclipse, Capt. E. St. J. Garforth, was at Aden on June 13, her departure for England having been delayed on account of the Briton not leaving the Cape as early as was anticipated for Zanzibar. An afternoon dance was given on board on June 11, which was attended by Gen. and Mrs. Blair and the officers of the garrison, likewise the officers of the Italian man-of-war Cariadi.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., Commanding-in-Chief on the East Indies station, was at Trincomalee on June 28, and remains. The Eclipse was at Aden, but has been ordered home. The Osprey had been ordered to the Maldive Islands on June 29, to assist the s.s. Barnsley.

Firefly, Lieut. and Com. E. G. F. Law, was to leave St. Vincent for Devonport on June 28, to pay off.

Gannet, Com. E. G. Bourke, arrived at Devonport on June 27, and will proceed to Sheerness to pay off.

Lord Warden, Capt. Kennedy, flagship of Rear-Admiral Sir Anthony H. Hoskins, K.C.B., with the remaining ships of the Reserve Squadron in company, arrived at Heligoland on June 25, and left for Bergen on June 27.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., commanding-in-chief in the North America and West Indies station, was at Halifax up to June 15. The Mallard would proceed to Chaleur Bay on June 18. The Tenedos was at Halifax on June 18. The Flamingo left Bermuda for St. John's, Newfoundland, on June 2. The Foam left Halifax on May 31, for St. John's, Newfoundland. The Garnet was at St. Kitt's on May 30. The Dido, at Bermuda, would be docked on June 8. The Griffon was at Jamaica on June 9. The Fantôme was at Bermuda on May 26, and would be employed on Jamaica Division.

Raven, Lieut. and Com. Ross, arrived at St. Vincent on June 27, on passage to Australia.

Rocket, Lieut. and Com. V. B. Orlebar, was paid off in the steam basin at Sheerness Dockyard on Wednesday last, the crew being granted the usual leave of absence. She was away from England nine years, and was recommissioned at Esquimault on July 25, 1878. She is to be put in the Fourth Division of the Medway Steam Reserve.

Sapphire, Capt. A. G. Fullerton, arrived at Singapore on June 27.

Satellite, Capt. Theobald, arrived at St. Vincent on June 23, and was to leave on June 27 for the Pacific.

Thetis, Capt. A. C. Curtis, arrived at Devonport on June 27 to pay off.

Woodlark, Com. Nesham, was at Reshire on May 24; would proceed to Busreh on May 25, probably remain there about 21 days, returning to Bushire. The Arab was at Muscat on May 17, and would leave Muscat for Karachi about the end of May, returning to the Persian Gulf after having given leave to her crew. The Philomel was at Jask on May 17, cruising off Musendorn, visiting Lingah weekly for mails up to May 31; she would return thence to Muscat and Jask. The Eclipse was at Aden on June 11; she is under orders to return to Devonport at once, without waiting the arrival of the Briton.

The murky sky and drizzling rain which prevailed at Portsmouth on Thursday morning presented a dismal contrast with the bright display of bunting on the various ships in harbour. The dreary and deserted dockyard served to remind one of the six or seven thousand employés whose holiday was spoilt; while the barometer, as if in mockery of the disappointed pleasure-seekers, remained high and steady. The Polyphemus is still in No. 10 dock, and, judging by appearances, is likely to remain there, having a very substantial staging erected round her bows, and a steam engine set up in the bottom of the dock for her especial benefit. Some important alterations are being made in the arrangements for discharging the torpedoes in line with the keel, the submerged tube being converted into a sort of air-gun, so as to dispense with the use of the ordinary "impulse" from inboard. In the ship basin are the Hawk, Coastguard tender, and the new Fire Queen, formerly the yacht Candace, which latter having, as is usual in such cases, been pulled to pieces, is now being put together again. The unsuitability of this deep-draughted vessel for the purpose for which she was purchased may prove to be a not altogether unmixed evil, if, as seems not improbable, one experience of landing from her in Cowes Roads, in a small steam pinnace, with a strong ebb tide and a stiffish breeze, should prove enough for some of her Majesty's Ministers, and turn the scale in favour of resignation. The Alberta, afloat hard by in a covered dock, is resplendent in new gold and varnish, and looks like one of the models from Greenwich; the Enchantress is also in dock, for her annual overhaul. The old steam basin presents much the same appearance as it has done since the departure of the Canada, except that the worn-out old gunboat Skylark, under the crane, is apparently about to receive her new boilers at last. The multitudinous and intricate fittings of the Colossus make but slow progress, and the Edinburgh's turret-plates are still securely cleated on the upper deck, as during her passage from Pembroke. The Camperdown is at the busiest stage of her construction, and makes sensible progress. Is it by authority, we wonder, or merely a freak on the part of the draughtsman, that there appears in the working plan of this vessel a cabin appropriated to the "1st lieutenant"? There being a captain and commander as well, "No. 1" should, of course, by existing regulations, take his chance with the other "majors," according to date of commission. The Malabar and Crocodile are in the large basin, and are about, after the somewhat uncomfortable practice of late years, to change places, the crew of the latter returning to what was formerly their own vessel. This system of "hide-and-seek" with one crew to two ships must be very unsatisfactory to commanding officers, but it has undoubted advantages as regards economy. The Dreadnought is missing from her accustomed corner, having gone out to Spithead, for experiments with the torpedo nets designed by her late Staff Commander.

THE CHANNEL SQUADRON.

[FROM OUR CORRESPONDENT.]

Arosa Bay, June 23, 1883.

The Squadron regatta was held last Tuesday, Wednesday, and Thursday. It passed off very pleasantly and successfully. The first day was devoted to pulling races; there were eighteen events on the programme, including two for officers, in galleys and cutters. The first was won by the Northumberland, and the latter, which was for gun-room officers only, by the Minotaur. The Northumberland and Neptune carried off most of the prizes; the final race for all comers was won by the Neptune's barge. After the races, there was a tug-of-war, each ship being represented by her launch as she had pulled in the all-comers' race. The sides were east-country ships, Minotaur, Sultan, and Neptune, against west-country, Agincourt, Northumberland, and Achilles. It occasioned a great deal of fun, and resulted in a decided success for the west country. The next day, the 20th, we dressed ship and fired royal salutes at noon in honour of her Majesty's Accession, and the second part of the regatta, sailing races with service rigs, came off. Four mark boats were laid out, forming a nearly circular course of about four miles round, the single-banked boats going once round and the others twice. The Northumberland won the launch, pinnace, and skiff races; the Minotaur, those for single-banked boats and cutters over 28 ft.; the Sultan, that for cutters under 28 ft.; the Agincourt, life-boat cutters; and the Neptune scored a win with her dingey. On Thursday the Admiral's cup was sailed for, the mark boats were opened out a little, which made the course, going round twice, about ten miles. The boats were started at about half-past 1, in batches, according to their classes, the time allowance being given between the starts. The boats were all got away capitally without any hitch or accident, and as they ran down before the wind, with spinnakers and studsails of all sorts set, it was a very pretty sight. The cup was won by the Minotaur's cutter, sailed by Lieut. Farquhar, which came in a long way ahead of anything else. There was a very close run for second place. The Admiral's galley passed the winning-post only a few yards ahead of the Northumberland's launch, but they both had to concede a time allowance of two minutes to the Achilles' galley, which came up a little astern of them, and took second place by a few seconds. The two minutes was allowed by officers of and above the rank of lieutenant to sub-lieutenants and midshipmen, in addition to the allowance for class of boat. The fifth prize fell to the Achilles' cutter, and a consolation prize, equal in value to the second prize, was given to the Sultan's cutter, as she had been dismasted, through no fault of her own, at a time in the race when she was doing very well. On both the sailing days the weather was everything that could be desired; there was a nice working breeze and a smooth sea. The country about here is very picturesque; there are several trout streams, which are flogged most energetically from early morning till late in the evening. Several officers have made trips up to Santiago, about 25 miles by train, to see the celebrated old cathedral there. We leave this on Tuesday morning, the 26th, for Corcubion. Mails for the Channel Fleet, after June 28, should be addressed to the Post Office, Waterfall, Berehaven.

The following is a list of the successful candidates in order of merit who have obtained the first thirty-one places at a competition held on the 13th inst. and following days for cadetships in the Royal Navy:—Hood, Hon. Horace Lambert Alexander, 1,392; Coode, Charles Penrose Rushton, 1,351; Child, Herbert Alexander, 1,284; Keate, Robert Hudleston, 1,255; Luard, Herbert Du Cane, 1,253; Hickley, Mercer Allen, 1,246; Webb, Richard, 1,242; Blunt, William Frederic, 1,190; Macaulay, Arthur James Denman, 1,159; Hand, George Edward Basil, 1,143; Brand, Herbert George, 1,127; Forbes, Wyndham, 1,119; Watson, Algernon Charles Willis, 1,114; Nugent, Raymond Andrew, 1,090; Muntz, Ernest Lionel Caldwell, 1,088; Smith, Alan Wyldbore Bosworth, 1,086; Cummens, Charles Philip Cooke, 1,087; Jones, Alexander Keith, 1,054; Sterling, Robert, 1,049; Carvich, Wm. Henry Charles, 1,034; Richardson, Lawrence Hill, 1,026; Olivier, Sidney Richard, 1,055; Clifton, Cuthbert, 1,001; Chapman, Edward Stewart, 1,000; Kirk, George Alan, 990; Marshall, Herbert John Temple, 958; Boyle, Hon. Edward Spencer Harry, 936; De Satge, Oscar Valentin, 899; Bosanquet, Henry Theodore Augustus, 893; Tyrwhitt, Reginald Yorke, 883; Hewitt, Francis Wm. Russell, 842. The following candidate qualified for a service cadetship:—John Richard Le Hunte Ward, 662.

The officers of the Opal played the St. Vincent, Cape de Verde, Cricket Club a match on June 5. It was not to be expected that the team of a single corvette could beat the expert players, who had only a few days previously given the Eleven of the Channel Squadron such a thorough dressing-down, but the Opals showed rare good stuff, which ought to be worked up into an eleven able to hold its own against most of the clubs the Opal is likely to fall in with during her commission. The score at St. Vincent was:—Opal 45 and 58, St. Vincent C.C., 99 and 5 for one wicket down. The weather was all that could be desired during the stay of the Opal at St. Vincent. The trade-wind, blowing fresh and cool, was fallen in with 300 miles from the Islands, and was carried up to St. Vincent. The Alecto had to repair damages done to her machinery from "dry working" while being towed out, which was worse than could have happened from actual steaming, and it is feared her engines will give trouble.

The Leander arrived at Sheerness on Tuesday morning, under the command of Capt. Lord Walter Kerr, of the Pembroke, and left for Chatham Dockyard shortly after. She is a new vessel, and has been built for the Government by Messrs. Napier and Sons, of Glasgow. She is a double-screw, steel, second-class cruiser, and is to be ready for commission as soon as possible.

"Sapo Carbonis Detergens" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "Wright, Southwark," are on each wrapper, and branded on each tablet, without which none is genuine.

THE PACIFIC STATION.

Rear-Admiral Lyons, Commanding-in-Chief on the Pacific station, has comfortably established himself at Victoria, and it is not expected that the Swiftsure, flagship, will make a move from Esquimault until nigh the end of the year. The Sappho and Heroine have before this reached Esquimault, where they were due early in the month, and the Mutine has left for the southern division of the station. In February the Swiftsure visited the Galapagos Islands, where every sportsman on board landed in search of wild cattle. The torpedo lieutenant was the only lucky one among the lot. He shot a wild ass. No doubt the Vernon establishment will be glad to hear of the feat, and reserve a conspicuous place on board for the assinine trophies. At Honolulu an ex-Naval officer, Mr. George Jackson, was discovered acting as hydrographer to his Majesty King Kalakau. The position was not a very lucrative one. Mr. Jackson was dismissed the service for his conduct on board the Virago in 1868-69, in aiding and abetting Commander Bingham in turning that sloop into a small "hell afloat," the commander being superseded. During this cruise the Swiftsure proved herself to be a regular clipper for an ironclad, doing from 150 to 190 miles a day regularly in the trades, under sail alone. At Esquimault, Lieut. Lees, gunnery lieut., purchased a wreck! As old Jorrocks says somewhere,—"Some people can't help nodding at auctions." Lieut. Lees' nod has cost him a pretty penny. On that nod, the hull of the Southern Chief, as she lay on the rocks minus masts, spars, anchors, cables, and with not even a winch or capstan on board was knocked down to him for 500 dollars. At Esquimault there exists a "ring" for the purchase of wrecks. Annoyed at an outsider venturing to trespass on the preserves of the "ring," its members threw such impediments in the way of Lieut. Lees floating his old hulk, that he has had to abandon the task as a bad job, and towards the latter end of May he once more advertised the wreck for sale. The "ownership of the Southern Chief" will form a standing joke against Lieut. Lees for many a day to come, if we mistake not, to whom it must be by this time rather a sore subject, for we fancy he must have dropped dollars over the job. There was little news to be relied upon from Chili or Peru. No active operations have been carried on for a long time, as the Chilians are in possession of the whole Peruvian coast, with Callao and Lima to boot. They appear to be devoting themselves, writes our correspondent, to squeezing as much money as they possibly can out of the unfortunate Peruvians and others whose misfortune it is to be in the country. The excessive taxation imposed by the Chilians has ruined the coast trade. But how the the Chilians are to get out of the mess they are in is difficult to see. There was a rumour abroad that they were about to patch up a sort of peace with Peru. But even did they do so, how could they withdraw their troops from Peruvian territory? The departure of the last Chilian soldier from Lima would be the signal for a reign of anarchy and confusion, which would transform the whole country into a regular pandemonium. As already announced, the Mutine was at Honolulu during the coronation of King Kalakau, and as Com. Edwards was the senior Naval officer present, his sable Majesty conferred on that officer the Cross of the Order of Kalakau, raising Com. Edwards to the dignity of a Knight of the said Order. The action of the Admiralty in declining to permit Com. Edwards to accept this very questionable honour, which he could not well of himself decline, will be generally approved of throughout the service, and serve to teach his sable Majesty that even a crowned nigger is not considered quite good enough to decorate a British Naval officer.

Col. the Marquess of Londonderry presided on Tuesday at the annual meeting of the National Artillery Association, at the Royal United Service Institution. The report of the Council stated that the Secretary of State for War had sanctioned the opening of the Camp at Shoeburyness from Aug. 4 to 10 for the First, or Northern, Division, and from Aug. 11 to Aug. 17 for the Second, or Southern, Division; that a detachment of Canadian Artillery, under the command of Lieut.-Col. MacDonald, First Provincial Brigade Field Artillery, with Major Short, Royal School of Gunnery, purposes attending the Camp; and that the Royal Marine Artillery may be represented by a selected detachment, to compete for the prizes offered to the Royal Artillery. The list of prizes has been augmented by the presentation of a challenge cup, valued £105, by Col. E. W. Harcourt, M.P., Vice-President of the Association.

Lord Wolseley will be entertained in the Rotundo, Dublin. His Excellency the Lord-Lieutenant will be present, and a number of distinguished military men, among them Sir Baker Russell and Sir Drury Lowe, will be guests of the committee.

LETTS'S POPULAR ATLAS is just now complete. The *Saturday Review*, May 12, 1883, says:—"We can honestly add that the unmounted edition (£2 2s) of Messrs. Letts's Atlas is beyond all question the cheapest full compendium of geographical information to be obtained, and the mounted form (£5) one of the most handsome."—Detailed Prospectus of LETTS, Limited, London Bridge, E.C.

MACHINE-GUN EXPERIMENTS AT ATHENS.

We have received a copy of the official report of the results obtained at Athens by a mixed Committee of Naval and Military officers appointed by the Greek Government to inquire into the relative merits of the Nordenfelt and Hotchkiss machine shell-guns and the Nordenfelt anti-torpedo boat-gun and mitrailleuse firing rifle calibre ammunition. The Committee appointed for this purpose consisted of MM. H. Petmezas, Colonel of Artillery (president); X. Manghinas, Lieutenant-Colonel of Artillery; E. Stroumbos, Major of Artillery; and L. Kriesis and C. Sachtouris, Captains in the Greek Navy. The experiments took place at Athens in May and June, 1883, having, in fact, only been completed this month, and as the results must be interesting to our readers, we publish the following translation of the salient points in the report which has reached us, premising that the experiments were conducted much in the same manner as were those carried out in this country, at Shoeburyness and at Portsmouth. The first experiment was to ascertain the rapidity of fire of the Hotchkiss and Nordenfelt guns, which is thus reported:—

25 m/m Nordenfelt, 40 shots in 7½ sec., equal to 320 shots per min.
37 „ Hotchkiss, 10 „ 7½ „ „ 80 „

Several attempts were made with the Hotchkiss revolving cannon, but only once were ten consecutive shots fired in the above time without accident to or stoppage of the mechanism. On all other occasions a stoppage took place after six or seven shots had been fired. For precision with accuracy of aim, the Nordenfelt only was fired. This was also the case in the experiment for precision when rapidly changing the sight from one target to another. The next trial in which both guns competed was for precision under quick firing, at a range of 700 mètres:—

25 m/m Nordenfelt, 40 shots in 15 sec., 26 hit.
37 m/m Hotchkiss, 3 „ „ 15 „ none hit.
37 m/m Hotchkiss, 7 „ „ 15 „ none hit.

After firing the above rounds, a breakdown in the Hotchkiss mechanism effectually prevented further firing that day with the revolving cannon.

The penetration trials were made at a range of 200 mètres, against compound iron plates. 1. At right angles, thickness of plate 25 millimètres, with two plates in rear, each four millimètres thick. All the Nordenfelt projectiles struck the target, piercing the first two plates, the points penetrating the third. Of the Hotchkiss five shots fired, but three hit the target, none of them penetrating, making only indents six millimètres deep in the first plate. At an angle of 25° to the target, a compound iron plate, 12½ millimètres thick, the Nordenfelt gun fired 15 shots, of which 14 struck and pierced the plate. The Hotchkiss revolving cannon fired the same number of shell, of which number but three struck the target, but did not thoroughly pierce it. The Nordenfelt gun was then fired at a target composed of two plates, placed at an angle of 15° to the line of fire; the first plate 8 millimètres and the second 4 millimètres thick. The whole of the Nordenfelt steel bullets pierced both plates, making holes of from 15 to 20 centimètres in length. It was considered useless to fire the Hotchkiss revolving cannon at a target placed at such an acute angle. During these trials not a single hitch or accident whatever happened to the Nordenfelt gun, while constant breakdowns occurred in the mechanism of the Hotchkiss.

The Nordenfelt 5-barrel rifle-calibre mitrailleuse was then proceeded with, and it was ascertained that this gun could fire 600 rounds a minute. The accuracy of the fire was found to be very good, and superior to that of ordinary rifles. The new automatic scattering gear also worked well. At a range of 800 mètres the spread was found to be 150 ft., or about the length of front occupied by 50 men in line. The training-gear also gave a horizontal spread through an angle of 25°, and was found to give a spread of 1,200 ft. at a range of 500 mètres, thus covering an exposed front equal to 400 men in line. The transport of these guns being greatly facilitated by their lightness, and as facility of transport is a matter of primary importance in such arms, experiments were made in this respect, which proved how easily the Nordenfelt mitrailleuse can be transported, either on the backs of mules, or by men, as well as in its own landing carriage.

Experiments were next made with the Nordenfelt shell-gun of 37 millimètres calibre, by which it was ascertained that, the gun being relayed after each shot, 15 shells could be fired in 40 seconds. The trials for accuracy and precision gave five hits for five shells fixed at a range of 1,000 mètres, with a mean deviation of 65 centimètres. The model of the bow of a torpedo-boat was next used as a target, and against this, at a distance of 500 mètres, the model being made to advance, five shells were fired, each one striking the targets in such manner that the torpedo-boat would have been entirely destroyed. The penetration trial was somewhat severe. A target was formed of eight plates of compound iron armour; the first was 25 millimètres thick; the next three plates were each 12½ millimètres in thickness; the two succeeding plates were 8 millimètres; and the last two plates, 4 millimètres thick. This gave a total thickness of 86½ millimètres. The range was 200 mètres. Each shell fired by the Nordenfelt machine-gun struck and pierced the whole of the plates. In February last similar trials were made in the presence of his Excellency Mr. Triconpis, President of the Council and Minister of War, and of Mr. Rouffs, Minister of Marine, and on June 1 the experiments were continued in the presence of Count de Mony, Ambassador of France at the Greek Court, as also Vice-Admiral Krantz, senior officer in command of the French Squadron anchored at the Piræus, Rear-Admiral Aube, second-in-command, and of the senior officers of the squadron, who all expressed their great satisfaction in regard to the solidity, simplicity, and excellent firing of the mitrailleuse, anti-torpedo boat, and rapid shell-firing guns, on the Nordenfelt system, submitted for trial. The French officers expressed it as their deliberate opinion that the Nordenfelt shell-gun was far superior to the Hotchkiss revolving cannon in use in the French Navy, more especially when used to repel the attacks of torpedo-boats. The Committee have reported in favour of the general adoption of the Nordenfelt system of machine-guns as superior to the Hotchkiss, throughout the Greek services.

The ninth annual Portsmouth Rifle Meeting will be held on Tuesday, Wednesday, and Thursday, July 3, 4, and 5, at Browndown, under the patronage of Admiral Hornby and H.S.H. Prince Edward of Saxe-Weimar. The prizes number 150, amounting altogether to £350. The arrangements appear to be on the most complete scale, and several improvements have been made from year to year in this the oldest military rifle meeting. It is true the Aldershot Meeting is a larger one, for obvious reasons, but at Browndown practical competitions useful to the British soldier are more encouraged than at Aldershot, for the principles of attack and defence are exemplified at the former place under the practical and unwearying supervision of Major Creagh, the D.A.A.G. for the Southern District. Major Creagh has, both in India and since leaving the Hythe School of Musketry, laboured unceasingly to make the application of the principles of musketry to actual warfare less complicated than has hitherto been the case. Several of our most distinguished General officers have strongly expressed their approbation of Major Creagh's views, and the Foot Guards have actually commenced to carry them into practice. They may be briefly summed-up in the idea that musketry instruction and practice in field operations may be carried on simultaneously. It is to be hoped that the Browndown Rifle Meeting will be supported as it deserves, for it is sure to be a practically-conducted affair, and one at which both Regulars and Volunteers can obtain useful information.

The *Times* says:—"The Russian Minister of War has announced the reorganisation and reinforcement of the Engineer Corps of the Army. Until now there have been in all five brigades of Sappers, stationed in the military circles of St. Petersburg, Wilna, Warsaw, Kieff, and the Caucasus respectively. The results of the last war convinced the military authorities of the necessity of increasing this force. Four of the brigades were called to the seat of war, leaving only the Warsaw brigade at home to meet all possible emergencies. A new brigade is therefore to be formed in the Odessa district, to consist of three battalions of Sappers, one pontoon battalion, three telegraph parks, and one Engineer park. With this addition, the whole force of Engineers in European Russia will consist of 15 Sapper battalions instead of 12, eight pontoon battalions, 15 telegraph parks, with 975 versts of wire, five field Engineer parks, four mining companies, one galvanic company, four railway battalions, and two siege parks at the fortresses of Dünaburg and Kieff. The Sapper brigade of the Caucasus will have two Sapper battalions, one telegraph park, and one Engineer park. In war time European Russia will also have 30 instead of 16 reserve companies of Sappers for fortress and other duties, and four reserve battalions for repairing the losses in the ranks. The Caucasus will have four reserve companies."

MARRIAGES.

BEDFORD—BRYSON.—On the 21st inst., at St. Jude's, Southsea, by the Rev. J. S. Blake, Vicar, William Orlebar Bedford, Assistant-Paymaster, Royal Navy, second son of the late Vice-Admiral George Augustus Bedford, to Flora Annie, second daughter of Lieutenant-Colonel T. Bryson, Chief Paymaster, Army Pay Department.

DE BURGH-LAWSON—HERIOT.—On the 23rd inst., at St. George's, Hanover Square, by the Rev. Canon Carr, LL.D., Vicar of St. Helen's, Lancashire, brother of the bride, assisted by the Rev. Viscount Molesworth, Rector of S. Petrock Minor, St. Issey, Cornwall, and the Rev. J. Harward J. Handcock, Vicar of Woodlands, near Sevenoaks, Sir Henry de Burgh-Lawson, Bart., of Gatherly Castle, Richmond, Yorkshire, to Fannie, widow of the Rev. George Heriot, of Fellow Hills, Berwickshire, Vicar of Newcastle-upon-Tyne.

LONGFIELD—PERCIVAL.—On the 28th inst., at St. George's, Hanover Square, by the Rev. B. Savory, Augustus Henry Longfield, Major, Norfolk Regiment, younger son of R. Longfield, Esq., of Longueville, Mallow, Co. Cork, to Florence Amy, younger daughter of the late R. N. Percival, Esq., of Sandbach, Cheshire.

ROGERS—SAUNDERS.—At St. Michael's Church, Stoke-Damerel, on the 25th inst., by the Rev. H. J. R. Rathbone, M.A., Richard James Rogers, Navigating-Lieutenant, R.N., to Elizabeth Jessie, only daughter of the late William McKenzie Saunders, M.D., R.N., Deputy-Inspector-General of Hospitals and Fleets (retired). No cards.

PIERSHILL SOLDIERS' HOME for CAVALRY.

It is proposed to hold a BAZAAR in the MUSIC HALL, EDINBURGH,
In aid of the Home,
On the 11th and 12th JANUARY, 1884,
Under the Patronage of
Field-Marshal H.R.H. The Duke of CAMBRIDGE, Commander-in-Chief;
Major-General H.R.H. the Duke of CONNAUGHT and STRATHEARNE, and H.R.H. the Duchess of CONNAUGHT and STRATHEARNE.

Further particulars, with List of Stallholders, will shortly be announced. Meantime, all are invited to interest themselves in this good work, and to endeavour to make the Bazaar a real success. Communications may be addressed to the SECRETARY, Piershill Soldiers' Home, Edinburgh.

£1,500 is REQUIRED for CONTEMPLATED ALTERATIONS and IMPROVEMENTS.

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 22, 1883.

AN EXAMINATION of CANDIDATES for COMMISSIONS, to fill thirteen vacancies in the MEDICAL DEPARTMENT of the Royal Navy, will be held at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 13, 1883, and following days, at 10 o'clock.

Candidates are to attend at this Department at 11 o'clock on Thursday, August 9, for preliminary examination as their fitness for the Service.

The Forms to be filled up by Candidates will be supplied on application to this Department, and should be returned as early as possible.

JOHN W. REID, M.D.,
Director-General.

TO SUPERANNUATED SICK-BERTH STEWARDS or ARMY DISPENSERS.—DISPENSER WANTED, at once, in a General Practice. His duties will be to dispense and deliver medicines, and to take charge of the Surgery.—Apply to Messrs. WALTER and RAVEN, Surgeons, Broadstairs, Kent.

REQUIRED, for the NORTH-WEST MOUNTED POLICE of CANADA, TWO CAVALRY DRILL INSTRUCTORS. Applicants must be under 35 years of age, and unmarried. Term of engagement, three years. Pay, 6s per diem, free kit, quarters, rations, fuel, and light.

Applications, accompanied by certificates as to character and proficiency, also medical certificate as to health, to be addressed to the COMPTROLLER, N.W. Mounted Police, Department of the Interior, Ottawa, Canada.

REPRESENTATIVES WANTED, either Ladies or Gentlemen, in England, Scotland, Ireland, India, the Colonies, America, and in all Towns in either Hemisphere where Englishmen reside, for a FIRST-RATE and HIGHLY POPULAR PUBLICATION. A liberal commission enables two pounds weekly to be easily made, in the leisure hours of any employment.—Address by letter, giving full personal particulars, to "PERIODICAL," care of J. W. Vickers, General Advertising Offices, 5 Nicholas Lane, London, E.C.

A RETIRED OFFICER of over a year's experience of coaching in Military Law and Tactics, WISHES to MEET ONE who can undertake Fortification and Topography, with the view of commencing work next October.—DUGALD DALGETTY, May's, 159 Piccadilly.

A LADY, aged 31, accustomed to Travelling, and speaking French and German, desires a HOLIDAY ENGAGEMENT, about the end of July, either as Travelling Companion, or to read French and German with Ladies at the seaside or in the country.—Address, "B.," 9 Banbury Road, Oxford.

A LADY, of considerable experience in the Education and Management of Children, is DESIROUS of undertaking the ENTIRE CHARGE of YOUNG ORPHANS, or of CHILDREN whose Parents are abroad. Good references given and required. — Address, "M. N. H.," 1 Edith Grove, Fulham Road, London, S.W.

TO INDIAN OFFICERS, and OTHERS. —A GENTLEWOMAN, residing on a beautiful part of the South Devon Coast, near Kingsbridge, RECEIVES CHILDREN to EDUCATE with her little Girl; first-class Governess, and every advantage. Nursery for younger branches, either girls or boys. Terms moderate, references exchanged. —Address, "ALPHA," care of Mr. Fox, Stationer, near Kingsbridge.

A LADY who has the Charge of the Little Daughters of an Indian Officer, is desirous of having TWO or THREE more YOUNG CHILDREN to bring up with them, in her country home, within a few miles of Brighton. She has a superior governess and nurse. References in India and England. Inclusive terms, with clothing, 100 guineas per annum.—Address, "L. E.," care of PAGE, 108 Fleet Street, E.C.

AN IRISH LADY, Widow, aged 33, the payment of whose jointure is delayed, is anxious to obtain the position of COMPANION, Travelling or otherwise, to a Lady. Highest references given and required.—Address, "O. B. W.," care of Mrs. E. WATTS-RUSSELL, The Limes, Somerset Road, Ealing, W.

WASHING WANTED, by the NEW SANITARY LAUNDRY WORKS, Orchard Road, Shepherd's Bush. The healthiest and best arranged private laundry in London. Linen got up in the best style at very moderate prices. No chemicals or hard scrubbing brushes used. Linen insured. Special terms to hotels and clubs.

Passengers from India, China, Australia, and the Colonies are invited to despatch their linen immediately on arrival in this country to the New Sanitary Laundry, as above, when it will be immediately forwarded to their address.

Kent.—Shooter's Hill.—A very attractive Residential Property, comprising in all about six acres, charmingly situate about 1½ mile from Woolwich Arsenal Station, 2¼ miles from Eltham Railway Station, and 8 miles from London Bridge. With possession.

MESSRS. DEBENHAM, TEWSON, FARMER, and BRIDGEWATER will SELL at the Mart, on TUESDAY, July 17, at 2, the very attractive RESIDENTIAL PROPERTY known as TOWER HOUSE, Shooter's Hill, Kent, comprising a capital, well-arranged residence, occupying a high but sheltered position, approached by a carriage drive with ornamental lodge at entrance, and containing 10 bed and dressing rooms, boudoir, bath room, two rooms in tower, spacious landings, entrance porch, outer and inner halls paved with encaustic tiles, good dining-room, elegant drawing-room, library, gentleman's room, capital domestic offices, dairy, and cellarage, numerous outbuildings, stabling for three horses, cow-houses, piggeries, poultry-houses and runs, potting shed, large span roof vinery, peach-house, &c. The grounds are tastefully laid out and adorned with some fine specimen trees and shrubs, and there are an excellent and well-stocked kitchen garden and two park-like paddocks, in which are clumps of ornamental trees and rhododendrons. The property embraces an area of about six acres, it is surrounded by a belt of well-grown trees, and is quite secluded. The views from the residence and grounds are very extensive and beautiful. The whole is held on lease for a long unexpired term, at the low ground rent of £24 per annum.—Particulars, with plan and conditions of sale, may be obtained of Messrs. NISBET and DAW, Solicitors, 35 Lincoln's Inn Fields, W.C.; and of the Auctioneers, 80 Cheapside, E.C.

WORTHING.—For IMMEDIATE DISPOSAL.—A Widow Lady will UNDERLET, for the Summer Months or a Term, her well FURNISHED Detached Modern VILLA, ten rooms, or the good furniture can be had and house rented unfurnished; good house, charming position; any reasonable offer will be entertained.—Address, H. S., Aberfoyle, Underhill Road, Dulwich, S.E.

DOVER.—Furnished, a Gentleman's PRIVATE HOUSE. Facing the sea; ten rooms and usual offices. Five guineas a week, July and August.—Address, "G. H.," 167 Piccadilly, W.

TO LET, Furnished, one mile from Chislehurst, by the month, year, or longer period, or would be SOLD, SMALL COUNTRY RESIDENCE, with stabling, conservatory, and garden, with or without three acres of land.—Apply, "X. Y. Z.," care of Messrs. GRINDLAYS and CO., 55 Parliament Street, S.W.

To GENTLEMEN'S SERVANTS, RETIRED MILITARY MEN, and OTHERS.

TO be SOLD, an Old-Established, fully Licensed HOTEL, admirably placed on the Parade at a fashionable Watering-place in Kent. Held direct from the Freeholder; half-rent let off; no premium. Furnished throughout. Price, for furniture, trade fixtures, fittings, and good-will, £750, £250 of which could remain. Freehold can be purchased.

Apply, Principals only,
W. R. NORRIS, Auctioneer.
29 and 30 Southampton Buildings, W.C.

TO RETIRED NAVAL LIEUTENANTS, and OTHERS.—For DISPOSAL in London, near the Docks, a NAUTICAL ACADEMY, with Chart and Nautical Book Business. Established over sixty years. Ill-health the cause of sale. A good connection and excellent residence at low rent.—Apply in first instance by letter, "J. G.," 27 Larkhall Lane, Clapham, S.W.

FOR SALE. — UNIFORM, Surgeon-Major, A.M.D., complete, with gold belts, cocked hat. Suit person six feet in height. Price £15.—To be seen at the General Agency, 111 Victoria Street, Westminster.

HANDSOME, HOODED PHAETON, convertible into Waggonette, One or Pair; Elegant, HIGH-HOODED GIG, suit horse 16 hands, both equal to new; and TWO SETS SINGLE HARNESS (brass), and sundry stable fittings, for sale, cheap; the property of a Depositor.—Apply at GWYNNE'S DEPOSITORY, High Road, Lower Clapton.

WANTED, IMMEDIATELY, an INFANTRY TUNIC; blue facings preferred. Must be in good order, and moderate price. Size round chest, 38 inches.—Apply to Captain HARRISON, 13 Beach Terrace, Southsea, Hants.

MANITOBA and the CANADIAN NORTH-WEST.

Prairie and Timber Lands.—Rich Soil.—Healthy Climate.—Good Water.—320 Acres reserved by Government for each Settler as Homesteads and Pre-emptions.

THE CANADIAN PACIFIC RAILWAY also offer

FARMING AND GRAZING LANDS

For sale on easy terms to actual settlers.

For full particulars, maps, and pamphlets descriptive of the country, address,

ALEXANDER BEGG,

Canadian Pacific Railway, 101 Cannon Street, London.

☞ Mr. Begg will be happy to answer any enquiries about the country either personally or by letter.

THE TRADING STEAMSHIP COMPANY, LIMITED.

ISSUE of £20,000 SIX PER CENT. DEBENTURE STOCK.

Interest payable on January 15 and July 15.

The Directors are prepared to receive applications for the above Debentures. Prospectuses and Forms of Application may be obtained at the Brokers,

Messrs. BENNETT, PAYNE, and CO.,
2 CROWN COURT, THREADNEEDLE STREET;

Or of the Secretary, C. H. WILLIAMS, at the Offices, 137 Fenchurch Street, London, E.C.

ROYAL SCHOOL for DAUGHTERS of OFFICERS of the ARMY.

At an Election of Eight Pupils, on June 27, 1883, the following was the Result of the Poll:—

SUCCESSFUL.

	Votes.		Votes.
Miss E. M. Day	4729	Miss A. O. Sherlock	3857
G. L. Green	4356	M. L. A. D. Day	3829

IMPORTANT NOTICE.

Series of Shilling Handbooks by eminent authorities.

With a view to rendering a knowledge of all matters connected with Fishing more general, as well as more accurate, the Executive Committee of the International Fisheries Exhibition have resolved upon issuing from time to time a Series of popular Shilling Handbooks, written by some of the most eminent authorities of the day. The Committee have much pleasure in announcing that they have succeeded in securing the valuable services of the following gentlemen:—

FREDERICK POLLOCK, Barrister-at-Law, M.A. (Oxon.), Hon. LL.D. Edin., Corpus Christi Professor of Jurisprudence in the University of Oxford—"The Law as to Fishing and Fisheries." [*Just published.*

G. B. HOWES, Demonstrator of Biology, Normal School of Science, South Kensington—"Food Fishes." [*Just published.*

W. M. ADAMS, B.A., late Fellow of New College, Oxford, Designer and Compiler of the Fisheries Map of the British Islands—"The History of Fishing from the Earliest Times." [*In the press.*

W. SAVILLE KENT, F.L.S., F.Z.S.—"Marine and Fresh-water Fishes of the British Isles" (Illustrated). [*In the press.*

His Excellency SPENCER WALPOLE, Lieutenant-Governor of the Isle of Man—"The British Fish Trade." [*In the press.*

FRANCIS DAY, F.L.S., Commissioner for India to International Fisheries Exhibition—"Fish Culture" (Illustrated).

E. W. H. HOLDSWORTH, F.L.S., F.Z.S., Special Commissioner for Juries, International Fisheries Exhibition—"Apparatus used in Fishing." [*In the press.*

W. STEPHEN MITCHELL, M.A., (Cantab.)—"Fish as Food." [*In the press.*

WILLIAM SENIOR ("Red-Spinner")—"Angling in Great Britain."

JAMES G. BERTRAM, Author of "The Harvest of the Sea"—The Unappreciated Life of the British Fisherman."

C. E. FRYER, Assistant-Inspector of Salmon Fisheries, Home Office—"The Salmon Fisheries" (Illustrated). [*In the press.*

J. P. WHEELDON, late Angling Editor of *Bell's Life*—"The Angling Societies of London and the Provinces."

FRANCIS DAY, F.L.S., Commissioner for India to International Fisheries Exhibition—"Indian Fish and Fishing" (Illustrated). [*In the press.*

HENRY LEE, F.L.S.—"Curious Sea Creatures" (Illustrated).

JOHN J. MANLEY, M.A. (Oxon.)—"The Literature of Sea and River Fishing."

A. J. R. TRENDELL, of the Inner Temple, Barrister-at-Law, Literary Superintendent for the Fisheries Exhibition—"The Outcome of the Exhibition."

OFFICERS' BAGGAGE, &c.—Officers are respectfully informed that Baggage, Luggage, and all kinds of Personal Property are stored at most moderate charges at the

STORE WAREHOUSES, BAKER-STREET BAZAAR, W.

The Warehouses having been built expressly for the safe keeping of goods, are peculiarly convenient, and are kept warm at an even temperature during the winter. Removals effected.

6d, 1/0, 2/6, KEATING'S POWDER

Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.

This Powder, so celebrated, is perfectly unrivalled in destroying BUGS, FLEAS, MOTHS, BEETLES, and all Insects (whilst perfectly harmless to all animal life). All Woollens and Furs should be well sprinkled with the Powder before placing away. It is invaluable to take to the Seaside. To avoid disappointment, insist upon having

"KEATING'S POWDER."

No other Powder is effectual. Sold only in tins, 6d, 1s, and 2s 6d. Beware of Imitations. Don't be deceived.

(*) Honorary Queen's India Cadet.

At the Preliminary Examination held in February, 1882, SIX out of SEVEN Candidates, and at the Preliminary Examination held in March, 1882, ALL FOUR CANDIDATES, sent up from the Manor House, were successful.

H. WOLFFRAM, the Manor House, Lee, S.E.

MILITIA MILITARY COMPETITIVE.—MILITIA OFFICERS are PREPARED for the above Examination at the "MANOR HOUSE, LEE, S.E." During the last three years, no less than THIRTY-EIGHT MILITIA OFFICERS passed into the Line from this Establishment. The Studies of the Officers are under the immediate supervision of Major J. L. NEEDHAM, P.S.C., R.M.A. A SPECIAL COURSE OF INSTRUCTION OF EIGHT WEEKS' DURATION WILL BE GIVEN BY HIM to Candidates for the NEXT SEPTEMBER Examination, commencing on TUESDAY, JULY 10.—Apply to H. WOLFFRAM, the Manor House, Lee, S.E.

NAVAL CADETSHIPS, &c.

R. N. ACADEMY,
BURGOYNE HOUSE, SOUTHSEA.
PRINCIPAL (since 1860),
G. EASTCOTT SPICKERNELL.

This School was established in 1851, and conducted by the late Mr. EASTMAN, R.N., for nine years, until his death. Burgoyne House is situate close to and directly facing the sea, and pupils have good BATHING and BOATING. All pupils are taught to swim. Pupils are received from nine years of age and upwards. More than 1,200 Pupils have entered H.M.'s Service. At June Naval-Cadet Examination, three-fifths of Pupils sent up passed.

PREPARATION for the PUBLIC SCHOOLS.—DALMHOR, CRIEFF, PERTHSHIRE.—Mr. W. E. FROST, for ten years of Trin. Coll., Glenalmond (three as Sub-Warden, seven as Master of the Junior School), will OPEN a PREPARATORY SCHOOL in CRIEFF, in SEPTEMBER next. Crieff is a well-known health-resort, and Dalmhor has special advantages for delicate or Indian boys.—Prospectus, list of references, &c., on application to W. E. FROST, Trin. Coll., Glenalmond, Perth.

ARMY PROMOTION EXAMINATION and MILITIA MILITARY COMPETITIVE EXAMINATION.—OFFICERS of the ARMY and MILITIA PREPARED for the above Examinations ONLY, at the ARMY COLLEGE, Abingdon, Berkshire. Full particulars on application. Special Course for September Military Competitive commences June 30.

WIMBLEDON SCHOOL.

Founded upwards of 50 years ago, removed to its present position, to buildings specially built and adapted in August, 1860.

THOROUGH PREPARATION for the MILITARY, NAVAL, and other COMPETITIVE EXAMINATIONS, as well as for the UNIVERSITIES and LIBERAL PROFESSIONS.

Since August, 1860, 180 have passed into the R.M.A., Woolwich, and 200 into Sandhurst; and the Line. Scholarships at Cambridge, Appointments in the India Civil Service, and the Engineering College, Cooper's Hill, Commissions in the Marine Artillery and Infantry have also been gained. All these successes were gained direct from the School. At the last preliminary Examination for the Army, Sixteen were successful.

For further particulars, address the Rev. CHARLES WYNNE, or the Rev. J. M. EUSTACE, as above.

OFFICERS of the LINE and AUXILIARY FORCES preparing for Examination in Military Law and Tactics, may find help by corresponding with DUGALD DALGETTY, May's, 159 Piccadilly.

REV. W. D. ALLEN, Findon Rectory, Worthing, late Fellow and Tutor, Magdalen College, Oxford, assisted by a Cambridge FIRST-CLASSMAN, takes PUPILS for Universities and other Examinations. Three passed into Oxford this Term.

TUITION.—A married Clergyman, successful as an Army Tutor, has TWO VACANCIES for PUPILS desirous of preparing for the Army or University, during the summer vacation. House taken for August on the north coast of Cornwall. Terms, inclusive, £6 6s a week. References. — Address, the Rev. J. WASTIE GREEN, Upton Park, Slough.

THE GRANGE, COWES. — The Rev. ARTHUR WATSON, M.A., Graduate in Honours, Second Scholar and Prizeman of Caius College, Cambridge, has for 20 years successfully PREPARED PUPILS for Army, Navy, Public Schools, and Universities. This June the only Candidate sent up for Naval Cadetships took the 13th place, and the previous June the 1st and 19th places were gained.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. Special Classes for the STAFF COLLEGE and Promotion Examinations. Captain James passed from the Staff College in 1877 with honours, Major Lynch in 1876, with honours and special mention in military art and history, reconnaissance, and topography. Eighty-three successes last year.

RECENT SUCCESSES.

WOOLWICH:—Five out of seven sent up in 1882, viz., 4th, 7th, 17th, 22nd, and 25th.

SANDHURST:—6th, 25th, 55th, 61st, 74th, and 2nd Queen's Indian Cadet.

SANDHURST PRELIMINARY:—Thirteen out of Eighteen this year.

MILITIA MILITARY:—Messrs. JAMES and LYNCH have passed thirty-six under the present regulations, viz.:—March, 1881, *FIRST, *25th, *59th; September, 1881, *8th, 16th, 21st, *23rd, *25th, *33rd; March, 1882, *FIRST, 4th, 12th, 14th, *19th, 28th, *30th, and three Cavalry commissions; September, 1882, *FIRST, 2nd, 8th, 10th, *14th, *19th, *20th, 25th, 27th, 28th, 30th, 33rd, *36th, and one (42nd) Cavalry commission; March, 1883, *4th, 10th, 28th—the 4th passed his first trial after only 16 weeks' reading.

(Those marked * passed first attempt.)

At three out of the five examinations held, Major Lynch passed the First Candidate.

MILITIA LITERARY:—Twelve out of thirteen in 1881, ALL in 1882; March, 1883, ALL, viz., 16th, 20th, 22nd.

STAFF COLLEGE:—1881: FIRST, 4th, 16th. 1882: FIRST, 7th, 10th, 15th, 22nd, 23rd, 26th.

PROMOTION EXAMINATION:—Messrs. JAMES and LYNCH have passed 178 officers for promotion. Only three have failed.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

GROSVENOR SCHOOL, Twickenham.

BOYS receive thorough PREPARATION for Woolwich and Sandhurst, and pass DIRECT. Special arrangements for very young boys. Healthy neighbourhood, good table, public-school tone. Strongly recommended by many Officers high in the Service, to whom reference is permitted. Head Master, the Rev. L. MURRAY D'ORSEY, M.A.

ASHFORD SCHOOL, KENT.

HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, assisted by the Rev. W. FULFORD, M.A., and Colonel COATES, late 99th Regiment, PREPARE CANDIDATES for Woolwich and Sandhurst. Also, in separate Classes, LIEUTENANTS of MILITIA for the Military Competitive Examinations, and Officers for admission to the Staff College.

Colonel Coates's private pupil, Lieutenant Hill, Cheshire Regiment, passed Sixth at the March Examination.

References will be given to Officers of very high position in the Service.

For particulars, apply to H. ZOBEL, Poulton House, Hampton.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of PUPILS to Prepare for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to 12. Five pupils out of six were successful at the last Sandhurst Examination (July, 1882).—Terms, references, and other information sent on application.

ROCHESTER CATHEDRAL GRAMMAR SCHOOL.

SCHOLARSHIPS TO BE FILLED UP IN JULY, 1883.

TWO SCHOLARSHIPS, of the annual value of £20, open to Boys not exceeding Fifteen years of age, and tenable for four years at the School, commencing at the next Michaelmas Term.

Also, ONE SCHOLARSHIP, of the annual value of £20, open to Boys not exceeding Sixteen years of age, and tenable for three years at the School, also commencing at the next Michaelmas Term.

Candidates must send in their names to Mr. G. H. KNIGHT, The Precinct, Rochester, on or before July 10, 1883.

SANDHURST, WOOLWICH, MILITIA, INDIAN FORESTS, and other COMPETITIVE EXAMINATIONS.—Prospectuses of Tutors in England and Abroad who have been successful in passing Students at all the Recent Examinations forwarded (gratis), on application to Messrs. ASKIN, GABBITAS, and CO., 38 Sackville Street, London, W. References kindly allowed to the Right Rev. the Chaplain-General to the Forces, and others.

EASTBOURNE. — St. ANDREW'S SCHOOL. ("The MEADS.")

Principal—Rev. F. A. SOUPER, M.A., formerly Head Master of Bradfield College, Berks, and Sub-warden of Trinity College, Glenalmond, N.B.

Young Boys prepared for Entrance Examinations at Public Schools, and for other qualifying and competitive Examinations. Terms for boys over Twelve years of age, 100 guineas per annum.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the last Militia Competition, which took place on March 8, for which 31 Commissions in the Line have been awarded, the under-mentioned officers passed from this Establishment, out of 18 sent up:—

Lieutenant	E. G. Wynyard...	8th
,,	H. J. Morphy ...	11th
,,	I. H. W. Southey	13th
,,	N. G. Woodyatt	15th
,,	J. H. Heycock ...	16th
,,	D. S. A. Cosby ...	22nd
,,	F. K. O. Peile ...	26th

This completes a total of 32 commissions secured by Colonel WILKINSON and Lieutenant-Colonel SHAW at the last four Military Competitive Examinations, the total number sent up for these competitions being 76. The names of the successful pupils have already been published.

Also, at the recent Literary Examination for Militia Officers held in April, Lieutenant Lord Skelmersdale took FIRST place on the list.

The results obtained at the last SANDHURST EXAMINATIONS have added to the general score, which amounts altogether to SIXTY-ONE SUCCESSES, achieved by pupils during the past 18 months.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, PRELIMINARY, &c.—CAREFUL PREPARATION for any of the above. Upwards of 130 successes during the past four years. Highest places in lists, Nos. 5, 8, 9, 15, 18, 29, 34, 37, 38, 52, 61, 63, &c. More Preliminary successes in February and March, 1883.

For full particulars, terms, references, &c., address, Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley-on-Thames.

MILITARY COMPETITIVE for MILITIA OFFICERS.—Special Course, in charge of Colonel STORY, late South Lancashire Regiment. 8 years' experience as Garrison Instructor. In 1882-83, with a total of Twenty-four Candidates, Six were successful, an average of one in four.

Address, Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and steady work is insisted on. Since the introduction of the Military Competitive, out of Forty-two Lieutenants of Militia sent up, Twenty-six have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of pupils successful at all Examinations, INCLUDING THE LAST SANDHURST AND RECENT MILITIA COMPETITIVE.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

KINGSLEY COLLEGE, WESTWARD HO!

HEAD MASTER—Rev. F. HEWSON WALL, LL.D.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL,
SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond. }

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June, for Assistant-Clerkships in the Royal Navy, THREE of the Five successful competitors were Pupils of this Establishment, taking First, Third, and Fourth places. And THREE passed the test of qualification.

THE REV. Dr. POLLOCK RECEIVES a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

MILITARY COMPETITIVE EXAMINATION.

MAJOR DE THOREN and Major MORGAN (late Rev. J. CARDWELL) PREPARE MILITIA OFFICERS for the above Examination. The great success they have hitherto had was even greater at the Examination on March 8 and 9, 1883. Out of the Eight Candidates sent up,

Mr. H. R. Pease passed 9th } at their first
Mr. A. Faulknor ,, 12th } attempt;

and Four others were in the first fifty, one being 33rd; the remaining two qualified, and were high up.

The fees at this Establishment are unusually low.

Major De Thoren was Professor of Tactics at Sandhurst, Garrison Instructor at Madras, and D.A.Q.G. in the Abyssinian Campaign.

Major H. F. Morgan passed the Staff College, and is the author of "Summary of Tactics" and "Summary of Law."

For further information, apply to Major MORGAN, 3 Douro Terrace, Jersey.

THE PRINCIPAL of a HIGH-CLASS SCHOOL for GENTLEMEN'S DAUGHTERS has VACANCIES for Anglo-Indian CHILDREN, or for those whose parents are abroad. Special advantages for delicate or backward girls. The house is large, airy, and very comfortable. Gardens, fields, and the use of a quiet pony. For prospectus, with view of the House, apply to Miss PARROTT, Overton House, Congleton, Cheshire. References kindly permitted to the Hon. Mrs. Wylie, Congleton, Major Wylie (60th Rifles), the Rev. J. Colyer, Astbury Rectory, Congleton, and others; and in India, Arthur Pointon, Esq., 6 Russell Street, Chowringhea, Calcutta.

BEDFORD MODERN SCHOOL.

Rev. R. B. POOLE, B.D., Head Master; 26 Assistant Masters; 450 Boys. Large Endowment; Annual Exhibitions. Army, London University Matriculation, Business, &c. Fees to residents, £4, £6, or £9 per annum.

MESSRS. ASHTON and PYNE, Raithby, Fitzjohn's Avenue, N.W., assisted by Masters of long and successful experience, PREPARE CANDIDATES for the ARMY, *viâ* Sandhurst, Woolwich, and the Militia. Reference to Lord Napier of Magdala, Earl Shannon, Lord Walter Scott, and Colonel Chesney, R.E., sons of whom have passed direct from this establishment into Sandhurst.

MILITIA CANDIDATES most carefully prepared for their Final Examination by two Field Officers, in classes each of five members only (to ensure individual attention). Out of Sixteen recently prepared by the above officers, Eight were successful.

MILITARY COMPETITIVE EXAMINATION.—Lieutenants of Militia PREPARED, at 37 Cambridge Gardens, W. At the last Two Examinations the following were successful:—

C. H. Farquharson	5th	J. F. Campbell	23rd

HOLLOWAY'S PILLS.—THE CHIEF WONDER OF MODERN TIMES.—This incomparable medicine increases the appetite, strengthens the stomach, cleanses the liver, corrects biliousness, and prevents flatulency; it purifies the system, invigorates the nerves, and re-instates sound health. The enormous demand for these Pills throughout the globe might cause astonishment, were it not known that a single trial convinces the most sceptical that no medicine equals Holloway's Pills in its ability to lessen or remove all complaints incidental to the human race. They are a blessing to the afflicted, and a boon to all. The purification of the blood, removal of all restraints from the secretive organs, and gentle aperient action, are the prolific sources of the extensive curative range of Holloway's Pills.

THE MIDLAND COUNTIES WATCH COMPANY,
OF VYSE STREET, BIRMINGHAM.

Let every reader of this send for our beautiful, new, Illustrated Catalogue, containing List of Testimoni... (from all parts of the world), and over 500 fine, copper-plate Engravings of Watches, Jewellery, and Electro-plate, sent gratis and post-free on application to any part of the World.

GENTLEMEN'S FINE SILVER, flat crystal glass, 25s.
LADIES' FINE SILVER, flat crystal glass, 25s.
YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

The Rev. Robert Cass, Settle, Yorkshire, writes, February 19, 1880:—The Lady's Gold Lever Watch received from you for 70s, in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

From Mr. J. J. Harris, Schoolmaster, 2-18 The Royal Irish Regiment, Aldershot, September 22, 1880:—"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by Regimental Clubs for treble the money."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

Mules	785	3	·4
	1,806	52	2·8

Leave of absence has been granted to Surgeon-Major Ramsbotham, A.M.D., from June 20 to August 19; Major McNair, Paymaster, Cameronian Highlanders, from June 20 to September 21; Lieutenant D. F. Davidson, Cameronian Highlanders, from June 16 to July 6; Lieutenant Todd-Thornton, Royal Sussex Regiment, from July 1 to September 6.

Commissary-General of Ordnance Russell, C.B., has arrived in Egypt, and been taken on the strength of the command from the 9th inst.

A squadron of Mounted Infantry will be immediately formed for service in Egypt, will be quartered at Abbassiyeh, near Cairo, and will form part of the 1st Brigade. The squadron will consist of a captain commanding, two subalterns, three staff serjeants, four serjeants, four corporals, and 106 men. The men are selected equally from the Royal Sussex (35th), Royal Highlanders (42nd), King's Royal Rifles (60th), and Gordon Highlanders (75th). Captain H. Humphreys, of the Welsh Regiment, is appointed commandant, and Lieutenants L. Trafford, of the Royal Sussex, and Buchanan-Riddell, of the 60th Rifles, as subalterns.

NOTES FROM ALDERSHOT.

(FROM OUR CORRESPONDENT.)

The Wexford and Royal South Down Militia Regiments left the Camp early in the week for Wexford and Belfast respectively, on completion of annual training. The conduct of these two battalions while here has been excellent. It was feared by some that their presence at the Camp would be the cause of disturbance; but such has not been the case, and their behaviour and general demeanour, in camp and town alike, has earned for them the good opinion of all, both military and civil. Indeed, as much may be said of all the battalions of Militia assembled here for training up to the present time. The Camp has been singularly free from crime during the past two months, and the Military Police have had but little to do. In the autumn of last year a couple of depôts of lads, with no non-commissioned officers of experience to control them, too young for service in the field, but old enough for stone-throwing and window-breaking, gave more trouble (though no one was injured) than all the 14,000 men assembled during the present month. It has been promulgated in Divisional Orders that H.R.H. the Field-Marshal Commanding-in-Chief has directed that the attention of commanding officers be called to a strict compliance with the instructions laid down by clause 153 of Army Circulars, 1882, and that reports be at once furnished as to whether worn boots which are not of regulation pattern are being given up to the contractor. It may well be that boots of a non-regulation pattern find their way into the contractors' hands. Many soldiers provide themselves with an extra pair of decent-shaped boots, generally spring-sides, for walking out on their own pleasure bent, and probably some worn boots of this pattern may have got mixed with the "ammunitions." I do not believe, however, that the contractor, who pays the large sum of about one penny per pair for them, is thereby wronged. The idea in the official mind is probably that such non-regulation boots are being worn on parades and during field-days by the troops. The 7th Grand Army Athletic Meeting was held here on the afternoons of Wednesday and Thursday. The days were observed as half-holidays, all offices being closed at noon, the men's dinners ordered earlier, and all parades, drills, and fatigues suspended. The numbers present did not seem to be up to that of former occasions, which is probably owing to the fact of there being fewer visitors than usual from London, where they have been surfeited with military athletics lately. On Wednesday the rain fell heavily and coldly, which greatly marred the proceedings. Her Royal Highness the Duchess of Connaught will present new colours to the Oxford Militia next week. A meeting was held in the Divisional Court-martial Room, Q Lines, South Camp, on Monday, at which were present representatives from all corps and departments in the command, when arrangements were made for giving a grand farewell ball to Sir Daniel and Lady Lysons, at the Officers' Club, at the end of July. Major-General Sir Frederick FitzWygram, Bart., presided. The dozen brick "huts," which have been in course of construction in A and B Lines, North Camp, during the past eighteen months, will be pronounced fit for occupation on Monday next. These new quarters provide accommodation for about 500 men; thus far has the reconstruction of the Camp gone. A combined minor operation came off on Tuesday last, under the following general idea:—"A force, operating northwards from Farnham, receives orders to seize and fortify a crossing over the canal. The canal, for the purpose of this operation, is supposed to be impassable, except at two fords, practicable for cavalry only. These fords will be represented by the bridges at Eelmoor and Aldershot Wharf." Colonel Vincent, 3rd Hussars, commanded the southern force, operating from Farnham, consisting of 200 Cavalry, 6 guns, 2 sections Engineers (with pontoons), and 500 Infantry. Lieutenant-Colonel Jones, R.E., commanded the northern force, defending the fords, consisting of 150 Cavalry, 6 guns, 1 section Royal Engineers (with pontoons), and 500 Infantry. The operations commenced shortly after 10 a.m., by signal from the chief umpire, Sir F. FitzWygram, Bart., and were of a most interesting character, but terminated rather abruptly about noon, some dispute having arisen in the matter of opening fire by the Artillery on a pontoon bridge in course of construction, in contravention, as alleged, of the umpire's rules, specially issued for guidance in these matters. Sir Daniel Lysons and Staff were present at the operations, and rain fell freely during most of the time. The following officers will assemble at the Gymnasium, North Camp, on Tuesday next, for examination by a special board of officers, in subjects *(c)* to *(e)*, paragraph 28, section 4, Queen's Regulations, for promotion:—Majors Cotton, 62nd; Daubeny, 18th; Captains Dickenson, 60th Rifles; Josselyn, R.H.A.; Barrow and Railston, 26th; Gillon, 71st; Warde and Trench, 19th Hussars; Peckham, 3rd Hussars; Holland, 15th Hussars; Whalley, 39th; Spurgin, 21st; Maclear, 3rd Buffs; Hannay, 93rd Highlanders; Hogarth, 25th; Garfit, 67th; and Le Marchant, 39th; Lieutenants Trench, R.H.A.; Hotham, 26th; Doyle, 85th; Littledale, R.E.; Patterson, 3rd Hussars; Pocklington, 15th Hussars; De M. Thuillier and Fetherstonhaugh, 26th; Lysons, V.C., 90th Light Infantry; M'Calmont, 6th; Davis, 96th; Lynch and Bray, 66th; Wedderburn, Royal Artillery; Deputy-Assistant-Commissaries-General Stokes and Bridge, Commissariat and Transport Staff. The South Middlesex, 1st Surrey, and 2nd Middlesex Militia will leave Aldershot by three special trains to-day (Saturday), for Hounslow, Kingston-on-Thames, and High Barnet, respectively, on completion of annual training. The Army Schools of the Division will be closed for holidays during the month of July. Surgeon H. E. R. James, A.M.D., is held in readiness for foreign service. Captain J. W. Hawkins, R.A., has been ordered to Aldershot for duty. A divisional field-day was to have been held yesterday. H.R.H. the Duke of Connaught had been told off to command the defending and Major-General Willis the attacking force. The attacking force marched out of camp at 8 o'clock, and took up a position at Crondall, but, owing to the excessive heat, it was wisely decided to cancel the original order, and General Willis was directed to return with his men as quickly as possible. A "combined minor operation" of the three arms has been ordered for Tuesday next, the "idea" being the defence of the passages of the Basingstoke Canal, by the rear-guard of a force retreating across the Long Valley, against the advance-guard of an army advancing from the direction of Farnham. As the object of these exercises is instruction in the tactical handling of the three arms combined, both with reference to ground and the position of an opposing force, the idea is made as simple and specific as possible, and does not admit of anything in the nature of strategical movements, which such small bodies would rarely be called upon to execute. The exercises are, therefore, confined to the attack and defence of a defined position, such as a wood, a group of houses, a marked feature of the ground, or, as in this case, the conduct of an advanced or rear-guard. Quartermaster W. Goulding, R.E., has been ordered to this station for duty. Quartermaster A. Lewis, R.E., has been ordered to Chatham for duty. The departure of this officer (recently promoted from troop serjeant-major) to another station, is regretted here. He is held in much esteem by all ranks in the corps, and although promoted over the heads of some 150 of his seniors, owes his elevation entirely to merit. A well-known officer of his corps recently observed that no one in the Engineers better deserved promotion than Mr. Lewis.

ANNEXATION OF ISLANDS IN THE WESTERN PACIFIC.

The suggestion of the several Administrations in Australia for the annexation of the New Hebrides, Solomon Islands, and other groups in the Western Pacific, following closely on the proposal of Queensland in New Guinea, are expressions of colonial opinion which have long existed, and now ventilated in consequence of the attitude of France in her attempt to become a "First-rate Colonial Power." Although the acquisition of those groups by the Imperial Government, for the benefit of Australia, is not an undertaking which would be endorsed by every Englishman, still there are considerations which must carry great weight with the public, were they carefully discussed and judiciously legislated for. The Solomon Islands and New Hebrides have become notorious of late years in the frequency of the attacks made by the native savages on the crews of trading vessels, and those employed in the "labour traffic" of Queensland and Fiji. Some of the masters of vessels have, by their bearing and dealings with the natives, made the different places "hot for themselves," and thus induced retaliation; while, on the other hand, many honest merchant skippers have been slaughtered in cold blood, merely for the sake of plunder. In 1880, the Lieutenant-Commander and boat's crew of the Sandfly were butchered at the Solomon Islands, to gratify the savage lust for the white man's skull and the inherent longing for his property. Fortunately, the Captain of one of the Australian Squadron was able to capture and execute the murderers; and undoubtedly such a lesson was not soon forgotten, though we cannot expect that the impression will be lasting. It is improbable that a similar misfortune will happen to Imperial officers and men, still the lives of British subjects are always in jeopardy, and the trade with the Islands materially affected. Mercantile enterprise can find but a poor field when such fearful odds are pitted against life, the ships' crews overpowered and eaten by cannibals, and the cargo divided amongst the assailants. That these murderous attacks will be repeated, from time to time, if repressive measures are not adopted, has been frequently urged for some time past by the leading Australian journals; therefore, if the Home Government will not undertake action both permanent and complete, the colonies themselves must necessarily resort to self-protecting their external interests. Past legislation for the punishment of outrages by these cannibal pirates has been desultory and insufficient. The action of Naval officers has been hampered by the control of Civil and Judicial functionaries, who had but a paper acquaintance with circumstances and localities, and attempted legislation in affairs which should have been left entirely to the Executive. The Western Pacific Islands will continue a source of trouble to our Australian colonies as long as savage humanity is allowed to wield his tomahawk uncontrolled; and as we are his nearest neighbour, we ought to teach him to keep his house in order. That the race will die out is undeniable, but as several generations must pass away before such a realisation, the duty is incumbent on us to take the nation in hand and rid their country of lawless aggression. Annexation is the only solution of the difficulty. It would remove the trouble which Naval officers encounter in carrying out the complicated instructions under which they act in dealing with these savages, and prevent all doubt in meting out punishment to offenders. The importance of the Australian colonies as a support to the national greatness is lost sight of in the busy turmoil of home and foreign politics. Since they were accorded "responsible government," Imperial administrators have allowed them to run their own course, without considering the importance they would eventually attain. That a great nation is springing up at the antipodes is undoubtable. Facts point thereto when the Treasurer of New South Wales, in making his yearly statement, informed Parliament that the income would be six millions, that at the end of the current year a surplus of two millions would exist; and, that the Public Debt of 15 millions was more than covered by the railways alone, valued in the English market at 25 millions. The other colonies can show similar prosperity, especially Queensland and South Australia. In the face of such pecuniary advantages, it is impossible to deny them every consideration. They ask for the annexation of the Western Pacific Islands on very justifiable grounds, and would partake in the expense attendant thereon, in a manner similar to that proposed by Queensland with regard to New Guinea. Such a step would necessitate an increased Naval force, but the additional outlay would willingly be shared by the Colonial Exchequers, in support of so important an undertaking. From their insular position, these great colonies will develop into large maritime countries, and therein is the nucleus of a fighting element. The time may not be far distant when, under Imperial supervision, cruisers, colonially manned from the different ports, will constitute a portion of her Majesty's Naval forces in Australian waters. By such means a well-disciplined defensive force for these grand possessions would be assured, and the certainty of being able to withstand foreign aggression provided for. One significant fact arises with this proposition of annexation; it shows that the people of these valuable colonies are feeling a power which will, in the future, develop itself sufficiently to demand a place in the councils of this great nation. The affections of such people should be in no way estranged from the mother-country, and the ties which hold them should be drawn closer, by making their interests identical with our own.

Obituary.

Gen. F. D. Atkinson, Bengal S.C., died on Saturday at Holmesdale, Worthing, aged 66. The deceased entered the Army in 1833, and obtained a lieutenant's commission in 1840. He was promoted to a captaincy in 1847, became major in 1859, lieut.-col. in 1861, brevet col. in 1866, major-gen. in 1877, and lieut.-gen. in 1881. He served against the hill tribes in Scinde under Sir Charles Napier.

It has been decided to employ a certain number of men of the Army Reserve and pensioners as parcels deliverers, or on other duties connected with the new parcels post. The wages of men so employed will vary from 16s. to 18s. a week, in addition to their reserve pay or pension. No man will be employed whose character, as shown by his parchment descriptive return (if an Army Reserve man) or discharge certificate (if a pensioner) is not at least "Good." Men desirous of being employed should apply (in writing) to the postmaster of the nearest head post-office, enclosing their descriptive returns, or discharge certificates, as the case may be, and stating their ages and present occupation. They should also give as references the names and addresses of persons or firms to whom they are known, or by whom they may have been employed since eaving the colours. They should further state whether they are willing to take employment away from the place they live in. The name and address of the head postmaster to whom these applications should be sent can be ascertained by inquiry at any post office.

SPECTACLES *v.* BLINDNESS.—"Spectacles can only be perfectly adjusted by those having a thorough knowledge of the anatomy of the eye, combined with optical experience."—We have the highest medical authorities confirmed by daily experience, that imperfect glasses, together with the haphazard plan of selection generally employed by the mere vendor, is the cause of most cases of blindness and defective vision. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but the spectacles you have adapted suit admirably. The clearness of your glasses as compared with others is really surprising." The Rev. Professor W. A. Hales, M.A. Cantab., 2 Minford Gardens, West Kensington Park, writes:—"The spectacles are perfect, and a most decided boon. I had occasion on Monday to write to Lord ——, and took the opportunity to mention your name and the wonderful power of your spectacles." Dr. Bird, Chelmsford, writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age (82). I can now read the smallest type, although suffering from cataract on the right eye." Testimonials from Earl and Countess Lindsay; F. D. Dixon Hartland, Esq., M.P.; the Venerable Archdeacon Palmer, Clifton; Rev. Mother Abbess, St. Mary's Abbey, Mill Hill, Hendon; C. J. Alford, Esq., Gas Light and Coke Company, Horseferry Road, Westminster, &c. Mr. HENRY LAURANCE, F.S.S., Oculist Optician, 39 OLD BOND STREET, W. (late 3 Endsleigh Gardens, Euston Square), personally adapts his Improved Spectacles daily (Saturdays excepted), from 10 to 5. Special arrangements are made for invalids and others unable to wait on Mr. Laurance. Pamphlet, "Spectacles: their Use and Abuse," post free City Branch, 6 Poultry, Cheapside.

THE WAR IN THE SOUDAN.

We are enabled to publish the following as a copy of Gen. Hicks's despatch to the Egyptian Minister of War, after the battle of Marabia:—

"Near Gebel Ain, Soudan, May 6, 1883.

"To his Excellency, Omer Lufti Pasha, &c., Minister of War, Cairo. Excellency,—You will have received through the telegrams from me, which I requested might be communicated, and from those of H.E. Aliadin Pasha, the Governor-General of the Soudan, the intelligence of our victory over the rebels near Marabia. On account of the great difficulty in obtaining any information, I preceded the main body of the army on its leaving Kana, and with a small force proceeded up river to reconnoitre, and to take possession of the ford at Abu Ted. On arrival at the ford, I found it in possession of a small body of rebels, which I had no difficulty in dislodging. On April 23 I remained there, placing the boats which I had brought up with me, containing Bashi-Bazooks, under the command of Jahier Bey (who is an excellent officer), in échelon, across the stream, in which position they could command a very considerable length of the ford, which extends about one mile, and support one another in case of an attempt at a forced passage. Having made these dispositions, I left on the morning of the 24th for a reconnaissance up to Gebel Ain. On reaching the Arnbatch Wood, to the south of the ford, I discovered a large number of stacks of Arnbatch, ready cut and prepared for raft-making on an extensive scale. A party was landed, and the whole of them were burnt. These stacks had evidently been prepared by the rebels for use in the event of their being obliged to cross. On proceeding up river, we found the banks occupied by straggling groups of Arabs, with whom we exchanged shots. On the 25th, I visited the Shillock village of Musran, having already arranged with the chief for information to be obtained of the enemy's movements. I learnt here that the rebels had left Gebel Ain, and were marching in force under Amer Makushfi, and many Dervishes, to attack the 'Turks' on our march from Kowa. Having ascertained that this information was correct, I steamed back to the ford, warned Jahier Bey, and during the night dropped down the river to join the army. I found the army at the north end of the island of Abba, and, with Col. Farquhar and Capt. Evans, joined it. In the evening, the rebel cavalry appeared, and was driven back with a few shells. On April 27, we received information from a spy, whom we captured, and also from other scourers, that the enemy intended to attack us that day, so as we were in a good open position, and in front the country was wooded and unfavourable, I determined to remain and await attack; but the night passed, and with the exception of a few false alarms, nothing occurred. We advanced on the 28th. On the 29th, before we had reached the unfavourable ground, Col. Farquhar, whom I had sent with a few native Bashi-Bazooks to reconnoitre, returned with the information that the enemy were about two miles in our front, and were advancing at a rapid pace. In about a quarter of an hour after this they appeared in considerable force, cavalry and infantry, and spread out round our flanks with a view of surrounding our square; they then advanced steadily and quickly, led, we could see, by several chief men on horseback, with banners borne before them. There was some delay and difficulty in getting our guns into action, but at last this was effected, and the range being accurately estimated at once, the very first shell burst in the centre of some cavalry; a second was also effective, and seems to have caused them to move rapidly off to our right flank, and eventually off the field, for they appeared no longer as a compact body. The Infantry still came on boldly, and although shot down in numbers succeeded in getting close enough to the square to throw some spears into it. There were not many armed with rifles, but two of our men were killed by rifle shots. I fancy the enemy fired high, as I am afraid our own troops did, to a considerable extent. The action lasted about half-an-hour, and the troops of his Highness behaved steadily and well. I estimated the strength of the enemy attacking us at the time to be between four and five thousand, but I have reason now to believe I much underrated it. The enemy's loss in killed was about 500 (with the Makushfi, and six other chiefs), and the wounded many. Our loss was trivial, viz., two killed and five wounded. Had I only had some cavalry, we could have inflicted severe loss, as the enemy was completely broken up, and fled in confusion. The difficulty I experience for want of cavalry is great; it is not possible to scout, nor to obtain or keep touch with the enemy. I had, I thought, raised a small dromedary corps for this purpose, but the animals turned out weak and slow, and useless. The scouting has to be done by the English staff, with a few native Bashi-Bazooks mounted on ponies. Lieut. Ali Effendi, of the Etat Major, now employed as an engineer under Shukeri Bey, accompanies Col. Farquhar on this duty, and does good service. I shall have to mention Ali Effendi's name to your Excellency in connection with another circumstance, and recommend him for promotion to Captain, which I hope may be granted. I am afraid that with the formation in which it appears necessary for the troops to march, as well as fight, we should never find the enemy unless he came to attack us (which, fortunately, he is good enough to do). The army in this formation can scarcely accomplish eight miles a day, six miles is the usual march, and consequently, it is impossible to strike a blow excepting when and where the enemy pleases. After the action near Marabia, I concluded that the rebels would send the news of the defeat as quickly as possible to Gebel Ain, and that an immediate attempt would be made to cross the river at some point beyond the ford (which was occupied) and Gebel Ain, so on reaching Gozabon Goome, where I had ordered a steamer to await me, I took two Nordenfelt guns and a few men on board, and started up river, picking up a boat with 90 Bashi-Bazooks *en route*. As I anticipated, I found (May 1) the rebels in large numbers crossing the river, about 10 miles this side of Gebel Ain, a regular place of passage. I drove them inland from both banks with some loss. Numbers had already crossed, but a large body was still on the eastern bank, with camels and baggage, and had to return. I sent to his Excellency Suleiman Pasha, requesting a rapid advance, when all these rebels and baggage animals, &c., would fall into his hands. The rebels were thoroughly disorganised, and would throw down their arms, but, with no cavalry and the infantry marching so slowly, his Excellency has apparently found it impossible to reach the place, 12 miles from his camp, under two days. I have since this twice visited Gebel Ain and landed and sent men up the mountain; they report not a sign of a rebel to be seen. The Shillocks also report the country evacuated. His Excellency Suleiman Pasha is very anxious to march to Gebel Ain, as he thinks the Arabs who inhabit that part of the country should see it is possible for an Egyptian army to march through there; so I shall await to meet his Excellency at Gebel Ain. Our after movements will depend upon circumstances and information, and will be duly communicated to your Excellency. It was my intention at first to cross over to the Kordofan side at the ford, and march down the bank towards Duen, but there appear to be no party of rebels assembled now at any place between this and Shag, and to make this long march, with the Army able to get along no faster than six miles a day, would take so long, that the whole of Kordofan would have time to concentrate, when and where convenient, and we might find ourselves in a position of having either to retreat, or undertake the campaign in Kordofan before we were prepared for it, either of which contingencies would be undesirable. Congratulating your Excellency upon the success, which I am convinced has had a great effect throughout the country, I have the honour to be your Excellency's obedient servant, W. HICKS, Major-Gen., Chief of the Staff.

"Names of the chiefs reported killed at the action near Marabia on April 29, 1883:—Amer-el-Makushfi (sent by the Mahdi from Obeid), Saleh Wald-el-Azawi, Sheik-el-Raki (sent by the Mahdi from Obeid), his son, Fadl Allah Wal-el-Kerif, Awad-el-Kerim, the brother of Wad-el-Berziog, Fadl-el-Moula Soleymon. I wish especially to bring Col. Farquhar's services to favourable notice. This officer has been indefatigable in the duty of scouting, for which he volunteered, and has afforded me very great assistance.—W. H."

Reviews.

Text-book of Gunnery. By Capt. G. Mackinlay, R.A. (Messrs. Clowes and Sons, Limited.)—Capt. Mackinlay, being an instructor in artillery at the Royal Military Academy, has been able to appreciate the difficulties which stand in the way of the student who is endeavouring to prepare himself for a military career in fathoming the mysteries of gunnery. He has, therefore, set himself to work to prepare a volume which will enable those who want to learn to acquire the knowledge they find it almost impossible to obtain. Great changes have taken place in the principles of gunnery during the last few years. Capt. Mackinlay has used as groundwork Col. Sladen's book, long since out of print, and having rewritten it, has placed once more in the hands of those who are aspiring to commissions in the Ordnance Corps a standard text-book which they can regard as an authority on all points connected with the study of gunnery. The author has done his work most carefully, and deserves the thanks of his students at the Academy for the pains he has taken in their behalf. But the book ought to have an extensive sale throughout the Army, as it treats on matters into which officers of all branches of the service would do well to obtain an insight.

Military Tribunals. By Lieut.-Col. C. F. Colvile. (Kegan Paul and Co.)—The Notes which Col. Colville has been induced to publish for the benefit of military aspirants were originally prepared for the use of the students at the Army College, Abingdon, with which institution Col. Colvile has been for some time connected. They are simply an explanation of the Army Act, and are strung together in such a manner as to render them specially valuable to those who are pursuing a course of study unaided by a "crammer," as they put all the intricacies of the Act forward in a concise form, and show at once the application of it under all circumstances.

The under-mentioned guards for the protection of public buildings in London have been reduced from the 23rd inst.:—Buckingham Palace guard: one subaltern, two serjeants, two corporals, one drummer, and twenty-four privates. Tylt Yard guard: One subaltern, one serjeant, one corporal, one drummer, and nine privates. The National Gallery guard and the sentry at the Irish Office are discontinued from the same date.

The Duke and Duchess of Albany have consented to distribute the scholarships and prizes to the pupils of the Royal School for Daughters of Officers of the Army, at Clarence House, Roehampton, on Friday, July 20.

The annual inspection of her Majesty's Bodyguard of Yeomen of the Guard took place on Tuesday in the Corridor of St. James's Palace, in the presence of the Duke of Connaught and Strathearne. The parade was under the command of Lord Monson, the captain. The following officers of the corps were present:—Lieut.-Col. Sir Arthur Need, the Lieutenant; Col. the Hon. W. J. Colville, the Ensign; and Capt. Morley and Lieut.-Col. F. Baring, the Exons. The Duke of Connaught arrived at 1 o'clock, attended by Col. Clarke, and was received with a Royal salute, after which his Royal Highness minutely inspected the ranks, and expressed himself highly pleased with the appearance of the corps.

"TIME TRIES ALL THINGS."—Of the numerous preparations announced for promoting the growth of the hair few survive, even in name beyond a limited period, whilst ROWLAND'S MACASSAR OIL, with an unparalleled reputation of more than 80 years, is still considered by the public to be the best and safest preserver and beautifier of the hair ever yet produced. They who prefer it can now have the oil of a golden colour, without in any way losing its beneficial effects. Sold everywhere. Sizes, 3s 6d, 7s, 10s 6d, and 21s.

THE LOSS OF THE LIVELY.

A court-martial assembled on Monday on board the Royal Adelaide at Devonport, Capt. Richard Carter presiding, to try Com. Alfred A. C. Parr, Lieut. Andrew S. Mills, Navigating Officer, Sub-Lieut. Harry H. Stileman, officer of the watch at the time the ship struck, and the rest of the officers and crew of the Lively, for the loss of their vessel upon the Hen and Chickens, near Stornoway, on June 7, while conveying the Royal Commissioners, of whom Lord Napier was chairman, round the islands lying off the Scotch coast, to investigate certain cases of refusal to pay rent. Staff Com. Gravener, of the Vivid, was the first witness examined, with a view to proving the meaning of the Admiralty Instructions and Queen's Regulations with reference to the duties imposed on commanding and navigating officers when a pilot is in charge of their ship. This officer was also requested to fix the position of the Lively prior to and at the time she struck, and, after having done so, he stated to the court that he was of opinion that, had the sailing directions for this part of the coast been followed, the Lively would have cleared the Hen and Chickens. Putting aside all question of the pilot, he was of opinion that the navigating officer of a ship was bound by every means in his power, by observation, by cross-bearings, and by paying attention to the sailing directions, to keep his ship clear of danger.

Com. Parr was then called, and, having been duly cautioned and sworn, deposed that he was below with the Commissioners at the time the Lively struck, believing the ship to be perfectly safe in the hands of the special pilot appointed by the Admiralty to navigate her while employed on this special service. There were no leadsmen in the chains, because they were useless at the speed at which the ship was going, and to enable them to be of use, her speed would have had to be greatly reduced, and he had to consider whether he was justified in delaying the work of the Commissioners by taking what might have been considered useless precautions, when it was remembered that the ship was in charge of a special pilot appointed directly from the Admiralty. He believed the cause of the disaster to be that the pilot steered in-shore, to place the ship in smooth water, for the convenience of Lord Napier, who was sea-sick, and that, in nearing the Hen and Chickens, he misjudged his distance, and hauled out too late. The rocks could not be seen, because it was the top of high-water, and the sun was on the horizon. He considered the navigating officer and the officer of the watch responsible for the safety of the ship when he was below. In his absence from the deck, they should have taken due precautions to prevent the possibility of the pilot running the ship into danger. He believed the pilot was asked the position of the Hen and Chickens before the Lively struck, and that he pointed out a spot astern, stating that the danger had been passed.

Lieut. Mills, Navigating Officer of the Lively, was next called and examined. He paid every attention to the navigation of the ship, and asked the pilot where the Hen and Chickens were, receiving the reply that the rocks had been passed. He was officer of the last "dog-watch." He had every confidence in the pilot, who had been specially appointed for the occasion by the Admiralty. He, therefore, did not consider any special precautions necessary, and his keeping watch also relieved him of his responsibility as Navigating Officer. Regarding the Admiralty Instructions, it was his opinion that they referred to ships taking ordinary pilots on board, but not to ships placed in charge of a special pilot by the Admiralty. He, therefore, went down to dinner during his watch, as was customary on board for the officer of the watch to do. He, nevertheless, watched the pilot as carefully as possible. He had written to the Admiralty on the pilot being appointed, but was informed that the Admiralty declined to alter their decision or cancel the appointment of the special pilot. After that, they worked amicably together. He had learnt to have every confidence in the pilot, and rendered him all the assistance in his power. He was in no manner influenced by their Lordships' appointment of a special pilot to less closely watch the navigation of the ship. On the contrary, he paid more attention to it than he otherwise would have done. Had no special pilot been on board, he would not have kept the last dog-watch. He would then have remained on deck, and would not have gone below to his dinner, but would have taken steps to get his dinner when the ship was clear of all danger. Being officer of the watch, he did as they did, the special pilot having charge of the navigation of the ship. Had he considered that the safety of the ship required his remaining on deck, nothing would have taken him below.

Sub-Lieut. Stileman, the officer of the first watch when the Lively struck, was next examined, and stated that, the special pilot having received the permission of Com. Parr to alter course when necessary, without reference to any one, he did not report the alterations of course to Com. Parr. He had no "look-out men" placed, because he was looking out, and leadsmen were never sent into the chains until speed was reduced, when going in or out of harbour. They then were ordered into the chains by Com. Parr. He trusted the special pilot in regard to the navigation of the Lively, and did not interfere with him.

John M'Donald, the pilot in question, said he was not a licensed pilot. There was no compass course steered after 8 p.m. on the night of the disaster. He detailed the courses which he followed, and stated that on getting into smooth water, after passing Grother Rock, he hauled the vessel's head off for Stornoway Point, so as to clear the Hen and Chickens. No one gave him authority to alter the courses as he liked without reporting them to any one. His object in passing so close to Grother Rock was to get into smooth water, so as to allow Lord Napier to get up and dress. Asked how it was he placed the ship on the rocks, and how he accounted for giving Lieut. Mills the wrong position of the Hen and Chickens, he said that the light deceived him. At the time the Lively struck she was heading for Stornoway Point. He intended to pass outside the Hen and Chickens. It was high water at the time. He considered that after passing a quarter of a mile off Grother Rock, it would have taken the vessel over a quarter of a mile from the Hen and Chickens. He had piloted a number of coasting vessels into Stornoway. He never used any clearing-marks for the Hen and Chickens in the daytime. He accounted for not seeing any ripple on the sunken rocks by the sun being so near the horizon. He was engaged as pilot for her Majesty's ship Jackal a few days last winter. He never took the Jackal into Stornoway. He had never piloted a steamer from the north into Stornoway. He thought that he had allowed plenty of room for passing the rocks. He was aware that the Hen and Chickens were covered at the top of high-water spring tides. He steered from Grother for Stornoway Point. He was quite sure that he did not haul in towards the land before striking. The court was to understand that he was deliberately steering for a point which must lead the ship clear of danger. Asked what he meant by hauling out two points, he said he did it to get Lord Napier into smooth water.

Capt. Brackenbury: "According to his evidence, this man was steering a course to clear a danger, and yet he goes on it." I confess I do not understand it. The court was then cleared, and on reassembling, the witness was subjected to a severe cross-examination as to his statement, and his answers not being understood, Com. Parr was requested to explain the discrepancy in the evidence of the pilot, and he said,—I think there is no discrepancy. He has stated that before reaching Grother Island he hauled in to the land, so as to place the ship in smooth water, which necessitated his hauling out again, to clear the Hen and Chickens.

William Bennett, boatswain's mate, and John Hayter, helmsman on the night of the accident, corroborated Com. Parr, and gave a detailed account of the attempts made to save the Lively after she struck.

Lieut. Price, senior lieutenant of the Lively, and Mr. Shoolbread, chief engineer, detailed at length the unsuccessful attempts that were made to get the ship off the rocks, and expressed their belief that everything that could be done was done.

Mr. Dunn, assistant-constructor at the Admiralty, who was sent to Stornoway by the Admiralty, produced a sketch of the position of the ship after she struck. Knowing all the facts of the case, he considered that Com. Parr did everything that was possible to do under the circumstances to save the ship. He fully concurred with every step that Com. Parr took. Asked if he thought that anything further could have been done either with regard to the ship or the stores, the safety of the men being duly taken into consideration, he replied that he considered that to do anything further would have involved a waste of public money and endangered the safety of the men.

Com. Parr, in his defence, said that he wished to make it perfectly clear to the court that from the commencement of the cruise there was always present to his mind the fact that having a pilot on board did not relieve him from responsibility as to the safety of the ship, which he considered as of paramount importance. The pilot was appointed to the ship by the Admiralty against the wish of the lieutenant for navigating duties, and he therefore had to entrust the steering of the ship entirely to him, except on rare occasions. Although the pilot was on board against his wish, the lieutenant for navigating duties loyally assisted in the navigation. In regard to there being no leadsman in the chains, the lead was a subject which had received great attention from him, and if the exact letter of the Admiralty Instructions was not complied with on that occasion, their spirit was most fully carried out. Although the pilot was specially appointed by the Admiralty, and was everywhere spoken of in the highest terms, he, Com. Parr, had too much at stake to trust him implicitly, therefore he studied the chart most carefully, and never allowed the ship to be taken in any direction, unless he was convinced that it was safe to do so. If he had only once thought the pilot was steering by eye instead of by marks, he should have had reason to doubt him, but not only was his knowledge trustworthy, but his caution was extreme. The pilot was not well acquainted with the Shetlands, and had mentioned this to the lieutenant for navigating duties, but they had come to the conclusion that they could take the ship where necessary without assistance. The engine-room telegraph was, with hardly an exception, worked by Lieut. Mills, and when there was any difficulty in turning the ship he always took charge himself. Everything with the ship worked most smoothly. There was a regular understanding among the officers, who knew their duties thoroughly and carried them out to his entire satisfaction. Taking everything into consideration, and there being on board a pilot specially appointed by the Admiralty, in whom he had reason to place confidence, and also good and trustworthy officers, was it too much of him to expect, when he went below, that the ship would be brought in safety into Stornoway Harbour? There was but one danger in the way for many miles, but there was plenty of sea-room to avoid it. He had to judge before the event, and in so judging it was impossible for him to believe that there was any possibility of danger.

Lieut. Mills said that the pilot won the confidence of all on board. He was always quiet and cool and with a judgment that he had never seen equalled. When he went below, shortly before the disaster, it was with a feeling that all was well. It had been asked why he did not leave directions to be called when the course was altered. Had he been navigating officer in charge the course would not have been altered without his knowledge, and in the present case he knew the course would only be altered by one supposed by the Admiralty to be his better as a pilot. Continuing, he said:—"And, gentlemen, it was one of two things—either to believe or to ask the officer of the watch to stop the ship while I obtained very accurate cross bearings; as on the small-scale chart the bearings would have to be very accurate to prove that the ship would not clear the rocks, and I cannot think that the captain of any of her Majesty's vessels of war would have taken such extreme measures on being assured by a pilot, specially appointed by the Admiralty to navigate the vessel, and in whom he had every confidence, that he had passed the danger. I must beg of you to let me explain one statement made by me, viz., as regards the navigating officer and the officer of the watch. What I meant was this, that if a navigating officer really goes in for doing his duty as such, and is not merely content with the regulation chronometer and meridian altitude and course so-and-so, that keeping watch must to a great extent interfere with the strict performance of those duties, such as constant attending to the deviation of the compass, and other helps which tend more completely to insure the safe navigation of the ship. In conclusion, I would beg most respectfully to submit that in my opinion the actual cause of the disaster was the presence of a man who was specially appointed on account of his good qualities and high recommendations, who had proved himself worthy of that appointment, and who, from some unfortunate error in judgment or otherwise, directed the ship to be steered for a point of land sufficiently far, as he thought, to the southward to clear the Hen and Chickens." Lieut. Mills said he was fully satisfied as to the capabilities of the pilot. Asked what his reasons were for getting rid of the pilot, he said: "In the first place, I am very fond of pilotage, and did not care to see another man taking charge of the ship; and I must confess that I consider he was also depriving me of the allowance which would otherwise have been granted to me."

Com. Parr said that he would willingly take Lieut. Mills as navigating officer wherever he went, while both prisoners gave Sub-Lieut. Stileman a good character as officer of the watch.

Sub-Lieut. Stileman, officer of the watch at the time of the disaster, said, with respect to the leadsman not being in the chains, he was simply carrying out the captain's orders on that subject. He knew that the leadsman was in readiness, and that the lead and line were clear. He had seen that the cables were clear and the anchors in readiness for letting go. He had also kept himself informed of the position of the ship on taking charge of the deck, and while passing down the coast, although she was in the hands of an experienced pilot, specially appointed by the Admiralty to navigate the ship, and in whom he had reason to believe, both from his previous performances and from his assuring conversation about the coast they were then passing along. He also wished to call attention to the fact that when in the vicinity of the Hen and Chickens, he asked the pilot to point out to him their position, and was quite satisfied, by his answer, that the safety of the ship was in no way in danger. He was also standing close by when Lieut. Mills put the same question to him, and heard his answer, and saw the direction in which he pointed. At the time the ship struck he was standing on the starboard side of the bridge, before the paddle-box, keeping a good look-out, and could only account for not having seen the ripple on the rocks by the fact of the red glare thrown on the surface of the water by the rays of the sun, which was at the time setting right ahead.

The court then deliberated for nearly two hours. On its reassembling, having sat from Monday to Thursday, the Deputy-Judge-Advocate read the finding of the court, which was as follows:—The court having found that her Majesty's ship Lively was wrecked through an error in judgment on the part of the pilot, Mr. John McDonald, in not allowing sufficient room to clear the danger known as the Hen and Chickens Rocks, and that Com. Parr, Lieut. (for navigating duties) Mills, and Sub-Lieut. Stileman neglected their duty on that occasion by omitting to observe with accuracy and attention the conduct of the pilot in the navigation of the ship, thereby failing to discover the error he was committing, and which resulted in the loss of the ship, the court having further found that subsequent to the Lively striking the rocks, the commander and all under his command did all that was possible to save the ship and stores, adjudges the said Com. Parr and Lieut. Mills to be severely reprimanded and dismissed from their ship, and Sub-Lieut. Stileman to be reprimanded.

A correspondent at Stornoway, telegraphing on Thursday, says:—"Yesterday's gale has made great havoc with the wreck of the Lively. From an inspection made this afternoon from Chicken Head, it appears that the forepart of the steamer to the extent of about 40 ft. forward of the funnels had parted, and is now ashore on a rocky cave at Chicken Head. The foremast broke off to-day about 20 ft. from the deck, and it is believed that it would be quite possible to tow this portion of the wreck to Stornoway. The aft portion of the Lively still remains on the rock, but with the exception of the mainmast nothing can be seen of it. Both funnels have disappeared, having apparently been swept away. So heavy were the seas striking the Lively yesterday, that they slewed her stern round about eight points towards the shore. The coast in the vicinity of the wreck is strewn with pieces of wood like matchwood from the wreck, and it is surprising how long the remaining portion has been on the rocks. It shows that the Lively was built of the very best materials. There were several offers sent from Stornoway for the Lively, but they were withdrawn last night by telegrams to the Admiralty, when it was known that the steamer had broken up."

The *Morning Post* says:—"The command of the 3rd Infantry Brigade at Aldershot, which will shortly fall vacant on Major-Gen. the Duke of Connaught proceeding to India, will, it is understood, be bestowed on Major-Gen. Hugh Rowlands, V.C., C.B., who commanded the brigade during his Royal Highness's absence in Egypt."

The announcement made in the *Times* of the 16th inst. that the Duke of Connaught will, next spring, succeed Lieut.-Gen. the Hon. Arthur Hardinge, as Commander-in-Chief in Bombay, is officially denied in India.

"Please send another 14 lb. barrel of LENTILLA, an excellent FOOD TONIC of which I cannot speak too highly. I fully endorse all said in its favour.—Yours truly, H. H. Brooks, Tinwell Grange, near Stamford." Cures indigestion, dyspepsia, constipation, liver and stomach complaints, &c. Tins, 1 lb., 1s 6d; ½ lb., 10d. Barrels, 28 lb., 30s; 14 lb., 16s. Of all chemists. Proprietor, H. J Deacon, Beckenham, Kent.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE. PALL MALL, June 26, 1883.

The Duke of Edinburgh's (Wiltshire Regiment)—Lieut.-Gen. J. A. Ewart, C.B., to be Col , vice Gen. the Right Hon. Sir W. T. Knollys, K.C.B., transferred to the Scots Guards (May 26).

4th Dragoon Guards—Lieut. H. M. Pickthall resigns his commission.

6th Dragoon Guards—Lieut. C. H. Tye, Adjt., to be Capt., vice C. Sandes, seconded (May 26).

12th Lancers—Capt. G. W. H., Lord Vernon, resigns his commission.

19th Hussars—Lieut. J. D. M. Guthrie to be Capt., vice W. P. Warner, resigned (March 7).

20th Hussars—Lieut. R. J. E. Oliver-Bellasis to be Capt., vice A. W. N. Thomas, seconded (June 1).

Scots Guards—Lieut. and Capt. Sir A. R. T. Willshire, Bart., to be Capt. and Lieut.-Col., vice F. L. Campbell, seconded (May 18); Lieut. F. S. Barton, from the 2nd Dragoon Guards, to be Lieut., vice F. P. F. Vane, resigned.

LINE BATTALIONS.

The King's Own (Royal Lancaster Regiment)—Lieut. T. De la Rue, Adjt., to be Capt., to complete establishment (May 30).

The Royal Warwickshire Regiment—Capts. F. L. Grundy to be Major, vice Brevet Lieut.-Col. G. de C. Morton, seconded for service on the Staff (April 3); N. F. Mansergh to be Major, vice F. L. Grundy, seconded for service as an Adjt. of Auxiliary Forces (April 3) (since deceased).

The Norfolk Regiment—Capt. J. H. Sewell to be Adjt., vice Capt. E. B. James, promoted.

The Lancashire Fusiliers—Major H. R. P. Lindesay retires on retired pay, with the hon. rank of Lieut.-Col.; Serjt.-Major Henry Selby to be Qrmr., vice T. McKay, retired (June 20).

The King's Own Borderers—Lieut.-Col. and Col. A. S. Cameron, V.C., is placed on half-pay, on appointment to the Staff.

The Cameronians (Scottish Rifles)—Capt. H. de C. Rawlins to be Major, vice J. Campbell, retired (May 30).

The Welsh Regiment—Lieut. J. C. Reynolds to be Capt., vice J. O. Quirk, seconded for service with the Egyptian Army (June 2).

The Oxfordshire Light Infantry—Lieut. A. G. Scriven to be Capt., vice Brevet Major W. A. Gough, seconded (May 9); Qrmr.-Serjt. George Alfred Hirst to be Qrmr., vice N. Roxley, posted to the 3rd Battalion.

The Northamptonshire Regiment—Capt. C. L. Hornby retires from the service, receiving a gratuity, with permission to retain his rank, and wear the prescribed uniform.

The King's Own Light Infantry (South Yorkshire Regiment)—Capt. B. H. B. Kennett to be Major, vice A. S. Wynne, seconded for service with the Egyptian Army (June 13); Lieut. H. Earle to be Capt., vice G. H. Denshire, retired (Feb. 14).

The Duke of Cambridge's Own (Middlesex Regiment)—Capt. A. A. Garstin to be Major, vice H. C. Hinxman, whose promotion has been cancelled (April 14).

The King's Royal Rifle Corps—Capt. M. C. Boyle to be Major, vice W. Forster, retired; Lieut. H. R. Lovett to be Capt., vice M. C. Boyle (both dated March 14).

The Duke of Edinburgh's (Wiltshire Regiment)—The promotion to the rank of Lieut., dated June 16, 1880, of 2nd Lieut. G. W. S. Fryer, is cancelled, he having been subsequently transferred to the Indian S.C., with an anterior date.

The Prince of Wales's (North Staffordshire Regiment)—Qrmr.-Serjt. Charles Howard to be Qrmr., vice A. Macqueen, retired.

The York and Lancaster Regiment—The second Christian name of Lieut.-Col. M. L. Elliot is Lettsom and not Lettson, as hitherto stated; Serjt. Edward Falconer Lynch-Blosse, from the Devonshire Regt., to be Lieut., vice W. Stewart, appointed a probationer for the Indian S.C.

The Highland Light Infantry—Lieut. W. F. Anstey to be Capt., vice W. Freeman, retired (May 30).

The Gordon Highlanders—Capt. and Brevet Major A. D. McGregor to be Major, vice H. F. Cotton, retired; Lieut. E. Gilpin-Brown to be Capt., vice Brevet Major A. D. Macgregor (both dated May 30).

Princess Louise's (Argyll and Sutherland Highlanders)—Lieut.-Col. and Col. A. C. Bruce, C.B., retires on full pay, with the hon. rank of Major-Gen.

The Royal Munster Fusiliers—Lieut. W. J. J. Kirkpatrick to be Capt., vice E. S. Evans, seconded (May 24).

Chaplains' Department—The Rev. Charles Freeman Reilly to be Chaplain to the Forces of the 4th Class (dated June 18, 1882, such antedate not to carry back allowances).

Army Pay Department—Staff Pymr. and Hon. Major W. Marvin has retired on retired pay, with the hon. rank of Lieut.-Col. (June 8); Pymr. and Hon. Capt. T. Bell to have the hon. rank of Major in the Army (June 22).

Veterinary Department—Inspecting Vet.-Surg. G. Fleming to be Principal Vet.-Surg., vice J. Collins, about to be placed on retired pay (June 28).

MEMORANDA.

Major-Gen. J. B. Spurgin, C.B., C.S I., retires on a pension, with the hon. rank of Lieut.-Gen.

Lieut.-Cols. A. C. Bruce, C.B., Princess Louise's (Argyll and Sutherland Highlanders), to be Col. (June 21); C. J. Moorsom, the East Lancashire Regt., to be Col. (June 27).

Qrmr., with the hon. and relative rank of Capt., J. G. Scott, 3rd Batn. the Oxfordshire Light Infantry, is placed on retired pay, with the hon. rank of Major (June 26); Qrmrs. T. Bayley, 4th Batn. the Prince of Wales's (West Yorkshire Regt.), to have the hon. and relative rank of Capt. (Oct. 19, 1882); W. Hunt, the Duke of Cambridge's Own (Middlesex Regt.), to have the honorary and relative rank of Capt. (March 26); T. H. Vickers, the Border Regt., to have the honorary and relative rank of Capt. (June 14).

Col. W. E. White, Madras S.C., has been transferred to the Unemployed Supernumerary List (May 31), (since deceased).

Assist.-Comy. and Hon. Lieut. W. Anderson, Madras Establishment, to have the hon. rank of Capt. (March 22).

RESERVE OF OFFICERS.

Lieut. J. B. Brady resigns his commission.

MILITIA.

WAR OFFICE, PALL MALL, June 26, 1883.

ROYAL ARTILLERY.

2nd Brigade, Southern Division—Lieut. W. A. Campbell-Briggs resigns his commission.

INFANTRY.

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Gerald Lindsey Appleyard, gent., to be Lieut.

3rd Battalion, the Royal Warwickshire Regiment—Lieut. W. H. A. White resigns his commission.

3rd Battalion, the King's (Liverpool Regiment)—Lieut. A. G. Coates resigns his commission.

4th Battalion, the King's (Liverpool Regiment)—George Chalié Harries, gent., to be Lieut. (June 13).

4th Battalion, the Devonshire Regiment—Capt. R. M. Marsh-Dunn, Retired List, to be Capt. (June 20).

3rd Battalion, the Prince of Wales's Own (West Yorkshire Regiment)—Capt. J. R. Tennant resigns his commission.

3rd Battalion, the Bedfordshire Regiment—Major and Hon. Lieut.-Col. G. B. Sharpe resigns his commission; also is permitted to retain his rank and to wear the prescribed uniform on his retirement.

5th Battalion, the Royal Irish Regiment—Major G. Hely resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

4th Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Capt. R. Bell resigns his commission.

3rd Battalion, the Royal Scots Fusiliers—Capt. G. R. Murray resigns his commission.

4th Battalion, the Worcestershire Regiment—Capt. T. King, from the 3rd Batn., to be Major; Lieuts. W. H. A. Croker, from the 3rd Batn., to be Capt.; R. Holden to be Capt.; Stewart Lygon Murray, gent., to be Lieut.

4th Battalion, the Essex Regiment—Major T. Prickett, 2nd Batn., to be Adjt., in succession to Major R. B. Bald, 1st Batn., whose term of service as Adjt. has expired (July 1).

3rd Battalion, the Sherwood Foresters (Derbyshire Regiment)—Capt. E. L. S. Charlton has been permitted to assume the surname of *Anne*, in lieu of that of Charlton.

3rd Battalion, the Duke of Cambridge's Own (Middlesex Regiment)—The under-mentioned Capts. resign their commissions:—W. M. Metcalf and C. S. Baker. Frederick Græme Batten, gent., to be Lieut. (July 2).

9th Battalion, the King's Royal Rifle Corps—Lieut. R. F. St. Leger resigns his commission.

3rd Battalion, the Duke of Edinburgh's (Wiltshire Regiment)—Qrmr. J. Gledden is placed on a retired allowance (July 1).

3rd Battalion, the Durham Light Infantry—Edward Salusbury Vaughan Grimshawe, gent., to be Lieut. (June 13).

4th Battalion, Princess Louise's (Argyll and Sutherland Highlanders)—Lieut. F. M. A. Murray-Honey resigns his commission; the Hon. T. H. A. E. Cochrane, late Lieut. Scots Guards, to be Lieut.

6th Battalion, the Rifle Brigade (the Prince Consort's Own)—Capt. R. Dowse resigns his commission.

8th Battalion, the Rifle Brigade (the Prince Consort's Own)—Lieut. G. H. Jones resigns his commission.

9th Battalion, the Rifle Brigade (the Prince Consort's Own)—Capt. E. Battersby resigns his commission.

4th Battalion, the Prince of Wales's Leinster Regiment (Royal Canadians)—Lieut. J. W. Ritchie resigns his commission.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, June 26, 1883.

Denbighshire—Capt. H. R. L. Howard, 16th Lancers, to be Adjt., in succession to Major W. Creagh, 7th Dragoon Guards, whose term of service as Adjt. has expired (July 2); Surg.-Major T. Eyton-Jones resigns his commission, also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement; William Jones, gent., M.D., to be Surg.

West Kent—Surg. A. R. Martin resigns his commission; also is granted the hon. rank of Surg.-Major, and is permitted to continue to wear the uniform of the regiment on his retirement.

Warwickshire—Capt. J. F. Green, 5th Dragoon Guards, to be Adjt., in succession to Lieut.-Col. W. R. Truman, whose term of service as Adjt. has expired (June 21).

1st West York—The under-mentioned gentlemen to be Lieuts.:—John Loxley Firth and Mark Firth.

MILITIA MEDICAL DEPARTMENT.

Surg.-Major W. S. Kerr, M.D., 3rd Batn. the Royal Scots Fusiliers, resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, June 26, 1883.

ARTILLERY.

1st Cheshire and Carnarvonshire—Lieut. R. W. Preston resigns his commission.

1st Cinque Ports—John Ernest Stilwell, gent., to be Lieut.

1st Edinburgh (City)—Acting Surg. D. Menzies, M.B., resigns his appointment.

1st Gloucestershire—Alfred Moxon Sydney-Turner, gent., to be Acting Surg.

1st Hampshire—Capt. R. G. Pinder resigns his commission; Acting Chaplain the Rev. C. M. Owen, M.A., resigns his appointment; the Rev. William Willcox Perrin, M.A., to be Acting Chaplain.

4th Lancashire—Acting Surg. F. R. Murray resigns his appointment.

5th Lancashire—Hon. Col. T. Wilson resigns his commission.

3rd Middlesex—Capt. A. W. Foxwell is granted the hon. rank of Major.

1st Newcastle-on-Tyne—Acting Surg. R. Young, M.D., to be Surg.

1st Northumberland and Sunderland—George Arthur William Ward, gent., to be Lieut.

The Tynemouth—Capt. J. Hodgson resigns his commission.

1st Sussex—Henry Long Woodroffe, gent., to be Lieut.

4th West Riding of Yorkshire (Sheffield)—William Ernest Hutton, gent., to be Lieut.

ENGINEER.

2nd Gloucestershire (the Bristol)—William Henry Benson, gent., to be Lieut.

1st Newcastle-on-Tyne and Durham—The under-mentioned Capts. resign their commissions:—S. Neville and L. A. Rooke.

RIFLE.

2nd Aberdeenshire—Adam Nicol, gent., to be Lieut. (supernumerary).

3rd Aberdeenshire (the Buchan)—John Joshua Smith, gent., to be Lieut.

1st Volunteer Battalion, Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. W. F. Payne resigns his commission.

1st Cheshire—Capt. J. Dean to be Major; Lieut. C. W. Simpson resigns his commission.

1st Cornwall (Duke of Cornwall's)—Lieut. F. C. Matthews to be Capt.

1st Edinburgh (the Queen's City of Edinburgh Rifle Volunteer Brigade)—Hon. Major and Adjt. W. Hills is placed on a retired allowance; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement (June 30).

2nd Edinburgh (City)—Lieut.-Col. J. Hope resigns his commission; J. Hope, Esq., late Lieut.-Col., to be Hon. Col. of the corps; Major W. U. Martin to be Lieut.-Col.; and Capt. D. Campbell to be Major.

1st Volunteer Battalion, the Essex Regiment—Lieut. I. J. H. G. Ibbetson to be Capt.

1st Flintshire and Carnarvonshire—Hon. Major and Adjt. J. O. J. Priestley resigns his commission, and is placed on a retired allowance; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement (July 2).

2nd Glamorgan—The under-mentioned officers resign their commissions:—Capts. E. W. Shackell, J. H. Jenkins, and Lieut. W. D. Williams.

2nd Lanarkshire—John Cochrane, gent., to be Lieut.

3rd Lancashire—Lieut. A. Jobling to be Capt.

6th Lancashire (1st Manchester)—James John Marsh, gent., to be Acting Surg.

1st Volunteer Battalion, the Lincolnshire Regiment—Frederick John Ingoldby, gent., to be Lieut. (June 16).

1st Linlithgowshire—Capt. A. B. Dorward resigns his commission.

3rd London—Lieut. H. Curtis to be Capt.

4th Middlesex (West London)—Lieut. F. G. Battyn resigns his commission (July 2); Percy James English, gent., to be Lieut.

10th Middlesex—Louis Augustus Sillem, gent., to be Lieut.

11th Middlesex (Railway)—The Rev. William Cadman, M.A., to be Acting Chaplain.

17th (North) Middlesex—Edward Douphrate Langley, gent., to be Lieut.

2nd Monmouthshire—Lieut. H. Bumby resigns his commission.

4th Volunteer Battalion, the Norfolk Regiment—Jabez Jarvis-Spelman, gent., to be Lieut. (supernumerary).

1st Volunteer Battalion, the Northumberland Fusiliers—Captain William Dodds is granted the honorary rank of Major.

1st Ross-shire (Ross Highland)—Hector Ross, gent., to be Lieut. (Supernumerary).

1st Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—Lieut. R. B. Bryan resigns his commission.

2nd Volunteer Battalion, the South Staffordshire Regiment—Hon. Major and Adjt. R. B. R. Bedford resigns his commission, and is placed on a retired allowance. Richard Bisse Rowland Bedford, Esq., late Hon. Major and Adjt., to be Lieut.-Col. Lieut.-Col. R. B. R. Bedford is granted the hon. rank of Col. (all three dated July 2).

2nd Volunteer Battalion, the Prince of Wales's (North Staffordshire Regiment)—Conway John Morgan, gent., to be Lieut. (supernumerary).

6th (West) Suffolk—The under-mentioned officers resign their commissions:—Major T. J. Huddleston and Capt. H. Bridges. Acting Chaplain the Rev. G. S. Barrow, M.A., resigns his appointment.

2nd Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—John Lainson Nash, gent., to be Lieut.

4th Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—Capt. H. J. F. Groves resigns his commission.

1st Sutherland (Highland)—Lieut. A. J. T. Box to be Capt. Walter Stuart, Esq , commonly called the Hon. Walter Stuart, Master of Blantyre, to be Capt. The under-mentioned gentlemen to be Lieuts.:—John Morrison and Duncan Menzies.

1st West Riding of Yorkshire—Edward Addison Mangin, gent., to be Lieut.

1st (Hallamshire) Volunteer Battalion, the York and Lancaster Regiment—Capt. J. E. Cutler to be Major.

(Where not otherwise stated, the foregoing commissions and announcements bear date June 27, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

WAR OFFICE. PALL MALL, June 29, 1883.

Royal Engineers—Col. Sir C. B. P. N. H. Nugent, K.C.B., having completed five years' service as a Regimental Col., to be placed on the Unemployed Full-pay List, under Article 79-I of the Royal Warrant of March 11, 1882; Lieut.-Col. and Col. R. Grant, having completed five years' service as a Regimental Lieut.-Col., to be placed on half-pay (both dated July 1); Lieut.-Col. Arthur Parnell retires upon retired pay, with the honorary rank of Col. The under-mentioned Capts. to be Majors, under the provisions of Article 10 (*b*) of the Royal Warrant of March 11, 1882:—Brevet Major W. S. S. Bisset (June 29); William Henry Coaker and Fleetwood Isham Edwards, C.B.

INDIA OFFICE, June 29, 1883.

The Queen has approved of the following promotions among the officers of the Staff Corps and Indian Military Services made by the Governments in India:—

BENGAL STAFF CORPS.

To be Lieutenant-Colonels:—Major E. C. Corbyn (May 6); and Major and Brevet Lieut.-Col. H. B. Hanna (May 12).

MADRAS STAFF CORPS.

To be Majors:—Capt. and Brevet Major G. Simpson (April 14); and Capt. E. Quin (May 12).

MADRAS ARMY.—CAVALRY.

To be Lieutenant-Colonel:—Major and Brevet Lieut.-Col. F. S. Cherry (May 4).

BOMBAY STAFF CORPS.

To be Lieutenant-Colonel:—Major A. Hogg (May 16).

BREVET.

To be Colonels:—Lieut.-Cols. J. M. Williams, Madras Infantry (since retired) (Oct. 27, 1879), and R. C. Stewart (Dec. 22, 1881).

MADRAS CAVALRY.

To be Lieutenant-Colonel:—Major A. R. Kenney-Herbert, Madras Cavalry, in succession to Lieut.-Gen. A. C. Silver, Madras Infantry, transferred to the Unemployed Supernumerary List (March 19).

(Where not otherwise specified, the foregoing commissions and announcements bear date June 30, and the current year must be understood.)

Amusements.

The programme of the ROYAL ITALIAN OPERA during the week has been varied and attractive. "La Gioconda" was repeated on Monday, "Rigoletto" on Tuesday, "Carmen" on Thursday, and "Dinorah" was assigned to Friday evening, with Madame Patti as the heroine, and Madame Schalchi, Signor Frapoli, and Signor Cotogni in the other prominent characters.

At the ADELPHI, the Drury Lane drama of "Pluck," originally produced last August and since played at several London and provincial theatres, seems to have found congenial quarters. Miss Kate Paterson, returned from her American tour, gives increased interest to Florence Templeton. Mr. G. W. Anson is here Bevis Marks, and the cast in other respects well furnished by Mr. Edmund Lyons, Mr. A. C. Lilly, Mr. Harry Parker, and Mr. J. Elmore. The scenic effects, on which the attraction of the piece so much depends, display considerable ingenuity of contrivance.

The GAIETY THEATRE has been occupied during the week by the company from the Vaudeville, Paris, with Madame Pierson and M. Dupuis as the leading members. "Odette" and "Le Nabob" have been the chief pieces in the programme.

With this week has terminated the present season at HER MAJESTY'S THEATRE, where the operatic spectacle of "A Trip to the Moon" has been played for the last six nights. Miss Geneviève Ward's season at the OLYMPIC has ended with the representation of "The Queen's Favourite," and on Monday next Mr. Frank Harvey's "Beatrice Comedy Company" take possession of the theatre, with the drama called "The Wages of Sin." Mr. John S. Clarke has, with this week, terminated his engagement at the OPERA COMIQUE, and next week Mr. J. L. Toole will close his successful season at TOOLE'S THEATRE.

"Lady Clare" will now be withdrawn from the GLOBE, but the summer season will be prolonged by the revival, after a long interval, of Mr. Buckstone's romantic drama of "The Flowers of the Forest," originally produced at the Adelphi Theatre in March, 1847, and last acted there in August, 1859. Mr. Charles Kelly now appears as Ishmael, Miss Ada Murray as Cynthia, Miss Clara Jecks as Starlight Bess, Mr. Percy Bell as Cheap John, Mr. E. Russell as the Kinchin, and Miss Harriett Jay as Lemuel, the gipsy-boy.

Miss Isabel Bateman on Monday afternoon delighted a fashionable assemblage by giving some effective recitals at the special request of the Countess of Ducie, at her residence, 16 Portman Square.

According to the latest arrangements, Mr. Henry Irving, Miss Ellen Terry, and the Lyceum Company will leave Liverpool for New York on October 11, after playing farewell engagements of two weeks each at Glasgow, Edinburgh, and Liverpool.

Gen. Conolly is expected to leave England at the end of the season for the Crimea, being entrusted by the Government with a mission in connection with the graves of those of her Majesty Forces who fell during the Crimean War. The services and the country should be grateful to the General, as he goes out entirely at his own expense, and is too modest to expect either money or thanks.

Messrs. Jackson and Graham, whose business is being transferred to a limited-liability company, invite inspection of a suite of rooms which they have had decorated from designs by Mr. Robert Edis. The famous Bective cabinet is also to be seen on the premises, which, taken altogether, constitute one of the sights of London.

STIMULANTS and insufficient amount of exercise frequently derange the liver. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT.—"All our customers for ENO'S FRUIT SALT would not be without it upon any consideration, they having received so much benefit from it.—WOOD BROTHERS, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, June 30, 1883. Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD.

IN whom shall we put our trust? Shall it be in the Marquis of Hartington, or in the Earl of Morley? We expect more good would come to the Army from the former than the latter. We read with pleasure on Saturday, June 2, the debate upon the Army brought about by Sir W. Barttelot, who, in a very able speech, drew attention to the falling-off at present in our supply of recruits, and to crime and waste in the Army. The facts and figures adduced by him were well known to us, and we have from time to time called public attention to the subject; but a deaf ear was turned to our warnings. As regards its Army, the country is peculiarly indifferent. It is only under the influence of panics that it ever directs its attention to it, and then it is only for a short time. Changes are made, the uniform, perhaps, altered, and the country sinks again into repose. The discussion in the House of Lords on June 29 was very characteristic of our Army Administration. There was a brief discussion brought about by Lord Strathnairn, supported by the Earl of Longford and the Marquis of Hertford, and answered in a very insufficient manner by the Earl of Morley, and then, as the *Times* says, the "subject dropped." The speech of Lord Strathnairn was principally an attack upon our present system of placing a civilian at the head of our Army. It is, indeed, a marvellous thing that such an anomaly should be allowed. In things purely civil, if we wanted our kettle mended, we should go to a tinker, and we should deem ourselves particularly unfortunate if we only had one tinker to do the work. If we were to conduct business in civil life upon the same principles as we do those relating to the Army, if our kettle had a hole in it, we should go either to a tailor or a shoemaker to have it mended. To this strange system of military administration we attribute not a few of our failures. We are confident that our Secretaries of State for War do not willingly do wrong, but they are only human, and not being endowed with supernatural powers, they cannot conduct with success a business in the details of which they are, for the most part, ignorant. They are, therefore, entirely at the mercy of their subordinates, or of Army reformers, who, from want of practical knowledge of their subject, often attempt to build up a system upon an impossible foundation, and then when failure comes strive to put the blame upon those who have the misfortune to be obliged to try the carrying-out of their impracticable designs. The opinion of men of experience is totally ignored by the reformers, for it is looked upon as being tainted with prejudice. Let any theorist arise, and he is regarded as a Daniel. The very fact that he ignores altogether the opinion of practical men seems to give him, in the eyes of the country, additional weight. The Marquis of Hartington, in his reply to Sir W. Barttelot, could not deny that the facts brought forward were, for the most part, true, more especially in the essential points, namely, a want of recruits, and crime and waste in the Army. As regards recruiting, he admitted that the average deficiency was from 6,000 to 8,000. This, he also allowed, was a serious matter, and worthy the attention of the House of Commons. As Lord Morley never mentions the fact in his reply to Lord Strathnairn, we presume he does not consider that the subject deserves the attention of the House of Lords. The noble Lord the Secretary of State for War, in his speech of June 1, was very sanguine that when the stringency of the rules regarding recruiting are relaxed, the standard of height lowered, and the chest measurement decreased, we shall have a plentiful supply of recruits. We shall then again hear the disciples of Short Service raise their voices in tones of triumph, which will only be hushed when in some fresh campaign our military house of cards falls to pieces. We gathered hope from the Marquis of Hartington's speech, and we read with pleasure that soldiers would be allowed to complete twelve years' service, and then re-engage for a pension. This, we consider, would be a benefit to the State, to the soldiers, and to the Army, for it would give to the soldier the opportunity, if he so wished, of making the service a means of obtaining a permanent living. At the same time, it would give more matured non-commissioned officers and more old soldiers to assist in moulding our raw recruits into shape. But, as we have before said, there must be no uncertainty about the conditions upon which a man enters the service, for uncertainty sooner or later will be sure to bring discontent. The hope which went through the Army when Lord Hartington's speech was read has been rudely shaken by what Lord Morley said on Friday last. It would appear that his lordship either never read the debate in the Lower House, or having read it, ignores the facts and figures then set forth. And yet these statistics are, we doubt not, quite as reliable as those Lord Morley quoted in the House of Lords. His lordship disclaims any intention upon the part of the Government of replacing our short-service by a long-service system. Nay, he states openly that they merely intend making an experiment to meet a temporary emergency. Alas! more experiments! Has not the Army already suffered enough from experiment? But experiments will bring with them no good. We are almost forced to believe, from Lord Morley's speech, that he was not prepared for the attack. If he was, we do not think that he was prepared with sufficient information, and what he had was not of a very convincing nature. For instance, he says that last year over 45,000 recruits presented themselves, but he is very careful not to say how many of these were rejected as physically unfit. It is sad to think that the hopes raised by the speech of the Marquis of Hartington on June 1 should be dashed to the ground by Lord Morley on the 29th of the same month. There is evidently a desire to put off the evil day, as it is considered, when short service must be condemned as the failure it undoubtedly is. The evil day may, however, be put off too long, and unless we are mindful this will be the case. The Army is simply crumbling to pieces under the hands of the Army reformers, and they are so obstinate that they will not yield. Obstinacy and incompetence are two most dangerous things to go together. Our modern Army reformers possess both these characteristics. And yet there are some who express surprise that there should have been so much noise made about so little wool; that we should have been favoured for years past with assurances that the Army was reaching the acme of perfection, whereas events have shown the very reverse is the case. We ask, could it have been otherwise, seeing the groove in which we have been working, and having regard to the income petence of those to whom we have looked to provide for our wants?

THE Dockyard Expense Accounts for the year 1881-1882, which have just been presented, will probably receive a closer scrutiny than is usually accorded to them, now that the state of the Navy is attracting the earnest attention of the Naval critics in both Houses of Parliament, and in the Press. They contain the detailed record of the work performed in the Dockyards, comparing the actual construction and repairs of ships during the period which they cover, with the estimates prepared before the commencement of that period, upon the faith of which Parliament voted the money required for these services. By this time, the public must be pretty well accustomed to find that the promises have not been kept, and that if the work provided for the dockyards to execute in 1881-1882 was necessary, as Parliament was led to believe, the conclusion forced upon us by a perusal of the Accountant-General's prefatory report is that they have done those things which they ought not to have done, and that they have left undone those things which they ought to have done. It must be admitted, however, that, on the whole, the record is somewhat better than in some former years, if we have regard only to the net results. Thus the total amount of construction during the year only falls short of the total estimate by 280 tons, which seems to be caused by a deficiency in the amount of unarmoured ships built by contract and a small default of the dockyards, amounting to 68 tons, in the matter of armoured ships. While the task set the dockyards for the year was 10,816 tons of armoured and 4,024 tons of unarmoured ships, they have succeeded in turning out 10,748 tons of the former and 4,690 of the latter,—that is, an increase of 4 per cent. on the total estimate for the year. But the deficiency of 878 tons of unarmoured construction which was to be supplied by contractors reduces the net amount completed to 18,610 tons, against 18,890 estimated, a deficiency of about 1½ per cent. If, however, we look to the cost of the labour which has produced these results, the retrospect is less satisfactory, for while the dockyards have accomplished about 4 per cent. more than their allotted task, they have spent in wages about 10 per cent. more, the estimate for the work being £477,313, and the actual expenditure £525,546. We have seen that the armoured construction fell short of the estimate by 68 tons, but the cost of the labour in producing this deficient supply exceeded the estimate by £11,166, that is, an excess of about 3¼ per cent. Again, the unarmoured tonnage completed is about 16½ per cent. in excess of the estimate, but the expenditure of labour thereon is about 27½ per cent. more than the £137,056 provided for it in the programme of works appended to the estimates, as subsequently amended. The Accountant-General of the Navy points out the deviations from the programme in regard to each ship upon which constructive work has been performed during the year, and shows that certain vessels cost together about £58,000 more than was provided for them, and were advanced by 1,431 tons more than was anticipated, when the estimates were prepared. In order to obtain this result, other ships, shown in the same tabular statement, were retarded to the extent of 1,499 tons, thus leaving £46,831 of wages available to meet the excess. The reasons which he gives for these departures from the programme may be sufficient to justify the Admiralty in the course which they have adopted, but it is difficult to understand why it should have been necessary to save £46,800 out of the ships set down in the programme in order to meet an expenditure of £58,000, which had not been foreseen, when, as the

Accountant-General states, a sum of £50,000 had been added to the vote expressly to provide for "unforeseen work." At most, it might be supposed that a saving of £8,000 would have sufficed, and the original programme have been fulfilled, except by such amount of tonnage as this £8,000 would represent. It is curious to observe that the heaviest of these unforeseen charges were incurred upon that expensive luxury the *Polyphemus*, which absorbed £24,196 more than was provided for her in the Estimates; and the *Inflexible*, the costliest vessel in the Navy, which, though supposed to have been completed, yet had 551 tons added to her, by an expenditure of £19,968. The explanation which is afforded of the various deviations from the programme of works is that it was found expedient to make further progress than had originally been contemplated with certain ships, in preference to work being proceeded with on others, with a view to the economical working of the yards. We can understand that this might be a very satisfactory account to give, if the business of shipbuilding and the methods of dockyard management were in the hands of novices, who had had no previous experience of framing estimates of work, or in arranging the details of its execution; but it might not unreasonably be supposed that the Constructors at the Yards and at the Admiralty would be able to foresee the difficulties which had to be met, and to give effect to the policy of their political masters in such a manner as not to exceed the £50,000 provided to meet unexpected contingencies. The deviations from the programme of unarmoured construction present some curious anomalies. The only vessel upon which the sum expended has been less than that estimated is the *Canada*, which was advanced 205 tons less than was anticipated, and on which £4,361 for wages was thus saved, being at the rate of £21 per ton. The *Cordelia*, on the other hand, had £5,356 more spent in labour upon her than was estimated, but she was only advanced 86 tons more than was promised in the programme; while the *Calliope*, for £4,761 more, was advanced as much as 137 tons. Thus the additional work on the *Cordelia* cost in wages £62 per ton, while that on the *Calliope* was rather less than £35 per ton. This, perhaps, would not be very remarkable, and might be explained on the ground that they are ships of a somewhat different type, were it not that on turning to the accounts of the total expenditure on these ships, we find that the average cost of labour per ton upon the whole of the work performed during the year on these three ships was, for the *Canada*, £38; the *Cordelia*, £38; and the *Calliope*, £34. This is the more noticeable since the expression "tons," as used in the Estimates and the Dockyard Accounts, is understood to represent—not a certain quantity of actual work added to the ship, which increases her displacement by so many tons—but a quantity of estimated work, calculated upon the basis of dividing the estimated cost in labour by the total number of tons. It might, therefore, be reasonably expected that the excess or deficiency in the work executed, would give the same average cost per ton as the total amount of construction on each ship. The account of repairing work, as stated in the report of the Accountant-General, shows a short expenditure of £25,988, or 8 per cent. of the estimates; and an excess of £2,409, on manufactures and yard services. Perhaps the most satisfactory element in the report of the Accountant-General is the diminution which it shows in the cost of the charges for yard and harbour services, or what are, otherwise, known as incidental charges, this class of expenditure having been reduced by no less than 19 per cent., or £66,000, in the course of four years, a portion of this reduction being due to a more rigid apportionment of charges to particular ships and services, but a considerable proportion of it representing an absolute saving to the public, effected by careful control and supervision. There is one matter upon which the public, and especially Members of Parliament, and those whose duty it is to criticise in the Press and elsewhere, the administration of the Navy, may be congratulated. For some years past, they have had placed before them a concise account of Dockyard transactions, instead of the bulky volume of unintelligible statistics, which it was next to impossible to analyse, and seemed only designed to confuse and befog the student of Naval finance, and they have had the further advantage of being assisted by the official explanation of the accounts which the Accountant-General has furnished by way of preface.

The Admiralty have exercised a wise discretion in reinstating Sub-Lieutenants the Hon. B. Tyrwhitt and W. James, recently dismissed the service by sentence of court-martial for most unofficer-like conduct. The former officer is placed at the bottom of the list of Sub-Lieutenants, and the latter loses one year's seniority. As we stated at the time, the educational course which obtains in the Navy is more to blame than were the culprits, and on these grounds we should have regretted to have seen the sentence of the Court confirmed by the supreme authority. But the officers who tried Messrs. Tyrwhitt and James had but one duty to perform, and that was to administer the written law of the Navy with firmness and impartiality, and the most heavy sentence that law would permit of was not too severe punishment, under the circumstances of the case. We hope that this example, coupled with the leniency of their Lordships, will have a beneficial effect on the minds of young officers, and illustrate to them that the position of an officer in her Majesty's Navy carries with it the obligations appertaining to their enviable status of gentlemen, and that they should never forget that "Noblesse oblige."

The Admiralty recently denied all knowledge of yellow-fever having broken out on board the *Mallard*. After the fact was mentioned in these columns, numerous inquiries were made at the Admiralty, where no information could be obtained, even by those having relatives on board, and who were naturally most anxious to ascertain what were the real facts of the case. They were even told that the report published by the *Army and Navy Gazette* was untrue, and that it emanated from "an irresponsible source." Such a statement by Admiralty officials was most heartless, as the real facts of the case were within their knowledge, and should have been made public. The *Mallard* picked up yellow-fever at Port-au-Prince. Sub-Lieutenant Grimston, Mr. Truscott (assistant-paymaster), Mr. Leonard (gunner), and a Marine were amongst the first attacked. Mr. Truscott alone recovered, and has since come home. The others succumbed, and were added to the many victims of this scourge, who find a last resting-place within the palisades at Port Royal. The *Mallard* then proceeded direct to Halifax, Nova Scotia, and, luckily, no fresh cases occurred. Having been thoroughly cleared out, she left on June 18 for Pictou, to attend upon H.R.H. the Princess Louise.

From the experience gained on the North-American Station by ships reaching it from the West Coast of Africa, it would appear that all vessels leaving the latter station should be first sent to a more temperate climate than that of the West Indies. Last year, when the *Foam* arrived at Halifax, her crew were in a very debilitated condition. The Commander-in-Chief kept her in consequence on the northern part of the station until the health of the men had been thoroughly re-established, afterwards sending her to the West Indies. On her return in May all on board were in first-rate health. Port Royal is at present healthy, but we fear that if the Admiralty persist in employing the *Tyrian*, they will soon have trouble from that quarter, as the stench on board is unbearable. A wooden ship in such a climate should now be unknown. No case of yellow-fever has ever been heard of on board the *Urgent*, and there is no excuse for keeping the *Tyrian* at Port Royal. She should be replaced by a small iron paddle-steamer, which would meet all the requirements of Port Royal, be more roomy for officers and men, and which, with sides painted white, and a light, fixed roof over the upper deck, instead of an awning, makes a most comfortable vessel for such a hot and unhealthy place.

We hear that the new Acting Storekeeper at Port Royal has had a narrow escape of losing his appointment, the Commodore having given him another chance. The same gentleman had to leave Halifax Dockyard not long ago, and to send him to Port Royal was a great mistake. Mr. M'Hardy seems to know but little of the men he promotes. The late Storekeeper at Port Royal was turned out for being incapable, and other cases of a similar nature have been brought to our notice. Quite recently, Mr. M'Hardy was obliged to visit Halifax, to inspect the accounts of that yard. Since then, the Naval Storekeeper has applied to the Admiralty to be allowed to take charge of the Works Department, assisted by the Carpenter; but it is to be hoped that the apparent immediate prospect of saving a few pounds a year will not lead the Admiralty to commit such a blunder as that of increasing the present responsibilities of that officer. Indeed, it would add greatly to the efficiency of the Dockyard, were an Executive Naval officer appointed to superintend the work therein performed. At present, there is not the slightest check in a yard officered like that of Halifax. The Naval Storekeeper has the boatswain, carpenter, and foreman of works entirely at his mercy; and as the present system of audit is nothing more than a farce, he can do pretty well what he likes.

Mr. Gourley, on Navy Estimates, Vote 14, will move to reduce the Vote £2,000, for expenses on account of the Royal Household and entertainments on board the *Bacchante* and *Osborne*; and to reduce the Vote by £20,000, in connection with repairs to her Majesty's yacht *Victoria and Albert*, at Portsmouth Dockyard. We wonder attention has not also been attracted to the enormous expenditure now being incurred on the *Myrmidon*, an antiquated gun-vessel, in the Medway.

The hesitation of the Government in not confirming the proceedings of that of Queensland with regard to New Guinea, and eventually extending a protectorate over the native islands of the Western Pacific, as suggested by the Australian Government, has quickly produced expressions of disappointment from the different Colonies, who decline to accept the decision as final. We are now informed, by advices from Sydney, New South Wales, of the 6th inst., that a French war steamer has forestalled us, by hoisting the French flag in the New Hebrides, a group 400 miles north of New Caledonia, and 1,000 miles from Australia. Erromango, one of the islands, has long been an important English Mission station. France has no claim to this group, and her present action is akin to that displayed in the Congo and at Porto Novo, where she has undoubtedly presented herself in opposition to our interests, and with the intention of embarrassing us at Lagos. Australians justly complain of the irritation caused by the adjacent settlement of New Caledonia, and this late annexation of the New Hebrides by France will embitter the feeling, which nothing but immediate action on the part of the Home Government will assuage. We trust that Parliament will insist on no delay.

The Admiralty have appointed Commander G. W. Hill to the *Linnet*, "vice Harris," apparently forgetting that not long ago Commander John Hope was sent to the *Linnet*, to relieve Commander Harris; Commander Jones, of the *Victor Emanuel*, being sent to command the *Fly*, vice Hope, Commander Davis being sent out to fill the vacancy in the *Victor Emanuel*. If these changes were not approved by the Admiralty, why were they inserted in the July *Navy List?*

We see that some of our Paris contemporaries have raked up a story, which first appeared in the *Gaulois* some months ago, respecting the origin of the Tonquin expedition. From this story, it seems that a Naval officer, writing to Mdlle. Valtesse, who is well known in the theatrical world and the "half-world," gave such a brilliant description of the country that the lady conceived the idea of seeking an interview with M. Gambetta, and recommending an annexation. Some notes passed between the fair one and the statesman, who was then President of the Chamber, and the result was a personal interview, which took place at the official residence of the President. Mdlle. Valtesse has given a charming and graphic description of the audience. She had come up from the country, she was rather fatigued and dusty, her toilette out of order, not looking nearly as fascinating as she could have wished; she did her best to set matters right, and was profuse in excuses. However, she was soon at home, and she has left it on record that she found M. Gambetta very amiable, but very dirty, and that he had evidently been indulging in garlic. To make a long story short, Mdlle. Valtesse was asked to draw up a report on the affair. This she did, and hence the Tonquin expedition. Since then several financial gentlemen have taken up the matter, and report says that amongst these is to be found the son-in-law of President Grévy. We may add that the French Government contemplate increasing the strength of the Marine Infantry which does colonial duty, and this is not to be wondered at.

Colonel Howard Jones, C.B., A.D.C., Royal Marine Light Infantry, who has been travelling in the Mediterranean and Egypt, to recover his health, which broke down after his late Egyptian Campaign, has returned to England, and will shortly rejoin his head-quarters.

It has for some time been in contemplation by the Accountant-General's Department at the Admiralty to do away with the per-centage allowed to Paymasters of the Royal Marines on money passing through their hands, and giving a fixed amount in lieu, which will combine salary and estimated per-centage. This has now been carried out by an Admiralty order, which has been issued during the past week, to take effect from January 1 last, on all Paymasters appointed from that date. Fortunately for themselves, the Order is not made further retrospective, so that the present holders remain under the old system, as, from calculations made, new appointments will receive from £36 to £55 a year less income than the average of that now enjoyed.

The promotions in the Royal Marine Artillery and Light Infantry, consequent upon the retirement of Colonel-Commandants Mawbey and Bennett on the 3rd and 4th inst., bring Major Francis H. Poore, R.M.A., Equerry to H.R.H. the Duke of Edinburgh, and Major Gerald A. Heseltine, R.M.L.I., on the higher rate of pay as Majors. There is a very strong feeling throughout the service owing to Lieutenant-Colonel John Frederick Sanders having again been passed over, as is considered most unfairly, as no officer has superior claims.

The Viscount Sidmouth will, on Tuesday, ask the Second Naval Lord of the Admiralty whether he will state what the rules and regulations of the service are in accordance with which warrant officers are permitted to make reasonable representations as to their condition, rank, and on other matters connected with their profession, to the Board of Admiralty.

The Admiralty have this week promoted a batch of 37 Sub-Lieutenants, adhering pretty well throughout to the claims of seniority. Commencing at the top of the List, their Lordships have, for reasons best known to themselves, skipped the fourth officer on the List, Sub-Lieutenant Percy James Elliot, serving on board the *Northumberland*, who now becomes senior Sub-Lieutenant of the Navy. Thirty officers are then promoted by seniority, when the Admiralty again revert to selection, and skip thirteen officers to promote Sub-Lieutenant Inglefield, of the *London*, twelve to reach Sub-Lieutenant Wyatt, of the *Alexandra*, and two more to promote Sub-Lieutenant Couper, of the *Invincible*, who was decorated with the 5th Class of the Medjidieh for the bombardment of Alexandria. These two officers came under the immediate notice of Lord Alcester, who is not the man to allow real merit to go unrewarded, and it is only natural that their services should now be recognised. The junior Sub-Lieutenant promoted, Arthur Wartensleben Ewart, by virtue of his "three firsts," heads the whole batch, verifying the prophecy that "the first shall be last, and the last shall be first."

Lord Stanley of Alderley will, on Tuesday, ask the First Lord of the Admiralty if he will lay on the table the finding of the court-martial in the case of Price, seaman of the *Triumph*, in 1881; and to move for this and other correspondence.

Two ship-loads of the "civilising influence" of "La Grande Nation," in the shape of several thousand muskets with ammunition, left Havre on the 16th inst., for the use of the Brazza expedition. Whether they will prove as advantageous as the peaceful efforts of the representatives of the Comité d'Etudes du Congo, we shall probably not be long in ascertaining. Nothing is more detrimental to the improvement of the uncivilised African than placing war-like instruments in his hands. The sad experiences of past years in Polynesia, where fire-arms are the principal article of exchange between the white man and his cannibal friend, have shown the fearful evil of allowing such implements to become the property of the savage, who intuitively acquires a knowledge of their value, and is not long in using them against the race who supplied them. The action of France in this instance will be deeply regretted by the zealous and praiseworthy promoters of the Belgian Association, who cannot fail to see that the attempts of their brave pioneers will suffer by the ambition and vanity of a nation which appears capable of adopting any means to attain an end. We trust that in the long-run, the humanity, justice, and good faith of philanthropists will override Republican adventure, even when supported by State aid and National Tirailleurs.

His Excellency Earl Spencer, Lord-Lieutenant of Ireland, commented, in most eulogistic terms, on the services of the Royal Marines, when speaking recently at the banquet given to Lord Wolseley. Earl Spencer, in the course of his speech, said:—"I think I may properly pay a compliment to the soldiers and marines, and then also the Navy, who have done so much service to us in Ireland during those past years. While speaking of this, I must specially refer to the force that has been in Dublin now so many months. It was a time of most unusual danger, even of panic, when the highest officials were threatened, their lives were threatened, and when there was considerable panic in the city, when we called upon one of her Majesty's forces to assist the police in keeping order, and the Marines in considerable force came to Dublin. No body could have behaved with more admirable discipline, more admirable tact, or more admirable ability than the officers and men of that noble force during their stay in Dublin. I think the Government, the citizens of Dublin, and the country at large owe a great deal of gratitude to that force for the manner in which they have performed their duties here."

It is reported that differences have arisen between M. Tricoupis, president of the Greek Council, and M. Calligas, Minister of Finance, on the subject of the 40,000,000 of francs required by the former for the construction of vessels of war. The latter has tendered his resignation, as also has the Minister of Marine, Admiral Roufos. Under these circumstances, it appears highly probable that the projected increase of the Greek Navy by four ironclads and a number of cruisers will, at least for the present, be impossible.

We referred a few weeks back to the injustice of sending the *Briton* from the West to the East Coast of Africa, in entire opposition to the rule laid down in 1867-8 by the late Mr. Corry, when First Lord of the Admiralty. The disappointment, to use no harsher term, which is felt at such an unusual proceeding, and the unconcern of the Admiralty for the health of the officers and crew, in removing them from a hot and sickly station to one equally bad, if not worse, has impressed all ranks with a feeling which cannot be conducive to discipline, and lessens the little confidence which the service holds in the impartiality of its rulers. This measure is solely due to the pettifogging economy of the present Board, who would sooner ruin a ship's company than commission a ship. Complaints come from all stations of the small number of vessels to do the work, and that, with the reduced squadrons of the present day, the withdrawal of only one vessel without being replaced is much felt by the remainder. The repairs of ships at home for foreign reliefs have now to give place to the demand for new ones building, as the Admiralty have not the moral courage to insist on money being granted for the same; while their fingers are itching with mal-practices which honourable Members have exposed and these columns freely ventilated. We again urge that this breach of faith with the *Briton* should be questioned in Parliament, as it has only been done to save the cost of commissioning a ship, while the officers and crew are the sufferers.

We notice that Sir Thomas Brassey's "British Navy" figures among the works added to the library of the Russian General Staff during the current quarter, and also the Duke of Edinburgh's Report on the Naval Reserves.

A circular has been issued by the Russian Admiralty directing commanders of men-of-war on foreign service to be more sparing in their purchase of provisions at foreign ports, and to exercise greater supervision over the salt junk, "which at present deteriorates so rapidly in foreign waters." The circular has been provoked by a common practice of Russian commanders to report useless, and throw overboard, the inferior provisions obtained from the Government yard at Cronstadt, and to replace them with extensive purchases at foreign ports.

The Earl of Derby's reply relative to the annexation of New Guinea and other Pacific islands, was productive of a statement important to Naval officers on the Australian station, in regard to the enforcement of better discipline in the southern portion of New Guinea, and that if the machinery of the High Commissionership is defective it will be remedied. It is to be hoped that immediate remedy will be applied to one of the worst pieces of legislation ever enacted, both with regard to those for whose benefit it was intended, and the officers who have the misfortune to be selected to carry it out. Since the introduction of a High Commissioner, the office has until lately been held by one individual, whose ability for the same may be estimated by the success attending his administration of the various colonies from which he has always withdrawn before his term expired. It is be hoped that his counsel will no longer be required in this particular feature of native policy, and that under a new régime a healthier state of affairs will be created. If the Government will not invest the officer commanding the Australian squadron as High Commissioner, the official holding it should make himself acquainted with every part coming within his jurisdiction, and not issue laws and regulations for the guidance of Naval officers which are ambiguous by lack of local knowledge. This plan of making Naval officers the instrument, under most exceptional circumstances, of a civil functionary, has not borne good results. Were the Naval Commander-in-Chief in Australia his own master in dealing with the native races, most of whom are cannibals, in the Western Pacific, and only required to refer questions to the Home Government, a better state of things would be brought about, and the present expense of the High Commissioner's office reduced.

Messrs. Stilwell and Sons, Navy Agents, of 21 Great George Street, Westminster, have been appointed to act as agents to the Royal Marine Officers' Widows' Fund, in the place of Mr. Draper, of Buckingham Street, Strand, who held that appointment for many years prior to his becoming insolvent in April last.

In view of complications between China and France, the Russian clipper *Opritchnik*, which touched at Portsmouth a short time ago, has been ordered, we hear, to the Pacific, whither she will be followed by two more vessels from Cronstadt, the *Strelok* and the *Bayan*. The *Opritchnik* and *Strelok* belong to the new clipper series of the *Razboinik* type, and are the latest additions to the Navy in this branch. The *Strelok* is of iron and steel, the *Opritchnik* exclusively of steel. Both are 214 ft. long, 32 ft. broad, have a displacement of 1,334 tons, carry three 6-in. rifled guns, with traversing carriages and slides, four nine-pounders, and six machine guns. Their maximum speed is 16 knots, they carry coal for 14 days, and have a crew of about 180 men all told. The *Bayan* is an old corvette of the 1860 period, recently retimbered at Cronstadt after her return from the Pacific. She carries four 8-in. guns, and four nine-pounders.

The Order in Council of November 29, 1881, which reorganised the Corps of Royal Marines, fixed the new establishment of captains in the Royal Marine Artillery at 21, and in the Light Infantry at 60, resulting at the time in a number of supernumeries in each branch of this service. In the Marine Artillery, however, the supernumerary captains have now been absorbed, so that the retirement of Colonel-Commandant Mawbey on the 3rd inst. will cause the promotion of the senior subaltern, Lieutenant Swinburne, who has not completed quite eleven years' service as a lieutenant. The Light Infantry list of captains is also fast reducing to a normal condition, and the promotion consequent upon the retirement of Colonel Bennett, Commandant of the Portsmouth Division, who completed his period of command on Wednesday last, will reduce the supernumerary captains to three, which will no doubt shortly be worked off, and thus give hope to the senior lieutenants who have for some time been at a standstill.

The last batch of torpedo-boats of the *Tapfer* class (Batoum type), built for the German Navy by the Weser Company, Bremen, have lately undergone their trial-trips in the Bay of Eckernfoerde. The results obtained were satisfactory, as far as speed was concerned, viz., an average of 17·6 knots per hour in six hours' steaming, but the vibration was so great that it became apparent to all present that the boats would be soon shaken to pieces if often driven at full speed. This is not surprising, when it is taken into consideration that the vessels are built by firms comparatively inexperienced in the construction of torpedo-boats. When reports reach the German naval commanders of the great speed attained by Messrs. Yarrow's boats, a cry is raised for similar vessels, whereupon the German shipbuilders undertake to construct the same, but the order should be placed out of the country. The result is that strength and seaworthiness are sacrificed to speed, which, however, even then does not approach that of the vessels built by English firms, who have made a speciality of the construction of fast torpedo-boats. There is in the north of Prussia an engineer and shipbuilder celebrated for the lightness and finish of his engines, who, during the crisis of 1878, supplied the Russian Government with a large number of torpedo-boats. Although these vessels were urgently needed at the time, they have been very rarely under steam; but so weak were they in construction, that they had to be sold out of service as quickly as they could be replaced by stronger boats, a few only being reserved as targets for machine-guns.

We draw attention to an advertisement which appears elsewhere, appealing for subscriptions towards a fund which is being raised for the benefit of the widow and family of the late Mr. G. W. Reay-Mackey, R.N., who died suddenly a short time since, after having held for a brief period the managership of the Crystal Palace. Mr. Reay-Mackey had many friends in the service, who will come forward, we feel sure, and add their mite to the fund.

The Budget Commission of the German Parliament has voted the sum of 2,000,000 marks for the completion of ironclad *E*, and 3,750,000 marks for the purchase of bronze "fish" torpedoes. The sum of 600,000 marks asked for by General von Caprivi for commencing the construction of an Armstrong cruiser to replace the old frigate *Elizabeth*, has not been allowed.

The Swedish corvette *Vanadis* (2,120 tons, 1,400 horse-power, 16 guns) is preparing for a voyage round the world. Her departure will probably take place in November, and it is stated that Prince Oscar will serve on board as a Lieutenant. This will be the third Royal Prince to leave Europe during the present year as a Naval officer, the others being Prince George of Wales, in the *Canada*, and Prince Henry of Prussia, in the *Olga*.

The determination to send the Chinese ironclad *Ting Yuen* to her destination in charge of officers and men belonging to the Imperial German Navy, had been subjected to much comment in France before the order was countermanded. The matter has now been settled by Prince Bismarck, who has ordered the German crew to disembark, and has left it to Li Fong Pao, the Chinese Ambassador to the Court of Berlin, to get his vessel away as best he can. Great exertions are being made to collect a crew sufficiently experienced to manage a vessel of this class, so as to get the *Ting Yuen* well on her way to China, before a rupture with the French Government can occur. To prevent confusion, it should here be remarked that French papers are in the habit of calling the above vessel *Chen Yuen*, which is a mistake, as the latter is still in course of construction at the Vulcan Company's Yard, near Stettin.

Some two years since, the system which had been in vogue for thirty years, of allowing Militia recruits to assemble for 56 days' preliminary drill, prior to the yearly embodiment of their regiments, was put an end to. The War Office, in furtherance of its policy of changing everything, had started a new-fangled idea that it would be better for the men on enlistment to go at once to the Brigade District, to be there instructed, not in a body of from 150 to 300, but in ever-varying squads of from 15 to 20 men. Under the old system, the best of the company officers were selected to do the duty, and being directly under the eye of the District Lieutenant-Colonel, they naturally were most anxious to push forward their men, whilst the fact that a number were drilling together gave good opportunity for increasing the efficiency of the men. That this system was appreciated by them is proved by the fact that during the last two years the number of the men enlisting in the Militia has steadily decreased, and the force is now some 23,000 short of its full complement. It is strange that every change inaugurated by the reformers should have failed so signally. Wherever they have laid their hands on anything, the most serious consequences have ensued. Certainly, so far as the Militia is concerned, they have been most unfortunate.

Commissary-General Sir E. Morris, in his published Memorandum "On the Commissariat and Transport Department," urges the immediate and absolute necessity of "reorganisation" of his corps, "if efficiency is to be maintained," condemning its present constitution as not only "unworkable," but the state of its officers (in respect to the Deputy-Assistant-Commissaries-General recently introduced from the Army) as "anomalous" and "uninstructed," and, therefore, "comparatively useless," &c. And this mainly, it seems, on account of their military rank, pay, and age; though, what personal knowledge of them as a body Sir Edward Morris can have, it is hard to conceive, as he writes in December last, on return from Egypt, and, ere going there, he had but recently returned from South Africa. Of course, some few came under his notice in Egypt, and yet these are referred to as doing good service. Sir Edward writes, for instance:—"The regular companies of the Commissariat and Transport Corps, although labouring under heavy disadvantages, did right good service, and, by working on the railway before there were engines, enabled the supply at the front to be fairly maintained." Some of these companies, we presume, were commanded by Line officers, Captain Littledale having, we believe, been specially mentioned. Whatever changes it may be found desirable to effect, it is hoped it is not in contemplation to break faith with those Line officers who have already cast in their lot with the Commissariat, relying upon the ruling of existing Royal Warrants. When the Commissary-General demurs to the Army rank, pay, &c., of Deputy-Assistant-Commissaries-General from the Line, as compared with the relative rank and pay of the old departmental officers, he does an injustice to the Linesmen. The Commissary-General, however, still relies on obtaining a large number of junior officers from the Line on more humble terms, whose Commissariat rank shall more palpably evince their subordination to, and not clash with, the relative rank of his older officers. What his success will be remains to be proved, for he wants "young men physically and mentally fit for the excessive strain which they must bear during active service." The junior of the Deputy-Assistant-Commissaries-General from the Line now in the Commissariat and Transport Staff only enjoys the "high pay," so termed, of 12s. 6d., and that after $8\frac{1}{3}$ years' combined service in the Line and Commissariat and Transport Staff. Does the Commissary-General look for the pick from the Army Subalterns for less, seeing, moreover, that some of those now are obtaining their companies after four or five years' service?

Looking over an article in *La Nouvelle Revue*, entitled, "Les Armées de la Monarchie," we found such curious information as this:—In the good old days, the Captain was a far more responsible officer than he is to-day; he had to furnish recruits, clothing, arms, horses, and ammunition to the King, and in return for this he received a miserable pay and an indemnity of so much a year per recruit, and the consequence was that numbers of officers were raised in the service of their country. A Captain was obliged:—1st. To recruit his company. Each time that he returned from on a furlough he had to bring back with him two recruits, the same obligation was imposed on his Lieutenant and his serjeants. It was forbidden to pay a recruit more than twenty francs; and we are not astonished to find that few men cared to enlist for six years for so small a sum. 2nd. The Captain had to clothe his company, furnishing shirts, drawers, stockings, shoes, gaiters, hat, &c. The King furnished only the cloth for the coat. In obligation No. 5, we find that each Captain "must possess camping materials, a tent for eight men, cooking utensils, &c., and *ten tools fit for throwing up earth*." The pay was quite inadequate to the obligations, and it was not at all uncommon, says the writer, to hear gallant officers declare that they had been ruined in the service of the King.

We have never failed to protest against the system now in vogue, which has handed over the whole of the functions of the command of the Army to the principal clerks of the War Office. As further evidence of the pernicious effects of the system, we may refer to the present condition of the Militia. Officers are leaving the service in disgust, and commanding officers complain on all sides that they cannot get men of the right stamp to take their places. Men are continually being heard to say, "What do we remain in the service for? Our 27 days' outing is only a source of expense. From the Militia we get nothing, more especially since the virtual command has been taken from the military authorities by the civilians at the War Office." That this is so, the following facts show beyond doubt. In the yearly Estimates a certain number of officers are estimated for, and hitherto, if any regiments on embodiment were short of their complement among the Captains, volunteers from other regiments, approved by the respective commanding officers, and by the Generals commanding districts, were allowed to serve, in lieu of officers who, for private and other reasons, found it inconvenient to attend. This is now put an end to, as the Accountant-General has disallowed the pay issued to officers doing duty in lieu of those thus absent, no pay being allowed, unless there is an absolute vacancy on the establishment, or the officer absent is certified as being unable to attend the training under a medical certificate. A large number of Militia officers cannot conveniently attend every training. The consequence will be that at least 25 per cent. of the companies will have no Captains, and their place cannot now be filled up by volunteers. The object of the Accountant-General is to save the pay, to the detriment of the service. We wonder how much longer the country will allow the present farce to continue which vests in a number of War-Office clerks powers even greater than those of the Commander-in-Chief himself!

According to some statistics published in Germany, it appears that the losses suffered by the Russian Army of the Danube and that of the Caucasus amounted to 117,621 men, out of 933,000. Sickness carried off 81,166 men, and 36,455 were killed by the enemy. We find a far different state of affairs when we turn to the losses of the German Army during the campaign of 1870. The German Army, 1,113,254 strong, lost 40,743 men. Of these, 12,115 died of sickness and 28,628 remained on the field of battle. The Russians lost twice as many men by pestilence as by the sword, and it was just the contrary with the Germans. Then, the Russian hospitals admitted, during the war in the East, 1,828,357 men! so that every soldier may have passed twice through the ambulance. As a general rule, there was only one doctor for 1,000 sick. Out of 11,000 cases of congelation, 1,530 men died. Of course, it is only fair to remember that the Russians had to operate in a far more unhealthy climate than the Germans, and that France offered resources in the way of the necessaries of life which were not to be found on the banks of the Danube or in the gorges of the Caucasus.

The French War Minister has refused to give his approbation to the scheme which has found favour in the Radical mind for levelling the enceinte round Paris, and converting the land into building ground for the poor. One statement made by General Thibaudin during his examination before a Parliamentary Committee has created no little astonishment in France. He said that the new detached forts were not a sufficient protection to the capital. It will be remembered that during the siege of Paris, in 1870, the Germans fired over the old detached forts right up to the walls of the Louvre. It was therefore determined, after the war, to construct new forts at a greater distance from the wall, and this was done. Some of the new forts are at 10, 12, and even 15 miles from the enceinte. One of these forts is some miles beyond Versailles, where the Emperor William was crowned, and had his head-quarters twelve years ago. M. Cochin has traced the history of the fortifications of 1840 in two numbers of *Le Correspondant*, April 10 and June 10, 1883. The idea of fortifying Paris appears to have originated with Vauban; but his plans were pigeon-holed, and never saw the light until 1830! Marshal Soult was then War Minister, and he recommended the construction of detached forts such as Napoleon had recommended in 1815, for he had been much struck by the capture of Paris by the allies in 1814. In 1833, the question being still before Parliament, the Marshal said that Paris required to have for its defence a zone which should be what the ocean is to England and what ice is to Russia. After a tremendous battle, which lasted over ten years, between Marshal Soult, who advocated detached forts, and M. Thiers, who advocated an enceinte as well, the latter won the day. In spite of the cries of the Liberals, who feared that the fortifications would be used against patriots for the purposes of tyranny, and who objected to the expense, the detached forts and enceinte were ordered. The Duke of Orleans sent for Gen. de Chabaud Latour, and said to him, "Trace me the line of the enceinte." The General, who was a first-rate engineer, took up a pencil and traced the enceinte, and marked the position for the detached forts, and with this plan, which was afterwards executed, the Prince and the General drove off to see M. Thiers. It is interesting to remember that General de Chabaud Latour was in Paris in 1870, and took part in the defence of the capital, and that M. Thiers, in 1871, saw himself kept out of Paris by the forts and enceinte whose construction he had so ardently advocated. He found himself and his army in possession of one fort, Mont Valerien, while the forts on the south and the east were held by the Communists, and those on the north were in the hands of the Germans. The French appear highly indignant at the opposition offered to the Channel Tunnel in this country, but their War Minister is in favour of the "ocean" referred to by Marshal Soult being maintained round Paris.

The question of creating an Artillery corps for the fortresses in France is occupying attention. It appears that it would require 97 batteries for the proper defence of the whole frontier, while there are only 57 in existence. It is urged, however, that as half the French frontier is coast, the coast should be entrusted to the care of the Naval authorities, and should be defended by the Marine Artillery—that it could be better defended by the Marine Artillery than by that of the Army. As far as the land fortresses are concerned, the *Avenir Militaire* does not view with pleasure the proposal of creating a special corps of Fortress Artillery, holding that the Artillery force at present in existence is quite sufficient for the inland defences; it also holds that the territorial army might be charged with the duty of garrisoning the fortresses. The *Progrès Militaire* takes quite another view of the question. It declares that neither 57 batteries nor 97 are sufficient for the defence of the French frontiers, and that, in its opinion, and in the opinion of the Superior Council of War, 198 batteries are necessary, while leaving the Marine Artillery the duty of protecting the coast! That a good deal of anxiety should reign in France with regard to the proper defence of fortresses is not to be wondered at, seeing the fate which befell Paris, Strasburg, Metz, Thionville, Peronne, Sedan, Verdun, Laon, Toul, Soissons, and other places which in 1870 had neither proper garrisons, proper means of defence, nor proper means of offence.

In the pages of Hart's usually accurate *Army List* are still retained the names and war services of three veterans who must have completed their one hundredth year, viz., Major-General Loftus Owen, an Ensign of December, 1799; Colonel G. Wrightman, who joined in July, 1800; and Colonel A. R. O'Reilly, a Lieutenant in 1800. Besides these remarkable specimens of longevity, we find therein nine officers' ages ranging from 95 to 97 years; 14 gentlemen, aged from 90 to 94 years; and about 20 more veterans, the youngest of whom, Colonel J. C. Webster, cannot be less than 86. We have calculated 17 as the age on entering the service. A nominal roll of these officers would occupy too much space.

We have received such strong remonstrances from India against the decision of the War Office to keep batteries of Artillery sixteen years in that country, instead of the usual period of ten years, that we feel compelled again to bring the question before public notice. The decision appears to us to be a downright breach of faith on the part of the responsible authorities. We are informed that many officers who left England during the past year to join their batteries in the Bombay Presidency, were assured that they would return home in the ordinary course, and were recommended not to exchange. This sudden alteration of system comes upon them as an unexpected blow. The British officer, however, is so accustomed now to experience this kind of treatment that he has almost ceased to raise his voice against any fresh instance of bad faith. But in this case, the non-commissioned officers and men are as much concerned as the officers. In the batteries in question, many men have re-engaged for long periods of service on the distinct understanding that their batteries would return to England at the usual time. They are now told that they must remain five or six years longer in India. They naturally protest against the injustice of this decision, and they ask their officers to release them from engagements which they had entered into on the faith of an official pledge. We trust that this matter may be brought to the notice of his Royal Highness, who has before now been compelled to interfere in order to secure justice to the Queen's troops. There is no reason whatever why the alteration should be carried out in the arbitrary and sudden manner now proposed. The change of system can be introduced gradually, as in the case of the Infantry, and with due regard to the interests of individuals. Depend upon it, such expressions of opinion as we have received cannot be safely ignored. The Army is not a machine placed at the mercy of every Adjutant-General or Deputy-Adjutant-General, who wishes to commend himself as a reformer to the War Minister of the day. It is painful to think that dissatisfaction should exist in so distinguished a corps as the Royal Artillery. It is still more painful to think that individual officers and men of that corps should be compelled to appeal to the Press for justice, because their interests are neglected by those whose duty it is to guard them.

As so much childish nonsense is talked and written about the British soldier by the hydropot officers of the Army, it will be interesting to hear the opinion of the Indian Sepoys on this subject. The following extracts are from the "Life and Adventures of Subedar Setaram, of the Bengal Army, translated by Lieutenant-Colonel Norgate, Bengal S.C." Subedar Setaram entered the Bengal Army as a private soldier in 1812, and was retired in 1860, after forty-eight years' service. He served in the Pindaree, Bhurtpore, and Nepaul Campaigns, first Afghan War, Sikh Wars, and Indian Mutiny, and was several times wounded. This officer was a most excellent soldier, and had a great admiration for the fighting qualities of the Gora Log, or white soldiers. He certainly does not believe in the martial inspirations of water, though a Brahmin himself, and obliged to drink nothing else. Grog seemed to him to have a good deal to do with the fighting power of our troops, in olden days, when the British Tommy always fought like a Trojan, and better:—"As to the white soldiers, I hardly know what they love fighting so much for, unless it be for grog; they would fight ten battles running for one lota of *daroo* (spirit). Their pay is nothing; it cannot be for that. They also love plunder; but I have seen white soldiers give a cap full of rupees for one bottle of brandy. I have been told that the Belaitee hakems (English doctors) have discovered some essence, which is put in the European soldiers' grog, and that great care has to be taken not to put too much in, or the men would all kill themselves in battle by rashness. I know water has always to be mixed with their spirit, although they themselves do not know it. Whenever I have seen them discouraged, or fighting without heart, it was always when they were deprived of their usual allowance of spirit. The Sikh soldiers who drink English liquor say that they have no fear when they can get ration rum, but that the country spirit burns up their livers and makes them fools, not brave. I am sure there must be some sort of *umrit panee* (water of life) in it, as I have seen men wounded, and all but dead, come to life again, after having some given them. Be this as it may, there is something very extraordinary in it, I am certain, because I know European soldiers worship it, give their lives for it, and lose their lives by it. I have spoken to Doctor Sahebs about the subject, and they themselves told me it was, in their own language, called 'water of fire,' 'water of life,' &c. It proves what I have before said, that the Saheb Log and Gora Log like fighting for the sake of fighting; and the latter, if they have but enough of their beloved spirit, are content; it is an amusement, a kind of *khel* (game), to them."

We commend to the serious attention of Lord Hartington the following extracts, which tell their own tale, and may be of value at the present moment:—

EXTRACTS FROM DUKE OF WELLINGTON'S DESPATCHES.

"To Major-Gen. W. Cameron, Paris, April 9, 1818.—My dear Sir,—I have received your letter of March 31, and I must protest against being called to account, excepting by those who have a right to call me to account, for any act of mine respecting the Army under my command, and particularly respecting the promotion of the officers. I recommend for promotion those whom I think proper to recommend, and I am sorry when I cannot make the number larger. I have always made it a rule that I would recommend for promotion those who did their duty in the Line, rather than those who performed it on the Staff, because the latter have advantages which the former have not, and because if the principle of their preference were once admitted, they would obtain all the promotion, and those in the Line none. I shall conclude by assuring you that your son has no reason to complain, and particularly now that he lost his promotion, by losing the general officer at the head of the department in which he was serving.—Ever yours, &c., WELLINGTON."

This principle was certainly not carried out in Egypt.

"To Earl Bathurst, Paris, Oct. 23, 1815.—My dear Lord,—I received this morning your letter of the 20th, regarding the formation of the British Contingent. My opinion is that the best troops we have—probably the best in the world—are the British Infantry, particularly the old Infantry that has served in Spain. This is what we ought to keep up, and what I wish above all others to retain. The Cavalry, that which is the expensive branch of the Cavalry, the horses, may be put down in peace, and upon the renewal of the war it is more easy to recruit them, or even horses for the Artillery, than it is to get together a good body of Infantry. For this reason, I would recommend you not to lose your good Infantry if you can help it, and to reform, rather, the horses of your Cavalry and Artillery to the utmost, and all the expensive parts of your establishments.—Believe me, &c., WELLINGTON."

EXTRACT FROM "HISTORY OF NAPOLEON," BY GEORGE MORE BRASSEY.—(On arrival in Paris from Elba.)

"In the midst of distractions of every kind, Napoleon proceeded with his accustomed energy to reorganise the Army, and prepare the promised Constitution of the Empire. The number of troops had been greatly diminished by the Bourbons. They could muster, indeed, only 90,000 effective men, a force scarcely more than sufficient to guard the fortresses and principal sea-ports. It would have been dangerous to resort to conscription as a means of raising recruits. The Emperor, therefore, endeavoured to revive the old recollections and spirit of the soldiers, and thus to create a spontaneous enthusiasm for the service. The old numbers of the several regiments were restored to them. The veterans of the grand army were exhorted to rally round their ancient colours," &c.

EXTRACT FROM SAME WORK, REFERRING TO QUATRE BRAS.

"The French fought gallantly throughout the day, but they were no match in steady endurance, imperturbable valour, and discipline to the foes they had encountered. They had been accustomed to decide a battle by some bold manœuvre which carried panic through the ranks of their opponents. The English soldiers could only be moved from their posts by the orders of their Commanders, or the weapons which stretched them lifeless on the earth."

What would the British soldier do now? How did he behave in the Transvaal?

During 1882, 482 Infantry soldiers re-engaged to complete twelve years, 373 for periods less than twelve years.

The Government is evidently well aware of the importance of Central Africa as a new field for British industry, and it appears that neither M. de Brazza nor France is to be allowed to monopolise that "Dark Continent" first opened up by British enterprise. Captain Lonsdale, C.M.G., has received permission from the Colonial Office to equip an expedition to explore the upper regions of the Niger, and to work his way up country until he meets Mr. H. M. Stanley on the Congo. He has also been authorised to arm and equip whatever number of men he may deem necessary for the safety of his expedition, and it is stated that he will raise a force of several hundred Houssas. It appears that Mr. Stanley has already organised a force of two hundred of this war-like tribe, and that it is the knowledge of these facts which has induced the French Government to send out such a large quantity of arms and ammunition, as well as men, to M. de Brazza.

THE ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have only just had the opportunity of reading a recent able and consistent article in the columns of your paper *in re* the Army Medical Service. However, I must ask you to give credit where credit is due. Dr. Crawford was not the first to attach a Medical officer to each corps, when proceeding on active service, the very same thing having been done by Sir W. Muir in the Zulu Campaign, he himself having been the originator of "unification." "Unification" was intended to afford a "system," practicable in time of peace and war; but on the very first occasion of active service the theory was found impracticable, and a Medical officer was attached to each corps engaged as a practical necessity, but with the disadvantage that men so attached found themselves strangers to the officers and men, as painfully experienced by myself, who, from the very first, foresaw that "unification" was unsuited to the British Medical Service. No doubt, Sir, by a great number you are esteemed an "enemy" to the "Army Doctors," in consequence of your candid and persistent conservative opposition to "unification;" and I can quite sympathise with you, as I have had "more kicks than halfpence" myself, for upholding your views from the very beginning of the vile change. I am now too senior to reap any benefit or personal advantage from improvement, but not selfish enough not to wish for an improvement for my juniors, Medical and Militant. You are, indeed, correct in thinking that our present able and respected Director-General and his deputy, the popular "Jack," are the very men to re-establish the Medical Service to more than its original position, and bring back harmony and social comfort to the executive grades, not incompatible with improved duty to the State and to the individual soldier. The old regimental system, no doubt, had its faults, and its hospital administration was cumbersome and expensive; but what a "Phœnix might have arisen from its ashes!" "Unification" was to have been identical with economy. Has it been so? The station hospitals have been the sole points of economy, and how much more efficiently and happily to every one concerned might not they be carried on, under an improved regimental system, each regiment having two medical officers, each isolated battery of artillery one, who would be allotted a certain per-centage of beds in each station hospital, and be held responsible for the treatment of sick and sanitary work of their corps, their appointments being for five years, retainable for a second five years, should they be found the "right men in the right place." The station hospital itself should be administered by a brigade surgeon or senior surgeon-major responsiblefor the discipline, equipment, and registration only of the hospital. By this means, all medical officers would be able to get their respective proportion of leave, similar to their militant companions, and in time of war no change would be requisite, field hospitals representing station hospitals, and base hospitals representing Netley and Herbert Hospitals, with a carefully selected staff, supplemented, if necessary, by civilian skilled assistance. It may be argued that the proportion of home and foreign service could not be equally regulated under such a system, but has "unification" as yet done anything to lengthen the periods of home service, except to a chosen few? As regards command of the Army Hospital Corps, I have ever looked upon it as unprofessional and a grand mistake, which most senior Medical officers are now beginning to see, and I am in hopes that it may yet be changed into a separate corps, with its own officers, as before.—I am, &c.,

A SENIOR OFFICER, A.M.D.

LIEUTENANTS AND THE PAY DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The authorities have made a mistake in altering Article 366 of the Warrant of 1882, if it is thought thereby to accelerate promotion. Senior Lieutenants of ten years' service will think twice, on the eve of promotion in their corps, before they join the Pay Department in that rank. It might be reasonably asked,—What will be the status of a ten years' lieutenant ten years hence? If we gauge from the times, probably "Lieutenant and Honorary Captain." Comment here is useless. The means of accelerating the promotion of subalterns is multiform:—Make captains adjutants of Brigade Depôts, second them also in the Militia, or add four more to each regiment to work under the majors. Do anything and everything to give the hard-hit subalterns an opening, but not in the way suggested in the Circular of May 18, 1883. Happy thought! Promote to captains all lieutenants of ten years who desire to join the Pay Department.—I am, &c., SERIOUS.

THE FORAGE ALLOWANCES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It is with no desire to swell the rising tide of discontent in the Army that I venture to ask the admission into your columns of a few observations on a subject of considerable importance to a large class of officers. I refer to the forage allowance, which, as is well known, is utterly inadequate to the purpose for which it is granted. It almost seems as if this allowance is so regulated as to make mounted officers pay out of their own pockets half the keep of their horses, in consideration of the pleasure of being mounted, the proper principle being that all the expenses of chargers kept for duty purposes should be paid by Government. The cost of a serviceable horse, with all the necessary trappings and furniture, may be put down at least as from £80 to £100, a sum very often not at the command of men promoted to field rank or appointed to the Staff. The rate allowed for the keep of a horse varies from 1s. 2d. in Ireland, to 1s. 8d. a day at Aldershot. It comes, therefore, to this, that before an officer on promotion or appointment to the Staff draws one penny of his increased pay, he must put down a large sum, which may greatly inconvenience him at the time, and of which, owing to accidents, changes of stations, and the natural wear-and-tear of horse-flesh and saddlery, he may never recover even a small portion. The niggardly forage allowance, as all men acquainted with horses must be aware is utterly insufficient to feed the animal, and to pay for the groom, blacksmith, and veterinary-surgeon, whose services are as necessary the horse as hay and oats. In civil life the aforesaid expenses are generally reckoned at a pound or a guinea a week, while the Military rider is considered to be magnificently remunerated for keeping a horse for the public service by a grant of from £21 to £30 a year. This is a matter which requires to be looked into and considered. Much might be done towards its rectification, by either granting to mounted officers from the ranks of the Cavalry the loan of horses and trappings, to be returned on the cessation of the officers' duties; or by an increase of the present insufficient daily allowance, which appears to be calculated on the usual War-Office principle, not of justice or adequacy, but of anything being good or sufficient enough for officers of the Army who have no friends to represent their interests, nor any advocacy beyond that which is so generously accorded in your columns.—I am, &c.,

A FRIEND OF ONE INTERESTED.

MAJORS AND STAFF EMPLOY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I feel sure that all majors serving on the Staff will be glad to see that you have not lost sight of the disabilities under which they labour. Some months ago, under the head of "An Undoubted Grievance," you published an article on this subject. Officers on the Staff are the last to grumble, and they have not done so. But they cannot but feel; and what must their feelings be when they (nominally field officers) are denied the very allowances they would get, had they never been selected for the Staff, after, we must presume, long service and arduous study? Take an instance. A major is selected for Staff service, and accordingly, is seconded in his corps. A captain of that corps obtains his majority as a consequence. The two officers subsequently travel on duty together; the Staff major can only claim 10s. a day travelling allowance; but his junior, the untutored regimental major, who owes his very promotion to the other's selection, gets 15s. If this be not a premium on the theory "Stick fast to your corps, and don't go to sea," we are much mistaken. A field officer, of some 20 years' service, is informed that he is specially selected; but at the same time, is given to understand that it is too much to expect that he can aspire to higher allowances than those granted to the last-joined medical officer or to an inspector of Army schools (who ten years before was a non-commissioned officer), and that he is altogether holding his head too high, if he expects those given to every medical officer of 12 years' service. We cannot help agreeing with you that to discredit the Staff and foster the view that it is "not good enough" to go in for, is to do harm to the Army at large.—I am, &c.,

A MAJOR (MERELY STAFF).

OFFICERS FROM THE RANKS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—As you are the exponent of the views of the service, permit me to bring to notice the status of the above class of officer. It will probably suggest itself to you and others that article 67 of the Royal Warrant for 1882, "Pay and Promotion," cuts the ground from under the feet of all officers from the ranks, and that, unless some considerable concession is made to those officers, not one in a hundred will rise beyond the rank of captain in the service. To make the matter plainer,—a non-commissioned officer or warrant officer is made a lieutenant after 12 years' service; he has only 14 years to run for compulsory retirement, half his former service, that is, six years, being counted against him. This poor fellow, for such I must call him, is compulsorily retired after 14 years' service, without the ghost of a chance of succeeding to anything, and this is what is called "the Marshal's bâton"! I would venture to suggest that the officers concerned should have the same chance of promotion for 20 years as all others, as this invidious distinction keeps many a good man from competing for what must only be the semblance of the reality held out to the public. Take even the last circular issued relative to the Pay Department and its candidates. In it, captains and lieutenants of 10 years' combatant service may join it. When the officer from the ranks promoted at the age of 32 has ten years' combatant service, his age exceeds the limit for qualification to this Department, and it is not even suggested that the half rank-service, &c., should count as part of the qualifying ten years, although the experience of the officer from the ranks, and the interest he has in the service, are, on all accounts, immeasurably superior to the class for whom the Warrant has been revised. If we come to consider the work of these officers, past and present, the influence they exercise on the service, and the advantages the latter derive from their presence in it, it will not be too much to ask that they should have the same measure of justice meted them as others. I venture to place on record one or two of the many peculiarly painful disadvantages of the service, as it is only by publicity we estimate our surroundings, and the more light we throw on these matters the more fully will we comprehend our wants; and not the least amongst the latter would be a judicial mind, with a judicial balance, to assimilate the gifts of the service without class and without prejudice.—I am, &c., OBSERVER.

"Dragoon" writes on behalf of non-commissioned officers of Cavalry in India, who, he contends, should enjoy the same indulgence granted to non-commissioned officers on home service, in respect to transfer to the Yeomanry. This privilege is at present denied to those in India, although many would gladly avail themselves of the chance of joining the Yeomanry, were they allowed to volunteer. Our correspondent says, "I do not suppose the War Office would permit volunteering, unless one had completed some years' service in this country; but I think those who rule the destinies of the Army have quite overlooked us out here. They would be doing both the Regulars and Yeomanry a good turn by allowing non-commissioned officers (*i.e.*, troop serjeant-majors or serjeants) of five years' service in India, and 16 to 18 years' total service, to transfer their services to the Yeomanry."

THE WEST INDIES STATION

[FROM OUR CORRESPONDENT.]

Port Royal, Jamaica, June 7, 1883.

As I predicted, so has it come to pass, our dear old Commodore goes home by this mail; whether he will return to us I think very doubtful. He was most loth to leave, but Dr. Fegan told him that he would not be answerable for his life if he remained out any longer. The severe shake he got in the Flamingo was no doubt the original cause of his illness. His loss will be greatly felt, both here and at Kingston, where he was a great favourite. The dock-yard under his hands is quite a different place, order and neatness having taken the place of chaos and dirt. Com. Davis, of the Griffon, takes over the duties for the present, but I suppose the Garnet will be ordered here. The Fantôme is here, but I believe goes to Haiti next week for a few days, then on to north side to give leave to crew. We are trying hard to get money for the purpose of building a new club for the officers. The old house has lasted many years, but at last has arrived at that stage that no more patching will keep it weather-proof, and it is really necessary that a new house be built. The Commodore wants to change the position, and has written to the Admiral to endeavour to get the old polygon fort made over to the Admiralty for this purpose. It would be a most advantageous site, some 20 ft. or 30 ft. above the level of the sea, and far away from the coal-dust and also from the men's recreation-room. In the present house, you can hear almost every word from one place to the other. If you could get any subscription from old West-Indian officers to assist in this good work, it would be a great boon, as in Port Royal there is no other place except the Club for officers of all ranks. About £700 will be required for a good house. A native seaman belonging to the Urgent was admitted into the hospital with small-pox, but there seems some doubts in the minds of the medicos whether it is small or chicken-pox. The Commodore, however, took every precaution, placing that part of the hospital in quarantine, and the whole town of Port Royal. There has been no fresh case. The hospital is wonderfully nice and clean, and great credit is due to Dr. Fegan for the way it is looked after at a small expense. Dr. Jennings and Mr. Duffus, the dispenser, also go home by this mail. The latter has served his full time, and was much liked by every one. The revolution in Haiti progresses slowly, but the rebel party are certainly gaining ground. Their supply of arms and money seem almost unlimited, but where it comes from nobody seems to know. Several towns have risen in their favour, while on the other side money is scarce, neither officers nor men getting their pay. It is really a war of races, the pure black against the brown, the latter being more plentiful in the towns, while the country people are chiefly black. The President, Soloman, is very black, but he has married a white French woman, who is, I believe, a very clever person; no doubt they have feathered their nest, and I should not be the least surprised to hear that they have bolted for France at any time. France is the haven for all Haitians, French being the language of the country. We are anxious to hear news of the unfortunate Mallard; how and where she got yellow-fever seems a mystery. Port-au-Prince appears to be quite healthy, and she did not go to any other port in Haiti. The assistant-paymaster (the only one of the four who recovered) goes home in the Medway, invalided. The weather is getting very hot, and I am afraid we are going to have a hot summer. Mosquitoes are also getting very plentiful.

THE BOMBARDMENT OF TAMATAVE.

Despatches received at the Admiralty from the officers commanding H.M.'s ships Dryad and Dragon, at Tamatave, Madagascar, give the following account of the bombardment of that place by the French Fleet, under Admiral Pierre:—As soon as it was known that the Hovas had rejected the ultimatum presented by the French Admiral, the majority of the foreign residents took refuge on board the ships in the harbour. The bombardment of the fort lasted two hours. The Hovas made no reply to the French fire, and evacuated the fort after it had been struck by the first few shells. The town itself was set on fire in several places, partly by the French shells and partly by the native inhabitants, who seemed determined that the French should gain nothing by the occupation. Fortunately, none of the foreign residents lost their lives, and their property did not suffer much injury. The French landed, on June 11, about 900 men, to occupy the town. Within half an hour from the time they landed, they took possession of the fort, there being no one inside to offer any resistance. Steps were immediately taken to strengthen the fort, and the French mounted a number of guns in it, so as to be able to make a good defence in case they were attacked. Five hundred of the men were left as a garrison, and the rest subsequently returned to the ships. The Hovas retreated to the hills near the town, where they are being reinforced from the capital. Some skirmishing is expected, as the French piquets are feeling their way towards the interior. The French flag was hoisted at the fort on June 14, and the town was placed in a state of siege under military law. The custom-house is in possession of the French, who are collecting the duties, and the authority of the foreign Consuls is entirely superseded. Communication with the interior of the country is exceedingly unsafe. All French subjects were ordered to quit the capital on the outbreak of hostilities. None of them, however, have arrived at the coast, and grave fears are entertained as to their safety. It is seriously doubted whether, when the news of the bombardment of this town and of the other forts and villages along the coast reaches Antananarivo, the Malagasy authorities will be able to afford protection to the foreigners residing there, whatever their nationality may be. When Tamatave was bombarded the number of British subjects living in the town was about 600, but as the despatches make no mention of any casualties, it is assumed that all were safe and uninjured.

ASSISTANT-PAYMASTERS, R.N.

The Secretary of the Admiralty could not have known that Assistant-Paymasters possess feelings the same as other human beings, or he would not have directly blunted them as he did on two occasions this week, when their claims were advocated by Mr. O'Connor. Possibly he was unaware of their existence until the question appeared on the notice-paper, and then the able assistants, in which the Admiralty so richly abounds, prepared him with statements which are utterly at variance with fact, and added insult to the injury under which these officers have long suffered. He was "glad to say that their prospects of promotion are at present somewhat more favourable," which, we can assure him, is not the case. When questioned as to service as Assistant-Paymaster after eight years being allowed to count as "senior service," he stated that the present conditions of service were, as a whole, satisfactory, which no one will admit. With astounding ignorance, he asserted that the long period served by Assistant-Paymasters was due to the entry in past years of officers in excess of the requirements, when it is well known that some few years ago the list of Assistant-Paymasters had become so largely reduced as to necessitate renewing the entry of Assistant-Clerks, and retirement of Paymasters and Assistant-Paymasters was in consequence suspended. The assertion that during the past 18 months more promotions have been made than the average number in former years is contradicted by the fact that in 1882 there were four specially promoted for Egypt, and 13 advanced by seniority, against 12 in the preceding years from 1878, thus giving an increase of one only in support of the official statement. They are now 15 years before they become Paymasters; whereas, in 1867-8, they were from 7 to 9 years; and in 1869, 10 years. When the Childers' scheme was introduced, they were in no way benefitted. In 1870, they were over 10 years; in 1871-2, 11 years; in 1873-4, 12 years; 1876, 13 years; 1877-9, 14 years; 1880-1, 15½ years, and nearly the same in 1882; therefore, the period has progressively enlarged. Yet, in the face of this fact, the Admiralty representative congratulates them on their improved prospects. Such a statement is in accordance with others which emanate from the Admiralty, and bear only one impress, which, unfortunately for the Naval service, the public do not clearly see. Assistant-Paymasters can justly complain of the manner in which the Admiralty have "booted them about." In 1877, by Order in Council, they were given rank "with lieutenants;" but two months afterwards, on the authority only of "my Lords," it was withdrawn, and "with, but after," substituted. In 1879, the uniform which was allowed them in 1877 was altered to one less important in appearance, and hardly worth adopting. In March last their social position on board ship could not be decided until a circular and general letter explaining the latter had been issued. Those lately promoted are 37 years of age, and cannot, at the ordinary rate of employment, acquire 11 years' service, to enable them to count all junior time, until they are 15 years a Paymaster and in their 53rd year. As they will probably be worn out and sick of the service at 55, they will gladly retire, without attaining the highest rate of full pay, and the Admiralty will get rid of them cheap. Such injustice speaks for itself, and shows that the Admiralty are willing to see those suffer who are unable to make a stand against such cowardly treatment. If officers are necessary for the maintenance of the service, they should be fairly dealt by, and their just complaints given proper consideration, instead of equivocal and misleading answers accorded them. The duties of Assistant-Paymasters have increased, while the number to perform the work has gradually lessened. They are middle-aged men when promoted, and even then placed in appointments which belong to junior officers. Advantages which accrue to other officers are denied them, and the Admiralty turn a deaf ear to suggestions which would ameliorate their lot. Assistant-paymasters are much indebted to Mr. O'Connor for bringing their case before the Legislature singlehanded, and will not forget that no Naval Member afforded him the slightest support in his praiseworthy effort to have right done to a long-suffering and hard-worked body of officers.

The annual meeting of the shareholders of the United Services Proprietary College, Westward Ho, took place on Friday, June 28, Gen. Sir H. C. B. Daubeney, K.C.B., in the chair. The chairman congratulated the shareholders on the continued success of the school, both educationally and financially. Field-Marshal Lord Napier of Magdala, in moving the adoption of the report, commended the prudence of the Council in restricting the dividend to 3½ per cent., and reserving a good balance to spend upon school improvements. This motion was seconded by Surg.-Gen. Moore, C.I.E., and carried unanimously.

According to the latest official return of Surgeon-Gen. J. Irvine, principal medical officer to the army of occupation in Egypt, out of a total force at Cairo of 5,135 troops, 386 were on the sick list; of the 1,578 troops at Alexandria, 112 men were sick; while of the 98 men at Port Said, 5 only were under medical treatment. Of the various corps, the return of the Royal Engineers is the most favourable, of 181 only 10, or about 5 per cent., being on the sick list; while the regiment which is suffering most from disease is the Gordon Highlanders, which out of a total strength of 792 has 96 men, or over 12 per cent., ill. Telegraphic instructions have been sent out to Surgeon-General Irvine to take every precaution for the health of the troops, in view of the outbreak of cholera in Egypt, and a draft of officers of the Army Medical Department and Army Hospital Corps will shortly proceed to the country, to strengthen the medical staff.

"Sapo Carbonis Detergens" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "Wright, Southwark," are on each wrapper, and branded on each tablet, without which none is genuine.

The Army.

1st King's Dragoon Guards. The gold medal offered by Col. P. Roddy, V.C., Bengal S.C., for the best practical essay on African horses has been awarded to Vet.-Surg. Longhurst, A.V.D.

2nd Dragoon Guards. The regiment is *en route* from Manchester to Aldershot. The dismounted party will arrive on Monday next. The regiment will be quartered in the East Cavalry Barracks.

7th Dragoon Guards. Major Creagh has completed his five years as Adjt. of the Denbighshire Hussars.

4th Hussars. H.R.H. the Duke of Cambridge made an inspection of the regiment at the Cavalry Barracks, Hounslow, on Tuesday. After a close inspection of the men, who were paraded in the barrack-square, his Royal Highness visited the stables, barrack, and orderly-rooms. The Duke expressed his satisfaction with the state of the regiment.

ROYAL ARTILLERY.

Col. F. G. Bayley, who recently vacated the appointment of Commandant and Inspecting Officer of Auxiliary Forces for the Woolwich Regimental District, on the expiration of his tenure of Staff service, has been succeeded by Col. W. J. Finch.

The remains of Gen. Sir Edward Sabine, R.A., K.C.B., were deposited beside those of his wife, who died in 1879, in the family vault at Tewin Church on Saturday last. In accordance with the request of the venerable general, his funeral was of the plainest character. The chief mourners were the Rev. Alexander Baring-Gould, M.A., the Rev. Sabine Baring-Gould, M.A., Mr. Frank Baring-Gould, Capt. Hamilton Sabine Pasley, and Prof. S. R. Gardiner, relatives of the deceased, the other mourners comprising Gen. Sir H. Lefroy, R.A., Gen. W. J. Smythe, R.A., Brigdr.-Gen. Reilly (Director of Ordnance), Major Cameron, R.A. (Ordnance Department, Woolwich), Mr. J. Evans, D.C.L. (Treasurer) and Prof. G. G. Stokes (Secretary) of the Royal Society, Capt. Sir Frederick J. O. Evans, R.N., F.R.S. (Hydrographer at the Admiralty), Mr. R. H. Scott, F.R.S., Mr. J. F. Bateman, F.R.S., Mr. H. Slade, and Mr. Baker (of Kew Observatory). The service for the burial of the dead was impressively read by the Rev. A. Carter, curate of Tewin.

Coldstream Guards. The 1st Batn. will leave Wellington and St. George's Barracks on the 28th inst. for Chelsea Barracks, south wing. The 2nd Batn. will move on the same day from Pirbright to Windsor.

Grenadier Guards. The Queen has approved of Col. the Hon. G. P. H. Villiers, military attaché at Paris, being detailed to attend the French Cavalry manœuvres, which take place at Châlons between August 13 and 20 next.

Scots Guards. The 1st Batn. will proceed on the 28th inst. from Windsor to Pirbright, for musketry training.

3rd Buffs (East Kent Regiment). Capt. Taaffe, 1st Batn., has joined the 1st Batn. 21st Fusiliers at Dover, for duty as a probationer for the Pay Department.

10th Lincolnshire Regiment. Lieut.-Col. Stockwell has been offered and has accepted the command of the hill depôt at Pachmaree, in the Central Provinces. Lieut. Fasken has arrived at head-quarters, Sitapur, on transfer from the 1st Batn. Lieut. Andrews has joined the 2nd Batn. on appointment.

21st Royal Scots Fusiliers. This battalion was inspected on the 3rd inst. on the Citadel Glacis, Dover, by Major-Gen. Newdegate, C.B., commanding the South-eastern District. At the termination of a long and scrutinous inspection, and a series of movements to test the efficiency of all ranks, Gen Newdegate addressed the parade thus:—"Col. Gildea, officers, non-commissioned officers, and men,—I am highly pleased with all I have seen of you to-day. Your conduct in town, too, is all that any General can desire. The place which your battalion holds in the public estimation is best shown by the fact, as conveyed to me by your colonel, that your regiment is now at full strength. I shall be but performing my duty in reporting most favourably of you to the Commander-in-Chief."

38th South Staffordshire Regiment. A meeting of officers was held in the theatre of the Royal United Service Institution on Tuesday, with the object of considering the placing of two old sets of colours in Lichfield Cathedral, with a memorial of the officers, non-commissioned officers, and men of the regiment who were killed in action, or have died of wounds, or from other causes, on active service, during the Crimean, the Indian Mutiny, and the recent Egyptian campaigns. The following were present:—Major C. Cockayne-Frith, Sir R. Sinclair, Bart., Lieut.-Col. Sir G. Hume, Col. the Hon. C. J. Addington, Lieut.-Col. H. P. Vance, Col. C. A. S. Dickins, Col. W. K. Ellis, C.B., Lieut.-Col. P. H. Eyre, Lieut.-Col. Sir N. Pringle, Bart., Capt. J. Emeris, Capt. M. Thackeray, Lieut. E. S. Pipe-Wolferstan, and Lieut. N. C. Heath. Major Cockayne-Frith, as the oldest officer of the 38th present, was voted to the chair. The following resolution, on the motion of Sir G. Hume, seconded by Col. Dickins, was carried:—"That, with the permission of the Dean and Chapter, a memorial be placed in the Lichfield Cathedral, together with the old colours restored by the Earl of Dartmouth, and those at present borne by the regiment (which are about to be replaced), to record the services of the 38th, or 1st Staffordshire, Regiment." Lieut.-Col. Eyre, now in command, explained that for a considerable period the old colours, which were carried through the Peninsular campaign, could not be traced until their recent restoration by the Earl of Dartmouth, into whose possession they had passed with property purchased from the family of Col. Sir Henry Piggott, a former commander of the regiment. They were found wrapped in canvas. The regiment was raised at Lichfield in 1702, and 80 years later was named the 1st Staffordshire. During its existence of 181 years, 131 had been spent in foreign service. Col. Addington proposed and Col. Ellis seconded the nomination of a committee to carry out the wishes of the meeting, and it was also agreed to invite subscriptions from the officers with that view. Votes of thanks to Lord Dart-month, the Committee of the Royal United Service Institution, Lieut.-Col. Eyre, and to the chairman concluded the proceedings.

49th Berkshire Regiment. A handsome monument has been erected in the English church at Cairo in memory of the non-commissioned officers and men of the regiment who fell in the late campaign in Egypt. The tablet is of white marble, and bears the following inscription :—"Sacred to the memory of the following men of the 1st Battalion of Princess Charlotte of Wales's (Berkshire Regiment) who died in Egypt between July 27, 1882, and May 10, 1883." Then follow the names of 21 non-commissioned officers and men. The inscription is surmounted by the colours of the regiment and a laurel-wreath.

ROYAL MARINES.

Col. Howard Jones has returned from his trip to Egypt to restore his health, and rejoined his head-quarters last Saturday.

Colour-Serjt. Burtonshaw, of the Portsmouth Division of Royal Marines, who has received his commission as Qrmr. in the corps, in the vacancy caused by the retirement of Capt. and Qrmr. Herring, of the Depôt, at Walmer, on the 3rd inst., served on the Staff as serjt.-major of the Royal Marine Force in Egypt, and has since been specially employed on police duties in Dublin.

51st King's Own Light Infantry. The following is an extract from Oude Division Orders, June 1, 1883, by Lieut.-Gen. C. Cureton, C.B., commanding :—"The Lieutenant-General Commanding cannot allow Col. M. C. Farrington to leave this command without placing on record the very high estimation in which he holds that officer's services. Col. Farrington has discharged the duties of Assistant-Adjutant-General with judgment, tact, and energy, and the Lieutenant-General cannot speak too highly of the great zeal and ability he has invariably displayed in conducting the duties of his important office. The Lieutenant-General has been fortunate in having an officer of such ability at the head of his staff during the time he has had command of the division. He not only possesses a thorough knowledge of all matters connected with regimental and staff duties, but has shown himself thoroughly acquainted with the movement of troops of all arms, and has been of the greatest assistance to the Lieutenant-General during the drill seasons, and more particularly during the past season, when a large force was collected at this station for tactical manœuvres. Lieut.-Gen. Cureton is much indebted to Col. Farrington for the valuable assistance and support he has invariably received from him, and in bidding him farewell he fears he will lose a valued friend and the services of an able adviser."

55th Border Regiment. The *Pioneer* says :—"Capt. Braddon, Aide-de-Camp to Major-Gen. Hume, C.B., at Lahore, having reached the age of 40 years, when men are supposed to be too worn out for advancement regimentally, has been promoted Major on half-pay from May 3, the date on which, according to Royal Warrant, "a Captain shall not be eligible for promotion to a regimental majority after the age of 40 years." Major Braddon will complete his service on the staff, and then, if fortune favours, he will be brought back as a Major when a vacancy offers."

60th, King's Royal Rifles. Capt. J. S. D. McGill, late of the regiment, died on the 30th ult.

67th Hampshire Regiment. It seems impossible that the Indian authorities can contemplate sending the regiment from Cannanore to Burmah, as is stated, as it was in Burmah only eight years ago, and is within five years of its return home.

The Auxiliary Forces.

MILITIA.

South Irish Division, Royal Artillery. Col. E. Bagwell-Purefoy, of Greenfield, county Tipperary, commanding the 5th Brigade (Tipperary Artillery), died on Monday at Derrymore, Ireland. He was the second son of the late Very Rev. R. Bagwell, Dean of Clogher. He was born in the year 1819, was educated at Harrow, and formerly held a commission in the 4th Hussars. In 1846 he succeeded to the estates of Col. W. Purefoy, of Greenfield, whose name he assumed by Royal licence.

The Royal Warwickshire Regiment. The training of the 3rd Batn. terminated at Warwick on Saturday last. The inspection was made by Major-Gen. Cameron, C.B., on Friday last. The officers present were :—Col. Grimston (commanding), Majors Roberts and Marsland, Captains Pennington, Savage, Spooner, Cruikshank, Dawson, Creagh, Gretton, and Hon. Major Mansergh (attached); Lieuts. Tyrwhitt, Cunliffe, Thursby, Lennock, Smyth, Congreve, Corder, Archer. Gen. Cameron, in addressing the regiment, said he was well satisfied with everything that he had seen. The marching past was very good, especially in double companies. As far as the mechanical work was concerned, the steadiness with which the men carried out their orders proved that great attention had been bestowed upon this drill. Though the shooting was above the average —nearly 50—it should be made better. That the conduct of the men had been good was obvious from an inspection of the entry book, which exhibited only 49 delinquencies. He had never come across a regiment with so little drunkenness. That fact spoke for itself, but, nevertheless, when officers take an interest in their men, as he had witnessed on the preceding evening at their small festive gathering, the result must always be a diminution of crime.

East Lancashire Regiment. The *Manchester Courier* says :—"It is impossible to resist noting, for the special benefit of the over-burdened British taxpayer, that although the members of the Militia Battalion of the East Lancashire Regt. are now undergoing their annual training at Southport, a matter of some nine miles from Altcar, only half of them have been permitted to fire even so small a number as 40 rounds at the targets. The reason given is that to do so would involve too much expense to the nation. It would be difficult to imagine a more glaring instance than this of sinking a good ship for the sake of a pennyworth of pitch. Here is one of the smartest Militia regiments in the kingdom prevented, for the sake of a paltry £42, from learning the most vital part of its duty, and some hundreds of men will return to their civil occupations, for another 12 months at least, with no knowledge of or mastery over their splendid Martini rifles."

Durham Light Infantry. The 3rd Batn. assembled at Barnard Castle on the 25th ult., and with the recruits, numbering in the whole 800 men, are now engaged in their annual training. The officers on duty with the regiment are Col. Sowerby; Majors Briggs, Lawson, and Richardson; Surg.-Major Munro; Capts. Hugginson, Wilson, Wilkinson, Molyneux, Allison, Smithson, Campbell-Haslip, and Ruddach (adjt.); Lieuts. Denny, Scott, Thompson, Cuthbert, Boyle, and Morris; and Qrmr. Shea. The training will terminate on the 21st inst.

Gordon Highlanders. The inspection of the 3rd Batn. took place on June 28 and 29, at Aberdeen, where the corps has been in barracks since the beginning of the month. On Friday it paraded in review order at 10 a.m., and, under command of Colonel Turner, marched to the New Town Links, where it received the inspecting officer (Col. Parker, C.B., late 92nd) with a general salute. It then formed quarter-column by the right on No. 1, and marched past in column, quarter-column, and at the double, with great steadiness. Afterwards line was formed on the rear company, and the men were put through the manual and firing exercises by Major and Lieut.-Col. Keen, and the bayonet exercise by Capt. and Adjt. Oxley. Col. Turner then again assumed command, and executed a number of evolutions. Finally, he wheeled the battalion into line, and, advancing in review order, saluted. The manner in which this was done elicited well-deserved applause. The battalion, having returned to barracks, was formed into square on its parade, and addressed by Colonel Turner. He said that he had been commissioned by the inspecting officer to let them know how highly pleased he had been with the whole of the inspection. The cleanliness and order of the barrack-rooms had given him the greatest satisfaction, and the steadiness of the battalion on parade had well kept up its old reputation. The strength of the battalion at head-quarters was 627.

The under-mentioned regiments are ordered to assemble for their annual training on Monday :—4th Batn., Argyll and Sutherland Highlanders, at Irvine Muir, in camp; 3rd Batn. Border Regt., at Brackenber Moor, in camp; 3rd and 4th Batns. North Lancashire Regt., at St. Anne's-on-Sea, in camp; 3rd and 4th Batns. Manchester Regt., at Southport, in camp; 3rd Batn. Royal Highlanders, at Perth; 4th Batn. Royal Scots Fusiliers, at Ayr, in camp; 3rd and 4th Batns. Scottish Rifles, at Lanark Muir, in camp; 3rd Batn. Somersetshire Light Infantry, at Leigh, in camp; 4th Batn. East Surrey Regt., at Aldershot, in camp; 3rd Batn. Royal Welsh Fusiliers, at Wrexham, in camp; 4th Batn. Worcestershire Regt., at Worcester, in camp. The 3rd Batn. York and Lancaster Regt. assembles on Wednesday for 27 days' training at York.

The following regiments assembled on Monday last for twenty-seven days' training and exercise :— 4th Brig. Scottish Division (Fife Artillery), at Cupar; 4th Batn. Border Regt., at Brackenber Moor; 4th Batn. Durham Light Infantry, at Redcar; 3rd Batn. Gloucestershire Regt., at Horfield; 3rd and 4th Batns. Royal Lancaster Regt., at Lancaster; 3rd and 4th Batns. Middlesex Regt., at Hounslow; 3rd Batn. Northumberland Fusiliers, at Alnwick; 3rd Batn. Royal Scots, at Glencorse; 3rd Batn. Royal Scots Fusiliers, at Dumfries; 4th Batn. Warwickshire Regt., at Warwick; 3rd and 4th Batns. West Riding Regt., at Halifax; 4th Batn. Yorkshire Regt., at Richmond; and 3rd Batn. West Yorkshire Regt., at York.

The under-mentioned regiments on completion of training will be dismissed to-day :— 3rd Batn. Highland Light Infantry, at Lanark Muir; 3rd Batn. East Lancashire Regt., at Burnley; 3rd and 4th Batns. Liverpool Regt., at Warrington; 4th Batn. Oxfordshire Light Infantry, at Oxford; 4th Batn. North Staffordshire Regt., at Lichfield; 4th Batn. South Staffordshire Regt., at Lichfield; and 3rd Batn. Worcestershire Regt., at Worcester.

THE VOLUNTEERS.

Honourable Artillery Company. A presentation dinner to Lieut. W. H. Baker, of the Light Cavalry, took place at the Armoury House on Wednesday, when about 50 members of the troop assembled. The chair was taken by Capt. Lord Headley, who presented to Lieut. Baker a full-sized oil-painting of himself, also a service sword. The presentation was made on behalf of the whole of the members of the troop, and in recognition of Lieut. Baker's services for several years past.

2nd Kent (Plumstead) Artillery. Col. Finch, R.A., inspected Lieut.-Col. Hughes's command last Saturday evening, in the Repository School at Woolwich. The numbers were not large—only 332, the 2nd has a strong competitor in the Woolwich Arsenal Corps—but the quality is undoubtedly good.

5th Cheshire Rifles brought its stay in camp, at Somerford Park, the residence of Col. Sir C. W. Shakerley, C.B., to a close on Monday. On the previous Saturday it was inspected by Col. J. H. Hall, commanding the 22nd Regimental District, when 981 of all ranks, out of a total strength of 998, were on parade.

1st Volunteer Battalion, Essex Regiment. Col. J. S. Hand, commanding the 44th Regimental District, inspected this (the Ilford) battalion last Saturday, at Warley, when over 500 of all ranks were on parade, under Lieut.-Col. W. J. Burgess. The inspection passed off satisfactorily.

3rd Lancashire Rifles. This battalion, over 800 officers and men, goes into camp to-day, at Lytham.

6th Lancashire (1st Manchester) Rifles were officially inspected on Saturday last by Col. Lock, commanding the 4th Regimental District. Lieut.-Col. Bridgford's fine command, of which we recently saw a good representation at Aldershot, had a muster of 1,053 of all ranks, out of a total strength of 1,163, and passed the ordeal to the evident satisfaction of the inspecting officer.

6th Middlesex (St. George's) Rifles. This battalion, 495 of all ranks, in six companies, under the command of Col. the Hon. C. H. Lindsay, C.B., underwent its annual official inspection last Saturday evening in Hyde Park, by Col. Fitzroy, Coldstream Guards, who said it turned out and drilled well. Col. Lindsay subsequently, in an address to the regiment, regretted that the ordinary drills were not better attended, and thought, unless they could raise two more companies, they might have to be amalgamated with another corps.

12th Middlesex (Civil Service) Rifles. Col Viscount Bury's command was inspected on Saturday evening last in the Old Deer Park, Richmond, by Col. Clive, Grenadier Guards. Including the company of the 25th Middlesex (Bank of England) Rifles attached, which had 67 of all ranks on parade, the muster was 603. The Civil Service are looking up in strength, but, while we can endorse Col. Clive's opinion about the smart turn-out and the silence in the ranks, we think that some portions of the drill were very loose.

21st Middlesex (Finsbury) Rifles. The battalion brought its stay under canvas at Neavesden to a close last Saturday. We understand that the attendance of all ranks was good, and that Lieut.-Col. Morris proposes to repeat the experiment next year.

22nd Middlesex (Central London Rangers). Col. Alt had a fine battalion to present to Col. Wigram, C.B., Coldstream Guards, at the annual inspection of the corps, on the Guards' Ground, Hyde Park, on Saturday evening last. There were present 685 of all ranks, being exactly the number the corps returned as efficient on Oct. 31 last, or 101 more than were present last year, and 114 more than attended in 1880. Col. Alt was assisted in the field by Majors Florence, Godfrey, and Adderley (adjutant), all of whom, as well as Capt. White, handled the battalion during the drill, which was throughout very satisfactorily performed.

2nd Volunteer Battalion, Royal Fusiliers (23rd Middlesex). Col. Kent, 7th and 57th Regimental Districts, inspected this battalion in Hyde Park, near the Albert Memorial, last Saturday, when Lieut.-Col. Routledge had under his command 750 of all ranks, in eight good companies of 30 files each. A searching ordeal terminated with an advance in review order, and square having been formed, Col. Kent addressed the battalion, and praised its smart and soldierly appearance. The manual exercise, he said, was done well, but the markers, as usual the weak point, did not take up enough distance, and the dressing of companies in line was not done properly from the inner flank to the outer. He congratulated the corps on having become the Volunteer battalion of the Royal Fusiliers, and also upon having got so fine a soldier as Lord Wolseley for their colonel. In conclusion, the gallant officer said Col. Routledge had just cause for pride in his battalion, with the appearance and drill of which he was well pleased.

4th Volunteer Battalion, West Surrey Regiment (late 8th Surrey). Col. T. F. Lloyd, commanding the Guildford Regimental District, inspected Col. Ray's smart battalion on Saturday evening in the grounds of Lambeth Palace, when 578 of all ranks were on parade. Col. Ray, like some other Volunteer officers in the Home District, believes in the axiom that what is worth doing at all is worth doing well, and this was very evident last Saturday, as it has been on many previous occasions, the turn-out being one of which any commander might feel proud. There are no under-sized boys in the regiment, the equipment is complete, and it is sufficient to say of the drill that Col. Lloyd was very pleased with it.

Tower Hamlets Rifle Brigade. Col. Moncrieff, Scots Guards, inspected this battalion last Saturday evening on the Exhibition Ground, Hyde Park. Under Lieut.-Col. Mapleson, with whom also was Lieut.-Col. Wigram, the corps stood in ten good companies, the parade state showing 814 of all ranks. At the close of a long drill, Col. Moncrieff pointed out certain mistakes which had been committed, but praised the muster and appearance.

The 1st Middlesex, 1st London, and 2nd Tower Hamlets Engineers assembled for brigade drill last Saturday evening in Regent's Park, under Col. Hart, V.C., R.E.

The under-mentioned regiments will be inspected this evening :—3rd Middlesex Rifles, at Hornsey; 4th Middlesex (West London) Rifles, in Hyde Park; London Irish Rifles, on the Exhibition Ground, opposite Knightsbridge Barracks; the Finsbury Rifles, at Regent's Park Barracks; and the 20th Middlesex (Artists) Rifles, in Hyde Park.

H.R.H. the Duke of Cambridge inspected the boys in the Royal Military Asylum, Chelsea, on Wednesday. His Royal Highness, who was accompanied by Col. Bateson, was received on his arrival by Col. Mackenzie (the Commandant). The prizes having been presented, the Duke of Cambridge said that never since he first inspected the school had he seen the boys look more healthy, smart, clean on parade, and well drilled. Their drill was as good as any regiment—in fact, he wished all regiments drilled as well. He heard from the report of the Commandant that the conduct was everything that could be wished for. An incentive to them should be the list of the positions occupied by old boys, who had derived all the advantage from being brought up there, and learning that discipline required from a soldier when he joined his regiment. In the conduct reports as to the boys who had entered the Army, there was only one boy returned as "very bad," and he hoped that next time it would be found that they had got rid of that individual, somehow or other. He was greatly gratified and pleased with all he had seen and heard.

Vice-Admiral the Lord John Hay, Commander-in-Chief in the Mediterranean, was to leave Ancona for Avlona on Sunday, with the Mediterranean Fleet under his command. The Humber left Malta for Avlona on Sunday last. Thence the squadron proceeds to Corfu, Zante, and other islands of the Greek Archipelago.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 65 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The House is capable of containing 70 widows, and the Committee appeal to the public for funds to enable them to admit the additional number, the present subscriptions being insufficient.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

An annual subscription of half-a-guinea or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

NOTICES TO CORRESPONDENTS.

K. K.—It is quite within his powers, but the authority is rarely exercised.

The ARMY AND NAVY GAZETTE this week contains eight pages extra.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenchaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.
LONDON, SATURDAY, JULY 7, 1883.

If there were any who favoured the idea of Promotion by Selection, their faith in the advantages of such a system must have been rudely shaken by the last two gazettes. We drew attention last week to the working of the regulations in respect to regimental officers. The *Gazette* of Tuesday last furnished striking evidence of the injustice which will at times have to be suffiered by officers of higher rank under the cloak of this doubtful expedient. Our readers may remember that six months ago a number of steps were given to the senior Line Colonels. These steps had been some time due. After considerable delay, the vacancies were filled by the selection of six officers, viz., Colonels R. T. Glyn, C.B., C.M.G., G. H. Page, G. E. Baynes, W. Cooper, Sir J. C. M'Neill, K.C.B., K.C.M.G., and Sir G. R. Greaves. In the case of some of these officers a considerable jump was made. It had previously been ruled that seniority established a claim to advancement. It was decided, however, by the Secretary of State for War that the interests of the service demanded that, under certain conditions, it was desirable to make examples. Examples were accordingly made; seven of the senior colonels being subjected to the disgrace of having juniors promoted over their heads. It was contended when the officers were passed over that there was something against them. This was the only way in which such wholesale supersession could be accounted for. It was known, of course, to those behind the scenes that there had been a good deal of wire-pulling. Those, however, who are unacquainted with the ways of office could scarcely be brought to realise the fact that such injustice could be openly perpetrated without an inquiry being instituted, or even a question asked in the House. The announcements in the *Gazette* of Tuesday last must have convinced the strongest believer in the integrity of officials that there exists a serious danger of selection and favouritism becoming synonymous terms. There have been for some time a number of vacancies on the Generals' List. These were filled on Tuesday. And how were they filled? In six cases by the officers who, a few months ago, were deemed to be unfitted for the rank to which they have now been promoted. The officers in question were held back from promotion in December last, presumedly because they were not considered qualified for the rank of General officer. Yet within six months we find this decision reversed, and they are given the steps which only a short time previously they were refused. We ask,—Is there anything in such a system to recommend it? It simply comes to this:—If a man has friends at Court he will make headway, whatever his merits may be. If he is unknown; if he has been content to do for years the drudgery of regimental work, and has not aspired to the loaves and fishes of Staff employ, he may be ever so good a soldier, but his fate will rest in the balance,—he may be superseded any day, and driven out of the Army a "Queen's bad bargain." It would be impossible on any grounds to defend the action of the War Office. Either the officers now promoted were qualified, and if qualified, entitled to their promotion in December last, or they were not. If they were qualified, they should have been promoted. If they were not, they should have been removed from the service, and not allowed to block the list and stand in the way of others who are better men than themselves; but to deny them promotion at one time, and to give it to them later, for no other reason than that they have not left the service in disgust, naturally creates an uneasy feeling among officers. It so happens that two of the officers who were favoured in December last were well-known men—one was Equerry to the Queen, the other held for five years the appointment of Assistant-Adjutant-General at Head-quarters. Men like this have, of course, exceptional chances of ingratiating themselves. To the ordinary regimental officer, it is a sad disappointment to find that those who have enjoyed all the good things of the profession continually coming to the front, simply on account of the luck which has attended them, and has enabled them to secure snug berths at Court or Head-quarters. It was never intended that officers such as these should be helped on, under selection, to the detriment of those not similarly fortunate. If it was, it would have been better had the Purchase system, with all its many shortcomings, been allowed to remain in force. The whole service heartily approves of the action of Lord Hartington with regard to the superseded Colonels. They have in every instance fairly earned the promotion that has passed to them; but it cannot be a comforting reflection to the senior officers generally, to feel that that what has happened to Generals Colville, Bowles, Chippendall, Pearson, and Bancroft may any day happen to them, too, and that as a reward for years of professional drudgery, they may be called upon to "give backs" for others to spring over, who are not, perhaps, better officers, but are better-known men than themselves.

It is delightful to see modesty in those in an exalted position, and that evinced by Lord Wolseley at the Dublin banquet is particularly gratifying. Lord Wolseley is right: he is not a public speaker. We wish to give him his due. He is undoubtedly a successful soldier, but not an orator, though, from what has fallen from his lips on other occasions, had he turned his attention in that direction, he would, no doubt, have been as successful a speaker as he is now a soldier. He is a man who, according to his own estimate of himself, could not have done otherwise than succeed in anything. Even had he been a tinker, he has told us he would have made better pots and pans than his neighbours. The labourer is worthy of his hire, and Lord Wolseley has earned the honours bestowed upon him. Lord Wolseley is not only a successful soldier, but he is a shrewd man, and knows how to take advantage of the drift of public opinion. He has the merit, too, of being able to accommodate himself to circumstances. Had Edinburgh decided to do him honour, he would doubtless have said that the Scotch, if led by Scotchmen, would be the best soldiers in the world. He said, in his speech at Dublin, that, during a long career as a soldier, he has carefully studied the characters of men under him. We should have thought, considering the number of years his lordship has been on the Staff, that his knowledge of Thomas Atkins was but limited. But of this no matter. He went on to say, "My lords and gentlemen, I do not think there is a greater folly than to imagine that the strict discipline—that discipline that we know to be so necessary for the maintenance of the Army—can be maintained among Irish soldiers by the cold, unsympathetic rule of Englishmen." This, of course, flattered the vanity of his audience immensely, and we imagine that all those in Ireland who clamour for Home-rule heartily agree with his lordship's views of the Irish character. We have had painful evidence lately that many besides soldiers would like to get rid of the "cold, unsympathetic rule" of England, but, to make use of a Yankee expression, his lordship was simply talking "bunkum." In the first pages of his "Pocket-book," he lays down the rules that ought to guide an officer in his conduct towards his men. Amongst other things, he is to conduct himself in such a manner that the soldier will learn to look upon him as a friend. Beyond the magic circle of Lord Wolseley's admirers, we doubt whether the British soldier has very much love for him. If there is one thing the British soldier has a contempt for, it is humbug. Lord Wolseley should remember that he is not only Baron Wolseley of Cairo fame; he is the Adjutant-General of the Forces also. As such, his duty is to see discipline maintained; not to encourage subordinates to set it at defiance.

The new rules regulating exchanges between Artillery officers are arbitrary, and go too far in the direction of limiting the right to exchange. The question has been asked as to how far the military authorities are constitutionally within their right in issuing regulations, which practically abrogate a privilege conferred on officers by Parliament.

We regret exceedingly to hear that attention has had to be drawn to the conduct of the Foot Guards encamped at Pirbright for musketry and military training. A fatal affray occurred in the quiet village of Frimley on Saturday evening last, in which Guardsmen bore a leading part, when such injuries were inflicted on an unfortunate labouring man, father of a large family, that he died shortly afterwards. Three corporals of the Coldstreams were arrested, and have now been committed on the charge of manslaughter. Unfavourable reports have been current for some time past regarding the behaviour of the Foot Guards in the villages and hamlets near their encampment, and a representation on the subject was recently made by the inhabitants to the nearest bench of magistrates. Military precautions are now taken to prevent the recurrence of disorder, by increasing pickets and police, and confining the men to camp. It is very unsatisfactory, indeed, that the conduct of the Household Troops can be unfavourably compared with that of English and Irish Militia regiments assembled at Aldershot for training. We deeply regret to have to take notice of such a matter, but, in the interests of the Brigade, we feel it our duty to do so, in order that Commanding Officers may take steps, when their battalions visit Pirbright, to prevent a repetition of the scenes which have unfortunately brought so much discredit on the Brigade of Guards generally.

The motion of Lord Wemyss respecting the defective state of our Military organisation, and of the Militia in particular, is again postponed till Monday next. The indifference of Parliament to the state of the Army foreshadows grave disasters should we be involved in European war.

It would appear that the Scientific Corps are becoming as unpopular among the aspirants for commissions as among the population who furnish the ever-declining recruits. At the examination for entrance into the Royal Military Academy, Woolwich, now being held, 50 cadetships are being competed for by only 170 candidates.

The Aldershot "Permanent" Committee on Dress, &c., meet often, but are said to make but little progress. It is rumoured that the members of the committee hold diverse views on various matters under discussion. The grey colour for the military garments of the future does not meet with approval; but a new shade without a name, which has been described as similar in colour to an Aldershot hut, seems to be in favour. One gallant officer appears to hold the opinion that a fantastically constructed cap is all that is required to make the soldier fit for active service in any clime. He has provided himself with patterns of the forage-caps of all the armies in the world, civilised and uncivilised, and has concentrated his talents on this subject. "Great things" are probably expected from this Committee in some quarters, but this is certainly not the general expectation at Aldershot.

Major-General E. Newdigate, C.B., commanding the South-Eastern District, has been selected to attend the autumn manœuvres in France, during the month of September, and will be accompanied by Lieutenant-Colonel J. Alleyne, Brigade-Major, Royal Artillery, Aldershot.

We hope the Quartermaster-General's Department may be able to arrange for the relief of the the 65th (1st Battalion, York and Lancaster) Regiment by the first homeward-bound troopship this year. The 65th, it will be remembered, were brought to Aden before their time in relief of the 72nd Highlanders, who were sent to Egypt. Though Aden is free from malarious fever, its climate has a notoriously depressing effect on Europeans, and the prevalence of brain and nervous diseases render it undesirable to retain troops there longer than a year.

A point which appears to have been overlooked in the case of Colonels compulsorily retired on account of age is that the regulation value of their Lieutenant-Colonel's commission has been considerably reduced. Formerly, they could receive £4,500; now, they only get the commuted value of their retired pay according to Government tables of calculation as to age, which value decreases as the age increases. This aspect of their case is one of grave moment to them, most of them being family men, and the loss under this head has not been compensated for in any way.

We are afraid that it is evident that the Government are trying to put back as long as possible the anticipated discussion on Votes 8 and 19 of the Army Estimates, as they are to be contested in Committee, and the complete failure of Mr. Childers' organisation scheme fully exposed. Under Vote 8, the "reserves" and recruiting will be discussed, and under Vote 19 the treatment of the compulsorily-removed Colonels will be brought before Parliament. Postponement to the latest possible day of these discussions may be good Parliamentary tactics, but they are dangerous, as it destroys the confidence of the Army in the War Department, who are on their trial, for the collapse of all their plans and schemes of reorganisation, both of officers and soldiers.

Major W. C. James, Royal Scots Greys, at present going through a course of instruction at Aldershot, in conformity with Staff College Regulations, has been appointed Secretary to the War-game Committee.

From later information we have received on the subject, it appears that our remarks on the supercession of fifteen Captains by Major Boyle, of the King's Royal Rifle Corps, were far less severe than the circumstances justified. In the first place, the vacancy had existed since March 14, just three and a half months; and as several Captains, who for the last four months have been studying at garrison classes, have undergone examination this week, it is evident that a gross job has been perpetrated. Besides this, Clause 33 of the Royal Warrant distinctly states that, when an officer has not had an opportunity of qualifying, he may be provisionally promoted. Now, without going further down the list, we will mention the case of the senior Captain, who, after serving in the Zulu and the Boer Campaigns, was appointed Adjutant of Volunteers, and as such, refused permission to attend a garrison class. We always predicted that promotion by selection would prove to be favouritism in its grossest form, and we regret to find we were right.

Some experimental trials are to be made at Aldershot with the new mountain-battery equipment in possession of H Battery, 4th Brigade, R.A., now at the camp.

It has come to our knowledge that the War Office have offered compensation under the forthcoming Warrant to those Generals who were compulsorily removed from Staff employ; but, with the usual infelicity of the War Department, they have ignored all allowances, house-rent, &c., and award only the difference between Staff pay and retired pay. This seems most unfair to the removed officers, as they have suffered an absolute loss of pay and allowances—and not a net loss in pay only—and they should, we think, be fully, and not partially, compensated. We would hope that this matter may be reconsidered before the Warrant is published.

Sir George Balfour, on Civil Service Estimates, Class 3, for convict establishments, will move that the Vote for £411,103 be reduced by the sum of £16,156, being an intending part expenditure for purchase of land for new prison and for works at Dover.

During the next trooping season, some twelve or fourteen Paymasters will proceed to India, to relieve a similar number of Staff Paymasters returning to England, the India Office having declined to pay officers of the higher grade when the duties can be as efficiently performed by officers of shorter service in the Pay Department. In this course, the Indian Government can hardly be blamed, as the proper *locale* for a Staff Paymaster is a General or Regimental District office; nevertheless, the Paymasters' roster for foreign service will be considerably upset, and a good many officers, who had anticipated five years without a move in some Regimental District, will find themselves *en route* to the gorgeous East before many months are over. The following, amongst others, have received orders of readiness for India or elsewhere:—Captains Stockley, Burge, Graham, Coppinger, Wilson, and Major Wood.

The Navy.

◆

ADMIRALTY, June 29, 1883.

Sub-Lieutenant Arthur Wartensleben Ewart has been promoted to the rank of Lieutenant in her Majesty's Fleet, with seniority of June 23.

The following promotions have been made from this date:—Sub-Lieutenants Arthur Knox Du Pré, Edmund Walker Yorke, Paul Hewett, Charles Robert Salusbury Payne, John Philip Rolleston, Rupert George Hinnber Blomfield, Lionel Henry St. Croix Coxon, Aylmer Herbert Garnons Williams, Robert Lowry Herbert Armstrong, Richard Morrisey, Edward Lohet Lowdell, Richard Hawkesworth Story, Arthur Dodgson, John Martin, Henry Vernon Hart, Alfred Ephrot Tizard, Henry Venn Wood Elliott, Thomas Fynes Clinton Dundas, George Walter Howard Martin, William Greenwood Stewart, Ralph John Ruck-Keene, Henry Thomas Carnegie Knox, Logan Sutherland Stansfield, Hugh Bradley Barton, Henry Walter Sharp, Maurice Charles Knight, Trevenen Penrose Rushton Coode, Richard Sidney Bayley Bird, Edward Cecil St. John Buchanan Neale, Frank Alexander Garforth, Charles Hope Dundas, Godfrey Harry Brydges Mandy, Stuart Victor Seymour Craigie Messum, Edward Fitzmaurice Inglefield, Herbert Montagu Wyatt, and George Couper, to be Lieutenants in her Majesty's Fleet.

ADMIRALTY, July 3, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Paymaster Edwin Rose Miall has been placed on the Retired List from the 1st inst., with permission to assume the rank and title of Paymaster-in-Chief.

ADMIRALTY, July 3, 1883.

Royal Marine Light Infantry.—Quartermaster, with the hon. and relative rank of Captian, William Henry Herring is placed on the Retired List, under the provisions of her Majesty's Order in Council of November 29, 1831 (July 4).

Royal Naval Artillery Volunteers (Liverpool Brigade).—Richard Williams Charlesson, Esq., to be Sub-Lieutenant (July 3).

ADMIRALTY, July 4, 1883.

Royal Marine Light Infantry.—Colonel-Commandant William Henry Worthy Bennett has been placed on the Retired List, period of command having expired; Colonel Second Commandant John Michael de Courcy Meade to be Colonel-Commandant, vice Bennett; Lieutenant-Colonel Frederick Gasper Le Grand to be Colonel Second Commandant, vice Meade; Major and Brevet Lieutenant-Colonel Ponsonby Ross Holmes to be Lieutenant-Colonel, vice Le Grand; and Colour-Serjeant John Burtenshaw to be Quartermaster, vice Herring, retired (all five dated July 4).

APPOINTMENTS.

Captains—Nathaniel Bowden-Smith, to the Britannia, vice Wells; Harry W. Brent, to the Amethyst, vice Bowden-Smith.

Commanders—Frederic A. Wetherall, to the Eagle, vice McNeil; Cecil F. W. Johnson, to the Belleisle, for the Coastguard at Malahide, vice Wetherall.

Lieutenants—Frank A. Garforth, to the Minotaur, additional; John P. Rolleston, to the Foxhound, additional; Henry V. Hart, to the Impregnable, for the Nautilus; Arthur Dodgson, to the Impregnable, for the Seaflower; Richard S. B. Bird, to the Impregnable, for the Sealark; Rupert G. H. Blomfield, to the Impregnable, for the Martin; Edward L. Lowdell, to the Impregnable, for the Liberty; Henry L. F. Royle, to the Valorous, vice Fanshawe; Arthur W. Ewart, to the Euphrates, vice Cotton; George C. Higgins, to the Foam, vice Baker; Fritz Hauch Crowe, to the Coquette, vice Garbett; George Izat, to the Foam, vice Crowe; Robert L. Groome, to the Cockchafer, vice Hill, Thomas F. Pullen, to the Indus, vice Lowe; Lionel H. St.-C. Coxon, to the Foam, additional; Aylmer H. G. Williams, to the Hercules, additional; John Markin, to the Lord Warden, additional; Thos. F. C. Dundas, to the Audacious, additional; George W. H. Martin, to the Undine, additional; Edward F. Inglefield, to the London, additional; Thomas E. Maxwell, to the Vigilant, vice Lindsay; Hon. Richard Bingham, to the Orwell, vice Needham; T. P. R. Coode, to the Swiftsure, additional.

Midshipmen—Basil R. H. Taylor and Hugh H. D. Tothill, to the Dido, complement incomplete; H. George A. Hardinge, to the Impregnable, for the Pilot, vice James; Torquill Macleod, to the Impregnable, for the Nautilus, vice Tyrwhitt.

Surgeons—A. W. McLeod, to Hong Kong Hospital, vice Bentham; E. H. Williams, to Haslar Hospital, vice McLeod; A. W. W. Reid, to the Asia, vice Williamson; George M. Cuffe, to the Hecla, complement incomplete.

Assistant-Paymasters—Frederick W. Mortimore, to the Agincourt, vice Chalmers; Cyril H. Jones, to the Lion, vice Alton.

Assistant-Clerks—Charles M. Luckham, to the Duke of Wellington, additional; Frederick H. Graham, John E. Jones, Gilbert Graham, and Alfred M. Cleveland, to the Duke of Wellington,—all from July 15.

Gunners—James Curtis, to the Pembroke, for the Caroline; William Hutson, to the Vernon, vice Bye; George H. Matthews, to the Asia, for the Triumph; T. Rockey (a.), to the Indus, for the Albacore.

Boatswain—James R. Ahern, to the Euphrates, vice Brown.

Alexandra, Capt. Harry Rawson, C.B., Commander-in-Chief in the Mediterranean, with the Superb, Monarch, Temeraire, Inflexible, Carysfort, and Helicon, was at Ancona up to June 30; would leave on the 1st inst. for Avlona, and is expected to arrive at Corfu about the 13th inst. The Monarch, Inflexible, and Carysfort left Trieste on June 21; arrived at Malamocco the same day, and left on June 24; arrived at Fiume on June 25, left on June 27, and arrived at Ancona on June 29. The Helicon left Trieste on June 21, and arrived at Venice the same day; left on June 28, and arrived at Ancona on June 30. The Alexandra and Superb left Trieste on June 22, and arrived at Malamocco the same day. The Temeraire left Trieste on June 23, and arrived at Malamocco the same day; left with the Alexandra and Superb on June 27, and arrived at Ancona on June 29. The Coquette was at Avlona, awaiting the squadron's arrival, joined the flag at Malamocco on June 24, and left on the 26th for Avlona. The Invincible was at Malta, and on arrival of the Superb will join the flag. The Cruiser was in dock at Malta. The Cygnet will shortly cruise to Sicilian ports. The Decoy left Trieste on June 21, and arrived at Malamocco the same day; left Malamocco on June 26 for Malta, to be docked. The Iris was at Port Said. The Condor was at Alexandria. The Bittern left Port Said on June 25, and is cruising on the coast of Syria; would reach Larnaca about the 25th inst., Rhodes on Aug. 9, and Smyrna on Aug. 15. The Falcon was at Constantinople. The Cockatrice was in the River Danube.

Audacious, Capt. Tracey, flagship of Vice-Admiral G. O. Willes, was at Woosung on May 18; left Amoy on April 26, arrived at Matson Island on April 27, and left on May 1 for Chusan Archipelago; would leave May 26 for Chinkiang and Chefoo. The Daring at Jin Chuen, Corea, on May 9, *en route* to Corea; on return would proceed to Shanghai. The Moorhen at Kobe on April 26; on arrival of the Zephyr, would proceed to Hong Kong, then to England, on relief by the Cockchafer or Espoir. The Zephyr left Chefoo on May 10 for Kobe; would remain for general service in Japan. The Linnet at Chefoo on May 10; ordered to visit Chefoo, Tientsin, and Newchwang in turn, remaining seven days in each. The Kestrel left Shanghai on May 10 for Hankow; is ordered to remain 14 days, and then return, if affairs are settled, calling at Treaty Ports on the way down the river. The Vigilant, Pegasus, and Albatross at Shanghai on May 18; would accompany the Audacious on May 26. The Cleopatra at Amoy on May 3; ordered to leave on May 10 for Woosung, and will then accompany flag. The Curaçoa at Hong Kong on May 15; ordered to leave on May 19 for Yokohama and Cheefoo, arriving at Cheefoo by June 20. The Sheldrake at Hong Kong on May 12; after refitting, would proceed to Singapore, thence to England, viâ Suez Canal. The Swift left Swatow on May 16 for the wreck of the Mataran (Pratas Shoal), to bring the crew to Hong Kong. The Champion left Singapore on May 1 for a cruise to Bangkok, Labuan, Borneo, and Java. The Fly at Labuan on April 16; to cruise in Borneo, returning to Singapore by the end of May. The Foxhound at Singapore on April 26, doing general duty in Straits of Malacca; ordered to be at Hong Kong by July 1. The Flying Fish at Chefoo on May 10, surveying on the west coast of Corea. The Magpie at Hong Kong on May 12; ordered to proceed to Labuan to meet the new commander, then to commence surveying in Borneo.

Beacon, Com. A. W. Moore, was paid out of commission at Chatham Dockyard on Saturday last, and the crew granted the usual leave of absence. She is to be placed in the Fourth Division of the Medway Steam Reserve until required for foreign service.

Briton, Capt. A. J. Kennedy, at Zanzibar, awaiting orders to proceed to Madasgascar to reinforce the Dryad and Dragon, who are protecting British interests at Tamatave.

Canada, Capt. Durrant, arrived at Madeira on Friday last, and would leave for Halifax on July 3.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., was at Trincomalee on July 5. A report is current in Naval circles that Capt. Hastings will shortly be superseded at his own request, owing to urgent private affairs.

Gannet, Com. E. G. Bourke, arrived at Sheerness on Friday last from the Pacific, after being in commission on that station since April 17, 1879. She was put into the steam basin at Sheerness on Tuesday, to be dismantled and paid off.

Lord Warden, Capt. Kennedy, flagship of Rear-Admiral Sir Anthony Hiley Hoskins, K.C.B., in command of the Reserves, left Bergen for Lerwick, Shetlands, on July 4, with the ships of the squadron in company.

Merlin, Lieut.-Com. R. C. Brenton, was moved from the Dockyard basin on Wednesday, and placed at a buoy off the Royal William Victualling Yard, and having taken powder, &c., on board, will go through her trials, and leave for the China station.

Minotaur, Capt. Fellowes, flagship of Vice-Admiral Sir William M. Dowell, K.C.B., commanding the Channel Squadron, was at Arosa Bay on June 21. The Squadron was to leave on June 25 for Corcubion and Bantry Bay, where it is timed to arrive on July 10. A stay of about three weeks will be made at Bantry, during which torpedo exercise will be largely indulged in. From Bantry, the Squadron will most probably proceed to Queenstown. An outbreak of fever has occurred on board the Agincourt, to which Mr. Chalmers, assistant-paymaster, has succumbed. Capt. Fellowes, Sir W. Hunt-Grubbe, and Sir B. Walker were among the officers who contested in the sailing race for the Admiral's Cup, won by Lieut. Farquhar, in the Minotaur's cutter.

Nelson, Comdre. James E. Erskine, A.D.C., was at Sydney up to May 18; would proceed to Fiji and other islands on May 19. The Diamond was at Sydney on May 18, about to be docked. The Espiègle left Sydney on April 30, on a lengthened cruise to the islands of the Western Pacific. The Miranda left Sydney on April 15 for Fiji, and will await the arrival of the Nelson there. The Dart left Sydney on April 26 for Solomon Islands and Fiji, and will wait the arrival of the Nelson at the latter island. The Lark was at Brisbane on May 16, and returns to Solomon Islands.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., Commanding-in-Chief in the North America and West Indies station, was at Halifax on June 21. The Tenedos, Flamingo, and Foam were then on the Newfoundland Fisheries. The arrival of the Canada was awaited most anxiously for many reasons, amongst others to enable a court-martial to be convened for the trial of Torpedo Gunner Watson, who deserted from the Northampton last year, but subsequently gave himself up. Every one is sorry for Watson, who, like many a better man, was entirely led away by a pretty woman. The old Charybdis has been advertised for sale, but it is not expected she will fetch a very high price. It is thought she could be pulled to pieces by the men of the flagship to far better advantage, as she has a large quantity of good metal in her. Some anxiety was felt in Halifax, owing to the state of Lady Commerell's health, but we are glad to hear that progress towards recovery was being rapidly made by the amiable wife of the gallant Commander-in-Chief, under whose able administration the station has greatly improved. Sir John Commerell is most energetic, and cares for little else beyond the efficiency of his squadron, but, at the same time, he is the most popular admiral of any who have commanded the station for many years past.

Thetis, Capt. A. C. Curtis, will be paid off on Thursday at Devonport.

NAVAL WARRANT OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—My attention having been directed to your remarks on the question addressed to the Admiralty respecting Warrant Officers, and the answer of Lord Alcester in the House of Lords, I have the honour to state that no reference was made by myself to "an anonymous pamphlet," or to a "combination" on the part of those officers. These expressions were Lord Alcester's own. Nor, so far as I can remember, did any words fall from me that would imply that the Warrant Officers were engaged in a Parliamentary agitation respecting their position in the service.—I am, &c.,

78 Eaton Place, S.W., July 5. Sidmouth.

THE CHANNEL SQUADRON.

(FROM OUR CORRESPONDENT.)

Corcubion, June 30, 1883.

We left Arosa Bay on the 26th, and arrived here on the 28th. The Neptune went out the day before for target practice. We unmoored in the morning, and weighed at 10. The Neptune rejoined us as soon as we cleared the harbour. In the evening, we made sail and had drill, shifting topsails and courses. During the night, we stood off the land, under easy steam, and the next forenoon exercised at steam tactics. In the afternoon, we made sail, and had the usual drill in the evening. The following morning, the 28th, we observed land at daylight, and stood in for the anchorage. We came in in single-column line ahead. The Minotaur let go first, the other ships of the first division—the Sultan and Neptune—passing her, and mooring further up the harbour, and the second division closing up into their places. The squadron looks very well from the shore lying in one long line. Another death occurred on board H.M.S. Agincourt while at Arosa Bay; Mr. George Chalmers, assistant-paymaster, died of fever on the 23rd, and was buried on shore. This is a very quiet little place, and there is nothing to be done on shore, except fishing and taking constitutionals. The country is pretty, but the fishing is not as good as in the neighbourhood of Arosa Bay. Before we left Arosa, the Northumberlands gave an entertainment, consisting of a couple of farces, "Taming a Tiger" and "Wagner Out-wagged," and a short nigger-minstrel performance. It was all very good, and was much applauded. Last night the Achilles followed suite, and played "The Ticket of Leave" and Burnand's burlesque of "Vilikins and his Dinah." They were both capitally acted, and occasioned great amusement; the burlesque in particular was received with roars of laughter. We leave this on Tuesday next, July 8, for Bantry Bay.

Mr. George Davis Carpenter (supernumerary), of the Boscawen, was last week dismissed her Majesty's service by sentence of court-martial for drunkenness.

A draft of seamen left the Royal Naval Barracks at Sheerness on Tuesday, in the steam-tug Sampson, to join the troopship Orontes, which was commissioned at Chatham that day. The Forward was put out of dock on Tuesday, and placed in the steam basin, to be prepared for the pendant as early as possible. The Mermaid, tender to the Repulse, arrived at Sheerness on Saturday last, and landed a young man from Heligoland who had been sentenced to 18 months' penal servitude for manslaughter on that island. Inspector Atkinson, of Scotland Yard, made the arrest, and accompanied the prisoner to England in the Mermaid. The vessel left on Tuesday, to rejoin the Reserve Squadron.

Owing to the outbreak of cholera in some of the Mediterranean ports, the transports with the autumnal reliefs for India will go round the Cape, instead of the Suez Canal. They have, therefore, been ordered to be ready at the beginning of September, or about a week earlier than usual.

Regulations as to Captains and Commanders attending the Royal Naval College, Greenwich, have been issued by the Admiralty, to take effect from October 1, 1883, viz.:—1. Out of the 25 captains and commanders admitted annually as students at Greenwich under existing regulations, a number not exceeding five captains and five commanders will be borne on the books of one of H.M.'s Ships, and allowed full pay and time while studying: the full pay to be the lowest of the rank of the officers, respectively, and the time to reckon as harbour time, subject to Clause 6 of these regulations. 2. Officers of the ranks above mentioned will be permitted, in consultation with the Director of Studies, to select the subjects of study which they consider will be of the greatest advantage to them. A certain amount of elementary mathematics will be considered necessary. 3. These officers will be required to take part in the intermediate examinations at Christmas and Easter, and in a final examination at the close of the session. 4. A limited number will be allowed to remain a second session for study, if they be desirous of doing so, provided they have established a high character for diligence and ability in their first session and are recommended by the President. 5. These officers will be selected about Sept. 1 in each year from the list of applicants for appointment to the College. 6. An officer, having been borne on ship's books for full pay during study, who does not undergo the final examination or who fails to obtain a satisfactory certificate of qualification, will be debarred from the privilege of counting the period of study as harbour time, unless the circumstances of the case are, in the opinion of their Lordships, exceptional. 7. Other officers will be admitted, up to the existing limit of 25, to the College on the same terms as at present:—Captains—With the rate of half-pay they are in receipt of. Commanders—With the highest half-pay of their rank. All captains and commanders will receive 1s. 6d. a day towards their mess expenses. 8. Any vacancy which may occur during the term in the number receiving full pay will, at their Lordships' discretion, be filled up by selection from amongst the officers studying on half-pay, but no officer will be appointed unless he is undergoing a course of "mathematics."

NAVAL NOTES.

The following is a list of officers who have been placed on the Retired List of the Navy during the quarter:—Lieutenants, with the rank of Retired Commander, A. W. Brooks and A. J. Farquharson. Lieutenants—Neville E. C. Leigh and Henry V. Baker. Staff Captain, with the rank of Retired Captain—Frank Inglis. Staff Commander, with the rank of Retired Commander—Alfred F. Gibbons. Caffin, K.C.B.; on Retired List, Rear-Admirals W. Horton, C.B., and H. W. Hore, C.B. Captains—On Retired List, John Liebenrood, J. V. Willyams, J. C. Wells, D. Craigie, C.B., and Samuel Braddon. Commanders—D'A. A. Denny; on Retired List, R. Johnstone, George Pew, R. A. Newman, and Henry Balt. Lieutenants—J. F. S. Sargeaunt; on Retired List, John Anderson. Sub-Lieutenant—O. D. Grimston. Midshipman—J. Blakiston. Staff Commanders—On Retired List, F. F. F. Taylor, H. Bond. Navigating-Lieutenants—On Retired List, C. M. Hammond and H. Brayn. Chaplain—On Retired List, Rev. J. C. Connolly, B.A. Chief Inspector of Machinery—On Retired List, John Oliver. Inspector of Machinery—On Retired List, Lionel Swift. Chief Engineers—On Retired List, J. Rollinson and P. Greetham. Engineer—On Retired List, W. C. Archbold. Staff Surgeons—On Retired List, B. Dickson and M. Hamilton, M.D. Surgeons—On Retired List, H. S. Smart, M.D., and Charles McConaghy. Paymaster-in-Chief—On Retired List, W. W. Parminter. Paymasters—On Retired List, John Dennis, J. R. Tate, T. T. Wise (b), and J. G. W. Hoare. Assistant-Paymasters—H. G. W. Terry; on Retired List, J. J. Hill, G. W. Reay-Mackie, and Charles Maxwell. Gunners—W. Richards, W. West, and E. Leonard. Officers of Royal Marines.—Colonel Second Commandant—J. H. Maskery. Lieutenant—E. D. Ormond. Quartermaster—G. Rendall. On Retired List.—Lieutenant-Colonel E. McArthur, R.M.A. Major—C. M. Barham.

Com. St. Clair, of the Boscawen, will, it is rumoured, succeed Capt. Rose in the command of the yacht Osborne.

The under-mentioned men have been awarded medals for long service and good conduct:—Robert Preecy, writer, first-class, H.M.S. Thalia; Henry S. Plant, master-at-arms, H.M.S. Thetis.

MARRIAGE.

WESTMACOTT — JUSTICE. — At Saint Margaret's Church, Lee, on July 5, by the Rev. Walter Westmacott, Vicar of Highbridge, Somerset, brother of the Bridegroom, assisted by the Rev. J. F. Reyner, D.D., Rector of Staplehurst, and the Rev. A. L. Jukes, of St. Stephen's, Lewisham, Captain Ruscombe F. Westmacott, 2nd Battalion Duke of Cambridge's Own Middlesex Regiment, son of the late Rev. Horatio Westmacott, Rector of Chastleton, Oxfordshire, to Katharine Anne Wylie, Widow of the late Lieutenant Arthur S. Justice, Royal Scots Fusiliers, and daughter of E. Erskine Scott, Esq., of Marlborough Road, Lee, Kent.

DEATH.

GRAHAM.—On the 3rd inst., at Windsor Castle, Colonel J. J. Graham, late 75th and 70th Regiments, M.K.W., eldest son of the late General Graham, Deputy-Governor of Stirling Castle, N.B.

Advertisements.

Gentlemen requiring sleeping accommodation only, are respectfully informed every attention will be paid to their comfort and convenience. A trustworthy porter in attendance all night.

COMMANDER-IN-CHIEF'S OFFICE,
Sheerness, May 29, 1883.

THE Brother Officers and Friends of the late Assistant-Paymaster GEORGE WILLIAM REAY-MACKEY are informed that by his death his Widow is left destitute without a pension or means of any kind, with three young children to support. This is truly a case where there are strong claims on those to whom this appeal is made, and by whose assistance a Fund may be raised to secure the Family of one so highly esteemed and respected from absolute want. The undersigned have formed themselves into a Committee with this object, and it is earnestly requested that those who are disposed to assist in this good work will be pleased to forward their remittances to Messrs. Woodhead and Co., 44 Charing Cross, to be placed to the credit of Mrs. Alice Reay-Mackey, and that the Subscription List when filled up may be sent to one of the Committee with a notation of the dates of Remittance Lists.

C. A. PRITCHARD, Paymaster-in-Chief, Ferndale, Blackheath.
SILAS WAYMOUTH, Paymaster, 10 Kidbrook Park Road, Blackheath.
W. B. RISK, Secretary to Commander-in-Chief, Sheerness.

THE
GENERAL AGENCY AND EXCHANGE,
LIMITED,
VICTORIA HOUSE, 111 VICTORIA STREET, S.W.
(Corner of Francis Street, next door but one to the Army and Navy Co-Operative Society.)
TELEPHONE No. 3102.

Established in 1879, for the benefit of Members of the Army and Navy Co-Operative Society, but now open to the Public generally, HOUSE and ESTATE AGENTS, AUCTIONEERS, STOCK, SHARE, and MORTGAGE BROKERS, GENERAL AGENTS. The Electric Telegraph News Company has placed two of its Machines in the Company's Offices, whereby a continuous telegraphic record is obtained throughout the day of fluctuations in prices in every description of Stocks and Shares and of the latest General News. The information thus obtained is open to the use of all clients and Subscribers of the General Agency and Exchange, Limited. For those Clients desirous of purchasing or selling Stocks and Shares, their time, trouble, and expense of going into the City is saved, and instant execution of orders at the prices of the moment is ensured.

SALE and EXCHANGE ARTICLES of all KINDS, the same being placed on view at the Show-rooms, thus leading to a more ready sale.

Monthly Sales by Auction are held, at which any articles remaining unsold may be disposed of, without additional expense to the sender.

The *Service News and General Agency and Exchange Circular*, published on the 15th of every month, is the best medium for Letting or Selling Property, and for those seeking Houses or Estates; also for the Sale or Exchange of Articles.

All information can be obtained on application to the Secretary, Major W. N. G. JOHNSON.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.
FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

IMPORTANT NOTICE.

Series of Shilling Handbooks by eminent authorities.

With a view to rendering a knowledge of all matters connected with Fishing more general, as well as more accurate, the Executive Committee of the International Fisheries Exhibition have resolved upon issuing from time to time a Series of popular Shilling Handbooks, written by some of the most eminent authorities of the day. The Committee have much pleasure in announcing that they have succeeded in securing the valuable services of the following gentlemen:—

FREDERICK POLLOCK, Barrister-at-Law, M.A. (Oxon.), Hon. LL.D. Edin., Corpus Christi Professor of Jurisprudence in the University of Oxford—"The Law as to Fishing and Fisheries." [*Just published.*

G. B. HOWES, Demonstrator of Biology, Normal School of Science, South Kensington—"Food Fishes." [*Just published.*

W. M. ADAMS, B.A., late Fellow of New College, Oxford, Designer and Compiler of the Fisheries Map of the British Islands—"The History of Fishing from the Earliest Times." [*In the press.*

W. SAVILLE KENT, F.L.S., F.Z.S.—"Marine and Fresh-water Fishes of the British Isles" (Illustrated). [*In the press.*

His Excellency SPENCER WALPOLE, Lieutenant-Governor of the Isle of Man—"The British Fish Trade." [*In the press.*

FRANCIS DAY, F.L.S., Commissioner for India to International Fisheries Exhibition—"Fish Culture" (Illustrated).

E. W. H. HOLDSWORTH, F.L.S., F.Z.S., Special Commissioner for Juries, International Fisheries Exhibition—"Apparatus used in Fishing." [*In the press.*

W. STEPHEN MITCHELL, M.A., (Cantab.)—"Fish as Food." [*In the press.*

WILLIAM SENIOR ("Red-Spinner")—"Angling in Great Britain."

JAMES G. BERTRAM, Author of "The Harvest of the Sea"—"The Unappreciated Lives of the Fisherfolk."

C. E. FRYER, Assistant-Inspector of Salmon Fisheries, Home Office—"The Salmon Fisheries" (Illustrated). [*In the press.*

J. P. WHEELDON, late Angling Editor of *Bell's Life*—"The Angling Societies of London and the Provinces."

FRANCIS DAY, F.L.S., Commissioner for India to International Fisheries Exhibition—"Indian Fish and Fishing" (Illustrated). [*In the press.*

HENRY LEE, F.L.S.—"Sea Monsters Unmasked" (Illustrated). [*In the press.*

JOHN J. MANLEY, M.A. (Oxon.)—"The Literature of Sea and River Fishing."

A. J. R. TRENDELL, of the Inner Temple, Barrister-at-Law, Literary Superintendent for the Fisheries Exhibition—"The Outcome of the Exhibition."

The FISHERIES PORTFOLIO, containing ten original Etchings of Scenes on the British Coast, by R. W. Macbeth, A.R.A., Colin Hunter, J. D. Watson, David Law, Otto Leyde, R.S.A., C. J. Watson, C. P. Slocombe, J. P. Heseltine, J. MacWhirter, A.R.A., and W. W. Ball. Price 15s. [*Just published.*

Publishers, Wm. Clowes and Sons (Limited), International Fisheries Exhibition, and 13 Charing Cross, S.W.

6d, 1/0, 2/6, KEATING'S POWDER

Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.

This Powder, so celebrated, is perfectly unrivalled in destroying BUGS, FLEAS, MOTHS, BEETLES, and all Insects (whilst perfectly harmless to all animal life). All Woollens and Furs should be well sprinkled with the Powder before placing away. It is invaluable to take to the Seaside. To avoid disappointment, insist upon having

"KEATING'S POWDER."

No other Powder is effectual. Sold only in tins, 6d, 1s, and 2s 6d. Beware of Imitations. Don't be deceived.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. Special Classes for the STAFF COLLEGE and Promotion Examinations. Captain James passed from the Staff College in 1877 with honours, Major Lynch in 1876, with honours and special mention in military art and history, reconnaissance, and topography. Eighty-three successes last year.

RECENT SUCCESSES.

WOOLWICH:—Five out of seven sent up in 1882, viz., 4th, 7th, 17th, 22nd, and 25th.

SANDHURST:—6th, 25th, 55th, 61st, 74th, and 2nd Queen's Indian Cadet.

SANDHURST PRELIMINARY:—Thirteen out of Eighteen this year.

MILITIA MILITARY:—Messrs. JAMES and LYNCH have passed thirty-six under the present regulations, viz.:—March, 1881, *FIRST, *25th, *59th; September, 1881, *8th, 16th, 21st, *23rd, *25th, *33rd; March, 1882, *FIRST, 4th, 12th, 14th, *19th, 28th, *30th, and three Cavalry commissions; September, 1882, *FIRST, 2nd, 8th, 10th, *14th, *19th, *20th, 25th, 27th, 28th, 30th, 33rd, *36th, and one (42nd) Cavalry commission; March, 1883, *4th, 10th, 28th—the 4th passed his first trial after only 16 weeks' reading.

(Those marked * passed first attempt.)

At three out of the five examinations held, Major Lynch passed the First Candidate.

MILITIA LITERARY:—Twelve out of thirteen in 1881, ALL in 1882; March, 1883, ALL, viz., 16th, 20th, 22nd.

STAFF COLLEGE:—1881: FIRST, 4th, 16th. 1882: FIRST, 7th, 10th, 15th, 22nd, 23rd, 26th.

PROMOTION EXAMINATION:—Messrs. JAMES and LYNCH have passed 178 officers for promotion. Only three have failed.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Four Open Scholarships or Exhibitions gained in 1881.—Address Rev. E. BARTRUM, Head Master.

ASHFORD SCHOOL, KENT.
HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, assisted by the Rev. W. FULFORD, M.A., and Colonel COATES, late 99th Regiment, PREPARE CANDIDATES for Woolwich and Sandhurst. Also, in separate Classes, LIEUTENANTS of MILITIA for the Military Competitive Examinations, and Officers for admission to the Staff College.

Colonel Coates's private pupil, Lieutenant Hill, Cheshire Regiment, passed Sixth at the March Examination.

References will be given to Officers of very high position in the Service.

For particulars, apply to H. ZOBEL, Poulton House, Hampton.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of PUPILS to Prepare for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to 12. Five pupils out of six were successful at the last Sandhurst Examination (July, 1882).—Terms, references, and other information sent on application.

SANDHURST, WOOLWICH, MILITIA, INDIAN FORESTS, and other COMPETITIVE EXAMINATIONS.—Prospectuses of Tutors in England and Abroad who have been successful in passing Students at all the Recent Examinations forwarded (gratis), on application to Messrs. ASKIN, GABBITAS, and CO., 38 Sackville Street, London, W. References kindly allowed to the Right Rev. the Chaplain-General to the Forces, and others.

EASTBOURNE. — St. ANDREW'S SCHOOL. ("The MEADS.")
Principal—Rev. F. A. SOUPER, M.A., formerly Head Master of Bradfield College, Berks, and Sub-warden of Trinity College, Glenalmond, N.B.

Young Boys prepared for Entrance Examinations at Public Schools, and for other qualifying and competitive Examinations. Terms for boys over Twelve years of age, 100 guineas per annum.

MILITIA MILITARY COMPETITIVE.—MILITIA OFFICERS are PREPARED for the above Examination at the "MANOR HOUSE, LEE, S.E." During the last three years, no less than THIRTY-EIGHT MILITIA OFFICERS passed into the Line from this Establishment. The Studies of the Officers are under the immediate supervision of Major J. L. NEEDHAM, P.S.C., R.M.A. A SPECIAL COURSE OF INSTRUCTION OF EIGHT WEEKS' DURATION will BE GIVEN BY HIM to Candidates for the NEXT SEPTEMBER Examination, commencing on TUESDAY, JULY 10.—Apply to H. WOLFFRAM, the Manor House, Lee, S.E.

WASHING WANTED, by the NEW SANITARY LAUNDRY WORKS, Orchard Road, Shepherd's Bush. The healthiest and best arranged private laundry in London. Linen got up in the best style at very moderate prices. No chemicals or hard scrubbing brushes used. Linen insured. Special terms to hotels and clubs.

Passengers from India, China, Australia, and the Colonies are invited to despatch their linen immediately on arrival in this country to the New Sanitary Laundry, as above, when it will be immediately forwarded to their address.]

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the last Militia Competition, which took place on March 8, for which 31 Commissions in the Line have been awarded, the under-mentioned officers passed from this Establishment, out of 18 sent up:—

Lieutenant	E. G. Wynyard...	8th
,,	H. J. Morphy ...	11th
,,	I. H. W. Southey	13th
,,	N. G. Woodyatt	15th
,,	J. H. Heycock ...	16th
,,	D. S. A. Cosby ...	22nd
,,	F. K. O. Peile ...	26th

This completes a total of 32 commissions secured by Colonel WILKINSON and Lieutenant-Colonel SHAW at the last four Military Competitive Examinations, the total number sent up for these competitions being 76. The names of the successful pupils have already been published.

Also, at the recent Literary Examination for Militia Officers held in April, Lieutenant Lord Skelmersdale took FIRST place on the list.

The results obtained at the last SANDHURST EXAMINATIONS have added to the general score, which amounts altogether to SIXTY-ONE SUCCESSES, achieved by pupils during the past 18 months.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, PRELIMINARY, &c.—CAREFUL PREPARATION for any of the above. Upwards of 130 successes during the past four years. Highest places in lists, Nos. 5, 8, 9, 15, 18, 29, 34, 37, 38, 52, 61, 63, &c. More Preliminary successes in February and March, 1883.

For full particulars, terms, references, &c., address, Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley-on-Thames.

MILITARY COMPETITIVE for MILITIA OFFICERS.—Special Course, in charge of Colonel STORY, late South Lancashire Regiment. 8 years' experience as Garrison Instructor. In 1882-83, with a total of Twenty-four Candidates, Six were successful, an average of one in four.

Address, Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and steady work is insisted on. Since the introduction of the Military Competitive, out of Forty-two Lieutenants of Militia sent up, Twenty-six have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of pupils successful at all Examinations, INCLUDING THE LAST SANDHURST AND RECENT MILITIA COMPETITIVE.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

THE REV. Dr. POLLOCK RECEIVES a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

MILITARY COMPETITIVE EXAMINATION.

MAJOR DE THOREN and Major MORGAN (late Rev. J. CARDWELL) PREPARE MILITIA OFFICERS for the above Examination. The great success they have hitherto had was even greater at the Examination on March 8 and 9, 1883. Out of the Eight Candidates sent up,

Mr. H. R. Pease passed 9th } at their first
Mr. A. Faulknor ,, 12th } attempt;

and Four others were in the first fifty, one being 33rd; the remaining two qualified, and were high up.

The fees at this Establishment are unusually low.

Major De Thoren was Professor of Tactics at Sandhurst, Garrison Instructor at Madras, and D.A.Q.G. in the Abyssinian Campaign.

Major H. F. Morgan passed the Staff College, and is the author of "Summary of Tactics" and "Summary of Law."

For further information, apply to Major MORGAN, 3 Douro Terrace, Jersey.

THE PRINCIPAL of a HIGH-CLASS SCHOOL for GENTLEMEN'S DAUGHTERS has VACANCIES for Anglo-Indian CHILDREN, or for those whose parents are abroad. Special advantages for delicate or backward girls. The house is large, airy, and very comfortable. Gardens, fields, and the use of a quiet pony. For prospectus, with view of the House, apply to Miss PARROTT, Overton House, Congleton, Cheshire. References kindly permitted to the Hon. Mrs. Wylie, Congleton, Major Wylie (60th Rifles), the Rev. J. Colyer, Astbury Rectory, Congleton, and others; and in India, Arthur Pointon, Esq., 6 Russell Street, Chowringhea, Calcutta.

BEDFORD MODERN SCHOOL.
Rev. R. B. POOLE, B.D., Head Master; 26 Assistant Masters; 450 Boys. Large Endowment; Annual Exhibitions. Army, London University Matriculation, Business, &c. Fees to residents, £4, £6, or £9 per annum.

MESSRS. ASHTON and PYNE, Raithby, Fitzjohn's Avenue, N.W., assisted by Masters of long and successful experience, PREPARE CANDIDATES for the ARMY, *viâ* Sandhurst, Woolwich, and the Militia. Reference to Lord Napier of Magdala, Earl Shannon, Lord Walter Scott, and Colonel Chesney, R.E., sons of whom have passed direct from this establishment into Sandhurst.

MILITIA CANDIDATES most carefully prepared for their Final Examination by two Field Officers, in classes each of five members only (to ensure individual attention). Out of Sixteen recently prepared by the above officers, Eight were successful.

CAVENDISH COLLEGE,

"FOR THE BLOOD IS THE LIFE."

CLARKE'S
WORLD-FAMED
BLOOD MIXTURE.
THE GREAT BLOOD PURIFIER AND RESTORER.

For cleansing and clearing the blood from all impurities, it cannot be too highly recommended.

For Scrofula, Scurvy, Skin Diseases, and Sores of all kinds, it is a never-failing and permanent cure.

It Cures Old Sores.
Cures Ulcerated Sores on the Neck.
Cures Ulcerated Sore Legs.
Cures Blackheads, or Pimples on the Face.
Cures Scurvy Sores.
Cures Cancerous Ulcers.
Cures Blood and Skin Diseases.
Cures Glandular Swellings.
Clears the Blood from all impure matter,
From whatever cause arising.

As this mixture is pleasant to the taste, and warranted free from anything injurious to the most delicate constitution of either sex, the Proprietor solicits sufferers to give it a trial, to test its value.

Thousands of Testimonials from all Parts.

Sold in Bottles, 2s 6d each; and in cases, containing six times the quantity 11s each—sufficient to effect a permanent cure in the great majority of long standing cases—BY ALL CHEMISTS and PATENT MEDICINE VENDORS throughout the world, or sent on receipt of 30 or 132 stamps by The LINCOLN and MIDLAND COUNTIES DRUG CO., Lincoln.

Trade Mark—' BLOOD MIXTURE."

LAMPLOUGH'S
PYRETIC SALINE.

HAVE IT IN YOUR HOUSES AND TRAVELS, USING NO OTHER. This is the true antidote in Fevers, Eruptive Affections, Sea or Bilious Sickness, having peculiar and exclusive merits. *Officers and others proceeding to Egypt, India, and the Colonies should not fail to take a supply with them.*

EKOWE (with Col. Pearson).—"There was great demand for Lamplough's Pyretic Saline."—See *Blackwood's Magazine.*

LETTER FROM RAWUL PINDEE.—"Your Pyretic Saline will do more to prevent *fever* than all the quinine can cure."

Observe the GENUINE has my NAME and TRADE-MARK on a BUFF-COLOURED WRAPPER.

113 HOLBORN HILL, LONDON.

HOLLOWAY'S PILLS.—For the cure of debility, bile, liver, and stomach complaints, this inappreciable medicine is so well-known in every part of the world, and the cures performed by its use are so wonderful, that it now stands pre-eminent above all other remedies, more particular for the cure of bilious and liver complaints, disorders of the stomach, dropsy, and debilitated constitution. A course of these digestive Pills painlessly but surely regulates the organs of digestion and acts most beneficially on the secretory and excretory organs generally. They expel from the secretive organs and the circulation those effete and morbific matters which produce inflammation, pain, fever, debility, and physical decay—thus annihilating, by their purifying properties, the virulence of the most painful and devastating diseases.

2|- TEA OF EXTRAORDINARY QUALITY,

As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS

A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves.

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

THE
CHAMBERLAIN LIGHT.
TO BE SEEN IN OPERATION AT
43 NEW BROAD STREET, E.C.

The Best, Cheapest, Safest, and Purest Light in Existence.

Extract from the Report of Professor H. HUTCHINSON, C.E., F.C.S., &c., on the Apparatus and Light:—

"The apparatus is very simple, uses pure material. The gas does not contain sulphur or sulphur compounds, nor naphthaline. Can be made without the least offensiveness in any house or mansion. Will travel any distance without deposit or condensation.

Hygienically the qualities of this light far surpass those of any other.

May be used as ordinary coal-gas for heating and cooking purposes.

It is the cheapest, brightest, and purest gas known."

Estimates given on application.

Horses	1,026	51	5·0
Mules	763	4	·5
	1,789	55	3·1

Captain Humphreys, 2nd Batn. Welsh Regiment, is made commandant of Mounted Infantry Corps, with command pay of 10s. a day. Lieutenant G. Williams-Freeman, 1st Batn. Royal Sussex Regiment, becomes Assistant-Provost-Marshal, with status of D.A.A.G., in succession to Captain Humphreys. Lieutenant J. G. Maxwell, 1st Batn. Royal Highlanders, becomes Assistant Commandant Military Police, in succession to Lieutenant J. Williams-Freeman.

Major E. T. H. Hutton is posted on promotion to the 3rd Batn. King's Royal Rifle Corps, but obtains leave of absence till August 11.

Lieutenant C. H. Payne, 1st Batn. Gordon Highlanders, will be attached for duty to the Mounted Infantry from July 7 next.

Majors J. M. Murray, C.B., R.H.A., and W. A Smail, 1st Batn. Gordon Highlanders, are invalided and will be provided with passages by first available steamer.

Colonel Minto Elliot and Captain Newcome cease to hold the appointments of Colonel on Staff R.A. and Brigade-Major R.A. respectively, the former remains in command R.A., and the latter will perform the duties of Adjutant R.A.

H.M.S. Invincible received orders to repair to Malta and was to have left on Thursday last, but a little breeze rendered it impossible for her to cross the bar till Saturday. Alexandrians were glad to have two days more of a very popular ship, game enough to give a very bright little moonlight dance on the previous Tuesday. But the delay draws attention to the very serious inconvenience which might be caused by this obstruction to the entrance, an obstruction which our Egyptian Ministry have promised to remove, and which therefore is likely to last for ever. Imagine a disturbance at Port Said, and men-of-war compelled to wait in Alexandria until the sea quieted. Commercially speaking, the removal of the rocks might, by a very small tax which would be willingly paid by the shipping, be made renumerative. H.M.S. Iris came round here from Port Said for the purpose of obtaining a court-martial on one of the firemen, who was subsequently convicted of striking one of the engineer officers, and received five years' hard labour. The Iris and the Invincible left together, the former to return to Port Said, the latter for Malta. It is not certain whether the Carysfort or the Iris will replace the Invincible. Alexandrians would prefer the latter, as she is better known, but it is quite possible that their views will not be taken into consideration by the Admiralty. At present the Condor alone protects us, but is she not sufficient? Did she not destroy the forts of Alexandria, assisted partly by the Inflexible and others?

Speculators in firearms and other military fittings may perhaps be tempted to come to Egypt and invest in the following, now offered for sale by Colonel Watson, Inspector-General of the War Department: —111 mitrailleuses, 149 cannon, 132 mortars, 8,926 sabres, 10,000 Remingtons, from 38,000 to 39,000 rifles, chiefly French, not to mention some 5,000 pistols, muskets, and revolvers,—all this surplus stock bearing high testimony to the economy of Egyptian administration in general, and of Arabi Pasha's Minister of War in particular.

So long as medals were confined to Military and Naval men I generally abstained from criticism, but as they are now falling thick on civilians it would be well to ask upon what principle they are distributed. With regard to Turkish orders and Egyptian bronze stars we do not look for much discrimination, and these are showered with so liberal a hand that perhaps it is the highest honour to be undecorated, but we have been wont to look upon an English medal as something that had to be earned, which was grudgingly given to merit and not made ridiculous. Now here is the first batch. Mr. John Ross and Mr. David Ross, stevedores and contractors for supply of meat to the ships; Mr. Claude Routh, secretary to the Captain of the Port, and stepson of the President of the Railway Administration—never employed at all in any service whatever on land or at sea—and Mr. Auchin, for one week interpreter to a regiment.

On the other side, we find the following men who rendered most distinguished services utterly passed over :—Mr. Cornish, C.M.G., who saved Alexandria from water famine by courageously sticking to his duties as chief engineer and manager of the Water-works; Sir Frederic Goldsmid, K.C.S.I., C.B., who acted as Chief of the Intelligence Department, was not recompensed for his services, and was actually out of pocket by them; Mr. Gibson, who acted as Sir Frederic's lieutenant, and did real hard work and good gratuitous service; Mr. Frank Haselden, who in the same department was Chief of the Interpreter Department and adlatus to Colonel Tulloch on board the *Invincible* during the engagement. For obvious reasons, I do not mention the Press correspondents, many of whom, however, did good work, and risked their skin as much as the sailors. They worked in their profession, and they received their pay, so that medals to them may be considered unnecessary, but it does seem difficult to understand how a Government can avail of the services of men who risk their life in their service, who ask for no pay, and who, when there is no longer need of them, are dismissed without a word of thanks.

June 26.—To-day is the anniversary of the Khedive's accession to the throne. We were all congratulating ourselves on the different circumstances which would accompany this celebration to that of last year, when the horizon was black indeed. The *Egyptian Gazette*—our local *Times*—has an article already in print with much talk of the enchanter's wand, and so forth, when without a shadow of warning comes a telegram bursting among us with all the force of an Inflexible shell, "Cholera at Damietta." One requires to know Alexandria and its citizens to realise the change. Not the sound of a broadside from the combined fleets of Europe could produce more effect. As for shells, pooh! they are made for and directed against people whose trade it is to encounter them, not poor peaceful merchants and stockjobbers; but King Cholera is another matter, markets are deserted and the steamship agencies are besieged; Loan falls one per cent, the men breathe brandy and the streets reek with camphor. Three steamers are already, I believe, full of their living freight, and others, far ahead, have every berth engaged. The scare may not perhaps prove justified; meanwhile, it is sufficiently serious.

The following extract from General Orders is considerate, but hardly comforting :—"O. C. Regiments and Corps are informed that coffins can be procured at the Royal Engineers' Stores at Abbassiyeh and Citadel. The contract price is 24s."

NOTES FROM ALDERSHOT.

(FROM OUR CORRESPONDENT.)

The weather generally during the past fortnight has been much against military operations. Great heat and thunderstorms, accompanied by torrents of rain, have been our daily and nightly experience. Under these circumstances, the Militia, in their tents, have not been very happily situated. Proposed Divisional parades and combined minor operations have been postponed or cancelled on account of the weather, and Commanding Officers have been ordered to make arrangements to confine parades and field-days during the hot weather to the early morning and the evening. The affair of advance and rear-guards which was ordered for Tuesday morning last, at 5.30, was postponed at that hour, and finally cancelled. A terrific thunderstorm had raged during the night, and the morning was most unpromising. The remarks by the Chief Umpire (Sir Frederick FitzWygram) on the conduct of the last minor operations have been circulated during the week. The Southern Force (180 Cavalry, 6 guns, 2 sections Royal Engineers, with pontoons, and 400 Infantry, under the command of Colonel Vincent, 3rd Hussars) had orders to seize and fortify a crossing over the canal. This object Colonel Vincent succeeded in effecting near Eelmoor without any opposition from the Northern Force. The Northern Force (120 cavalry, six guns, one section Royal Engineers, with pontoons, and 400 infantry, under the command of Lieutenant-Colonel Helsham Jones, R.E.) had orders to prevent, if possible, the formation of a bridge anywhere between Pondtail Bridge and the Government gas-works. This object Colonel Jones failed in effecting. Sir Frederick remarks that Colonel Jones appears to have thought that he could best effect his object practically, if not exactly according to the letter of his instructions, by allowing his enemy to throw a bridge over the canal and to fortify his position, and, during the time his enemy was so employed, by himself throwing a bridge for his own northern force over the canal and crossing them over, and afterwards attacking his enemy's position and bridge. As the Southern Force had had time to entrench their position, which commanded their bridge, Sir Frederick holds that Colonel Jones must have failed in his attack. General Sir Daniel Lysons, who was present during the operations, concurs, generally speaking, in the opinion of the Umpire-in-Chief. He considers that the Southern Force was unnecessarily exposed in its advance upon Eelmoor Hill, and would have suffered serious loss there. When trenches are supposed to be constructed during these operations, the men who are told off for the work should be extended along the tape-lines with their tools, and be left there for the regulated time required for digging a trench of the necessary dimensions. The detailed reports of the umpires can be seen by officers at the Assistant-Quartermaster-General's office. A further meeting of representatives of regiments, corps, and departments was held in the Divisional Court-martial Room on Monday, Major-General Sir F. FitzWygram, Bart., presiding, to make final arrangements for the farewell ball to Sir Daniel and Lady Lysons, which has now been fixed for Tuesday, the 24th inst., at the Officers' Club. Lieutenant-Colonel Sartorius, V.C., D.A.Q.M.G., officiates as Hon. Secretary. The following officers commenced a course of instruction in gymnastics on Monday :—Lieutenants Cullinan and Segrave, 2nd Battalion 18th; Gorman, Stuart, and Bell, 31st; Lamb, 39th; McMahon, 85th; Wolfe, 87th; Eccles, Ferguson, and the Hon. E. Bateman-Hanbury, 3rd Rifle Brigade. The Roscommon Militia (5th Connaught Rangers), from Boyle, 420 officers and men, arrived at the Camp for annual training on Thursday. This battalion is encamped on Cove Hill, and attached to the 3rd Brigade. A detachment of recruits from the Depôt at Armagh arrived at the same time to join the 87th. The 3rd Surrey Militia (4th Battalion, East Surrey Regiment), about 900 officers and men, will arrive from Kingston-on-Thames, for annual training, on Monday next, and will be encamped on Rushmoor Hill, and attached to the 2nd Brigade. This is the last regiment of Militia for training at the Camp this season. The 24th Middlesex Rifle Volunteers, about 500 strong, will arrive here by special train to-day (Saturday) for a week's drill with the Regular forces. This corps will be accommodated in L and M lines, North Camp, and attached to the 3rd Brigade. A dismounted party of four officers and 91 men of the 2nd Dragoon Guards (Queen's Bays) will arrive from Manchester on Monday next; the remainder of the regiment, which is now on the march for Aldershot, is expected to arrive about the end of next week. This corps will be quartered in the East Cavalry Barracks. The Oxford Militia, about 600 all ranks, will proceed to-day (Saturday) by special train at 8 a.m., from the North Camp station, *viâ* Reading, to Oxford, on completion of training. H.R.H. the Duchess of Connaught presented new colours to this regiment, on the Queen's Parade, North Camp, yesterday (Friday) afternoon. Major

A. C. Hamilton, R.E., and Brigade-Surgeon R. W. Carter have been appointed members of the Aldershot Local Board of Health. Lieutenant J. H. Thomson, R.A., and the Rev. E. Jenner, Chaplain to the Forces, have been ordered to Shoeburyness; and Veterinary-Surgeon J. P. Adams to Dublin, for duty. Lieutenant A. Capel-Cure, R.A., is under orders for Aldershot, from Woolwich. A number of farriers and shoeing-smiths from the various Cavalry regiments at home stations have arrived here to go through a course of instruction at the Army Veterinary School.

LORD MORLEY'S COMMITTEE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—As there seems some probability that the proposal of Lord Morley's Committee to fuse into one body the now distinct and sometimes conflicting organisations of the Army Hospital Corps and the Army Medical Department, I would suggest that a new name might well be devised for the new arm of the service thus constituted, and that "The Royal Medical Department" would be a suitable one. It would extend a coveted distinction to a part of the Army not less essential to its efficiency, nor inferior in the exercise of highly trained ability, when compared with the Artillery and the Engineers. And as the question of relative rank is one which keenly interests officers of all branches of the service, I may further point out that I believe a simple reform in respect to "titles" of medical officers would go far to redress a grievance which, though perhaps it may be called a sentimental one, certainly causes dissatisfaction to a large body of meritorious servants of the Crown, and probably deters not a few from entering the Medical Department of the Army. I mean that while all the higher titles of the Army are naturally enough those which are borne by combatant officers, the fact that non-combatant officers take equal rank with them is apt to be overlooked, not only by the outside public, but by too many of the combatant officers themselves, who have been known to assume a tone of superiority over the non-combatants not always justified by their relative merits. It is to be remembered, however, that only a small part of the duties even of combatant officers consists in the actual operations of war. By far the larger part of the work, indeed we may say the whole of it, during peace, is of a routine and disciplinary character. But in this respect the non-combatants are at least on the same level with them, and therefore might very well bear the same titles. An officer who is moved from his regiment to the Pay Department of the Army ceases to be a combatant, but does not cease to be a major, captain, or lieutenant, as the case may be. Why not carry out this principle into the new medical arm of the service? In point of fact, the medical officers at present are in command of the Army Hospital Corps, and discharge the same duties towards it as the combatant officers do to the rank and file of their several regiments. Why not recognise this by giving them not merely the relative rank which they now hold, but also the distinctive name which that carries with it, so that a medical officer shall be known henceforward not only as surgeon or surgeon-major, but as captain, major, or colonel, according to his grade, with the letters of the department added, as is done in the case of the Artillery and Engineers? The strictures passed by Lord Wolseley on the working of the Medical Department in the late Egyptian War make it clear that, if the Army Hospital Corps and the Army Medical Department are to be fused together, the officers of this new branch of the service will require a double training to make them efficient. They must, as now, receive a full medical education, together with the special training at Netley and Aldershot, and they must also be made practically conversant with the theory and practical work of the Transport and Commissariat Departments. It is impossible for a medical officer who knows only the routine of his own immediate profession to fulfil satisfactorily the duties which must fall on him in war-time, inasmuch as no field hospital can be effectively worked nor relief afforded in a battle, unless the medical officer in command is thoroughly familiar with all questions relating to supplies, dietary, ambulance, and other details which fall usually within the province of the departments just mentioned. I have reason to believe, did these matters receive the attention they deserve, that the popularity of this branch of the service would be restored, and that a better class of candidates would be forthcoming to seek admission into the Royal Medical Department of the Army.—I am, &c., H. M.

SIR,—Having read the evidence contained in the Report of Lord Morley's Committee, as well as many articles and letters which have been published on the same subject, I must express my astonishment at the manner in which a noble and learned profession has been treated. Whatever may be said as to the inefficiency and incompetency of this or that branch of military service, an impression has been conveyed to the general public that the Army Medical Department utterly failed in its duty during the recent campaign in Egypt. The majority of those persons who gain their information from newspapers have been told that the wounded were not properly removed, that the hospitals were not provided with necessaries, that painful operations were performed without chloroform, and that the ships which brought the invalids to England were dirty and uncomfortable. Sweeping accusations have been recklessly circulated, and they have had the effect of casting obloquy on the doctors, who have thus been made responsible for all real and imaginary shortcomings. Now, I do not pretend to deny that changes might be advantageously made in the Army Medical Department, nor that reforms are also necessary in those other branches of the service which are connected with and indispensable to it, such as the Army Hospital Corps, Transport, and Commissariat; but as an Englishman, and one who has had more experience of the direct and immediate results of battles than many of those who have been loudest in their condemnation, I do most emphatically protest against the unfairness of the bulk of the charges that have been levelled at what are called the non-combatant branches of the Army, and especially against that one which has been made the scapegoat of the Egyptian Expedition, namely, the Army Medical Department. On what are these charges for the most part based? Why, upon accusations made on hearsay evidence, and published without a tittle of truth to support them, on the representations of individuals who had had no previous experience of war, and therefore were unqualified to pass judgment on hospitals, of which they were even unable to discriminate whether they were field, stationary, or base hospitals; and on certain statements uttered by Lord Wolseley when before Lord Morley's Committee, which were scarceley consistent with the approval repeatedly expressed by his lordship to some of the Army doctors in Egypt, and the telegram he forwarded to the Director-General of the Army Medical Department, after visiting some of the hospitals at Cairo, to the effect that everything was being done to his entire satisfaction. Let me add, although I know I am asserting an unpalatable truth, that owing to the war having been carried on within easy access of England, with every facility for the daily and almost hourly transmission of sensational gossip as well as authentic news, many statements were circulated which have gone far to diminish the legitimate pride which may well be felt both by, and on account of, those who took part in the campaign. Admitting that in many respects there were reasons for inquiry and reform, was there ever a war of such short duration in which the complaints were so numerous, so exaggerated, or so unfounded? As long as there is war, there must be suffering; but looking at most of the letters which were published during and since the Egyptian Campaign, we might almost imagine that war is henceforth to be carried on without any pain or discomfort, and without any need for those qualities of patience and endurance which hitherto have been distinguishing characteristics of Englishmen. What a demoralising example has been set to our sailors and soldiers! Have our countrymen submitted to no privations in India and other parts of the world, that those which were borne for a very short period in Egypt should obliterate all memory of the past? Are recruits to be taught that battles will henceforth be fought on new principles, and that glory will be won without any of the sacrifices that have hitherto been incidental to war? Sir William MacCormac, in vindication of the profession of which he is a distinguished member, has publicly dissented from much that was given in evidence before Lord Morley's Committee. I can fully endorse what he has stated with regard to Sedan, and as everything connected with the German Army is regarded with favour, I might mention many facts as to the state of the temporary hospitals around the scene of that series of great battles comprised in the name of Gravelotte. I might also evoke many sad reminiscences of the sufferings of which I was a witness in the neighbourhood of Metz during the siege, and at a later period around Paris. I could give evidence from my experience of other campaigns, but I will confine myself to that in which, on the one side, the organisation was considered as near perfection as possible. I am bound, however, to assert that with the roads and railways in rear open to them, I often remarked difficulties in the way of transport and commissariat, to which no forethought and preparation had proved equal; and yet the sufferings which want of every kind produced, and of which I have failed to find a parallel in Egypt, were not laid to the charge of the doctors, as it was well known that they were doing all that could be done to mitigate and relieve them. I am aware that the comparison between the Franco-German War and the short campaign in Egypt may not be accepted as a fair one; but it must be borne in mind that, though the latter was very limited in extent and duration, there were certain circumstances of climate and situation which greatly added to its importance. Let everything be done that care, experience, and foresight can suggest for the good of our soldiers and sailors, whether in peace or war; but let it not be imagined that we can make war a holiday pageant, or that military hospitals during a campaign, even under the best conditions, can ever be brought to the level of those civil establishments which we have in London and other large towns. (Even these grand institutions would not be safe from the pen or the tongue of a reckless and inexperienced critic, who might consider it his duty to report on one after a casual visit before breakfast.) I write warmly on this subject, regretting, at the same time, that my words cannot carry greater weight. Englishmen like fair-play, but I feel strongly that this has not lately been accorded in any degree to the military doctors. Systems have proved defective, and individals have, it must be admitted, occasionally been found wanting in their duty, but are we on this account to condemn an entire branch of a distinguished profession, and to allow a stigma to rest on its members individually and collectively? for it amounts to this. A day will come, and come, I hope, it soon may, when justice will be done to a body of men whom, from an intimate personal experience of many years, both in sunshine and in storm, I know to be devoted, generous, and self-sacrificing in peace, and second to none for bravery, endurance, and soldierly qualities in war.—I am, &c., JOHN FURLEY.

THE POSITION OF REGIMENTAL OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The best thing for the "Mud-Major" to do is to erase, if possible, the ideal Major of the Purchase days altogether from his mind, realise that he is one of the four "Major" or senior captains of his battalion, and congratulate himself on the increment to his pay! I admit the hardships of looking on this phantom as "Promotion." Promotion, forsooth! To be left in the same relative position in the list of officers of his own battalion; to be in all probability superseded by two or three officers of a battalion to which he is unwillingly dovetailed! I refer principally to the Purchase Captains, the majority of whom must be so sick of "the whole performance" since the reorganisation of the Army commenced with the very expedient retention of their money, that it is, perhaps, useless wandering away into a further "flogging of the dead horse." The real sufferers in this "Major" business are the seniors. Look at their position now and what it would have been three years ago. When the object they have been striving for, and paying for—in many cases, for over a quarter of a century—is apparently within their grasp, it is turned into Dead-Sea fruit! and the senior major of to-day, instead of having attained to the regimental status of a *bonâ fide* field-officer, finds himself a "Jack of all trades,"—at one moment, as your correspondents remark, inspecting rations, signing small books, fitting clothing, drilling recruits, &c. (and this work, besides being infinitely more harassing, has increased 30 per cent. since short service was adopted); and the next, turning out garrison guards, and commanding his regiment, for it must not be forgotten that now the junior lieutenant-colonel is detached for many months of the year at the rifle-range, in the event of the absence or sickness of the colonel, if only for a day or two, the responsibility of command is tacked on to the already multiplied duties of this miserable "Mud-Major," who, instead of finding more congenial work as he grows older and advances in his profession, discovers, alas! that the "last state of that man is worse than the first"! I see by the papers that Lord Hartington proposes a further reorganisation. I would submit the anomalous position of senior majors as a trifle that could be amended, with very great advantage, not only to the officers, but to their employers,—the State. As both the officer and serjeant-instructors of musketry have been abolished, and the junior lieutenant-colonel removed for a great portion of the year to some generally distant rifle-range, let the establishment of battalions be increased by one captain, and give the present senior majors a modicum of FAIR-PLAY.

SIR,—In the late numbers of your paper several letters have appeared calling attention to the anomalous position in which Majors of Cavalry and Infantry are now placed. It cannot be denied that it is an anomaly that substantive field-officers should also be company officers, but in the peculiar position of Army affairs, this, probably, could not easily be remedied. The degradation of field-rank, caused by majors being placed on the same roster for duty, &c., as subalterns, however, is very easy to prevent. The order by which commanding officers are permitted to assign duties to majors should be abolished, and distinct directions given from head-quarters on that head. It cannot be for the good of the service that all distinctions between ranks should be done away with, and I venture to say that a commanding officer who proceeds on those lines does not understand the principles of command by the chain of responsibility, and he will eventually find that the steps that divide him from the junior ranks having been fused, his own position will become affected. This is no unimportant matter, and may well merit the attention of Lord Wolseley for a few moments.—I am, &c.,

AN INFANTRY MAJOR.

SIR,—The Purchase Captains must thank the "Mud-Major" for his practical letter in your columns of the 16th ult., and for bringing forward the anomaly that exists in the difference of the retiring allowances between Purchase and non-Purchase officers. Most Purchase Captains would, I think, be satisfied if (considering the status and duties of majors have been very considerably altered) they were offered the same bonus as non-Purchase officers if they wished to retire, together with the regulation value of their commissions. What must be the feelings of such officers, who find that their services are estimated at *nil*, while their more fortunate post-Purchase brother-officers' services (besides the extra pay they receive while serving) are valued at £100 for each year up to twenty years' service? What equity can there be in this arrangement? This treatment has engendered the feeling that we have been treated without any consideration. Some may consider that the non-Purchase officer entered under new conditions; still, it also ought to be borne in mind that the conditions under which Purchase Officers entered the service are entirely altered, and, therefore, it seems only reasonable both should be placed now on the same terms of retirement. The only option, apparently, the Purchase officer has is to get the best interest he can for his outlay. Surely, officers who have, besides their money, given the best years of their lives to their profession, deserve better treatment by the country whom they have faithfully served for a considerable number of years; and who may be said (not including the Scientific Corps, who have special retiring allowances) to represent the only old soldiers at present serving.—I am, &c., FIAT JUSTITIA.

The following young gentlemen have been successful in passing the examination for assistant-clerkships to the Royal Navy:—Messrs. C. M. Luckham, F. H. Graham, J. E. Jones, G. Graham, and A. M. Cleveland.

SPECTACLES *v.* BLINDNESS.—"Spectacles can only be perfectly adjusted by those having a thorough knowledge of the anatomy of the eye, combined with optical experience."—We have the highest medical authorities confirmed by daily experience, that imperfect glasses, together with the haphazard plan of selection generally employed by the mere vendor, is the cause of most cases of blindness and defective vision. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but the spectacles you have adapted suit admirably. The clearness of your glasses as compared with others is really surprising." The Rev. Professor W. A. Hales, M.A. Cantab., 2 Minford Gardens, West Kensington Park, writes:—"The spectacles are perfect, and a most decided boon. I had occasion on Monday to write to Lord ——, and took the opportunity to mention your name and the wonderful power of your spectacles." Dr. Bird, Chelmsford, writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age (82). I can now read the smallest type, although suffering from cataract on the right eye." Testimonials from Earl and Countess Lindsay; F. D. Dixon Hartland, Esq., M.P.; the Venerable Archdeacon Palmer, Clifton; Rev. Mother Abbess, St. Mary's Abbey, Mill Hill, Hendon; C. J. Alford, Esq., Gas Light and Coke Company, Horseferry Road, Westminster, &c. Mr. HENRY LAURANCE, F.S.S., Oculist Optician, 39 OLD BOND STREET, W. (late 3 Endsleigh Gardens, Euston Square), personally adapts his Improved Spectacles daily (Saturdays excepted), from 10 to 5. Special arrangements are made for invalids and others unable to wait on Mr. Laurance. Pamphlet, "Spectacles: their Use and Abuse," post free. City Branch, 6 Poultry, Cheapside.

FRENCH ADVENTURE.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In several articles and paragraphs lately, the *Army and Navy Gazette* has inveighed against the recent spirit of adventure displayed by the present Government of France in a manner which has provoked some angry criticism in the French newspapers. It is not so much to protest against the tone which has been adopted towards a country which was our ally in our greatest war in Europe of late days, and in our greatest war with China at any time, I now write to you, but to point out that the statement, which has been repeated very often in your columns and elsewhere, that France uniformly fails as a colonising Power, that is, as a Power which can establish prosperous colonies, is not altogether borne out by the facts. At one time, indeed, France was exceedingly active, venturesome, and fairly successful in her colonial enterprise. Her sailors were skilful and bold, and the colonies which she founded in America attest her success, for Canada, from Quebec and Canada eastwards, is almost as much French as Brittany, and the flourishing state of Louisiana, ceded by France to the United States, was and is French in law, custom, and largely in language. Before the great English colonies rose upon the Atlantic seaboard, France was a very mighty and pushing coloniser in America. To her missionaries and traders we owe our earliest knowledge of the St. Lawrence and Mississippi. The policy which led to the abandonment of Montcalm in Canada was followed with the same results in the case of Dupleix and Lally Tollendal in India. In no sense, however, can we regard that country as a "colony," either French or English; it is a possession ruled by successive flights of non-colonising strangers, under the protection of an army; and rulers and soldiers come and go like swallows, not even holding their nests in the country. The colonisation of the United States can scarcely be called a success for England, inasmuch as the moment the people were strong enough they rebelled, and with the assistance of France shook off our yoke. The great colonies which have been founded in Australia and New Zealand were developed under very remarkable and—to use a word I dislike—exceptional circumstances, and the discovery of gold was an immense factor in the settlement. In the case of Algiers, France may claim to be fairly successful, and she has certainly established on the north shore of Africa a civilisation and a peace and order which have been of enormous advantage to the population and a boon to humanity. Her possessions at Senegal, &c., are a model of good government, and the troubles we have had ever since we settled at the Cape certainly do not entitle us to despise French administration. France has been happy in escaping Ashantee wars and African expeditions. The results of our splendid achievements at sea formerly handed over to us distant islands which were settled by Frenchmen and by them converted into scenes of peaceful industry. At the present moment, Guadaloupe, Maria Galante, Martinique, &c., are as well-to-do as their neighbours of the other Antilles. We seem to forget that at such places as Assinia, Bakel, Basses, Bien, Hoa, Bissago, Cambodia, Chandernagore, Pondicherry, Karikal, Dabon, Gaboon, Goree, Grand Bassam, Cayenne, Hatien, Loyalty Island, Maiotta, Marchese, Mitho, Nossi Bay, New Caledonia, Reunion and Bourbon, Saigon, Miguelon, &c., the French flag now waving attests the fact that her adventures in Tonquin and Madagascar are not sudden developments of a novel ambition to extend her trade commerce and influence beyond the limits of Europe. The world is wide enough for us both, and it is for that reason I would ask you to consider what benefit is to be gained by indulgence in criticism, which will be attributed to the meanest of passions—jealousy—and which certainly lays us open to some unpleasant *tu quoque* commentaries. For similar considerations, I hope you will permit me to express some regret at the language used by a writer in your columns with regard to the Portuguese, who are, at all events, entitled to the respect which is due to their ancient fame as the greatest navigators and discoverers of the mediæval world. As to the encouragement to slavery which is attributed by the writer to their officials, I would merely remark that domestic slavery is not quite unknown at such places as Cape Coast Castle, and that it was only in 1868 slave-holding ceased to be a recognised institution of the Great Republic. We must live and let live, and give some consideration to the claims of others to inherit the earth.—I am, &c.,

HOMO SUM.

THE ARMY SURGEON AS A TEACHER.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—There is at the present time a great work waiting to be done by the Medical Officers of the Army. I venture to predict that if such a work as is now proposed could be thoroughly carried out, it would do much to draw together the Army and its medical officers, and build up anew the more friendly relations of bygone years. It seems to me essential that definite and compulsory teaching in all that constitutes first aid to the wounded should be recognised as part of a soldier's routine duty, and that the giving of such instruction should be the regular work of the Army doctor. There is certainly no calling where a knowledge of what is called ambulance work is so much needed as in the Military service. The treatment of fractures, the stopping of bleeding, the recovery of the apparently drowned, the primary treatment of sunstroke, should be perfectly well known to every man in the service; and the only way it can be thoroughly done is by a systematic and compulsory course of lectures and practical instruction, carried out periodically by the medical officers of the Army. 2. Again, our men serve all over the world in every possible climate, but up to this date no systematic course of instruction has been given to the men on the causes and the preventive measures of various diseases. We should teach the Army all these things. The causes of malarious fevers, the ills resulting from over-crowding, the pernicious effects of bad water or bad air, and we should endeavour to make every man himself the guardian of his own health. Every officer who commands men should understand the main principles of hygiene, and it is by such teaching as we can give that we can pave the way for progressive sanitary reforms, and kill out the opposition to changes, which constantly are opposed by ignorant men. 3. It is our boast in this Army, for which we have done so much, that we have by our sanitary labours placed the soldier in a far more healthful position than his civil brother, and that by preventing disease we have increased very much the happiness of the individual man. But if we be logical in our sanitary efforts, we should most certainly be teachers of hygiene, and lecture the men while in health as to how they are to preserve it. 4. Again, with special reference to those contagious affections of which we hear so much, we have never yet fully and thoroughly lectured the Army as to the symptoms and effects of those diseases, yet there is a vast amount of ignorance on these subjects amongst officers and men. Instruction on such subjects would be an important part of the teaching I propose. 5. Nor should the soldier's wife be excluded from our teaching. We all know how much of the sad death-rate of the soldiers' children in India is caused by the want of knowledge of the soldier's wife in all that concerns the feeding and sanitary supervision of her children, and the nursing of them when sick. Definite instructions on all these points should be given to the soldiers' wives by the medical officers of the Army. I feel perfectly certain this instruction will be eagerly received by the men of the Army, and that the medical officers of the service would at once carry out such a scheme, if placed before them. It is by such-like works of self-sacrifice the medical service can continue to build up for itself a mass of sympathy amongst the men of the Army, and the efforts so made will have their reward in a lower sick-rate, and in our being able to pick out from amongst our classes intelligent and interested men to recruit the medical corps of the Army.—I am, &c.,

C. R. I. V., SURGEON-MAJOR, A.M.D.

THE UNPOPULARITY OF THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The difficulty of keeping up the strength of the Army is a question of grave importance, and one calling for the attention of those having the interest of the service at heart. There have been a great many reasons assigned as to the cause of the unpopularity of the Army, for it must be said to be unpopular, when the ranks cannot be kept anything like effective. As an old soldier, I may, perhaps, be permitted to point out one of the reasons for the difficulty in procuring recruits. The young men from whom the Army is recruited see daily the disadvantages under which men who have served in the Army labour, and see how difficult it is for them to procure employment; it therefore has a tendency to deter them from joining the Army. Take the case of the Reserve man, he cannot get employed as he could prior to joining the Army. I have known men of good character who joined the Reserve, and who applied for employment in the police, a situation for which they would be adapted, owing to their discipline and military training, but although vacancies existed, they would not be employed, the reason being that they were likely at any moment to be called to the colours. The railway companies will not employ them for a similar reason. Then again, take the case of the pensioners just come from the Army, who are generally in the prime of life (as a rule, under 40 years). They are debarred from filling many situations, they have also a great difficulty in procuring employment in civil life, except they take something much beneath the position which they held. But who can blame employers of labour for the military man being discarded so, when before the present Government came in, a good field was open in the Militia and other auxiliary forces, and also in the Barrack Department for non-commissioned officers who left or were about leaving the Army. Then the Militia permanent staffs were generally composed of pensioners from the Army and Marines, and the Barrack Department was altogether manned from the same source, but now a pensioner is prohibited from joining either one or the other. When one considers the number of Militia regiments in the United Kingdom, it must be seen at a glance what a source of employment it has hitherto been to the old deserving non-commissioned officers. Now when the Government has set such an example, what can be expected, and it is a known fact that the Militia worked well under the old organisation, which is more than can be said of the present system. Surely the authorities ought to rescind the order prohibiting the pensioned non-commissioned officers from joining the Staff of Militia regiments, and do an act of justice to the

"OLD SOLDIER."

[We consider the arguments put forward by "Old Soldier" so forcible that we give insertion to his letter in the hope that someone in authority may "read, mark, learn, and inwardly digest" its contents. There can be no doubt as to the serious disadvantages under which old soldiers now labour.—ED. *A. & N. G.*]

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS.—The present system of living—partaking of too rich foods, as pastry, saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

𝔒𝔟𝔦𝔱𝔲𝔞𝔯𝔶.

Col. J. J. Graham, whose death occurred during the present week, commenced his career as a cadet at Sandhurst during the year 1823-24. He received his first commission by purchase in the 75th Regt.; afterwards he entered the 70th Regt., from which corps he went on half-pay. During his foreign service he was employed at one time on the staff of Gen. Maister as deputy-judge-advocate-gen.; at another time he was employed as an assistant-engineer. Returning home, Capt. Graham went on half-pay, and was employed in the secretariat of the South-Eastern Railway, where his services in a highly responsible office called forth the marked approbation of the directors. Returning again to military life, Capt. Graham sailed for Canada, in command of a body of enrolled pensioners, and it is amongst these old soldiers, as well as among those who now form the 2nd-Class Army Reserve, that Col. Graham was so well known and kindly remembered. He filled the appointment of Staff Officer of Pensioners for some years at London, Canada West; again, after the Crimean War, at Lynn; and again at the Regent's Park Barracks. On the outbreak of the Crimean war, Lieut.-Col. Graham sought active employment, and in due course was appointed military secretary to Gen. Vivian, commanding the Turkish Contingent. For his services in this appointment he received the 3rd Class of the Medjidie and the Turkish medal. Returning to England at the close of the Crimean war, he contributed to the military literature of this country, which at the time may be said to have been in a dormant state, by writing, in 1858, "The Elementary History of the Art of War." This work, published by Bentley and Co., was favourably received. In 1862, he published, for private circulation, the memoirs of his father, Gen. Graham, with notices of the campaigns the latter distinguished officer was engaged in from 1779 to 1801. The publication of this interesting memoir was followed in 1864 by the publication of a work entitled "Military Ends and Moral Means," exemplifying the higher instincts influencing military life. During the great discussion on the reorganisation of the Army, Col. Graham contributed a pamphlet, entitled "Constitution and Organisation of Land Forces Reformed," which was published by Stanford, and called forth encomiums that a sound and philosophical view of the question could alone command. In 1873, Col. Graham added to the military library of this country a translation in English of the celebrated German work "On War," by Gen. Carl von Clausewitz. The magnitude of this undertaking can best be appreciated by those acquainted with the work as it is written in the German tongue, and its utility by those who study the highest branches of the military art. In addition to these contributions to military literature which have appeared, Col. Graham proposed to bring out a work he had compiled in German, French, and English, entitled "The Soldier's Compendium," the subscribers to which falling short of the number requisite, the endeavour was abandoned. Col. Graham was an accomplished artist in water-colours and crayons, both in landscape and figures.

Capt. the Hon. John Carnegie, R.N., died on Thursday, July 6, at 13 Pall Mall. The deceased officer was the second son of Sir James Carnegie, sixth Baronet, by Charlotte, daughter of the Rev. Daniel Lysons, of Hampstead Court, Gloucester, and was brother of the Earl of Southesk and the Hon. Charles Carnegie, Inspector of Constabulary for Scotland. He was born Oct. 14, 1829. He entered the Navy as a naval cadet in May, 1842, attained the rank of capt. in Sept., 1870, and was placed on the Retired List in Oct., 1873. He had seen in his early career plenty of active service. He was present at all the operations in New Zealand during the war in 1846-47, and was lieut. of the Sidon in the Black Sea throughout the Crimean War, was present at the bombardment of Kertch, Kinburn, &c., and at the fall of Sebastopol, for which he had received the Crimean and Turkish medals, with clasps for Sebastopol and Azoff. He commanded the Salamander in 1864, and founded the colony of Cape York, on the northernmost point of Australia. He was appointed a Deputy-Lieutenant for Forfar in 1860, and was a Fellow of the Royal Geographical Society.

Admiral Brandreth, Controller of the Navy, and Mr. George Rendel, accompanied by Capt. Fisher and Capt. Markham, paid a visit to the Dreadnought, turret-ship, at Spithead, on Wednesday. The ship proceeded to the back of the Isle of Wight to try its torpedo nets. When under steam, and also under fire, it was found that the nets dragged considerably astern and buckled, and that much heavier weights, with consequent increased resistance, must be adopted to keep them taut.

The Naval Discipline Bill, now before the House of Commons, will encounter opposition from two different quarters. The Naval Members regard its provisions as unsatisfactory, whilst a number of philanthropic Members intend to oppose them, on the ground that they are too severe in their character. In these circumstances, it is probable that the Bill will have to be dropped.

It is understood that the position of Usher of the Black Rod, rendered vacant by the death of the late Sir William Knollys, has been offered to and accepted by Admiral the Hon. Sir James Robert Drummond, G.C.B. Sir James was a Lord of the Admiralty for many years, and commanded the Mediterranean Fleet for three years.

A correspondent with the Mediterranean Squadron, writing from Fiume on June 27, reports a curious accident as having happened the day previously to Com. Pigott, of the Inflexible. While explaining to some friends the system of raising shot to turret-guns, he got his head jammed between the bars of the hydraulic lifting gear. The bars closed on the crown of his head and under his jaw, giving him a very severe squeeze. He was speedily extricated, and placed under the care of the ship's surgeon, who found that beyond a severe laceration of the scalp and painful bruises on the jaw, the gallant officer was not seriously injured.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 3, 1883.

1st Dragoons—Rdgmr., with the hon. and relative rank of Capt., J. Collins retires on retired pay, with the hon. rank of Major.

15th Hussars—Qrmr., with the hon. and relative rank of Capt., S. H. Staniland retires on retired pay, with the hon. rank of Major.

Coldstream Guards—Capt. and Lieut.-Col. H. J. L. Bruce retires on half-pay.

Scots Guards—Lieut. and Capt. Lord F. C. Gordon-Lennox retires from the service, receiving the value of his commission.

LINE BATTALIONS.

The Northumberland Fusiliers—Lieut. R. Southey has been appointed a probationer for the Indian S.C. (April 27).

The Prince Albert's (Somersetshire Light Infantry)—Lieut.-Col. W. K. Leet, V.C., has been appointed to command a Batn.; Major I. S. Allfrey to be Lieut.-Col., vice Col. P. E. V. Gilbert, C.B., retired; Capt. B. B. Twyne to be Major, vice I. S. Allfrey (all three dated May 1).

The Royal Irish Regiment—Lieut.-Col. H. Shaw, V.C., has been appointed to command a Batn.; Major T. C. Wray to be Lieut.-Col., vice Col. M. J. R. MacGregor, placed on half-pay (both dated May 22).

The Lancashire Fusiliers—Lieut. E. H. R. Hibbert to be Adjt., vice Lieut. F. Hammersley, who resigns the appointment.

The Cheshire Regiment—Capt. G. A. Christian has been placed on retired pay, with the hon. rank of Major (June 28).

The South Wales Borderers—Lieut. G. N. Caulfeild has been appointed a probationer for the Indian S.C. (April 23).

The Cameronians (Scottish Rifles)—Lieut. P. E. C. Sheehan to be Capt., vice H. de C. Rawlins, promoted (May 30).

The Royal Sussex Regiment—Lieut. T. H. Howe resigns his commission.

The Welsh Regiment—Lieut.-Col. S. W. Rawlins has been appointed to command a Batn.; Major and Brevet Lieut.-Col. A. B. Tulloch, C.B., to be Lieut.-Col., vice Col. R. FitzGerald, retired (both dated June 4).

The King's Own Light Infantry (South Yorkshire Regiment)—Lieut.-Col. W. S. Daniell retires on half-pay.

The Royal Irish Rifles—Capt. E. G. Selby-Smyth to be Adjt., vice Capt. C. Haggard, who has vacated the appointment.

The Prince of Wales's Leinster Regiment (Royal Canadians)—Lieut. C. R. Keate has been appointed a probationer for the Indian S.C. (April 22).

2nd West India Regiment—Major F. L. Mathews retires on retired pay, with the hon. rank of Lieut.-Col.

Commissariat and Transport Staff—Deputy-Comy.-Gen. A. F. Adams, having completed seven years' service in that rank, has been placed on retired pay, with the hon. rank of Comy.-Gen. (July 1).

Army Pay Department—The under-mentioned Pymrs. and Hon. Capts. to have the hon. rank of Major in the Army (dated July 1):—J. M. Kerr and J. S. Brereton.

MEMORANDA.

Lieut.-Col. W. S. Daniell, half-pay, retires on retired pay, with the hon. rank of Col.

Hon. Lieut.-Col. the Hon. H. J. L. Wood, late Capt., half-pay, has been permitted to commute his retired pay (June 14).

Major the Hon. E. J. Chetwynd, half-pay, retires on retired pay.

Hon. Major R. G. Southey, late Capt., the Lincolnshire Regt., has been permitted to commute his retired pay (June 6).

The under-mentioned promotions to take place in succession to Gen. Sir H. P. de Bathe, Bart., Col. 2nd Batn. the King's (Shropshire L.I.), retired:—Lieut.-Gen. Sir R. C. H. Taylor, K.C.B., Col. 2nd Batn. the East Surrey Regt., Governor of the Royal Military College, to be Gen.; Major-Gen. Sir F. W. J. FitzWygram, Bart., Commanding the Cavalry Brigade, Aldershot, to be Lieut.-Gen.; Col. Sir C. K. Pearson, K.C.M.G., C.B., Governor and Commandant of the Royal Victoria Hospital, Netley, from Lieut.-Col., half-pay, to be Major-Gen. (all three dated April 1).

The under-mentioned promotions to take place in succession to Gen. the Hon. Sir F. Colborne, K.C.B., Col. 1st Batn. the Queen's Own (Royal West Kent Regt.), retired:—Lieut.-Gen. the Hon. A. E. Hardinge, C.B., Col. 2nd Batn. the Royal Inniskilling Fusiliers, commanding the Forces in the Bombay Presidency, Extra Equerry to the Queen, to be Gen.; Major-Gen. G. W. A. Higginson, C.B., commanding the Home District, to be Lieut.-Gen. (both dated April 1).

The under-mentioned Cols. to be Major-Gens.:—F. M. Colville, C.B., from Lieut.-Col., half-pay, vice J. S. Thomson, retired (Dec. 2, 1882); V. H. Bowles, from Lieut.-Col., half-pay, vice R. J. Feilden, C.M.G., retired (Jan. 5); E. Chippindall, C.B., from Lieut.-Col., half-pay, Aide-de-Camp to the Queen, vice W. H. B. de Horsey, retired (Feb. 13); W. C. Bancroft, from Lieut.-Col., commanding a Regtl. District, in succession to Gen. Sir A. H. Horsford, G.C.B., retired (April 3); J. I. Macdonell, from Lieut.-Col., half-pay, vice R. B. Hawley, C.B., retired (April 18).

(Where not otherwise stated, the foregoing commissions and announcements bear date July 4, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 6, 1883.

Royal Artillery—Lieut.-Gen., with the hon. rank of Gen., E. Price, C.B., upon the Retired List, to be Col.-Commandant, vice Gen. Sir E. Sabine, K.C.B., upon the Retired List, deceased (June 27); Col. C. M. Govan retires upon retired pay, with the hon. rank of Major-Gen.; Lieut.-Col. A. Ford retires upon retired pay, with the hon. rank of Col.; Majors A. E. England retires upon retired pay, with the hon. rank of Lieut.-Col.; M. Moore-Lane retires upon retired pay, with the hon. rank of Lieut.-Col. (all four dated July 7); Capts. K. Howard-Bury, temporary half-pay, has retired upon retired pay (May 8); T. J. Roch retires from the service, receiving a gratuity (July 7); W. V. Gregory to be Major, vice W. R. Stirke, retired (June 20); R. E. Mundy, from the Seconded List, to be Capt., vice C. B. D'A. Willis, seconded as an Adjt. of Auxiliary Artillery (May 21); F. W. Campbell, from the Seconded List, to be Capt., vice D. E. Dewar, placed upon the Seconded List (May 31); T. J. Roch, from the Seconded List, to be Capt., vice S. Rudge, promoted Major on half-pay (June 8); J. T. Bury, from the Seconded List, to be Capt., vice W. V. Gregory, promoted (June 20); A. H. C. Phillpotts to be Adjt., vice W. Whateley, promoted (Jan. 27); F. A. Bowles to be Adjt., vice Brevet Major E. O. Hay, who resigns that appointment (May 29); Lieut. A. H. C. Birch to be Lieut. upon the Seconded List.

Coast Brigade—Serjt.-Major Richard Bailey to be Lieut., for service as Adjt. of the 1st Orkney Artillery Volunteers.

REGIMENTAL DISTRICT.

Lieut.-Col. and Col. A. Templeman, from half-pay, to be Lieut.-Col., to command the 91st Regtl. District (Princess Louise's Argyll and Sutherland Highlanders), vice Col. D. Macpherson, C.B., transferred to the command of the 42nd Regtl. District (the Black Watch, Royal Highlanders) (July 5).

Staff—Major and Col. Sir R. H. Buller, V.C., K.C.M.G., C.B., half-pay, to be an Assist.-Adjt.-Gen. at Head-quarters, vice Col. W. K. Elles, C.B., half-pay, whose period of service in that appointment is about to expire (July 22); Major G. E. Boyle, the Rifle Brigade (the Prince Consort's Own), now a Deputy-Assist.-Adjt. and Qrmr.-Gen. on the Staff, to be Military Secretary to his Excellency Sir H. G. R. Robinson, G.C.M.G., Governor of the Cape of Good Hope (May 25).

Staff College—Major E. Clayton, R.A., to be Professor, vice Col. L. A. Hale, half-pay, whose period of service in that appointment is about to expire (July 31).

Half-Pay—Capt. P. K. L. Beaver, from the Royal Artillery, to be Major (June 28).

MEMORANDA.

The second Christian name of Col. G. E. L. Walker, R.E., appointed a Col. on the Staff at Hong Kong in the *Gazette* of June 12, 1883, is "Edmond," and not "Edmund."

Lieut.-Cols. H. T. Vachell, Royal (late Bombay) Artillery, to be Col. (June 18); A. K. Ridout, R.A., to be Col. (June 27).

Hon. Major-Gen. H. Heyman, late R.A., has been permitted to commute his retired allowance (June 1).

Hon. Lieut.-Col. W. V. Legge, late R.A., has been permitted to commute his retired allowance (June 9).

Qrmr. S. Cox, R.A., to have the hon. and relative rank of Capt. (June 21).

WAR OFFICE, PALL MALL, July 6, 1883.

THE HONOURABLE ARTILLERY COMPANY OF LONDON.—The commissions of the following officers are renewed for five years:—Capt. A. Durrant (May 22) and Second Lieut. E. Blanks (June 1).

MILITIA.

WAR OFFICE, PALL MALL, July 6, 1883.

ROYAL ARTILLERY.

2nd Brigade, Northern Division—Lieut. E. M. R. Green-Emmott-Rawdon resigns his commission.

2nd Brigade, Cinque Ports Division—Major T. B. Hamilton, late R.A., to be Capt. (June 4).

5th Brigade, Scottish Division—Capt. C. C. Carnegie to be Major.

ENGINEER.

Royal Anglesey—William Glynne Massey, gent., to be Lieut.

INFANTRY.

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Lieut. T. Lloyd-Harries to be Capt.

3rd Battalion, the King's Own (Royal Lancaster Regiment)—Lieut. O. Z. Palmer to be Capt.

4th Battalion, the King's (Liverpool Regiment)—Major Sir T. G. F. Hesketh, Bart., resigns his commission.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry)—Lieut. W. G. S. Sainsbury to be Capt. (June 15).

—Lieut. W. G. S. Sainsbury to be Capt. (June 15).

4th Battalion, the Bedfordshire Regiment—Qrmr. T. Jones resigns his commission, and is placed on a retired allowance (July 2).

3rd Battalion, the Royal Welsh Fusiliers—Lieut. H. B. Robertson resigns his commission.

4th Battalion, the Worcestershire Regiment—Lieut.-Col. and Hon. Col. M. E. Vale resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

3rd Battalion, the Duke of Wellington's (West Riding Regiment)—Lieut. P. F. Bulteel resigns his commission.

4th Battalion, the Duke of Wellington's (West Riding Regiment)—Lieut. G. J. Mitton resigns his commission.

4th Battalion, the South Staffordshire Regiment—The resignation of the commission held by Capt. A. C. Chamier, notified in the *London Gazette* of 5th ult., is cancelled.

3rd Battalion, the Black Watch (Royal Highlanders)—Frederick Percival Maryon Maryon-Wilson, gent., to be Lieut. (June 25).

4th Battalion, the Prince of Wales's (North Staffordshire Regiment)—Lieut. C. S. Kynnersley to be Capt.

4th Battalion, Princess Victoria's (Royal Irish Fusiliers)—Lieut. T. Mawhinny to be Capt.

3rd Battalion, the Connaught Rangers—Lieut. M. Blake resigns his commission.

3rd Battalion, Princess Louise's (Argyll and Sutherland Highlanders)—William Alexander Hunt, gent., to be Lieut.

9th Battalion, the Rifle Brigade (the Prince Consort's Own)—Capt. F. L. Tottenbam resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, July 6, 1883.

Royal 1st Devon—Capt. C. A. W. Troyte is granted the hon. rank of Major; Lieut. A. C. Chichester to be Capt.

West Kent—Capt. J. B. W. E. Lambarde resigns his commission.

East Lothian—Walter Wingate Gray, gent., to be Lieut. (June 23).

Staffordshire—Henry Staveley Hill, gent., to be Lieut.

VOLUNTEERS.

WAR OFFICE, PALL MALL, July 6, 1883.

ARTILLERY.

1st Banff—Lieut. F. R. Murray to be Capt.

1st Berwick-on-Tweed—Lieut. T. Darling to be Capt.

1st London (City of London)—Louis Francis Lundy, gent., to be Lieut.

2nd Middlesex—Arthur Hamilton Renwick, gent., to be Lieut. (supernumerary).

3rd Middlesex—Lieut. G. Estall resigns his commission.

ENGINEER.

1st Gloucestershire—Charles Rudolf Ullrich-Yates, gent. to be Lieut.

RIFLE.

3rd Aberdeenshire (the Buchan)—James Law Crawford, gent., to be Lieut. (supernumerary).

1st Argyll (Argyllshire Highland)—Capt. T. C. Kemp resigns his commission; John Lawson, gent., to be Qrmr.

1st Volunteer Battalion, Princess Charlotte of Wales's (Berkshire Regiment)—Major and Hon. Lieut.-Col. H. L. Hunter resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the batn. on his retirement. Capt. J. Simonds to be Major.

1st Berwickshire—Capt. C. Hope, late the King's Royal Rifle Corps, to be Capt.; the Rev. James John Marshall Lang Aiken to be Acting Chaplain.

1st Durham—Lieut. G. Hopper resigns his commission; G. Hopper, gent., to be Qrmr.

1st Edinburgh (the Queen's City of Edinburgh Rifle Volunteer Brigade)—Capt. G. C. Banks resigns his commission.

1st Volunteer Battalion, the Essex Regiment—William Turle Moore, gent., to be Lieut.

1st Flintshire and Carnarvonshire—Lieut. A. Ward resigns his commission.

1st Forfar (Dundee)—Patrick William Anderson, gent., to be Lieut.

2nd Forfar (Forfarshire or Angus)—Capt. D. Fraser resigns his commission.

1st Herefordshire—Thomas Percival Evans, gent., to be Lieut.

1st Hertfordshire—Capt. H. W. Bonsor resigns his commission.

2nd Hertfordshire—Capt. A. J. Copeland to be Major; Lieut. G. E. Lake to be Capt.

1st Kincardineshire and Aberdeenshire (Deeside Highland)—Lieut. A. Niven to be Capt.

3rd Lancashire—Lieut. L. H. Brown resigns his commission.

7th Lancashire—Major J. A. Smith resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

2nd Volunteer Battalion, the Lancashire Fusiliers—Henry Heap, gent., to be Lieut.

18th Lancashire (Liverpool Irish)—Lieut.-Col. P. S. Bidwill resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

3rd London—Lieut. T. F. Monier-Williams resigns his commission; Torrington Faithfull Monier-Williams, gent., to be Qrmr.

11th Middlesex (Railway)—Lieut. W. Jordan to be Capt.

2nd Monmouthshire—Benjamin Owen, gent., to be Lieut.; Windsor Edward Richards, gent., to be Lieut. (supernumerary).

2nd Volunteer Battalion, the Prince of Wales's (North Staffordshire Regiment)—Lieut. W. G. Bagnall resigns his commission.

6th (West) Suffolk—Acting-Surg. J. C. Norman resigns his appointment; William Thomas Angrove, gent., to be Acting Surg.

3rd Surrey—Francis Lee Sanders, gent., to be Lieut.

1st Volunteer Battalion, the Royal Warwickshire Regiment—Samuel George Rogers, gent., to be Lieut.

1st Westmoreland—John Simpson Roper, gent., to be Lieut.

2nd Volunteer Battalion, the East Yorkshire Regiment—Capt. E. Storry is granted the hon. rank of Major.

2nd Volunteer Battalion, the York and Lancaster Regiment—William Moxon, gent., to be Lieut.

(Where not otherwise specified, the foregoing commissions and announcements bear date July 7, and the current year must be understood.)

The *Royal Navy List* for this quarter contains a great addition in the war services, with the medals and decorations of the whole of the officers of the Navy and Royal Marine Forces engaged in the war in Egypt. This information has been courteously supplied by the Admiralty. The work is growing each quarter, information of all kinds being added to make the work a perfect Naval compendium. The *Royal Navy List* now contains 3,300 entries of officers' services, and the editor is not to blame that it does not contain more. We have urged officers often enough to send in their services.

H.R.H. the Duke of Cambridge dined with the members of the New United Service Club (8 Park Place, S.W.), at their annual dinner, on the 26th ult. Among those present were the Marquis of Londonderry, Earl Redesdale, Viscount Cranbrook, Viscount Melgund, Gens. Sir E. Whitmore, Sir C. H. Brownlow, Sir Seymour Blane, Bart., and Harman. The band of the Middlesex Yeomanry played during dinner.

Reviews.

The Cornhill Magazine. (Smith and Elder.)—The first number under new arrangements of a magazine which was for many years—those palmy years so fondly remembered—regarded as the *beau idéal* of periodical literature, is now published. Of late, the *Cornhill Magazine* lost much of its popularity, and many of its old retainers "fought shy' of it. Those who provided the articles seemed to have altogether mistaken the taste, or call it fancy, of the public. They were frequently stupid as well as prosy, and the publication showed symptoms of a lingering decline. However, we are glad to see that another bold bid for popularity is now submitted to the reading public, who are to judge not hastily, but impartially as to its merits. The opening chapters in the July number, though few, afford pleasant reading. The place of honour is preserved for the already popular author of an extravaganza called "Vice Versâ," which in all probability will charm the public as much as "The Black Poodle," and other stories, by the same author. The serial now contributed claims an imposing title, "The Giant's Robe," and relates very pleasantly the sayings and doings of some not very interesting characters. The more experienced critic will, no doubt, discover the existence of some occult features which are sufficient to cause him to regard the opening chapters as the sure forerunners of an important work of fiction. It may be, or it may not be; we shall see. The author of "The Giant's Robe" has already caused novel-readers some little excitement. In fact, at this very early period, a most important incident, on which, no doubt, the main interest of the story will circle, has been made manifest—a startling, though, by no means, a novel one; possibly, the author, confident in his own strength, displays his cards more freely than others would do. This may be, but, no doubt, he has made it most clear that the manuscript novel, written by one of the heroes of the tale, and entrusted with such confidence to the other, will take a prominent part in the future of the story. The only other article we have looked at is "The Lay-figure;" and, indeed, it is a very wonderful story—one which must have cost the author many trying moments, in endeavouring to keep up its interest without faltering.

Amusements.

At the ROYAL ITALIAN OPERA, "Il Trovatore" was repeated on Monday, for the farewell performance of Madame Pauline, who is shortly to appear in New York. "Faust" was given on Tuesday, with Madame Albani as Margherita; "La Gazza Ladra" was produced on Thursday, with Madame Patti as Ninetta; "Aïda" was represented for the last time on Friday, and this evening (Saturday) is associated with "Le Prophète," Madame Scalchi being Fides and Signor Mierzwinsky John of Leyden. The season will terminate on July 21.

The French performances at the GAIETY have this week had the enlivening influence of Madame Chaumont in the familiar pieces of "Divorçons" and "La Cigale." Next week Madame Sarah Bernhardt will appear and give nine performances in six days. The stalls have long since been booked in advance, and seats are now at a premium.

This week the OLYMPIC THEATRE has been occupied by Mr. Frank Harvey and the "Beatrice Comedy Company," who have appeared in the four-act drama called "The Wages of Sin." The drama is a forcible one, and the acting throughout is excellent.

At the GLOBE has been revived Mr. Buckstone's drama of "The Flowers of the Forest," with Miss Harriet Jay as the boy-murderer Lemuel, Miss Ada Murray as Cynthia, Mr. Charles Kelly as Ishmael, and Mr. Percy Bell and Mr. H. E. Russell as Cheap Jack and the Kinchin, formerly associated with Mr. Edward Wright and Mr. Paul Bedford. Miss Clara Jecks played with notable spirit and deep feeling the part of Starlight Bess, first acted by Mrs. Fitzwilliam.

At the LYCEUM, Mr. Henry Irving has repeated, at a morning performance, his admirable impersonation of the King in Mr. Wills's poetic play of "Charles the First," with Miss Ellen Terry, for the first time, as Queen Henrietta.

"Youth," at DRURY LANE, will be presented for the last time on Saturday, July 14, when the rehearsals will commence for the new drama by Mr. George Fawcett Rowe and Mr. Augustus Harris, to be produced on Aug. 4.

The season at the PRINCESS'S THEATRE will terminate on Saturday night, July 14, when the drama of "The Silver King" will be represented for the 204th time. The theatre will be reopened under the same management on August 18.

With this week Mr. J. L. Toole brings his prosperous season to a close, and he will not reappear in London till December. A day and night representation was given on Thursday in association with the manager's benefit, when the old comedy of "Sweethearts and Wives" was revived. The first act of "Richard the Third" was also given, with Mr. Henry Irving as the Duke of Gloster and Miss Ellen Terry as Lady Anne.

The GRAND THEATRE, at Islington, will be opened by Messrs. Holt and Wilmot on the next Bank Holiday, with a new drama called "The Bright Future."

According to a Parliamentary Return, there was at the end of 1882-1883, work remaining in hand for the Navy, chiefly guns and carriages, in an incomplete state to the value of £101,000, provided for in the Army Estimates.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has always proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto.

Printed and Published for the Proprietors, at the Office, No. 16 Wellington Street, Strand, London.—SATURDAY, July 7, 1883. Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD.

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,225.—Vol. XXIV.]

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer, 248 Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

LORD WEMYSS is essentially a sound man,—he has this great merit, he never does things by halves. The Volunteer Force of to-day is a lasting monument to his zeal and devotion. He has worked for years to promote the true interests of the country, and he has received his reward. It must be to him a source of no small satisfaction to know that the magnificent Citizen Army, an institution that has fought against almost insurmountable difficulties until it has attained the position it now occupies, has been developed in a large measure under his fostering care. A man who has accomplished what Lord Wemyss has done cannot but be regarded as a pillar in the State. He has pinned his colours to the mast, and laboured conscientiously with one object in view,—the good of his country. When such a man speaks, it is fitting and right that he should be heard. His lordship spoke in the House of Lords on Monday last, and the subject of his remarks on that occasion was the state of the Militia. His speech was full of that sound sense and solid reasoning which give force to his utterances on all matters relating to the Army. He started by showing how seriously short-sighted the country is, how apt it is to close its eyes to facts, and how fraught with danger the position is in which it now finds itself placed. He was convinced, the noble Earl remarked, that nothing but a national disaster would cause Parliament or the nation to bestow adequate attention to Army. No one who has watched the progress of Army reform during the last few years can deny the truth of this assertion. The country takes no real interest in its Army and Navy. It knows that it grants large sums annually to be expended in maintaining those services in a proper condition of fitness, but whether that money is laid out to advantage, it never troubles itself to inquire. Lord Wemyss drew attention to the partial disaster suffered by our troops at Isandlwana, Maiwand, and Amajuba Hill. "But," he contended, "these reverses were not such as from their magnitude would go to the heart of the nation." His lordship might have added that it was easy for those in office to find scapegoats, if they did. "The King can do no wrong." Certain it is that so far as Army administration is concerned, the responsible officials at the War Office imagine themselves blessed with that infallibility of character which marks the actions of "the King." If young soldiers are sent on service, as they were sent to the Cape, imperfectly trained and thoroughly undisciplined, and they break down under the strain which is put upon them, a strain which, from their youth and immaturity, they are quite unable to bear, excuses must be found. "How is this?" the nation asks. "We have been paying a man's wage. Have we been paying it to boys only?" It would never do to allow the truth to be known. Search, therefore, is made for a scapegoat, and one is soon found in the General in command. If anything goes wrong, he is the man who must bear the onus. It is to this one-sided and most unfair arrangement that Lord Wemyss objects; and in condemning, as he does, the apathy of his fellow-countrymen, he has performed a most useful public service. If evidence were wanting to show the serious dangers of the position, this is furnished in the statistics produced by Lord Wemyss, in support of his motion for an increase of the Militia and Militia Reserve. What is the state of the Militia to-day? Lord Wemyss went carefully into figures. At the present moment the establishment is 128,000, but there are only enrolled 104,000; therefore, 23,000 odd are necessary to complete the full strength. If we deduct those under nineteen years of age, 15,904; those who have been struck off or have been absent, 6,942; and the Militia Reserves of the Army, 26,692, we have 54,556. It is further necessary to deduct one-fifth for casuals, so that the total of the Militia on whom we could rely for service is 43,960 men. We hold with Lord Wemyss that this is not a satisfactory state of affairs. When attention has been drawn to the condition of Army recruiting, and the failure of short service to supply us with a proper Reserve, it has more than once been contended that we had a strong and efficient reserve in the Militia, which in time of emergency could be utilised to any extent. After all, the "strong and efficient Reserve," though understood to be maintained at a maximum establishment of 128,000 men, is, in reality, only a third of that number. The British taxpayer cannot fail to be impressed when he reflects, if ever he takes the trouble to do so, by the failure of the reformers to redeem any one of their promises. The reason that has been given for all the mashing-up of regiments and general topsy-turveydom that has been going on these last few years has been a desire to level-up the Militia. Of what has this levelling-up consisted? In a change of name and a change of uniform,—a change of name and a change of uniform only. So far as numbers are concerned, the Force stands in a worse position than before. And it has been for this that the feelings of soldiers have been wounded; that regimental traditions have been laid in the dust; that so much has been sacrificed! We agree with Lord Wemyss, "looking over the general state of the Army, the Militia is the only thing on which we can congratulate ourselves." No one who has ever been associated with Militia regiments can have failed to be struck by the earnestness with which the officers and men carry out their duties. Yet valuable as the material is, it is, as at present organised, little better than a plant running to seed. That it has a strong root, its past history furnishes sufficient proof; but the strongest root will in time lose its vitality, if the stem and branches are totally neglected. The Militia, great as its claims are, has not as a service received that care and attention which it well merits. It has wanted bread, and it has been given a stone. The War Office has taken credit to itself for having carried through the Territorial System. But has that system benefited the Militia? Not in the slightest degree. To be sure, the change has pleased the vanity of a few men, who consider that their military status has been raised,—the men who join a service for swagger sake, and who have no ideas beyond pipe-clay and buttons. To the Militia itself, the new system has been, as we expected, a doubtful blessing. The Force is no more effective now than it was two years ago; it is no stronger, it is not so strong. In fact, it has not gained anything but a position which is, to say the least, anomalous. It still carries an obsolete rifle, has an equipment which did service a quarter of a century ago, and great-coats which have become rotten with age. Of transport, it has none; it has not even a medical organisation worthy of the name. Indeed, its condition is deplorable. And yet it is perfectly true, as Lord Wemyss observed, that it is about the only part of our Military organisation on which we can congratulate ourselves. Why? Because it is the only one which fulfils its conditions to any appreciable extent. The reflection is anything but comforting, and the nation may well feel anxious whilst its interests are being sacrificed to such an alarming extent. Whilst sympathising with the Militia, we cannot, however, altogether exonerate from blame those representatives who have been content to stand by and allow matters to come to such a pass. We have but to look to the Volunteer Force to see what fixed determination will do. But for men like Lord Wemyss, the Volunteer movement would have sickened and died in its infancy, a victim to official neglect. Those who enrolled themselves in its ranks—many of them Militia officers past and present, be it remembered—were bent upon establishing the movement on a firm basis, and they did. They would never have succeeded, had it not been that they would not allow themselves to stand still. What the Militia is suffering from now is a want of cohesion among its officers. A great mistake was made in 1881, when the service permitted itself to be carried away by the shadow. What it should have asked for, nay, demanded, was the substance. Gold lace and territorial titles may be all very well in their way, but they do not supply the place of the greater requirements which are being so keenly felt. Depend upon it, if men are properly equipped and properly organised, they will fight just as well with silver buttons on their tunics as with gilt. The Militia was satisfied with the concession that was made to it by Mr. Childers. Those who looked on and watched the game, saw the trick that was being played; it was a trick, and nothing more. Lord Wemyss has lifted his hammer judiciously, and brought it down with effect on the head of the right nail. Monday's debate was an eminently satisfactory one, and will do much, we believe, to call public attention to a matter which has been far too much neglected. His lordship has constituted himself the champion of the Militia service. We would recommend all Militia officers who are interested in the well-being of the service with which they are identified, to rally round his standard. They know what he has done for a junior service; they have read his speech of Monday last. He has shown beyond doubt that he has mastered his subject. It rests with the service he has befriended to say whether the agitation shall be continued or not. For our own part, we trust that it may, and we know no man better qualified than Lord Wemyss to lead the attack.

THE innumerable changes which have taken place in the organisation of the British Army under the general head of "Reform" have called forth the opinions of many distinguished officers, the latest being those of General Sir Lintorn Simmons, G.C.B., who has written an article in this month's number of the *Nineteenth Century* on "The Critical Condition of the Army." The writer commences with an examination of the principles on which the Armies of the great Continental nations are levied and maintained. He then shows the evil effects of conscription upon the population, as compared with the voluntary system of enlistment still in vogue in England, and draws the conclusion that compulsory service would be altogether incompatible with the requirements of India and the Colonies. This appears to be so far recognised by France that she is now contemplating the formation of a small Colonial Army on the voluntary principle. Speaking of the defence of the United Kingdom of Great Britain, and of the Greater Britain beyond the seas, he treats his subject much in the same spirit as that adopted by Captain Colomb in his lecture at the Royal United Service Institution, on the Royal Marine Corps, some months ago, viz., "that the first and most important means to this end is undoubtedly the Navy, which to be effective must have its operations based upon coaling and refitting stations in all parts of the world;" and that these should be "secured by defences, and protected by adequate garrisons, without which our squadrons might some day find themselves deprived of the means of locomotion, and become therefore powerless." The inference drawn is that the Army is "required for the defence of our home shores and of our coaling and refitting stations abroad," as well as for the protection of British interests, &c., in India, South Africa, and elsewhere. To meet this, the General argues that the strength of our Army is marvellously small, and totally inadequate for the defence not only of our numerous possessions, but even of the few important positions which it is necessary to maintain as coaling and refitting stations for the Fleet. The writer justly says that the "question of the efficiency of the Army is not one of party, but of interest to all alike, high and low, rich and poor, Radical or Tory, and is one which the country ought to insist upon having solved in such a way as will leave no doubt that it has its money's worth for what it expends upon its Military organisation." This is good and sound argument, but has there not of late years been imbued into the minds of whatever party has held the reins of government such stringent ideas of economy at any price, in order to satisfy the public, that there has been cutting-down where there should have been building-up, and that in order to keep a few thousands out of the Estimates the services have suffered materially? The result of such economy has been that when troops were suddenly called to active employment, an undue pressure was felt, and large supplementary votes required. The writer points out how that for the conduct of the recent small wars in Abyssinia, Zululand, or Egypt, a lavish expenditure was called for, in consequence of the previous inefficient state of the Army in general, much of which would have been avoided under a sound administration; and that even that lavish expenditure did not gain the desired end, inasmuch as, after the departure of the expeditions, "what remained behind was an almost disorganised mass, which it would defy human ingenuity to get into good working order for action within any reasonable limit of time during which a war now-a-days is likely to last." Battalions remaining at home were "skeletons during the Zulu and Egyptian Wars, and totally inadequate for the purpose of training either officers or men, and unfit to receive and assimilate the men of the Reserve sent to complete them in numbers." Batteries of Artillery "were in the most lamentable state, broken up and reduced both in men and horses, so that many of them could scarcely have put a single gun in the field; the Cavalry, not having been called upon to send so many men abroad as the other arms of the service, were perhaps not in quite so unfortunate a condition, but it may be confidently asserted that the whole Army at home, after the departure of the expedition to Egypt, was in a lamentable condition." Added to this, "Men are daily quitting the ranks on completion of their Army service, and are returning to civil life as Reserve men, so utterly dissatisfied that they will not accept the bribes that have been offered them in the shape of bounty to continue with the colours, and shiploads of men return from India, while the Government have not the means of replacing them, so that the Army in India will be fearfully reduced. Many battalions of Infantry are so weak that the commanding officers' parades, which all hands are required to attend, are frequently not equal to the strength of a good company." As a natural consequence of the excessive duties entailed upon the rest, "the men are dissatisfied, the young soldiers by thousands yearly purchase their discharge, or desert, while many break down under training and return to their homes without pension, to drag out a miserable existence and earn their living as best they can as invalids." From general annual returns presented to Parliament during the last ten years, "150,000 men have quitted the ranks of the Army, who, almost to a man, will give it a bad character, and whose testimony would act as a powerful check to the blandishments of the recruiter." Under these circumstances, the Army will be depleted more and more every year, unless strong measures are taken to stop it. One of the causes of this depletion appears to be a want of confidence in the stability of regulations, which are constantly being altered or interpreted to the detriment of the soldier. The General concludes by urging that "the outflow of men from the Army must be stopped without delay, not merely by temporary measures, such as have been adopted, but by endeavouring to make men contented in and with the service, and thus prevent the waste which is ruining the Army, by scattering broadcast over the country a dissatisfied body of men who, almost without exception, operate against the recruiter." "If nothing be done in this direction, and the country becomes more saturated with these discontented men, it may be impossible to recover lost ground, and to keep up our Army by voluntary enlistment; and the cry of some that we must have forced service and conscription will have to be considered, if we are to have an Army at all commensurate with the great responsibilities we have assumed in all parts of the world,—the protection of our commerce, and the maintenance of our integrity as a great Power." This is not a very encouraging picture of the efficiency of the Army, for the British public to contemplate; and if there is any patriotism left in the country, constituents will urge their representatives in Parliament to take such steps as will remedy the evil, without cavilling at the cost.

THERE is no man in England better qualified than Mr. John Furley to offer an opinion on the subject of arrangements for sick and wounded in war; none who knows better than he how much of the privations and hardships undergone by those who take part in military operations are in their nature unavoidable, how much dependent upon or aggravated by inexperience or direct mismanagement. When, therefore, Mr. Furley protests, as he has recently done in these columns, against the calumnies, perversions of truth, and exaggerations in connection with the working of the Medical Department in Egypt, it is right and fair that the views to which he gives expression should receive that degree of consideration to which, beyond all doubt, those of so high an authority are entitled. Let us briefly summarise what he says on this subject. He says, in effect, that by means of accusations, made on no better authority than hearsay and unsupported evidence, a scapegoat has been made of an able, active, and heretofore efficient officer; that the individuals who were loudest in their complaints were men to whom the experiences of actual war were absolutely new, and no doubt strange in their very novelty; that men who showed themselves so little capable of bearing up against, and making the best of circumstances, were made of very different materials from those, for example, who stemmed the Mutiny in India, and "roughed" it in camp through all weathers and seasons, in some instances for nearly two consecutive years. Well may Mr. Furley add, "Let it not be imagined that we can make war a holiday pageant, or that military hospitals during a campaign, even under the best conditions, can ever be brought to the level of those civil establishments which we have in London and other large towns." But the fact is, either the physique as well as morale of our soldiers and their officers have lamentably degenerated since "men with muskets" and "boy soldiers" have taken the place of the veterans of former days, or what between sanitation, education, "reorganisation," and several other "ations," the endurance and patience which once upon a time characterised the British soldier seems, like "the red man" before the advance of "civilisation," to have disappeared. It is no doubt right and proper to train the officer and educate the soldier to the highest possible degree, bearing in mind the particular purpose they have severally to perform. In time of war their work must be of the roughest, and therefore, whatever other "education" they receive than is directed to that end, becomes like so much "matter in the wrong place." The Chinese have a proverb to the effect that "the axe does not require the razor's edge." Perhaps if there had been more of the former and less of the latter in Egypt lately, there would have been fewer non-effectives sent home and fewer complaints because the comforts and luxuries of English barracks and London clubs were not readily obtainable during the few weeks the campaign lasted.

THE evidence given before the *Lively* Court-martial, and the finding of that tribunal, continue to occupy a large share of the attention not only of the service, but of the public generally. We have already referred to the capricious ingenuity displayed by the Admiralty in the construction and interpretation of the Queen's Regulations. The proper exercise of these judicial functions is a matter of such serious importance to the service, that it becomes unnecessary to plead any excuse for again referring to the subject. It is essential to the maintenance of the discipline, no less than to the preservation of the morale of the Navy, that there should be no uncertainty or doubt as to what is expected from officers and men, and that the duties they are called upon to discharge should be clearly and explicitly defined. It is surely a dangerous and mischievous result if we find that officers of Her Majesty's Navy, when called upon to act up to their instructions, deem it not only wise, but essential for their own protection, to consult rather the idiosyncrasies of the Lords of the Admiralty than the evident meaning of the language made use of in the printed Instructions. If the Queen's Regulations do not meet any particular case, or supply clear and unequivocal guidance to an officer under any particular circumstances, it would be only fair to the officers of the Navy that those regulations should be amended, or at least supplemented by a binding and authoritative interpretation which should form a precedent in future cases. The Admiralty, however, for their own reasons, prefer that a certain latitude and even positive inconsistency should exist in the Instructions, rather than that they should be deprived of a power which gives them, or court-martials under their direction, equal facility to acquit or condemn, as expediency or any other motive may dictate. According to the Instructions, Navigating Officers are only to assume charge or command, or participate in duties other than those appertaining to the navigation of the ship, at the discretion of the Captain. In the present instance, the Captain did use his discretion, and by detailing Lieutenant Mills for watch-keeping duties, relieved him of the duties for which he was specially appointed to the ship. By so doing, Commander Parr clearly manifested that, in his opinion, the appointment of a special pilot by the Admiralty, superseded, so to speak, the navigating officer of the ship, and left that officer free to perform other duties. Lieutenant Mills was appointed "for navigating duties." By the Queen's Regulations, officers "appointed additional for special service" "are never to assume any other charge or command except that which may appertain to the special or particular service for which they are borne, unless they receive from the Admiralty, or from the officer in command of a foreign station, express authority to the contrary." Now, it is a common practice for such officers, as well as for those appointed "for navigating duties," to be ordered to keep watch, the officers appointed for "special service" being so detailed in the teeth of this direction to the contrary. Lieutenant Mills was ordered to keep watch, on how many occasions we are not informed. This officer was anxious that his seniors should not incur blame on this account, and explained that, except on rare occasions, the little watch-keeping he had to do did not interfere with the performance of his navigating duties. But what we desire to point out is that an officer under either of these circumstances is practically powerless, and may be ordered to do double duty, in spite of the Queen's Regulations. In the event of his protesting, he will run the risk of being reprimanded, for the Lords of the Admiralty do not favour complaints of junior officers as to the conduct of their seniors. So well known and appreciated is this "unwritten law" in the service, that, however well-grounded a complaint, a junior officer will rather submit to injustice than incur the risk of being reprimanded by the Admiralty for forcing them to censure his commanding officer. Their Lordships should deal out justice to the officers of the Navy, without fear or favour. But here is one notoriously frequent and habitual breach of the Queen's Regulations which they find it convenient to wink at, whilst greater evils follow in its wake, and lesser offences are visited with speedy punishment. The Captain and the Navigating Officer are bound to attend particularly to the conduct of the Pilot, and if either shall have reason to believe the pilot not qualified to conduct the ship, or that he is running her into danger, the captain is to remove him from charge. If the ship be at any time damaged through the ignorance or negligence of a pilot, when a common degree of attention on the part of the Captain or Navigating Officer would have prevented the disaster, those officers will be deemed to have neglected their duties. The precise degree of attention required from these officers under ordinary circumstances is not very accurately defined, but it is clear that in some minor details they did not follow the letter of the Instructions. The reason is not far to seek. The pilot was specially appointed by the Admiralty to take charge of the ship, and no doubt the officers felt that they were in some degree deprived by this step of the power to exercise that judgment in the selection and control of the pilot which they would otherwise have felt themselves bound to observe; but it cannot for a moment be pretended that these officers did not pay a "common degree of attention" to the conduct of the pilot. The evidence is clear, as we have already pointed out, that the conduct of the pilot was very carefully watched by the officers, who had every reason to believe that he was discharging his duty in a careful and proper manner. The Captain and Navigating Lieutenant were, however, not free agents; their discretion was fettered, and, granting "a common degree of attention" on their part to the behaviour of the pilot, these officers would hardly presume to conclude that a pilot specially appointed by the Admiralty "was not qualified to conduct the ship." They were not asked, nor were they permitted to exercise their judgment in the selection of the pilot. He was appointed by the Admiralty, in opposition to the expressed opinion of the Navigating Officer, and the responsibility for his selection and qualifications rested with those who appointed him. Considerations such as these may, we trust, have some weight with the Admiralty, should the severity of the sentence of the Court-martial be modified, as it is to be hoped it will be. The Queen's Regulations do not contemplate a responsibility on the part of the officers of a ship for the acts of any person, or body of persons, over whom they possess no control. They are only bound to accept responsibility for their own acts, and the exercise of their own judgment; and if it is intended by the Admiralty to continue the system of appointing special pilots without consulting the officers of the ship, Regulations for the conduct of the officers under such circumstances should be made which relieve them from the difficult and embarrassing position in which they are otherwise placed.

"I CAN assure the noble Viscount, and your Lordships generally, that the Board are always ready to listen to any reasonable representations praying for the amelioration of their position, which they may receive from officers of any branch of the service, provided that such representations are made in accordance with the rules of the service." These are the words of Lord Alcester, in replying to a recent question put by Viscount Sidmouth to the First Lord of the Admiralty respecting the statements set forth by the Warrant Officers of the Navy in a pamphlet lately promulgated by that body. The irony underlying these words may not have been apparent to the assembled Peers, but it certainly must have been so to every officer and man in the Navy under whose observation the reply of the noble lord has passed. If it were possible to suppose that there was such a word as "subterfuge" in the vocabulary of the Peerage, such a word might be aptly applied to the reply given to the noble Viscount. Where, we would ask, are the regulations to be found under which representations can be made to the Admiralty, or their Lordships be approached by any body of officers? What proceeding could not be officially interpreted to mean combination? How, for instance, could the Warrant Officers approach the Admiralty with the statements contained in their pamphlet, or prove to the Board that it was not anonymous? The extract from the Queen's Regulations read by Lord Alcester in his reply to Viscount Sidmouth's most pertinent question on Tuesday last, shows that there is no possible way left open to officers of making "representations in accordance with the rules of the service." To prove unanimity—and this is the point of alleged doubt expressed first by Mr. Campbell-Bannerman, in his answer in the House of Commons to Sir H. Drummond Wolff, and secondly by Lord Alcester—appears to be necessary, for the Admiralty to look into the case. Supposing the warrant officers of each ship in the Fleet were to take a manuscript statement of their representations to their respective Captains, with a request that it might be forwarded through the several Commanders-in-Chief to the Admiralty, would the officers so acting not be reprimanded for combining to bring about alterations in existing rules and regulations, and would not their act be held all-sufficient to refuse their request? Let any officer or man in the Navy answer this question according to his service experience, and he must say that it would be as we state. Supposing, again, that half-a-dozen warrant Officers in as many ships had "belled the cat," would they not be told that their representations could not be accepted as the unanimous utterances of their whole body, and would they not thenceforth be marked men? Lord Alcester, in speaking of the pamphlet, which we know expresses the unanimous feeling of the Warrant Officers of the Navy, said that the members of the Board of Admiralty could not believe "that it [the pamphlet] is what it professes to be, inasmuch as the Warrant Officers of the Navy are far too well disciplined and acquainted with the Queen's Regulations not to be aware that such combinations are prohibited." When about 900 "well-disciplined" officers feel themselves compelled in self-support to urge their legitimate claims in the manner the Warrant Officers have done, because there is no other medium of communicating their unanimous views to the authorities open to them, it may be accepted as a convincing proof that there is something radically wrong somewhere, and that the righteousness of their case is felt by them—as it cannot but be by the public generally—to justify their act. The Board of Admiralty may find it convenient to don the cloak of official disbelief regarding this pamphlet and its unanimous appeal; but its unanimity remains a fact. And now, what do the Warrant Officers ask? Simply to be permitted to be considered as a class, with other ranks of the service, more especially in being granted compassionate allowances to their orphans. A small additional sum to be added to the pensions of their widows, according to their own length of service, so that the widow of an officer who has served, say, twenty years, may receive a larger pension than the widow of an officer who has only served one year, as at present seniority does not count. An increase of pay, according to length of service, the highest rate now attainable being only £150 a year. That store allowance should be granted more in accordance with the class of the ship and the value of the stores on board, instead of the existing rate of 6d. per diem for all vessels, from the sloop to the first-class ironclad. A slight addition to their uniform, according to their seniority in the service. A defined relative rank with the Army. In their own service, a Warrant Officer ranks next after Sub-Lieutenants, and Sub-Lieutenants rank with Lieutenants in the Army; but the Warrant Officer has no defined relative rank, and recent alterations in the sister-service render such rank more than ever desirable. The question of retirement is also temperately brought forward, and a small increase proportionate to length of service is solicited. Finally, on retirement as Chiefs, the honorary rank of Lieutenant is also solicited, and considering the many openings in the Army to the non-commissioned ranks, which on retirement carry with them the honorary rank of Captain, Major, and Lieutenant-Colonel, Chief Gunners, Boatswains, and Carpenters, who are, in reality, commissioned officers, are hardly asking too great a concession when they ask for the honorary rank of Lieutenant on retirement. These are the salient points of the statements in the pamphlet referred to by Viscount Sidmouth in his question to Lord Northbrook, and to which Lord Alcester replied by quoting a paragraph in the Queen's Regulations and Admiralty Instructions, which lays down a rule no officer dare follow, the "unwritten law" of the Admiralty effectually deterring him from so doing.

The Naval service will read with gratification the remarks of Lord Northbrook on the popularity of her Majesty's Navy in the Australian Colonies, and the cordial reception accorded her Majesty's ships at all places visited by them. We feel convinced that such a desirable state of things is mainly attributable to the good offices of Commodore James Erskine, A.D.C., whose urbanity to all classes and desire to encourage good feeling between colonial communities and his officers, has been marked with success since he assumed command of the station.

The First Lord of the Admiralty might have spared the Upper House any reference to the generous gift of a vessel-of-war to the colony of New South Wales. The majority of our readers are probably aware that the *Wolverine* was nearly "played out" at the time she was turned over to the colonials, and would have only contributed to the firewood and "scrap heap" of the dockyard had she returned to England. Possibly the recipients of this valuable present do not like to complain that she is not all they expected her to be, but the people of New South Wales admit that they possess a "white elephant."

The melancholy death of the Duke of Marlborough has prevented the question regarding the court-martial on the officers of the *Lively*, of which the deceased nobleman had given notice, from being put; but we understand either Lord Salisbury or Lord Sidmouth will take the matter in hand, with a view of bringing about a discontinuance of those practices which obtain to such a large extent at the Admiralty, whereby the Queen's Regulations are made to remain a dead letter whenever it suits the whim of our Naval rulers to assert their own unwritten law, a mixture of custom and caprice not easily definable.

The holiday-makers at Portsmouth were again unfortunate on Thursday, when the annual dockyard regatta was held in pouring rain. The promoters of this exceedingly well-arranged affair—which has become quite an event now-a-days, and has entirely superseded the Southsea regatta—deserve better success than has attended their efforts, the wind having to a great extent spoilt the sport on two previous occasions, while on Thursday it was impossible either to compete in or witness the events, save at the cost of a severe soaking. There were, nevertheless, some good contests, both in the sailing and pulling races, the latter being confined almost entirely to the harbour. In the dockyard there is but little of interest going on. The *Jumna*, the *Warrior*, dismasted, and a couple of small craft are alongside the jetties; the *Polyphemus* still remains a tenant of No. 10 Dock; the *Enchantress* is undocked and in the ship basin. The occupants of the old steam basin remain unchanged, both in position and outward appearances, but there are a good many hands on the *Cordelia*. The vessels on the stocks make tolerable progress, but the *Edinburgh* is still almost deserted, waiting, apparently until the *Colossus* can be undocked to make room for her. The *Dreadnought* is in again from her trials, and occupies her accustomed corner; the removal from her sides of the booms for the torpedo nets would seem to indicate that, as the result of recent trials, some other fitting has been adopted.

The following officers, having completed their course at Greenwich, have joined the *Vernon* for torpedo instruction:—Acting Sub-Lieutenants F. C. Pasco, F. C. Jones, A. G. Cawston, A. H. Christian, H. S. Boldero, and A. H. Limpus.

There appears to be great difficulty in obtaining suitable men to act as Marine servants afloat. For some time past volunteers have been called for from the harbour ships on the occasion of any vessel being commissioned, and these are now apparently exhausted at one, at least, of the home ports. Are Marines of good character more rare than formerly? And if not, what is the cause of the dearth? Some explanation should be possible. Is it that commanding officers consider that officers' servants should not be "excused idlers," but should be turned up on all possible occasions, and also made to mount guard in small ships?

Admiral Sir Cooper Key will be unavoidably absent from the dinner given by the Navy Club to the First Lord of the Admiralty on Wednesday next, the 18th inst., as he will be at Dartmouth inspecting the *Britannia*, and distributing the prizes to the cadets at the conclusion of the term.

The report on Admiralty surveys for 1882 has just been issued. Exclusive of the *Alert*, which was paid off in September, 1882, 76 officers of all ranks and 582 men were employed on the service. The principal work at home has been at Milford Haven, on the Lancashire coast, at the entrance to the River Ribble, approaches to Cowes, edge of Maplin Sands, inside Alderney Breakwater, Wexford Harbour and the off-lying banks, and Kingstown Harbour. Abroad, North and South America. The survey of the part of the Little Bahama Bank between Elbow Cay Lighthouse and Pensacola Cay is nearly complete, as is the northern portion of Fortune Bay, Newfoundland. The entrance to Rio de la Plata, English Bank and its extreme shoal ground, and Archimedes Bank have been defined; also the anchorage at Flores Island, near Monte Video, and of Maldonado Bay. The work in Magellan Straits was in active progress. In Africa, the southern portion of the Red Sea has been surveyed; in Delagoa Bay, search was made for the Natal and Assyria Shoals, but without success. The former has been removed from the chart. Coast line of Elephant Island, with north part of Inyack Island, with Danae Reef in offing, was examined; also the Seychelles and the Amirante and Glorioso groups of islands. In Western Australia, the work done includes the coast-line between Champion Bay and Cape Leeuween; in track of vessels between Fremantle and Champion Bay, the Turtle Dove Shoal was examined and position of Pelsart Bay; near Cape Leeuween, the formidable Rambler Reef was searched for, and its non-existence proved; also Beaver Reef, 60 miles west of Swan River. The mouth of Gascoigne River and its anchorage was also surveyed. In China, on the Corean coast, the approaches to Salée River, through a labyrinth of islands, the south-east coast of Kiusiu, east coast of Nipon, and south coast of Korea peninsula, from Fusan to Herschel Island, some 90 miles was examined, with Douglas and Ashby inlets surveyed in detail. The Fiji and Solomon Islands survey and the west coast of Hindostan between Malwan and Vingola and the Chittagong River, were also proceeded with.

Steps are being taken by the Corps of Royal Marines to insure proper care being taken of the graves of their comrades who were killed in action or who died of wounds or disease during the campaign in Egypt, and officers, non-commissioned officers and men are subscribing with a view to the erection of memorial-stones, bearing the names of those who perished while serving in Egypt, and who were buried either at Cairo, Alexandria, or Tel-el-Kebir. Several Line regiments are also making a similar move, so that the burial-places of those English soldiers who fell in Egypt will not be lost sight of.

Earl Granville stated on Thursday last that he had received authoritative information that there was no truth in the report that the French flag had been planted on the New Hebrides, and that both her Majesty's Government and the Government of France acknowledged in full the obligations which an agreement with respect to non-interference imposed upon them. It appears that the agreement referred to was effected in 1878, therefore if its integrity is maintained by both Governments, the annexation of the group by this country, as suggested by the Australian Colonies, would be materially affected.

The Under-Secretary for Foreign Affairs stated on Monday last, in reply to Mr. Onslow, that he was unable at present to make a statement as to the position of the negotiations between H.M.'s Government and that of Portugal regarding the River Congo, or whether there was any probability of a treaty being agreed to. Possibly the attitude of the King of Dahomey has slightly complicated matters, or our Government may forego their wishes regarding Whydah, and when the subject has quieted down, and opportunity for questioning it lapsed by the closing of Parliament, Portugal will possibly be allowed to take over the lower part of the Congo without any treaty obligations. The arduous task effected at the cost of much money and many valuable lives would thus be cast to the wind. The present Government, while ignoring the foreign policy of their predecessors in the Congo territory, appear to have no thought of the ill-effect of their present action in future administration, and the unenviable position in which Naval officers will be placed thereby.

Lord Henry Lennox will, on going into Committee of Supply on Navy Estimates, Vote 4, call attention to the condition of the Naval Reserves, and their present method of training.

Admiral Sir Geoffrey Phipps Hornby is exerting himself to his utmost to collect sufficient funds to erect a memorial window to the late Admiral John D. McCrea, in the Dockyard Chapel at Portsmouth. In drawing attention to the advertisement of Lieutenant Hegan, Flag Lieutenant to the Commander-in-Chief at Portsmouth, which appears in another column, we can but express a hope that all who knew the late Admiral-Superintendent, or who ever served under him, will at once respond to the call.

When the six-hours' full power trial of a newly commissioned ship is ordered to be made at the end of the usual Channel cruise, before proceeding on service, an engineer officer from the dockyard will not embark to watch and report on this trial, but an inspector of machinery or chief engineer from the Steam Reserve of the port at which the ship was fitted will perform the duty. This is throwing an entirely unnecessary expense upon the country.

A correspondent writes:—"Your Egyptian correspondent makes some unfavourable comment on the awarding of medals to civilians, specially alluding to Mr. Claude Routh as having done nothing to earn his medal. I have no hesitation in saying that Mr. Routh has right well earned the English medal for Egypt. He held the post of Attaché to Captain R. M. Blomfield, R.N., the Controller of the Port of Alexandria under the Railway and Port Administration. On June 11, the day of the massacre, he was in town with Captain Blomfield, during the riot and afterwards. He had his clothes torn off his back, he had to fight for his life, and was a good deal knocked about. From June 11 to July 9 or 10 he was actively engaged, under Captain Blomfield's orders, both on duty connected with the Port, and in the personal direction of the embarking of the refugees of all nationalities. This work he did most efficiently, and often at great personal risk. From the date of Colonel Tulloch's first visit to Egypt, Mr. Routh did much to assist that officer, at whose particular request Mr. Routh was on board the *Invincible* during the bombardment. Mr. Routh volunteered to land as a guide with the Naval party to spike the guns, but his services were not required. He subsequently landed with the Blue-jackets and Gatlings, to assist Captain Blomfield in guiding the parties through Alexandria. The Intelligence Department, under Sir F. Goldsmid, was established in Captain Blomfield's own house, at the Post Office. Mr. Routh was most active; from time to time he helped the Intelligence Department, and worked hard by night and by day, afloat and ashore, until the termination of the business. Lord Alcester had personal knowledge of Mr. Routh's good service, and was pleased to send in his name for the medal. Mr. Routh's willing and useful service was well known to Captain Molyneux, R.N., to Colonel Tulloch, and to many of the Naval officers."

Sensational headings, although referring to an individual, are often unpleasant to the class to which that individual belongs. For example, in the case of a petty officer in the Royal Navy who was recently convicted of theft from a comrade, a heading in large type has appeared in some of the daily papers. "A Quartermaster imprisoned for robbery." This is bad enough for the Quartermasters in the Navy who own the offender, but it is equally objectionable to a class of commissioned officers bearing the same title, *videlicet* the Quartermasters in the Army, to whom, from a glance at the heading alone, it might be inferred that the delinquent belonged. It is a pity that titles in the sister services should represent a different status in society; and, if there must be Quartermasters in the Navy, why not alter the appellation of those in the Army and Marines? The duties of Army Quartermasters are not dissimilar to those of a branch of the Commissariat Department, and why not therefore style them Regimental Commissaries; a step which would at once relieve them of the objectionable bracketing with a naval rank below even that of a warrant officer.

Although the Corregenda (Special) Royal Warrant of May 15 has conceded some of the demands for the redress of grievances existing in the Army Pay Department, there still exist many important points which should be granted, before the Department can be considered in a satisfactory condition as compared with other Departments of the Army. The following are the most urgent. 1. Staff Paymasters, after five years' service as such, to have the honorary rank of Lieutenant-Colonel. When the War Office sanctioned two ranks for each of the other grades in the Department, it was naturally anticipated that Staff Paymasters would also have two ranks. The Chaplains, Medical, Commissariat, and Ordnance Departments have all the rank for officers of similar service of position. From figures now before us, we find that the average service of Assistant-Commissaries-General in the Commissariat ranking with Lieutenant-Colonels is 26 years; of Assistant-Commissaries-General in the Ordnance, 29 years; and of Staff Paymasters, with five years' service in that grade, the average is over 30 years' service. Consequently, no objection could be made on the score of their age. The increase of expense would be a mere bagatelle, sixpence a day, being the difference in the lodging allowance (4s. *versus* 4s. 6d.) issued to a staff or departmental officer ranking as Major or Lieutenant-Colonel. 2. Paymasters who joined after July 1, 1881, to have the honorary rank of Major after seven instead of ten years' service as Paymasters, whatever may be the average length of service of combatant officers who join the Department in future,—it certainly is a most harsh distinction to draw the line of five *versus* ten years' service on July 1, 1881. For we find, on comparing the service of the last twenty who joined at the end of last year with those who were recently promoted Honorary Majors, that the former average only four months less than the latter. Hence, as a question of bare justice, and considering that the average promotion to field-rank now takes place after 16 to 17 years' service, all who joined the Department before April 1, this year, ought to attain the honorary rank of Major, after five years' service; and for those who join in future, seven years' departmental service might suffice. 3. Lodging, and fuel, and light allowances to be optional, as well as servant's allowance. The Royal Warrant of October, 1877, creating the Department, simply stated that "Officers of the Army Pay Department will be granted departmental allowances." All that the officers of the Department contend for is that they should be on all fours with other Departments in this respect, and up to now this has not been the case in many stations, notably in Ireland, where an officer who had shown great animosity to Paymasters, both abroad and in that country, took advantage of his position to deprive them of lodging allowance on every opportunity. It is unnecessary to particularise, his name is well known. The age clause has now removed him from the Active List, and the class of man he represented is gradually disappearing. 4. Forage for Chief Paymasters. If other heads of Departments on the Staff of General Officers commanding, who are never called upon to be mounted on duty, are granted the allowance in lieu of forage, there can be no possible reason for not sanctioning its issue to Chief Paymasters. 5. The immediate establishment of a corps of clerks, under the complete control of the officers of the Department, not liable to removal to another sphere, except for misconduct. 6. Matter for honours. For the recent and other campaigns, Departmental officers have been granted Military Orders of Knighthood. It is obvious that a Department composed almost wholly of old combatants ought to be honoured similarly to officers of the rest of the Army. 7. Extra-duty pay to be accorded to Paymasters when performing duties of Staff Paymasters, to make up in some measure for their increased responsibilities. 8. An officer of the Department in Pall Mall to superintend the *personnel*, under the Accountant-General. An impartial examination of the above will show that there is much yet to be done before the Army Pay Department can be considered to be established on a satisfactory footing.

The *Progrès Militaire*, in criticising the organisation of the Marine Infantry in France, says that, according to the present system, a reservist of Vesoul, in the event of a mobilisation, would have to go to Cherbourg for his effects, and then have to return to the east, "his point of concentration," say there and back, about 1,000 miles. The writer says that nothing has been changed since the Franco-German war, and that the same chaos exists to-day as in 1870. He then treats us to an anecdote which is interesting from more than one point of view. He says that on the occasion of the Egyptian difficulty, the Minister of Marine accepted the duty of guarding the Suez Canal, and formed a brigade, but the General who was to command this brigade was senior to the Rear-Admiral commanding the naval division. To remedy this a battalion was suppressed, and the force was placed under the orders of a Colonel. Then all the details were left to the Maritime Prefect of Toulon, and some battalions were provided with mules without canteens, and others with canteens without mules. And in fact, the *Progrès Militaire* brings a very long indictment against the authorities that be, showing that matters have not changed for the better since the fall of the Empire, on whose shoulders so many sins have been cast.

The President and Fellows of the Royal College of Surgeons in Ireland will, during the ensuing week, confer the honorary fellowship of their college on the Director-General of the Army Medical Department (Dr. Crawford) and on Sir James Hanbury, K.C.B., principal medical officer of the recent Egyptian Expedition.

There can be little doubt that the French disaster at Hanoi was more serious than at first represented, at least if one can judge from the number of officers killed and wounded. It seems that the enemy, consisting of Black and Yellow Flags, was more numerous than was thought, but the French, who have now been reinforced in Tonquin, will have little difficulty in dealing with those gentry, if they be left to their own devices. The French colonists in Cochin China recommend an immediate march upon Hua, which they declare to be the seat of the conspiracy which prevents them from founding their beneficent protectorate. The French, both in Cochin China and at home, seem very undecided as to the importance of the appointment of Li-Hung-Chang, which may mean a determination to resist French aggression *vi et armis*, or may be simply one of those vain threats upon which Chinamen often reckon in the hope of frightening an adversary.

Plans for the removal of the interior fortifications of Paris have been submitted to General Thibaudin by an eminent superior officer, and there is every probability that the French Chamber will also be asked to consider the scheme, in case the Bill recently brought forward by the Deputy Nadaud, but withdrawn in committee, should be taken up again by another Member. The proposal is said to be as simple as it is expensive. The present enceinte is to be levelled, but another one constructed in the periphery of the old forts. The new rampart would consequently include the suburbs of Vanve, Montrouge, Gentilly, Charenton, Saint-Maude, Romainville, Pantin, and the whole territory bounded by the Seine between Billancourt and Saint-Ouen. The scheme is one of the most extravagant ever evolved from the brain of a military officer. Independent of the heavy expense entailed by the construction of such an extensive enceinte, the large sums which would have to be expended by the military and octroi authorities in the purchase of ground and the erection of the necessary buildings contribute towards rendering the project impracticable.

General Thibaudin has informed the French Army Commission of his intention to propose in the new law of Conscription the reduction of the minimum height of recruits to 154 centimètres (5 ft.), in place of the height of 155 centimètres (5 ft. 0·45 in.), as proposed by the Commission. The War Minister gives as a reason for lowering the standard height that the change has become necessary owing to the proposed formation of the African and Colonial armies.

The French military journals are strongly advocating the adoption of a helmet for the French Infantry, in lieu of the képi. The *Avenir Militaire*, in a lengthy article, points out that a helmet will be no novelty in the French Army, as its infantry wore this headpiece under the Minister of War, St. Germain, in 1790, when the four-cornered hat had to give way to the helmet.

Since July 7, France possesses a new order of knighthood, intituled, "L'Ordre du Mérite Agricole." The cross is made of silver, enamelled green. The ribbon is of green watered silk, bordered with *amarante*. Knights of the Order are to wear their insignia on the left breast.

A very suggestive debate took place a few days ago in the French Chamber on the Tonquin affair, when M. Granet, a Radical, who is totally opposed to compulsory measures, asked for a little more light. He said that it was all very well to lay violent hands on a citadel which was not defended, and to seize on a country which offered no resistance; it was afterwards that difficulties arose, and if China did not actively oppose the French arms now, she would constantly excite troubles on the border. M. Granet was heartily opposed, not to genuine colonial enterprise of a commercial nature, but to the present system of military violence. M. Challemel-Lacour at first refused to state what force the French have in Tonquin, or what operations were contemplated; he afterwards said that there were plenty of troops, that instructions had been given for occupying merely the delta of Songkoi, and that China was not to be exasperated. There was to be no annexation, and negotiations with China were represented as satisfactory. If this be really the case, the French Government must have very recently changed its mind, for in the project for raising a colonial force, submitted a short while ago to the Chamber, we find Tonquinese and Annamite battalions figuring alongside of Senegalese battalions—so many companies, European officers, &c. According to one French military writer, the French force in Tonquin now amounts to 12,000 men, and the civil commissioner, under whose orders the expedition is placed, was lately a medico of the second class! During debate it was asserted that Commandant Rivière made his unfortunate sortie in compliance with orders received from home, and it was also pointed out that the *Siècle*, a paper managed by the President of the Chamber, had declared that if Commandant Rivière had not been killed, he would have been tried by court-martial. The *Spectateur Militaire*, in a first article on the Chinese Army, seems to us to make rather too light of the Celestials, who may have no more idea of glory than "he who was killed on Tuesday," but who are very stubborn, and very plentiful. After explaining the meaning and origin of the eight banners or divisions, the district system, how a man remains attached to his banner all his life, and how his son inherits his rights and his duties, &c., the writer sets down the Regular Army at 200,000 men, and the Militia at 650,000. From 10,000 to 20,000 Regulars, he says, are armed with breech-loaders of various patterns, and the Artillery has a few light field Krupps. There are 16 Generals-in-chief, 64 Generals, and 7,000 other officers, which would make about one officer per 90 men, if they existed anywhere but on paper. In fact, both M. Challemel-Lacour and the *Spectateur Militaire* for this month are of opinion that China is not in a position to fight the French in Tonquin and Annam. The *Avenir Militaire*, on its side, draws attention to the discussion going on in the American papers on the subject of privateering, and the refusal of the United States to adhere to the declaration of 1856, which declared privateering abolished. The fact of the Americans interfering in Madagascar and on the Congo, according permission to Naval officers to serve on board the Chinese fleet, and talking of preying on French commerce under Chinese colours, has raised a terrible storm in France, and has set the two Republics by the ears; so much so, that the French think of keeping the colossal statue of Liberty, which was offered some time ago to our cousins, who, we believe, were to pay for it. In addition to the above difficulties, now comes the insult to the British flag at Madagascar. And it was thought that the Republic would mean an era of peace and goodwill, and that France would give up disturbing the world, for a season.

ENLISTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Whether it is a Liberal or Conservative Government which is in power, it is about the same thing for Tommy Atkins. In Opposition it is another matter, and with only one-tenth part of the vigour shown in Opposition which is exhibited when in Office, the country would be materially the gainer. But still, there is one means of bringing a little gentle pressure to bear which might yield good fruit. Supposing at the next election the connections of soldiers gave their votes to that party which most improved their position. Other classes do so. I think it would have an appreciable result. Anyhow, it is worth testing. Demand and supply regulate everything, even to soldiers. If 35,000 men are required and 50,000 offer, then the Government can drive a hard bargain; but when it is the reverse, then the "pull" is on the side of the recruit, who is not slow to appreciate his advantage. Enlist every man for 21 years, but let him have the option of leaving after six years, with six in the Reserve; 12 years, with six in the Reserve; 15 years, with six in the Reserve, but with home battalions; 21 years, with pension, with deferred pay up to 15 years of service. If he elect to go on serving at the end of each term, give him half the deferred pay, the other portion accumulating until his discharge. Form invalid battalions, to give him every chance of regaining his health before being discharged. Some, discharged invalided, recover their health, and would gladly return to their regiments. Make the terms of enlistment suitable to everybody; you then entice all kinds, and the country is the gainer. Sir L. Simmons has hit the root of evil when he suggests the result of large quantities of men returning to their homes discontented, and ventilating their grievances, right or wrong, and preventing thousands from joining. Have a little more consideration for the permanent interests of the men (I don't mean your 18-year-old boys), so that they can see a future. The service might be made so attractive, in fact, that the authorities could afford to be very strict, and raise at the same time standard and age. It is simply a question of money, and keeping faith with "Tommy," for whom so many pitfalls are constructed; and small blame to him, he becomes suspicious. What is a million, more or less, to this country (I hate extravagance), which squabbles over a few shillings, while thousands and tens of thousands disappear without a thought? We cannot, as the Continent does, sweep recruits in by hundreds of thousands, so we must find the equivalent in £ s. d.,—and a very reasonable amount would alter the present aspect of affairs. We seem to have only one lever, bounty, and which we have again adopted; but evidently the bait does not attract (and I am glad of it),—it is done too meanly. In conclusion, just one more remark,—"Calling-out the Reserve." Some time since, you inserted a letter of mine on that subject. Say you require 10,000 Reserve men, in the first instance call for volunteers, there are always plenty glad to respond, while others who are married and settled prefer not to give up their employment. Now, if you can get the required number by volunteering, why fetch compulsorily those you do not need? You can always lay your hand on every man, at any time; so I think this suggestion treats this important question from a business point of view, and would be mutually advantageous. The whole matter is a simple question, how best to obtain an abundance of the article

Rank and File.

MILITARY *versus* CIVIL GAOLS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The large number of fraudulent enlistments which statistics of military crime disclose, may be accounted for in many ways. In the case of prisoners discharged from the Army on the termination of their imprisonment, if they have been, as they ought not, but frequently are, sent to military prisons, we may ask what else such men can do? Compare the case of a man discharged from a civil prison with that of a soldier discharged from the Army and afterwards from a military prison. A prisoner goes out from a civil prison with a little money to start him in honesty, if he has learned that to be the better policy. This he has earned by the system of marks. The Prisoners' Aid Society, too, will probably have given him some money, or tried to get a situation for him. If he worked well at a trade when in prison, this fact will be stated by the governor in a character. In one word, the man has a chance. It is not impossible for him to avoid committing another crime. I think that this cannot be said of a soldier who leaves a military prison after being dismissed from the Army. On going out he is given 1s. only, and a railway warrant to the place where he enlisted. The joy of recovered liberty does not prevent him from feeling rather hungry, so he makes a considerable hole in his first and last shilling, by providing himself with a meal or a glass or two of beer. What, then, is he to do? If he be discharged at the end of the week, it is almost impossible for him to get work until Monday. But he may have to wait much longer for employment, as he has neither money, friends, or character. Is there not a too strong temptation put in this man's way to fraudulently enlist? Having been abroad for some years, he does not know where to seek for work, and when he asks for it, the answer he gets is,—"Get along, we don't want gaol-birds here!" Under these circumstances, he thinks of the Army once more. He knows that to be a Cave of Adullam for everyone in distress, and everyone in debt, and everyone discontented. We do not write from the philanthropist point of view; but we do believe that if it is the duty of Governments to make it easy for the governed to do right, and difficult for them to do wrong, the stumbling-block alluded to should be taken out of the way. Every man who is dismissed from the Army should invariably be sent to do his punishment in a civil and not in a military prison. There he will have an opportunity of earning some money with which to exist when discharged, until he obtains employment. I may say that the Prisoners' Aid Society will not assist men leaving military prisons, so that when they are dismissed from the Army they have nothing to start a new life upon except one shilling and a railway warrant. Understanding the situation, the officers and warders often give something out of their own not very great funds, in order that a prisoner may have the possibility of abstaining from crimes in general, and from fraudulent enlistment in particular.—I am, &c.,

E. J. H.

REWARDS FOR THE EGYPTIAN EXPEDITION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The columns of your influential journal have lately been devoted to urging the claims of the officers of the Army Pay Department to some recognition of their services, in consequence of their being left so entirely in the cold, notwithstanding the very lavish manner in which rewards and decorations were distributed at the termination of the Egyptian Campaign. To say that they received the Queen's medal and Khedive's bronze star means nothing, as the most insignificant drummer-boy who landed in Egypt between certain dates, and did not see a shot fired, will receive the same. I was not brought much in contact with the officers of the Army Pay Department during the expedition, but two of their number with whom I had frequent transactions (Capts. Long and Kneller) struck me as being about as hard-worked and hard-working as any officer in the expedition. It is admitted on every side that decorations have been given with no niggard hand, and I consider the authorities committed a very gracious act when they decided to award the medals to the interpreters that accompanied the Army, and were of the greatest value and assistance. But there is another class of civilians whom I believe every officer of the expedition would be glad to see the medals bestowed upon. I allude to the commanders of the hired transport vessels. The kind, generous, and ready help that these gentlemen ever afforded was the subject of universal admiration, and of the value they proved themselves there can be but one opinion. Some of them, I believe, wear her Majesty's uniform as holding commissions in the Royal Naval Reserve, and the issue of the medals to them would not only be a graceful compliment that would be much esteemed by them, but would go a long way towards strengthening the bond of union between the Royal Navy and Mercantile Marine, that appears so desirable to be encouraged, as the last little broil has shown so unmistakeably how entirely dependent we are on the latter service whenever we are unfortunate enough to be engaged in war. If supported by you, I feel sure that the distinction would be speedily granted by the authorities.—I am, &c.,

A Subscriber.

Our Woolwich correspondent writes:—"The last of the 100-ton guns ordered to be mounted for the defence of the Mediterranean fortress was embarked to-day (Friday) at the Royal Arsenal, Woolwich, on board the War Department steamer Stanley, for conveyance to Malta. Two of these guns are now being placed in position at Gibraltar, and the third is at Malta, where it will be mounted in company with the one now being sent out. The four guns were purchased of Sir William Armstrong out of the vote of the "six millions," and the amount paid, including the charge for seven 10-inch (18-ton) guns, was £90,000."

THE WIMBLEDON MEETING.

[FROM OUR CORRESPONDENT.]

The twenty-fourth annual prize meeting of the National Rifle Association, which opened on Wimbledon Common on Monday last, promises to be the most successful in the history of an organisation which has done very much towards promoting rifle shooting, not only in the Volunteer Force, but in other branches of the Auxiliary Forces, and to some extent also in the Army. This year, it is very gratifying to learn that the entries all round are considerably larger, being, in the case of the Queen's Prize, about 2,400; and this fact alone proves that the action of the Council in abolishing the back position was right, and is appreciated as it deserved to be. The visit of the American team, who fire against the British Volunteers on Friday and Saturday of next week, is one of the numerous important events of the meeting, important in cementing the ties which exist between two great countries, and from which both should gain practical ideas. Col. Manningham Buller again commands the camp, with Major Urquhart (acting adjutant); and the hospital is under Brigade-Surgeon Elkington, Grenadier Guards, and Surgeon Pocklington, 3rd Surrey Rifles. The Executive Committee consists of Earl Brownlow, Sir H. Fletcher, Colonel Walrond, and Major Waller. Major Humphry, Cambridge University Rifles, is in charge of the Executive Department; Majors Archdale and Hollway, 1st Norfolk Rifles, the statistics; and Majors Tynte (East Kent Yeomanry) and Wylie, the ranges. We have only space for short records of the shooting, which appears generally to be of a high order, and shows a considerable advance over the records of last year:—

Alfred.—200 yards, seven shots, with Snider, standing. Eighty-eight prizes, value £300:—£20—Colour-Serjt. Noble, 1st Northampton, 32 points. £10 each—Serjt. Ritchis, 1st Renfrew, and Pte. Guy, 1st Ayr, 31 each. £5 each—Corpl. Fitzgerald, 9th Lancashire; Capt. the Earl Waldegrave, 1st London; Capt. Wilkinson, 1st Staffordshire; Serjt.-Instructor Randall, 2nd Sussex; Lieut. Fairbairn, 1st Roxburgh; Pte. Podger, 2nd V.B. Somerset; and Pte. de Guelle, Jersey Militia, 31 each.

Alexandra.—Seven shots, at 500 and 600 yards, with Martini-Henry. 300 prizes, value £900:—£30—Serjt. Peat, 2nd V.B. West Surrey, 66 points. £20—Serjt. Andrews, 2nd V.B. West Surrey, 66. £15 each—Capt. Walker, 15th Lancashire, 65; and Corpl. Geddes, 1st Galloway, 64. £10 each—Pte. Simpson, 1st Edinburgh; Pte. Hart, 1st Warwick; Serjt. Francis, 1st Pembroke; and Corpl. Scott, 2nd Perth, 63 each; Pte. Lillie, 1st Edinburgh; Pte. Goodear, 6th Lancashire; and Pte. Barnes, 1st Edinburgh, 62 each.

Any Rifle Sweepstakes.—800 Yards:—£5 1s. 3d.—Lieut. Meadows, 1st V.B. Leicester, 34 points. £3 0s. 9d.—Major Scriven, 1st V.B. Leicester, 33. £2 0s. 6d.—Major Young, 21st Middlesex, 33.

Gregory.—7 shots, with Martini-Henry, at 200 yards, standing or kneeling:—Tea and coffee service—Corpl. Geddes, 1st Galloway, 34 points. £10—Pte. Masson, 2nd Forfar, 34. £5 each—Pte. Lowe, 13th Middlesex, 33; and Colour-Serjt. Patterson, 1st Argyll, 33.

Humphry Challenge Cup.—Teams of four aside of Oxford and Cambridge Universities, any rifle, 15 rounds at 800, 900, and 1,000 yards:—Oxford—T. F. Fremantle, 178 points; P. H. Eliot, 172; A. G. Foulkes, 164; and C. E. Russel-Rendle, 148; total, 662 points. Cambridge—T. A. Pixley, 164 points; T. S. Oxley, 161; A. W. Drury, 155; and T. H. C. Dalton, 134; total, 614 points.

At the quarterly meeting of the directors of the Naval Medical Supplemental Fund, held on the 10th inst., Sir W. N. E. Smart, K.C.B., M.D., Inspector-General, in the chair, the sum of £90 was distributed among the several applicants.

The authorities have given special permission to a field-officer of the Spanish Royal Artillery to inspect the fortifications and defences at Chatham, and have directed that every facility is to be afforded him by the officials at the garrison on the occasion of his visit.

A correspondent writes:—"It is universally hoped that ere long some attention will be paid to bandsmen, as regards pay. In the late Royal Warrant this deserving class were entirely overlooked. They are deterred from joining the ranks and becoming efficient non-commissioned officers. Yet almost all these men are in possession of, or can easily obtain, the necessary certificates of education, and are intelligent men. The following rate of pay would no doubt do much towards alleviating their grievance:—Class I. After three years' service as bandsman, 1s. 3d. per day, not including good-conduct pay. Class II. After six years' service as bandsman, 1s. 4d. per day, not including good-conduct pay. Class III. After nine years' service as bandsman, 1s. 6d. per day, not including good-conduct pay. Class IV. After nine years' service as bandsman, 1s. 8d. per day, not including good-conduct pay."

Notice is given by the Department of the Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, to all persons interested, that the distribution of prize-money for the captures by H.M.S. Eclipse, specified below, will commence on July 20, in the Prize Branch of the Department of the "Accountant-General of the Navy and Comptroller of Navy Pay, Admiralty, New Street, Spring Gardens, S.W." The following are the shares due to an individual in the several classes for the respective captures:—Slave-dhow Fathelkheir, captured Jan. 6, 1882—Flag, £11 14s. 3d.; captain, £33 19s. 6d.; 2nd class, £7 12s. 6d.; 3rd class, £6 10s. 8d.; 4th class, £4 7s. 2d.; 5th class, £2 12s. 4d.; 6th class, £2 3s. 7d.; 7th class, £1 10s. 6d.; 8th class, 17s. 5d.; 9th class, 8s. 8d. Slave-dhow Fatalher, captured April 17, 1882—Flag, £6 3s.; captain, £17 16s. 9d.; 2nd class, £3 19s. 2d.; 3rd class, £3 7s. 11d.; 4th class, £2 5s. 4d.; 5th class, £1 7s. 2d.; 6th class, £1 2s. 9d.; 7th class, 15s. 11d.; 8th class, 9s.; 9th class, 4s. 6d.

The Army.

5th Lancers. Capt. and Qrmr. Berryman, V.C., is about to retire from the service on the pension of his rank.

ROYAL ARTILLERY.

Orders have been received at Chatham directing the 2nd and 3rd Baties. 1st Brig., Scottish Division, to be held in readiness to proceed to India. The V Baty. 1st Brig. is also ordered to furnish a draft of gunners and drivers to be despatched to India, there to join the I Baty. 1st Brig.

Major-Gen. A. F. F. Lennox, son of the late Lord J. George Lennox, died a few days ago at Old Park, Chichester. Gen. Lennox, who was born in 1824, entered the Army in 1842, and served in the Crimean Campaign, being present at the fall of Sebastopol. He was promoted, awarded a medal with clasp, 5th Class of the Medjidie, and Turkish medal. He attained the rank of colonel in 1868, and retired with the hon. rank of major-gen. in 1874.

Coldstream Guards. Mr. W. St. J. Dent, late of the regiment, died at 63 Margaret Street, W., on the 6th inst.

3rd Buffs (East Kent Regiment). Capt. Smith, 1st Batn., has been noted at the Horse Guards for appointment as an adjutant in the Auxiliary Forces.

20th Lancashire Fusiliers. Fourteen years have now elapsed since the 1st Batn. last served in England. Its tour of service has carried it to such stations so varied in climate and other features as the West Indies, North America, Cyprus, Malta, and Ireland. A number of the rank-and-file have not seen England in all that time. It is somewhere laid down that the limit of a man's expatriation from his home and kindred ought not to exceed seven years, but here the limit has twice been exceeded, and there is no near prospect of a change. Serjt.-Major Boor left Templemore on the 4th inst. to take up duty at the depôt at Bury. Before leaving he was presented by the serjeants with a handsome marble clock. Serjt.-Instr. of Musketry Burroughs has been promoted in his place. The following Regimental Order was published by Col. T. H. Clarkson on July 6, 1883:—"Lieut. E. H. R. Hibbert to be Adjt., vice Lieut. F. Hammersley, who resigns the appointment (July 4). With reference to the above extract from the *London Gazette*, the Colonel Commanding cannot allow Lieut. Hammersley to resign the appointment without notifying to him the good tact he has always shown. The able and zealous manner in which he has carried out the duties of adjutant, together with his smartness on parade and careful work in the orderly-room, have conduced so much to the state of discipline and pleasant performance of their duties by all ranks."

36th Worcestershire Regiment. It is rumoured the regiment, on completion of its Irish service, is to be sent back to Pembroke Dock for the second time since its return from India in 1875. Pembroke is a very dull place indeed—hard lines for both officers and men, particularly the latter. Being a very well-conducted, smart regiment, it surely deserves better treatment.

38th South Staffordshire Regiment. A meeting of officers of, and late of, the regiment was held at the Royal United Service Institution on the 3rd inst. There were present:—Major C. Cockayne-Frith, Sir Robert Sinclair, Bart., Cols. the Hon. C. J. Addington, W. K. Elles, C.B., and Dickens; Lieut.-Cols. Sir G. Hume, Vance, Eyre, and Sir N. Pringle, Bart.; Capts. Emeris and Thackeray; and Lieuts. Heath and Pipe Wolferstan. Major C. Cockayne-Frith was unanimously voted into the chair. Major Frith opened the proceedings by calling upon Lieut.-Col. Eyre to introduce the subject for the consideration of the meeting, which he did in a most interesting and exhaustive history of the 38th Regt., from its birth in 1702; together with an account of the old Peninsula colours, and the manner in which they have been restored to the regiment by the graciousness of the Earl of Dartmouth, after which the following resolutions were put from the chair, and unanimously carried:—Proposed by Sir G. Hume, and seconded by Col. Dickens: That with the permission of the Dean and Chapter, a memorial be placed in the Lichfield Cathedral, together with the old colours restored to the regiment by the Earl of Dartmouth, and those at present borne by the regiment (which are about to be replaced), to record the services of the 38th or 1st Staffordshire Regt. It was proposed by Col. the Hon. C. J. Addington, and seconded by Col. Elles, C.B.: That the following officers be asked to serve on the committee for the purpose of giving effect to the above resolution, and request Messrs. Cox and Co. to act as treasurers to the fund: Chairman, Gen. J. W. S. Smith, C.B.; Members, Lieut.-Cols. Sir Gustavus Hume, Vance, Eyre, Sir N. Pringle, Bart., and Capt. Emeris; and that Lieut.-Col. Sir N. Pringle, Bart., be requested to act as honorary secretary. Proposed by Lieut.-Col. Eyre, and seconded by Col. the Hon. C. J. Addington: That the form of memorial be left to the committee, in communication with the Dean and Chapter. Proposed by Lieut.-Col. Vance, and seconded by Col. the Hon. C. J. Addington: That a subscription list be now opened, and that the honorary secretary of the committee be requested to circulate the same amongst the old officers of the regiment. Proposed by Major Frith, and seconded by Lieut.-Col. Sir G. Hume: That the thanks of this meeting, and the high appreciation of the officers (past and present) of the 38th Regt., be tendered to the Earl of Dartmouth for his kind and generous consideration, in restoring to the regiment their old colours. Proposed by Major C. Cockayne-Frith, and seconded by Sir R. Sinclair, Bart.: That the thanks of the meeting be conveyed to the President and Council of the Royal United Service Institution for their great kindness in placing their theatre at the disposal of the meeting. Proposed by Sir R. Sinclair, and seconded by Major Cockayne-Frith: That the best thanks be given to Lieut.-Col. Eyre for his very interesting sketch of the history of the 38th Regt., as well as for the very great pains he has taken to lay this subject before the meeting; and at the same time to express to him the pleasure it has given to the old officers of the regiment to see him in command of the old corps, and to thank him for the high state of efficiency he has maintained in it. Proposed by Sir G. Hume, and seconded by Lieut.-Col. Eyre: That the thanks of this meeting be given to Major Cockayne-Frith for his so kindly presiding on this occasion.

44th Essex Regiment. Intelligence has been received from India that while a detachment of the regiment was escorting the Political Agent, who was proceeding to chastise a refractory village, they were attacked by a body of 500 Nagas, who were repulsed, with a loss of 50 killed. There were no casualties on the side of the British.

ROYAL MARINES.

It is rumoured that Major-Gen. J. W. C. Williams, R.M.A., who was Assist.-Adjt.-Gen. at the Royal Marine Office from 1867 to 1872, will become Deputy-Adjt.-Gen. when the vacancy occurs in September next; and that Lieut.-Col. Walsh, R.M.L.I., now serving at the depôt, will be the new A.A.G.

The promotion to lieut.-col. in the R.M.A., in the vacancy caused by the promotion of Col. Brydges to 2nd commandant, will not be filled up, as a supernumerary officer will shortly be absorbed in it. This, of course, refers to Col. Sir Francis W. Festing, C.B., K.C.M.G., who has been borne as a supernumerary while Assist.-Adjt.-Gen. at Head-quarters, and who will return to his regimental duties at the expiration of his appointment.

50th Queen's Own, Royal West Kent Regiment. A telegram dated from Cyprus, July 5, says:—"Sir R. Biddulph, the High Commissioner, and his Staff have removed to Mount Troodos for the summer. The head-quarters of the 50th Regt. have been established there. The health of the troops is good."

72nd Seaforth Highlanders. Col. Douglas Robinson, late of the regiment, died on the 5th inst. at Cheltenham, aged 56. He was the second son of the late Sir G. Best Robinson, and twin-brother of Sir George Abercrombie Robinson, the present baronet, to whose title he was heir-presumptive. He was born at West Cowes, I.W., in 1826, and entered the Army in 1844 as a cornet in the 7th Hussars, but shortly afterwards exchanged to the 72nd. He obtained a lieutenancy in 1847, was promoted to a captaincy in 1850, and served during the Crimean Campaign of 1855, including the expedition to Kertch, the fall of Sebastopol, &c. (medal with clasp and Turkish medal). He was promoted to the rank of major in 1862, was placed on half-pay in 1866, and became a col. in the Army in 1881.

2nd West India Regiment. The head-quarters of this regiment, under command of Lieut.-Col. Sheppard, arrived in H.M.S. Tyne at Sierra Leone on June 16. The following is the distribution:—Head-quarters and 400 men, Sierra Leone; detachment, 180 men, Gold Coast; depôt, 260 men, Barbadoes.

Commissariat and Transport Corps. Major-Gen. Smyth, commanding the troops at Woolwich, made his annual inspection of Nos. 2, 9, 10, and 11 Companies on Wednesday last. The companies, under the command of Assist.-Comy.-Gen. Parkyn, paraded on Woolwich Common in marching order at 10 a.m., and after marching past in column, ranked past, when, in consequence of the wet weather, the inspecting officer ordered them to barracks. At noon, the books, kits, barrack-rooms, and stables were inspected, and at 3 p.m. the corps paraded upon the barrack-field in drill order on foot, which finished the day's proceedings, the inspecting officer expressing himself much pleased with the appearance of the men, horses, and equipment. The Royal Artillery bands attended the parades. Assist.-Comy.-Gen. F. H. Bridgman has returned from Jamaica, and will shortly assume charge at the Curragh Camp. Assist.-Comy.-Gen. Young having returned from Ceylon, joins at Aldershot for supply duties. Assist.-Comy.-Gen. Noake has exchanged with Assist.-Comy.-Gen. Boothby, and will remain for a second tour of foreign service at Barbadoes, W.I. "Ranker" writes:—"Having read the letter of 'Junior Officer' on this subject in your issue of June 16, I would wish to call attention to one point in it. 'Junior Officer' complains of the 'amount of clerical drudgery' and 'weight of personal responsibility as regards custody of stores,' and speaks pathetically of the 'mental and physical breakdown' consequent on the performance of barrack duties. He proposes as a remedy the formation of a barrack section, composed of officers promoted from the ranks, to perform these onerous, important, and responsible duties, coolly suggesting that these officers, notwithstanding the importance of their duties, should, like the Coast Brigade, Royal Artillery, be subordinated to and controlled and directed by 'Junior Officer' and others like him, who are unable to perform these duties themselves. Surely the arrangement proposed by 'Junior Officer' to throw all the work and responsibility on the officers of the proposed barrack section, and to give into the hands of the Junior Officers, Commissariat Staff, all the control and direction thereof, would not be considered a hopeful or encouraging condition of service even by officers who have been promoted from the ranks."

Medical Department. Deputy-Surg.-Gen. J. Lamprey, A.M.D., has been appointed to succeed Surg.-Gen. J. A. Woolfryes, C.B., C.M.G., as principal medical officer of the Southern District.

Ordnance Store Department. The following changes have taken place:—Assist.-Commissaries-Gen. of Ordnance C. Ralph, Bermuda, to unattached; J. H. Pearson, Woolwich, to Natal, vice H. P. Moors, to unattached; J. Steevens, Egypt, to Devonport Gun Wharf, vice W. R. Mayo, under orders for Bermuda. Deputy-Assist.-Commissaries-Gen. of Ordnance F. H. Arnold, Devonport, to Dover, vice F. Richards, under orders for foreign service; C. J. Jeans, Gibraltar, to Aldershot, vice G. H. Everard, to unattached. The following acting warrant officers have been confirmed after probation, and appointed as follows:—Conductors of Ordnance Stores W. Garrett, to Devonport; H. Hardy, Colchester; H. G. Andrews, Portsmouth; J. Hunter, Tower; W. Swan, Woolwich; J. Shaw, Dublin; R. H. Booth, Woolwich; G. Stewart, Chester; W. Whitehead, Woolwich.

Pay Department. Capts. Kerr and Brereton were recently promoted to the honorary rank of major in the Army, after completing five years' service as paymasters, from the 1st inst. Major J. M. Kerr has 28 years' service, and served formerly in the 27th Regt.; Major J. S. Brereton has 22 years' service, and his previous regiment was the 67th. During the past month, the following changes have taken place:—Major O'Brien, from the 16th Regtl. District, to Unattached List, *en route* to the Cape; Major Treffry, from Unattached List, to the 16th Regtl. District, Bedford; Capt. Stoker, from the 104th Regt., to District Office, Malta; Capt. Lumsden, from District Office, Dover, to the 31st Regt. Two deaths are reported:—Lieut.-Col. C. B. Roche, late Pay Department, on May 10, and Capt. H. A. Cherry on June 11. Four Regimental Districts, and two Cavalry and 25 Infantry regiments are without paymasters:—18th Regimental District, Clonmel; 25th Regimental District, Berwick-on-Tweed; 68th Regimental District, Sunderland; and the 88th Regimental District, Galway; the 4th and 19th Hussars; and the 1st Batn. 3rd, 2nd Batn. 4th, 1st Batn. 6th, 2nd Batn. 6th, 1st Batn. 8th, 2nd Batn. 13th, 1st Batn. 15th, 2nd Batn. 15th, 2nd Batn. 19th, 2nd Batn. 24th, 37th, 52nd, 55th, 56th, 58th, 61st, 64th, 67th, 86th, 91st, 98th, 99th, 106th, 1st Batn. Rifle Brigade, and 2nd Batn. West India Regt.; total, 33 vacancies.

The Auxiliary Forces.

MILITIA.

North Irish Division, Royal Artillery. "An Old Soldier" writes:—"I was accidentally present at the review of the 6th Brig. Mid-Ulster Artillery, at Dungannon, on the 4th inst. The fine appearance of the men—all tall, broad-shouldered fellows, of proper age—and the efficient manner in which they performed battalion movements, quite surprised me. Their accoutrements were very clean, their set-up pleasant to the eye; indeed, of late years I have not seen a Regular regiment to compare with them, as regards physique and apparent powers of endurance. Lieut.-Col. Burges and the officers deserve great credit for the soldierly condition of this good Irish stuff, and also for maintaining (as the townsfolk informed me) perfect discipline in quarters. As Irishmen are often abused now-a-days, perhaps you will not reject these few words in their favour."

Royal Fusiliers. The 3rd Batn. is at present undergoing its annual training at Aldershot, which will terminate on the 21st inst. It is attached to the 1st Brig., under Major-Gen. M. Walker, V.C., C.B. The battalion is composed of a smart body of men, and their conduct during their stay has been exemplary. They have taken part in several field-days, and on Monday were inspected, along with the other infantry brigades, by H.R.H. the Field-Marshal Commanding-in-Chief, on the Queen's Parade, North Camp, in complete marching order. The officers present with the battalion are Col. Hough (commanding); Majors Walker and Addison; Capts. Piper, Sampson, Copplestone, Brooke, Forster, and Fox; Lieuts. Cannon, Cockerton, Thompson, Van-Notten-Pole, Bowman, Weatherall, Lund, Browne, and Sheridan; Capt. and Adjt. Gough; Qrmr. Masterson; and Surg. Hurman; Warrant Officer Cutbush, Qrmr.-Serjt. Farrington, Serjt.-Instructor Childs, Orderly-room Serjt. A. W. Cunnah, Pymr.-Serjt. C. A. Ludlow, Serjt. Drummer W. Lawson, and the usual others. It is expected that the inspection will take place on Wednesday next, and the battalion will proceed from Aldershot Town Station to Hounslow at an early hour on Saturday, when the men will be dismissed to their homes.

The Cameronians (Scottish Rifles). The 3rd and 4th Battalions assembled for their annual training on Monday last. The regiment is under canvas as usual on Lanark Muir. Over 1,200 men mustered, exclusive of officers and staff, and the regiment, which has lately been increased from 12 to 16 companies, presents a very fine appearance on parade. The officers present are:—Col. Carrick Buchanan, C.B.; Lieut.-Col. McCall; Majors Steele and Courtenay; Capts. Gray Buchanan, Farie, Dixon (hon. major), Bailey, Bond-Cabbell, O'Brien (hon. major), Thomson-Carmichael, and Lumsden; Lieuts. Fenton-Livingstone, Douglas, Fraser, Wilton, and Meiklejohn; Capt. Boughey, Highland Light Infantry, adjt.; Qrmrs., H. McLeod and J. Blackwood; Surg.-Major A. M. Adams. The following officers are attached for duty:—Lieut. Mansel, Highland Light Infantry (acting adjt. 4th Batn.; Major Lee, 5th Batn., the Rifle Brigade; Capt. Douglas, 5th Batn., the Royal Fusiliers; Capt. Cruden, 3rd Batn., Highland Light Infantry; Capt. Grant, 3rd Batn., the Cheshire Regiment.

Oxfordshire Light Infantry. The Duchess of Connaught presented new colours to the 4th Batn. at Aldershot on Monday. The battalion was under the command of Lieut.-Col. the Hon. A. S. Annesley. Major-Gen. H.R.H. the Duke of Connaught, who commands the 3rd Infantry Brigade, to which the regiment is attached, rode on the ground shortly before 3 o'clock, and was met by Gen. Sir Daniel Lysons, K.C.B., and the officers of the Divisional Staff. Punctually at 3 o'clock the Duchess of Connaught drove on the ground from Bagshot House, and was received with a royal salute. The ceremony of trooping the old colours was then gone through, and the regiment formed three sides of a square, the new colours being placed on a pile of drums. The Staff then dismounted, and the carriage conveying the Duchess of Connaught was driven into the square. The ceremony of blessing the new colours having been performed by the Chaplain, the Duchess alighted from her carriage and handed the colours to the officer deputed to receive them. The battalion afterwards marched past. In the course of the afternoon, the Duke and Duchess of Connaught, Sir Daniel and Lady Lysons, and a large number of guests were entertained by Col. Annesley and the officers of the battalion. The battalion, consisting of about 23 officers and 555 non-commissioned officers and men, proceeded on Tuesday by special train to Oxford, to be disembodied on completion of training.

Black Watch (Royal Highlanders). The 3rd Batn. assembled at Perth on the 9th inst. for the annual training. Total strength, 781 of all ranks. Commanding officer, Viscount Stormont; Majors, M. F. Hutton and G. G. Sandeman; Capts. R. M. Alexander, W. F. Middleton, A. B. Stewart, C. H. Dundas, J. H. Kerr, D. M. Smythe, Sir Duncan A. D. Campbell, Bart., and the Hon. A. G. Hay; Lieuts. J. S. Robertson, T. W. T. Dent, C. Tweedale, Hon. A. D. Murray, C. H. Durrant-Steuart, Hon. G. H. W. Walsh, Victor Staunton Sandeman, and F. P. Maryon-Wilson.

THE VOLUNTEERS.

1st Middlesex Engineers. The Marylebone companies of this corps, who enjoy specially good facilities for bridging over the water in the grounds of the Toxophilite Society in Regent's Park, were in hope that Lord Wolseley would visit their works last Saturday afternoon. They were disappointed in this, but their invitation was largely accepted, and the exhibition was one well worth seeing. There were the usual single sling, trestle, and barrel-pier bridges, all full size; and in addition there was a curious suspension bridge for infantry two deep, and a wire cable crossing the stream, with a deep basket, worked by ropes from either end of the cable, which was supposed to be thrown across a chasm, and which could convey men singly and stores. Both these were the invention of Capt. Surmon, the senior officer. The barrel-pier bridge was constructed and demolished by a working party in very good time.

4th V.B. the Essex Regiment. The former 9th Essex Corps—which has a recruiting field which includes Stratford, Silvertown, and Hackney—was inspected in West Ham Park by Col. Hand, commanding the Essex (44th) Regimental District. Lieut.-Col. Silver was in command of the corps, which mustered 539 of all ranks, a total which compares very favourably with the 468 of last year. The inspection was very favourable to the corps, and included a much larger amount of company drill than usual on these occasions.

3rd Middlesex Rifles. This corps, raised in the northern suburbs, was inspected on Saturday, at the Priory, Hornsey, Col. Kent. being the inspecting officer. In the absence on leave of Lieut.-Col. Warner, Major Church was in command. The muster was 565 of all ranks, to compare with 554 last year. The inspection occupied about a couple of hours, very fully used, and the corps received high praise from the colonel of the Middlesex and London Regimental District.

4th Middlesex (West London) Rifles. This, one of the smaller corps, was inspected by Col. Lambton, of the Coldstreams, on the Guards' Ground, on Saturday, the muster being 504, out of 568, or 64 more than last year, when 442 were on parade. The corps stood in eight companies of 22 files, under Lieut.-Col. Somers Lewis, the adjt., Capt. Goldfrap, being the only other mounted officer. The corps is evidently becoming stronger each year, and of the 64 absent from inspection, only seven had failed to apply for leave. Beside the colonel, the corps was drilled by Capts. Joseph and Rose-Innes, while the bearer company was put through the whole of its work, even down to dressing wounded, by Drs. Morton and Clark.

16th Middlesex (London Irish) Rifles. This regiment made the largest muster of all the corps out for inspection on Saturday last, Col. Ward having 849 officers and men on parade, which is 14 less than last year. There are at present 960 names on the roll, and the deficiency at inspection was accounted for by 74 absent with leave and 37 without leave. Col. Fitzroy, of the Coldstreams, was the inspecting officer, and besides the officer in command, the chief officers of the corps present were Lieut.-Col. Furnivall, Major Vaughan-Jones, and the adjutant, Capt. Thurlow. The regiment drilled very steadily opposite Knightsbridge Barracks, but the ground is not sufficient for a battalion standing 12 companies of 31 files. Col. Fitzroy expressed a very good opinion of the regiment, whose drill included the bayonet exercise and flag-signalling, a department introduced and supervised by Capt. Howland Roberts.

20th Middlesex (Artists') Rifles. Sir Frederick Leighton was in command of the Artists'—it is understood, for the last time—at the regimental inspection last Saturday in Hyde Park, north of the Serpentine. The corps turned out very smartly, as uniform in appearance as ever, and 667 strong, making eight companies of 33 files. Last year there were 677 on parade at inspection, so that this year's muster shows a loss of 10. Sir Frederick Leighton's mounted officers were Major Edis, Major Val Prinsep, and Capt. Haggard (adjutant). The members absent with leave 127, and only 10 without, the total on the roll being 804. Col. Moncrieff, of the Scots Guards, received the salute of the corps, being accompanied by his regimental adjutant, Lieut.-Col. Broadwood. After the march-past and the manual and firing exercises, all of which were most smartly done, the inspection drill was a long one, and included a considerable amount of "attack," the majors getting a turn of command with the half-battalions and the captains with their companies. Col. Moncrieff in his address was not sparing of the deficiencies he had observed, being, as usual, quick to note faulty accoutrements, and telling officers that their fire was not sufficiently well sustained when reinforcing line. He praised the drill generally, the marching, and the quietness, and bore testimony to Sir Frederick Leighton's efficiency as a soldier. Professional and official duties now require that Sir Frederick Leighton should retire from the active command, but the Artists' should all feel proud they had had so able a colonel for so long a period.

21st Middlesex (Finsbury) Rifles. This, the Finsbury corps, was inspected on Saturday last, at Albany-street Barracks, by Col. Wygram, of the Coldstreams. There were 615 officers and men on parade, or 36 fewer than last year; but certainly, in the case of this corps, the appearance improves as the numbers decrease. Lieut.-Col. Morris was in command, and under that officer, the majors, and a couple of captains, the corps, either as a whole or in half-battalions, had a very severe inspection. The public are apt to be rather troublesome in the parks sometimes at inspections, and thus make colonels glad to use any enclosed space instead; but probably this advantage is more than counterbalanced by the terrible cloud of dust in which the drill has to be performed at Albany Street.

4th V.B. East Surrey Regiment. This corps, the old 7th Surrey, has the largest Volunteer establishment in the county; and at the inspection at Lambeth Palace Grounds on Saturday, Lieut.-Col. Porter had 669 on parade, to compare with 703 last year. Lieut.-Col. FitzRoy, of the East Surrey Regt., was the inspecting officer, before whom the corps, in addition to the usual infantry exercises, went through the stretcher-drill and flag-signalling practice.

1st Stirling Rifles. The annual inspection took place on Saturday in the Queen's Park, Stirling. The inspecting officer was Col. Duncan Macpherson, C.B., commanding the 91st Regtl. District, with Major Barstow as aide-de-camp. The regiment was drilled by Col. King and Major Nimmo, Major O'Sullivan (adjutant) being in attendance. Col. Macpherson expressed his satisfaction at finding the regiment in a state of such great efficiency. The number on parade was over 600.

PROMOTION BY SELECTION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I, for one, sincerely hope that the authorities have no intention of carrying out any such idea as that suggested in your columns of May 5,—namely, that, in view of the short service of the senior lieutenants in certain regiments, companies, as they fall vacant, should be offered to officers of other regiments, who count longer service in the subaltern ranks. Specious and practical as the proposal may seem to any one superficially glancing at the *Army List*, it is not difficult to show that, if acted upon, it would in the end lead to a great deal more injustice than it could possibly remedy now. I am a senior subaltern in one of the regiments referred to in your paragraph. When I joined the regiment, about five years ago, the senior lieutenants had twelve and thirteen years' service. After the stagnation a reaction set in, and there certainly has been a great run of promotion; consequently, my present position may appear fortunate. But, slightly to modify the words of the Greek poet, "Call no man happy until he is promoted." For although at the present moment I stand fourth for promotion with little more than five years' service, I see no reasonable prospect of getting my company for another three years, and promotion throughout the regiment is bound to be slow for some time to come. Supposing an outsider were given the next company that falls vacant, it would postpone my promotion probably for a year at least; but it would be infinitely more unfair on those immediately below me, who, with very much the same service as I have, will have a great deal longer to wait. Surely it is quite reasonable that the officers of a regiment should have the benefit of good times as well as of bad. Five years ago they were bad; five years hence they will be bad again. But now that they are good, and there is a prospect of one or two subalterns getting their companies a few months under the average time, it would be hard to deprive them of their piece of luck, and very much harder on us below. I do not see how it would improve matters to extricate one man from an unfortunate position now by a plan that would help to place several others in much the same predicament a few years later. The remedy would prove worse than the disease. Apart from these considerations, which, I have no doubt, apply more or less to all the regiments, which you so unkindly suggest should be deprived of a step in the junior ranks, I need hardly point out that such a proposal is entirely opposed to the principle of the new reforms; and I would further remark that a comparison between the length of services of subalterns in different regiments leads to very fallacious conclusions as regards the rapidity of general promotion in any particular one. As a matter of fact, take them all round, the length of service of the senior officers of Line regiments varies but little, and will do so still less, now that Purchase has been abolished. Those who have had to wait long for their companies have run up the captains' list with proportionate rapidity; while those who are now getting their companies comparatively quickly, must expect to wait a long time for their majorities. So that the unfortunate subalterns, who you suggest should receive consolation in other regiments, would probably better consult their own interests by remaining where they are. Otherwise, as captains in their new regiments, they would run an excellent chance of encountering as much stagnation in promotion as they have already done as subalterns in their own.—I am, &c., A Subaltern.

"Justice" writes:—"Your correspondents, 'One of the Eight Hundred' and 'One who Volunteered,' in asking for medals for their services in Egypt, although they landed after Sept. 15, are really only pleading for what is justly their due. There is one point, however, in favour of their claims which they have omitted to mention. A war is scarcely finished until every fort and place in the enemy's country is subdued, and it is well known that Damietta and its commander did not surrender to Sir Evelyn Wood until Sept. 22 and 23. Lord Wolseley in his despatch brought Sir E. Wood's name to notice for the excellent way he had carried out the taking of Damietta, and surely it would be unusual that some officers and men may have been present at that operation, and still would not get medals. It would appear only just that all those who landed in Egypt before the surrender of Damietta should be given some reward. A similar course was followed, I believe, in South Africa, where all officers and men who landed before Ketchwayo and Secocœni surrendered, received medals. By bringing the point to notice, you will have the thanks of many officers, and (what is more important) of many men who never have anything to look forward to but a medal as a reward for active service."

A DEGRADED RANK.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The order abolishing the grade of instructor of musketry in the Army did not come in any way as a surprise, and was greeted by all, except those individually affected, with satisfaction. By the rules of the service the musketry instruction has always been in the hands of the company officers, and where this rule was adhered to, the instruction (barring the instruction of recruits) was a nonentity. In some corps, however, the company officer allowed the instructor of musketry to assume a false position, and many were the complaints of the old company officers of the way in which a young upstart from Hythe gave orders to their men. Now, however, all senior officers hold certificates to instruct in musketry, and the mysteries of the Hythe course being exposed, and being shown as quite superfluous, it is to be hoped that the British public will soon be relieved of the expense (about £10,000 per annum) of maintaining this establishment, and in lieu thereof a musketry class established at Sandhurst through which every cadet would pass before obtaining his commission. There is no reason why reform and retrenchment should stop here (for I calculate that that measure saves the country £19,000 per annum), and for the efficiency of the service and the purse of the public a great change may be made to that end. I refer to the adjutancies of the Auxiliary Forces. These posts are filled by 16s. majors, 13s. 7d. majors, captains, and men of a past era, who may have joined as subalterns and adjutants. Now, this is a post which should be filled by experienced officers—men who hold weight with their commanding officers, whose professional tests for promotion have been successfully passed—not by young men who have these examinations to interrupt and interfere with their other duties. By the *Gazette* of July, 1881, each regiment had eight, instead of four Majors. These officers have always been in a very false position. Many of them are adjutants of Auxiliary Forces; others, though obliged to pass for field-rank, still command companies beside captains; are mounted one day, and scramble through the mud the next; find themselves junior as regimental captain of the day to their junior or garrison field-officer,—this all degrades the rank, and leads to much unpleasantness; they are also very expensive to keep up as captains, as they draw field-officer allowances. We are at present paying men to do boys' work, and boys to do men's work. My remedy is so simple, that I think it will receive the consideration from the public and the War-Office authorities. It is to abolish the post of adjutant of Auxiliary Forces altogether, and create a new one, that of "Staff Major," or rather, attached major to auxiliary battalion of territorial regiment. On the abolition, the officers holding office, not being of the Regular Forces, retire on pension, the captains revert to their regiments, and the majors fill up the vacancies. By this means a uniform system will be established, and a link formed between each battalion of the territorial regiment. The country will get something for their money, and the majors themselves feel that, they being the responsible officers to the Militia and Volunteer commanding officers, they hold a position worthy of their rank. The cadre of the Regular Battalions would be as follows:—

	Lieut.-Cols.	Majors.	Capts.	Lieuts.	Total.
1st Battalion	2	1	8	12	23
2nd Battalion	2	1	8	12	23
Regimental Depôt	—	1	2	3	6
Proposed Total	4	3	18	27	52
Present Strength	4	8	10	30	52

The five remaining Majors attached to the staff of and on the estimates of Auxiliary Forces, and shown in italics in the *Army List*. The seniors would take the Militia battalions, the juniors the Volunteers; they would then have opportunities of gaining experience with all in districts, and have opportunities of manœuvring larger bodies of men than they would in their regiments. When the number of regiments to a district fell short of or exceeded the number of Majors, they would be drafted to or from those corps, and wait vacancies in their own district. The Militia in Ireland, being out of proportion to the number of districts, would be supplied in this way. As an economical arrangement I think it would meet with approval, especially to the Indian Government, for it will be seen by the accompanying statement, which may be open to severe criticism, that, first, we pension off 25 Militia and 56 Volunteer adjutants for £14,000. We increase the captains in the Army by 235, or about two per battalion, on £21,443. This makes a total of £35,443. On the credit side we have two subalterns off home and one off Indian establishment, making £21,352 and £12,120. Fifty regiments in India show a credit on three majors, one senior and two junior, each of £54,000. The 90 regiments at home, the difference of major's and captain's pay comes to £15,737, and the home allowance on 216 captains and adjutants comes to £7,300, and other allowances to about £109,772, and a saving of about £74,329. The Militia regiments number 156; the Volunteers, 208; total, 364. We have 70 Line regiments giving five and one (79th Regt.) two majors, or 352, a difference of 12; but 16 Militia regiments have not been formed, so that there are ample to fill the vacancies. Should these battalions be formed, the surplus might be filled by captains who had completed 20 years' service who would be promoted major, and hold appointments in the Militia for six years, or until otherwise employed.—I am, &c., 21 Years' Service.

Estimated Gain.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 14, 1883.

THE Joint Committee of the Lords and Commons appointed to consider and report upon the proposed Channel Tunnel, have, by a majority of six to four, reported adversely to that scheme. We hope that their Report, together with the statements of the opinions of some of the members, which accompanied it, will soon be published. In the meantime, it is satisfactory to find that a majority of the members from each House have confirmed, in effect, the judgment of the naval and military services. But we have only had a lucky escape after all, for a Parliamentary Committee might have decided otherwise, and by doing so have aided the commercial and unpatriotic designs of the projectors of this dangerous enterprise. Those who have foreseen and who now deplore the disastrous effects of the so-called reforms in our military system, have ample reason to look with apprehension on the proceedings of professional committees, which seem to be appointed only to give effect to some foregone conclusion, or to further some unpractical notion. And this feeling of distrust has naturally extended to parliamentary committees when they are convened to consider naval and military questions. As regards the Channel Tunnel scheme, the officers whose opinions carry most weight in their respective professions and with the public have been unanimous in urging grave and unanswerable objections; and their opinions have been endorsed by a long list of names sent to the *Nineteenth Century*,—a list comprising nearly all the men in the country who have risen to eminence in literature, art, science, philosophy, learning, philanthropy, and religion. Had the Parliamentary Committee decided in opposition to the opinions of those so fully qualified to judge fairly, and so interested in the safety and prosperity of their country, we do not think their decision would be quietly accepted, but, on the contrary, that it would cause such an agitation as would prove irresistible. The naval and military opponents of the Tunnel readily admitted the ingenuity of the devices suggested for its sudden destruction; but they maintained that, in the course of time, a feeling of security would arise; that all precautions would, sooner or later, be neglected; that when war became imminent, no Secretary of State or Prime Minister would incur the responsibility of ordering the destruction of the Tunnel (and with it the loss of the lives of many innocent passengers, probably) till the opportunity was lost; and, lastly, that acts of aggression or treachery, involving the seizure of the Dover end of the Tunnel, need not be preceded by a declaration of war or by any ostensible preparations for invasion. The Duke of Cambridge said that the construction of a first-class fortress, heavily armed, with a large and efficient garrison, and in constant readiness to repel attack, should be insisted on, and that the entire expense of fortification, armament, and garrison should be borne by the proprietors of the Tunnel. The cost involved in these conditions would be prohibitory, and in that way only would ensure us from invasion. The news just received from Madagascar of what the Prime Minister calls "grave and painful occurrences" shows clearly the precarious and unstable condition of our relations with France, and dispels all Utopian visions of permanent peace and general disarmament.

We are surprised to find among the Peers who voted in the minority against the motion of Lord Wemyss, that the Militia should be recruited up to its established strength, the names of Lords Bury and Cranbrook, ex-War-Office officials. The Duke of Cambridge appears not to have voted. Lords Enfield, Lyveden, and Waveney voted with the majority; but in the main, the division was, of course, a party one.

The interest of the House of Lords in Military matters may be seen in Monday night's division on Lord Wemyss's motion, in which 54 Peers only took part, though upwards of 300 were readily collected last month on questions such as the Deceased Wife's Sister Bill. Verily, it requires "a national disaster" to awaken Parliament and the nation.

According to Lord Morley, [the] aim of the War Office is to have one Army Corps always ready for active service. Lord Morley discreetly omitted to state whether such an Army Corps existed at the present moment. It is well known the Army in Egypt, which is by no means likely to be recalled, is included in this wonderful scheme, and that all other Infantry, Cavalry, and Artillery cadres would have to be depleted to fill up the remainder. Such it is to have an Army "on the cheap."

Lord Morley stated on Monday night, in the House of Lords, that it would be a long time before the country would consent to the addition of 30,000 men to the Army, which recruiting the Militia to the full establishment would involve. It is somewhat extraordinary, therefore, that Parliament should be called upon to vote year after year money for that full establishment, when the authorities have no intention it should be expended. Still more strange is it that the country should have been informed that the new military organisation provided for the attachment of two Militia battalions to each Territorial regiment, when by the *Army List* it appears over twenty Territorial regiments have only one Militia battalion and one Territorial regiment, the King's Own Borderers, none at all. No effort appears to be made to give effect to this provision, even by those distinguished Generals at the War Office whose advice, according to Lord Morley, was taken on all occasions.

Brevet Colonel A. K. Rideout resigns the Horse Artillery, in order to take up at once the command of the Royal Artillery in Guernsey and Alderney, vice Colonel Burn. A Lieutenant-Colonel's jacket in B Brigade falls, in that event, vacant.

The Secretary of State for War has decided that 55 shall henceforth be the limit of age for employment of pensioner clerks in Staff offices, unless with the special recommendation of the General commanding under whom the clerk may be serving, in which case the limit may be extended to 60 years. This order will immediately affect a few meritorious public servants who have grown grey in the service of their country, and who, as the regulations now stand, can be relegated to civil life, with age creeping on them, on pittances barely sufficient for mere existence. The regulations on this point should be so amended that each one of these clerks could retire on a decent competence, otherwise great injustice will be done to a few good and faithful servants, the value of whose past services cannot be over-estimated.

It is the intention to shortly establish a School of Instruction in Artillery range-finding at Aldershot.

The following has been issued during the week, for guidance of Commanding Officers in carrying out the second part of the annual course of musketry at Aldershot:—"A commanding officer may make any arrangement he thinks fit in the way of keeping men off duty for the day, whenever a troop or company is to be exercised in any practice of the second part of the annual course. A commanding officer may, if he thinks fit, order any man who may make bad practice at any distance in the first part of the annual course, to fire part (or the whole, if necessary,) of the 40 rounds of the second part in extra practice. This extra practice may take place, if desired, during the time the man is engaged in his annual course. The results will be shown under 'Exercise of Worst Shots,' in all troop, company, regimental, and battalion returns."

Lieutenant B. W. Anstruther, Royal Engineers, has been specially selected to proceed in an official capacity to the forthcoming Electrical Exhibition to be held at Vienna.

A suburban Volunteer Battalion has not only adopted (with the prefix 1 V.B.) the title of the old historic regiment with which it has become associated in the meshes of the territorial scheme, but it has actually taken to wearing, on the collar of the tunic, the badge indicating the origin of that regiment. There is only one step further to be taken in the downward course of ridiculous assumptions of unearned distinctions, and that is the wearing of the names of old victories and mottoes granted for special services. When the Kilkenny Militia mount the motto "Virtutis Namurcensis Præmium" with the names of Marlborough's victories, and when the Dorsetshire Militia and Volunteers have "Primus in Indis" and "Plassey," the climax of absurdity will be reached.

We understand that it is not unlikely that the 19th Hussars, at present on service in Egypt, may be very shortly moved to the Cape, as the force of cavalry in that country is not considered sufficient, should further complications shortly arise in those parts.

We learn that the appointment of Inspector-General of Cavalry in Great Britain has been promised to Major-General Sir Drury-Lowe, K.C.B., when the present incumbent, Sir F. W. J. FitzWygram, Bart., vacates the post, in April. Some persons were under the impression that Major-General C. Fraser, V.C., C.B., Inspector-General of Cavalry in Ireland, would be moved to Aldershot; but the claims of Sir Drury-Lowe are justly considered to entitle him to receive that reward; besides which, General Fraser has an appointment at the present time, the tenure of which has not expired.

The 83rd Regiment—now styled the Royal Irish Rifles—were inspected a few days ago at Dover by the General Officer commanding the District. The regiment—save the mark!—turned out on parade for inspection 162 men of all ranks! This regiment returned from India and Natal eighteen months ago with over 700 soldiers, who excited the praise of the Commander-in-Chief. This is what General Sir Lintorn Simmons probably calls *waste;* the Army calls it *destruction.*

We observed that in a recent *Gazette* Capt. Gibaut had retired from the Army Pay Department, and, we believe, on a pension of £200 per annum. This officer has over 25 years' service, of which over 20 years have been on full pay, but he is indebted to the fact of his being able to pass a medical board for his pension, as unless his state of health had been such as to permit of his doing so, he would, under the new Warrant, have had to serve another five years before being able to claim his retirement. It is as well that those who contemplate leaving their regiments for the Army Pay Department should know that when once gazetted to it, they will be unable to claim a pension until they have served five years longer than they would have to do if they remain with their regiments.

The trials of the 7-pounder 400-lb. rifled muzzle-loading mountain-gun equipment are now proceeding at Aldershot. Several officers of Artillery have been especially ordered to the Camp, for the purpose of conducting these experimental trials.

We find that we were correct last week in our information regarding the new Warrant for compensation for officers compulsorily removed from commands and Staff employ. The Warrant is published in the July *Army List.* This Warrant totally ignores all allowances, house rent, &c., and the various items which make up the total value of a command or appointment. The Warrant does not allow compensation for absolute loss of pay and emoluments; but only nett loss between Staff pay and retired pay to officers holding extra-regimental appointments, and turned out of the Army under Warrant of June, 1881. This is trifling with the removed officers, and intensifying the widespread discontent which now exists amongst officers generally, and we are informed that several officers have already remonstrated against this off-hand settlement of a vexed question. The Warrant, moreover, does not pay down the loss in cash, but makes insufficient additions to removed officers' pensions which cannot be capitalised at their ages without very heavy loss. This unfortunate Warrant affects a great many officers, from General Sir Daniel Lysons, K.C.B., commanding at Aldershot, to the latest removed Regimental District Colonel. These officers, many of them distinguished soldiers, have paid large sums in hard cash, under Government rules and regulations, to arrive at these positions. Their money is retained by the State; they are removed to make promotion for their juniors. In addition, they are now denied compensation even for absolute loss. This question cannot be so settled by the War Office. It evidently must go before "independent arbitration," and Parliamentary action may have to be taken.

The new system of musketry looked feasible on paper, but now that an attempt is being made to carry it into effect, it is found to be totally impracticable, except at a few stations on home service. The Diary published in G.O. 52 of March 29 provides for one company to be at the first part, and the others doing the second part on different days of the month. This may be all very well where the range is close to barracks, but at stations such as Sheffield, Manchester, London, Dublin, York, Cork, Bradford, Weedon, Portsmouth, &c., it is found that when a company goes down to fire its first part, it must stay and finish the second part also, otherwise the public will be put to the expense of moving the companies sometimes more than 100 miles twice a year, instead of once. The companies at Sheffield, for instance, go to Fleetwood or Strensall, those in London (the Guards) to Aldershot, those at Cork to Youghal, &c. So that, although the Order has only been published about a month, we have practically reverted to the old system, and the order is now being passed to all parts of the kingdom by letter and telegraph, "As you were." To any one at all acquainted with musketry, this is not surprising. This grand scheme of the 22 working days, &c., has ended in a dismal failure in the short space of two months. In what direction, we wonder, will our reformers next give evidence of their incapacity?

We are enabled to give the number of men in the Territorial Regiments, born in the Regimental Districts which were not comprised in our former list:—16th (Bedford), 296; 47th (North Lancashire—Preston), 291; 4th (King's Own—Lancaster), 290; 31st (East Surrey—Kingston), 280; 39th (Dorset—Dorchester), 260; 22nd (Cheshire—Chester), 259; 14th (West York—York), 259; 107th (Munster Fusiliers—Tralee), 249; 43rd (Oxford), 219; 5th (Northumberland—Newcastle), 203; 23rd (Welsh Fusiliers—Wrexham), 199; 35th (Sussex—Chichester), 189; 21st (Scots Fusiliers—Ayr), 184; 32nd (Cornwall—Bodmin), 173; 75th (Gordon Highlanders—Aberdeen), 171; 91st (Argyll and Sutherland Highlanders—Stirling), 169; 72nd (Seaforth Highlanders—Fort George), 151; 7th and 57th (Middlesex—Hounslow), 299; 19th (York—Richmond), 127; 2nd West Surrey—Guildford), 121; 100th (Leinster—Birr), 94; 68th (Durham—Sunderland), 89; 79th (Cameron Highlanders—Fort George), 83; 88th (Connaught Rangers—Galway), 64; 51st (S. York) and 65th (York and Lancaster—Pontefract), 132; 15th (East York—Beverley), 58; 30th (East Lancashire—Burnley), 57; 41st (Welsh—Cardiff), 48; and 87th (Irish Fusiliers—Armagh), 43.

The Royal Regiment of Artillery continues as it has been for the last two years, some 1,500 men under its strength, nearly every battery at home being at least one-third deficient. The men on enlistment are not kept for three months at their respective depôts, as in the case of the infantry, and under the so-called Localisation Scheme they continue to be moved about from one battery to another, and from one station to another, irrespective of time or inclination. We can scarcely feel surprised that with such an organisation it is found impossible now to obtain the necessary recruits.

An interesting Blue-book gives the proportion of English, Scotch, and Irish soldiers in the various branches of the Army on January 1, 1883:—In the Household Cavalry there are, English, 911; Scotch, 197; Irish, 90. In the Cavalry of the Line there are, English, 7,668; Scotch, 685; Irish, 1,024. In the Royal Artillery, English, 11,565; Scotch, 961; Irish, 2,373. In the Royal Engineers, English, 2,633; Scotch, 248; Irish, 373. In the Foot Guards, English, 4,260; Scotch, 828; Irish, 355. In the Infantry, English, 34,823; Scotch, 4,649; Irish, 11,966. It is difficult to see from this how Scotland is to furnish recruits for nine Territorial Regiments having seventeen Line battalions.

The following incident of the early part of the recent campaign deserves to be recorded. The famous —— Regiment arrived in Alexandria with its glorious colours inscribed with its victories of 40 centuries, more or less, and, having to leave them at the base, were ordered to place them in safe keeping on board H.M.S. *Helicon.* Guarded by six kilted Highlanders and two officers with drawn swords, the sacred banners were taken in state alongside. With the hospitality that characterises her Majesty's Navy, the officers were taken into the ward-room for refreshment, and the bo'sun was ordered to see to the precious charge. Jack looked over the side, and, to the horror of the hearers, said, "'Ere, you Marines, bring up them flags!"

The Navy.

ADMIRALTY, July 6, 1883.

Assistant-Paymaster Alfred George Hill has been promoted to the rank of Paymrster in her Majesty's Fleet, with seniority of June 2.

ADMIRALTY, July 7, 1883.

Charles Morgan, Esq., B.A., has been appointed a Naval Instructor in her Majesty's Fleet, with seniority of June 28.

ADMIRALTY, July 9, 1883.

Royal Marine Artillery.—Colonel-Commandant Henry Way Mawbey has been placed on the Retired List, period of command having expired; Colonel Second Commandant Edmund Henry Cox to be Colonel-Commandant, vice Mawbey; Lieutenant-Colonel and Colonel George Brydges to be Colonel Second Commandant, vice Cox (all three dated July 3).

Royal Marine Light Infantry.—Captain and Brevet Major Harry Montgomerie Clements to be Major, vice Holmes, promoted (July 4).

ST. JAMES'S PALACE, June 28, 1883.

The Queen has been pleased to appoint Admiral the Honourable Sir James Robert Drummond, G.C.B., to be one of her Majesty's Gentleman Ushers Daily Waiters, in the room of General the Right Honourable Sir William Thomas Knollys, K.C.B., deceased.

ADMIRALTY, July 10, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and April 30, 1877, Chief Engineer Francis Martin has been placed on the Retired List of his rank from the 8th inst.; and Acting Engineer Thomas Green has been confirmed as Engineer in her Majesty's Fleet, with seniority of September 23, 1881.

ADMIRALTY, July 11, 1883.

Assistant-Paymaster William Jocelyn Nash has been promoted to the rank of Paymaster in her Majesty's Fleet, with seniority of the 10th inst.

ADMIRALTY, July 12, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Lieutenant Herbert Charles Alexander Brand has been placed on the Retired List from the 10th inst., with permission to assume the rank and title of Commander on the Retired List.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and April 30, 1877, Chief Inspector of Machinery Richard Henry Sleeman has been placed on the Retired List from the 7th inst.

APPOINTMENTS.

Commander—Arthur W. Moore, to the Duncan, additional, for the Frolic.

Staff Commanders—William B. Goldsmith, to the Victoria and Albert, for service in the Alberta, vice Balliston; William P. Haynes, to the Victoria and Albert, for service in yachts, vice Goldsmith; John G. Boulton, to the Northampton, additional, for surveying service in Canada.

Lieutenants—H. A. Ogle, to the Excellent, additional, to requalify in gunnery (on expiration of leave); Godfrey H. B. Mundy, to the Cockchafer, additional; Logan S. Stansfeld, to the Bullfrog, additional; Charles H. Cross, to the Nelson, vice Powell; George L. M. Leckie, to the Tyne, vice Hungerford; Patrick C. Dudgeon, to the Duke of Wellington, vice Warner; William G. Stewart, to the Curaçoa, vice Evershed; Alfred E. Tizard, to the Curaçoa, vice Newland; Edward C. St. J. B. Neal, to the Daring, vice Smith; Frederick L. Lawrence, William A. L. L. Henriques, Charles W. W. Ingram, and William F. Forrest, to the Malabar; Henry A. Ogle, to the Excellent, additional.

Navigating Lieutenant—John Stocker, to the Malabar (to date August 6).

Sub-Lieutenants—William H. Eyre, to the Starling, vice Ricardo; William James, to the Amethyst, vice Beck; Harry H. Stillman, to the Boscawen, additional, for the Seaflower.

Midshipman—Francis F. Haworth-Booth, to the Impregnable, for the Nautilus.

Staff Surgeons—George H. Madley, to the President, additional, for temporary service, during absence of Fleet Surgeon Lees; Robert Turner, to the Victor Emanuel.

Surgeons—Edward Ferguson, to the Vernon; T. J. Preston, to the Hibernia; C. L. Vasey, to the Sultan.

Chief Engineers—John C. Weeks, to the Indus, additional, for the Cambrian, vice Trubshaw; Francis E. Julian, to the Cambridge, additional, for the Gorgon, vice Edmunds; James Stephens, to the Indus, for the Thalia, vice Ewart, on paying-off.

Paymaster—John J. Hayward, to the Malabar.

Assistant-Paymaster—Thomas Guard, to the Mallard, vice Truscott.

Engineers—W. H. Riley, to the President, additional; William S. Stribbing, to the Zephyr, vice Welch; William Sharp, to the Indus, additional, for the Bellerophon; William J. Mabb, to the Pembroke, additional, for the Conqueror.

Chief Boatswain—John Oliver, to the Pembroke Dockyard, vice Armitage.

Boatswains—J. S. M. Hill, to the Pembroke, additional, for the Leander; John Abbott, William J. Pearson, James Hamey, and James Fitzgerald, to the Malabar, for quarter-deck duties; William Hurlow, to the Malabar, vice Lee; Henry Lee, to the Royal Victoria Yard, Deptford, vice Oliver.

Entries.

Acting Assistant-Engineers—H. R. Hearson, E. G. Guyatt, H. L. Manning, Frederick Jarvis, N. H. Meadus, A. F. Well, C. J. James, George Pascoe, and E. W. Cudlip.

Coastguard.

Chief Boatmen—William Hewett, Cairn Ryan, to be chief boatman-in-charge, Port Patrick, vice William Cox, promoted; William McDonald, Crosshaven, to be chief boatman-in-charge, East Ferry, vice Mullany, pensioned.

Agincourt, Capt. Fellowes, flagship of Vice-Admiral Sir William M. Dowell, K.C.B., in command of the Channel Squadron, arrived at Bantry Bay on the 8th inst., and anchored at Berehaven.

Alexandra, Capt. H. H. Rawson, C.B., flagship of Vice-Admiral the Lord John Hay, K.C.B., Commanding-in-Chief in the Mediterranean, was to leave Valona on July 13 with the Squadron, for Corfu, calling at Taranto on July 17, and returning to Corfu by July 22. The Humber left Valona on the 9th inst. for Malta. A correspondent writes:—"The weather division arrived off Ancona on the evening of the 28th ult. The engines were stopped, and in the morning the lee division from Fiume joined the flag. The whole proceeded into the roadstead, and anchored about 7 p.m. The same evening a fête was held at the baths in our honour, and was very largely attended. The entertainment was to consist of illuminations, fireworks, and dancing. The two former came off, but on account of the crowded state of the grounds dancing was impossible. As a matter of fact, the entertainment was got up to put money into the pockets of the proprietor of the café attached to the place, and the British Naval officer was an exhibition for the small sum of three-halfpence, which was the fee for admission. The following day (Saturday) a cricket-match was played on the parade-ground, the most perfect ground for cricket on the station. The teams (14 in each) were one from the Alexandra, Monarch, Inflexible, and Carysfort, and the other from the Temeraire, Superb, and Helicon. The game resulted in favour of the latter (although drawn), who obtained 252 runs against their opponents' 59 for the loss of ten wickets. The same night a garden party was given at the Stablemento Derico, and was in keeping with the affair of the baths. We leave here here at 6 a.m. for Avlona, which place we expect to reach on the 5th or 6th inst., Termoli being cut out of the programme. The Superb leaves for Malta on our arrival. The Humber is to be there, and will provision the fleet, and on arrival at Corfu a collier is expected with coal sufficient to give each vessel the quantity she is short. Our stay will be about three weeks, and the regatta will be held."

Amethyst, Capt. Bowden Smith, was at Monte Video on July 8, and will shortly proceed to Rio de Janeiro.

Audacious, Capt. Tracey, flagship of Vice-Admiral G. O. Willes, C.B., Commanding-in-Chief on the China station, was at Shanghai on July 6.

Briton, Capt. A. J. Kennedy, arrived at Zanzibar on June 10, and has been ordered by the Commander-in-Chief to remain there for the present, in view of possible eventualities in Madagascar. Sir Wm. Hewett has now present with him at Trincomalee the Tourmaline, Osprey, and Ranger. The first of the French reinforcements for Tonquin has already passed here, and the arrival of the French ironclad or transport, bound for Cochin China, is now a matter of almost daily occurrence. The opinion appears to be prevalent amongst the officers of the expeditionary force that a rupture with China is within measurable distance, and one for which the French Government are making adequate preparation. In view of the naval force which the French are at present despatching to Chinese waters, it would seem advisable to make some substantial addition to our fleet out there, as at present we have only a solitary ironclad—the Audacious—in that part of the world. The Home Government have at length given the necessary permission for the construction of a coaling station on Perim Island, and the company which has undertaken the construction and maintenance of it are this week despatching their pioneers to make the necessary arrangements. The manager of the coaling station is a naval officer, Com. Mountjoy Squire, and it is believed the enterprise will receive a large amount of support, as steamers by coaling there will save a large amount of time, heavy port dues at Aden, and avoid the rigid quarantine laws which obtain at the latter place. It is now proposed to connect Perim with Aden by cable, so that steamers will be able to telegraph their arrival at the former place. The Briton has this week been ordered to Tamatave.

Canada, Capt. Durrant, was at Madeira on July 2. A correspondent writes:—"We arrived here on Friday last, after a very pleasant trip of ten days, just too late to catch the mail for England. Nothing of interest occurred during the voyage, drills being the order of the day. On June 21 we went to target practice, which was on the whole very satisfactory, considering that we were rolling the muzzles of our guns under water at the time. We did not have much chance of testing the sea-going qualities of the Canada, the weather all the way being delightful, but crossing the bay she gave us a slight illustration of her rolling capabilities, which are by no means bad, and it is generally thought that when we do get a little bad weather she will prove a 'brute.' On our arrival here we found the American training corvette St. Mary's, and the French frigates Alceste and Favorite. The American sailed on Saturday for St. Vincent; the French vessels are still here. Apparently, it is not generally known yet that Prince George is on board, as little or no courtesy is shown him. The captain and Prince George, with some of the officers, have had a few excursions on horseback inland, which is about the only pleasure one can indulge in here, there being no ground whatever fit for cricket or other sports, so our cricketers (and, I think, we muster a moderately strong team) will have to wait until we arrive at our destination."

Dragon, Com. Bolitho, arrived at Zanzibar early in the week, bearing despatches from Tamatave reporting the outrage on the British flag perpetrated by Vice-Admiral Pierre, commanding the French squadron in Malagasy waters.

Euryalus, Capt. Hastings, C.B., flagship of Rear-Admiral Sir William Hewett, V.C., Commanding-in-Chief in the East Indies, was at Trincomalee up to June 12, and would leave about July 15 for Mauritius, and leave Mauritius about Aug. 15 for Zanzibar, arriving there about Aug. 25, unless complications in Madagascar required her presence off that island. The Eclipse has since been ordered to Plymouth. The Briton arrived at Zanzibar on June 10, and has been ordered to Tamatave. The Tourmaline arrived at Trincomalee on June 8. During the absence of the Commander-in-Chief from Indian waters, Capt. Boyle will conduct duties of senior officer in the Bay of Bengal, with the Osprey under his orders. Woodlark in the Persian Gulf as senior officer's ship; remains there. Arab and Philomel in the Persian Gulf; will remain under orders of Com. Nesham, of the Woodlark. Ranger was at Trincomalee on June 8, and would leave during the first week in July for Mauritius to be docked to repair copper and make good defect in feathering gear of screw propeller. Osprey arrived at Trincomalee on June 9, and will remain in the Bay of Bengal, under orders of the captain of the Tourmaline. Dryad and Dragon were at Tamatave, Madagascar. Harrier and Undine are stationed at Zanzibar and on the east coast of Africa, for the suppression of the slave trade.

Flirt, Com. Robert Hammick, was senior officer at Cape Coast Castle up to June 18; arrived at Accra June 11 from Ascension, and will remain for the present at Cape Coast Castle. The Algerine, on arrival of Opal, would proceed to St. Paul de Loanda. The Bullfrog was expected from St. Helena and Ascension in the middle of July. The Stork was at St. Paul de Loanda, and would proceed to St. Helena and Ascension when relieved by the Algerine. The Opal and Alecto was at Sierra Leone on June 21, and would leave at once for Cape Coast Castle (expected to arrive end of June). The Pioneer has reached Madeira with the Tyne.

Invincible, Capt. Molyneux, was at Alexandria on June 20, when a court-martial was held on board for the trial of George Quinn, stoker of the Iris, on a charge of striking Mr. F. Moore, engineer. The prisoner was found guilty, and was sentenced to five years' penal servitude. His Highness the Khedive held a private reception on the 21st ult., when Capt. Molyneux, Com. Henderson, Lieut. Grieve, and Sub-Lieut. Couper, of the Invincible, were invested by his Highness with the Orders of the Osmanieh and the Medjidieh, conferred upon them for their services during the late Egyptian Campaign. The Invincible left on the morning of the 23rd for Malta. The Condor remains at Alexandria as senior officer.

Iris, Capt. Seymour, arrived at Alexandria on June 18, and left on June 23 for Port Said. There is little chance of her being paid-off this year, and officers and men are much disgusted at the prospect of the commission being stretched out to nearly four years.

Lord Warden, Capt. Kennedy, flagship of Rear-Admiral Sir Anthony Hoskins, K.C.B., commanding the Reserve Squadron, left Lerwick on the 9th inst. for Orkney Islands. where the squadron arrived on July 10, leaving again on the 12th on its cruise down the Scotch coast. Before leaving Heligoland, the ships were paid an official visit by the Lieutenant-Governor. An unfortunate accident happened to the Squadron on their leaving, namely, the grounding of the Valiant. She was anchored next to the flag, and, strange, to say, was turning in almost the same water, but by some unaccountable means got fast on a small reef, and was held there until the next tide, about six hours, when the Hercules towed her off with very little difficulty, and it is believed that she is in no way injured. This is quite a different place from where, it will be remembered, the Repulse grounded two years since; that place is now buoyed. After the Valiant rejoined, the Squadron proceeded on their course to Bergen; fine weather—rather hazy sometimes—was experienced during the passage, enabling the morning and evening evolutions to be well carried out, steam tactics and target practice also forming a part of the programme. Off Kiorsfiord, pilots were embarked, one for each vessel, who took the Squadron to the anchorage at Bergen on the afternoon of June 30. During the stay at Bergen, most pleasant times were experienced. Several leave men were allowed on shore every day up to 9 o'clock, and privilege leave on Sunday afternoon, and the hospitality received from all quarters made both officer and man feel greatly indebted to the inhabitants of this pretty Norwegian town. Every day the ships were crowded with visitors, more especially on Sunday, and serenading parties were the life of the Fleet by moonlight. On Monday, the 2nd inst., H.M.S. Repulse, Capt. George Le Sullivan, was inspected by the Admiral, and notwithstanding the numerous drills, &c., which were performed by the crew, the inspection was satisfactory. On Tuesday (3rd), a court-martial assembled on board H.M.S. Shannon, Capt. Edward S. Adeane, C.M.G., president, for the trial of Pte. Royal, a marine belonging to H.M.S. Lord Warden, for refusing to obey orders twice when warned off to clean the capstan. Capt. William R. Kennedy prosecuted, and Coms. John S. Rainier, of the Valiant, Herbert W. S. Gibson, of the Lord Warden, Henry E. Walters, of the Hercules, and Mr. Henry W. Rickard, officiating as deputy-judge-advocate, comprised the court. Both charges were proved, and the prisoner sentenced to imprisonment, with hard labour, for eighteen months, and dismissed her Majesty's service. Another Marine, belonging to the same ship, who the prisoner called as the chief witness, was sentenced by the court to three months' imprisonment, with hard labour, for giving false evidence. On Tuesday evening, the British Consul, Mr. Johnson, gave a dinner to the officers of the fleet at his country residence, at Damsgaar. Dancing was kept up until 3.30 a.m. The admiral and captains of the ships have also been interchanging dinner parties. On Wednesday all the ships were open to the Consul's and officers' friends. The Commander-in-Chief of the military forces visited the flagship, and was saluted with fifteen guns on disembarkation. An inquiry has been held on board the Lord Warden, relative to the grounding of H.M.S. Valiant at Heligoland. The result is not yet known. On leaving Bergen, on the evening of Wednesday, the 14th ult., each ship embarked a pilot for the purpose of navigating the Fleet through the north passage. Hundreds of spectators were watching the Squadron leave the harbour from the surrounding rocks, and it being such a delightful evening, no doubt the scene was grand. Thursday brought a very nasty fog, all the steam sirens were kept going and fog-buoys towed astern of each ship up to 9 p.m., when the fog lifted. On Friday morning, the Squadron dispersed, except Valiant, for target-practice, expending half a quarter's allowance. The Valiant, in the meanwhile, was inspected by the Admiral. About 1 p.m., the ships again formed into position, and, steaming very slow, arrived at Lerwick, in the Shetland Islands, at 6 p.m. Just before coming to an anchor, a waterman's boat was endeavouring to cross the bows of the Valiant, when she was carried by the tide right under the cutwater and capsized, but as it happened only one man was in her. The doctor of the Hector gallantly sprang from the poop to the rescue, and waited some time in the water for the unfortunate man to appear, and in the meanwhile the Defence's boat was to the scene, and picked up the doctor. Presently the capsized boat was discovered, bottom up, and the doctor, thinking the man might be underneath, dived for the second time, and finding him clinging to one of the thwarts brought him to the surface alive. He has, however, since succumbed.

Merlin, Lieut. and Com. Brenton, left Plymouth Sound on Saturday for the China station, calling at Madeira, St. Vincent, and the Cape of Good Hope.

Nelson, Comdre. J. E. Erskine, A.D.C., was at Suva, Fiji; telegraphed, *viâ* Sydney, July 12; would return to Sydney in August.

Northampton, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., was at Halifax up to June 29. The Tenedos was at Sydney, Cape Breton, on June 29, as senior officer's ship on the coast of Newfoundland. The Flamingo was at St. John's on June 10. The Foam was at Sydney, Cape Breton, on June 10. The Mallard is at Carleton, Bay of Chaleur, for the present. The Dido is at Bermuda; was docked on June 9, and will join the flag on completion of refit about the first week in August. The Garnet was at Antigua on June 10, as senior officer's ship, Barbadoes Division. The Griffon and Fantôme are at Jamaica, for general service on the Jamaica Division.

Raven, Lieut. and Com. Harry L. Ross, arrived at St. Vincent (Cape de Verdes) on June 27, and found the Satellite and Firefly at anchorage.

Superb, Capt. T. Le H. Ward, C.B., arrived at Malta on July 9.

Swiftsure, Capt. Aitchison, flagship to Rear-Admiral Lyons, Commanding-in-Chief in the Pacific, remains at Esquimault. Letters have been received at the Admiralty up to June 16. The Comus will proceed to England from Coquimbo when relieved by the Satellite. The Constance was at Callao on April 23; will remain on the coasts of Peru and Chili under the orders of senior officer. The Heroine was at Guayaquil on May 17; on passage to Esquimault from Panama. The Mutine was at Esquimault on June 16; about to proceed with the Commander-in-Chief to Nanaimo and Burrard Inlet. After arrival of the Heroine at Esquimault, will proceed to the coast of Chili. The Sappho on passage to Esquimault from Panama. The Kingfisher will return to Coquimbo after visiting the Society, Cook, and Hervey Groups of Islands, and Pitcairn Island. Letters have also been received at the Admiralty from the senior officer on the coasts of Chili and Peru in the Comus, up to June 4:—"Comus cruising on coast of Peru, in telegraphic communication with Callao; Constance at Guayaquil June 4, would eventually proceed to Payta and Callao; Heroine and Sappho *en route* to Esquimault."

The Queen has approved of Com. H. Fawkes being appointed to the command of the Royal yacht Osborne, but Capt. Rose is to retain his present position until the close of the summer season.

Staff Com. W. B. Goldsmith has been appointed to the Royal yacht Alberta, in succession to Sir A. Balliston, and the vacancy caused by his transfer from the Elfin will be filled by the appointment to her of Staff Com. W. P. Haynes, of H.M.S. Hercules.

We understand that the Hydrographer of the Navy has selected Staff Com. J. G. Boulton for surveying duties on the North America and West Indies station. This officer was first employed in the Surveying Service in 1858, when he assisted in the survey of the Hebrides and coast of Newfoundland until 1860. He was then sent to Victoria, but only remained there a twelvemonth, being selected for surveying and pilotage duties with the squadron during the New Zealand War. From 1863 he was employed in the New South Wales Survey, and in 1865 was transferred to that of the Cape of Good Hope, whence he was invalided. From 1872 to 1881 he was employed surveying the Gulf of St. Lawrence, the coast of Newfoundland, Labrador, and Hudson's Straits, and during the past year has been engaged in the survey of the west coast of England. Staff Com. Boulton will now be employed in Canada, and we can but congratulate the Hydrographer on the selection he has made for this important work.

The following is a list of the successful engineer students who have passed the necessary examination for acting assistant-engineers in the Navy:—H. Gregory, S. A. Screech, G. R. Taylor, R. W. Jones, F. W. Austin, F. W. Highton, W. R. Parker, H. Weir, J. H. Watson, W. T. Paul, G. C. Bath, W. J. Waugh, N. Blakeman, J. L. Fleetwood, A. Hart, J. D. Rees, H. P. Vining, S. G. Haddock, G. T. J. Ludlow, W. P. Chapman, F. P. Smith, B. J. Guise, R. St. J. Raper, C. E. Shorey, L. E. Thumwood, G. W. Noll, W. Monkhouse, W. J. Anderson, F. R. Stuttaford, and F. M. D. Spry. Only Messrs. Ludlow, Noll, and Anderson were students under the old regulations, the others passing out of the Marlborough.

THE COASTGUARD.

The Coastguard is a force which elicits very little interest on the part of the public. This apathy seems strange, since it is our first and undoubtedly most important Naval Reserve, and a force which, in its civil capacity, renders valuable services, the carrying-out of which formerly required the employment of a civil force, and would still, in the absence of the Coastguard. Serving the country as it does in a dual capacity—in time of peace acting as a coast police, and in case of war being a reliable and efficient fighting force—ought to entitle it to more consideration. It is still by some regarded merely as a preventive force, and many think that surveying the horizon with his telescope for suspicious-looking craft, which seldom appear, is the chief duty of the Coastguardsman. But the days of old Barnabys and Daniel Squibbs, with their romantic smuggling adventures, are consigned to the oblivion of the past as far as the Coastguard is concerned, and the modern representative of the preventive man finds numerous more important duties to occupy his time and call forth his energy. Since the transfer in 1856 of the control of the Coastguard from the Customs Department to the Admiralty, it has been recruited from experienced seamen serving in the Royal Navy. These have been gradually absorbed by the Coastguard, till it has become, as the saying goes, "part and parcel of the Navy." In fact, the present Coastguards may be regarded in reality as part of the crews of the ships of the Reserve Squadron. but doing duty on shore, while liable to be embarked at a moment's notice. A reorganisation of the Coastguard has for some time been talked about. The report made by H.R.H. the Duke of Edinburgh on the conclusion of his term of office as Superintendent of Naval Reserves, contains several suggestions relative to the force, well calculated to increase its effectiveness as a first reserve. Even supposing the adoption of these suggestions to be essential, it would not necessitate anything like reorganisation to carry them out, and it can scarcely be doubted that the force in its present condition is as efficient as its numerical strength can possibly permit it to be. If there is anything needed, it is to increase the strength of the force. To do this without admitting men whose character and qualifications are not up to the desired standard, it will be necessary to ameliorate certain grievances of which the members of the force complain, and sweep away the anomalies which exist between relative ranks in the Coastguard and Navy. The corresponding ranks afloat are better paid, and have manifold better prospects of advancement. The reason alleged for not giving the same pay to the Coastguard, is that the risk of life in the force is not so great as afloat. This may be a fact, but it is also a fact that the duties performed by the force in connection with shipwreck involve considerable risk of life, and are of a monotonous kind, entailing many hardships. The Board of Trade Reports bear splendid testimony to the large number of lives saved by the force in connection with this arduous duty. There are other reasons which render the Coastguard not so desirable a service as some think it. It is all very well to talk of the comforts of home, "in a cottage by the sea," with little to do in the way of hard work. Such ideas are acquired at watering-places where the duty is often mere routine, and where the Coastguard may apparently be better off than in a relative rank afloat. But such places are the exceptions to the rule, and differ vastly from an important boarding station or from one in such a place as the wilds of Connemara, where the Coastguardsman has often to go twenty miles for provisions, and where his family grows up without the meagrest education. At the expiration of his time in such a place, it often costs the Coastguardsman half his first year's miserable pension to remove to a locality where he can obtain employment and provide for his family. Against these drawbacks the only inducements offered men to join the force are the previously-referred-to comforts of home and the chance of being stationed at one of those favourite places so frequently, but erroneously, selected as instances to depict life in the Coastguard. The removal of the disabilities which the men complain of would induce desirable candidates to join, and, undoubtedly, the force could, with advantage to the country, be largely increased. There are various duties in our ports and harbours performed by civil bodies which could be entrusted to the Coastguard with this benefit to the country, that in case of an emergency the greater part of the men so employed would be available for service afloat, and their place could temporarily be supplied from other sources.

A distinguished meritorious service pension of £20 per annum, having become vacant by the death of Serjt.-Major D. Simpson, has been conferred by the Secretary of State for India in Council on Staff-Serjt. Joseph Thompson, late of Warley Depôt, who was discharged on March 15, 1861, his services being no longer required, the Depôt at Warley being about to be broken up. After a service of over 25 years with pension of 2s. per diem, and medal for long service and good conduct, Serjt. Thompson is one of the few left of a once famous service.

The following additions are to be made to the Queen's Regulations, Page 398, Art. 1235:—Defects made good by Private Trade.—2*a*. Whenever it is proposed that the repair of ships shall be undertaken by the private trade, provision is to be made in the specification for all new copper and mixed metal being obtained from a dockyard, if practicable, where they can be provided more cheaply of the best quality, and of Admiralty pattern marked with the broad arrow. The same course is to be followed with such of the under-mentioned articles as it may be necessary to renew, *i.e.*, when those on board cannot be repaired economically, viz.:—Blocks, wood and iron, other than patent blocks; chain rigging; copper and naval brass sheathing with nails; copper and naval brass bolt-stave; dead-eyes; gun-metal cocks and valves; gun-metal companion hinges; locks, brass and iron; shivers for blocks, brass and lignum-vitæ; canvas. The supplies are to be made without charge to the contractors, the quantities required being previously estimated by the surveying officers. 2*b*. A list of the articles required to be supplied by the Admiralty to the contractors for carrying out the work is to be prepared (on Form D. 501) with a view to arrangements being made for the supply of the stores. The list is to give full particulars of the stores required as shown in the rate book for naval stores. 2*c*. This list is to be prepared in triplicate, and upon it the captain is to state which, if any, of the stores can be spared from the ship, and he is to send two copies of the list to the Commander-in-Chief or Senior Naval Officer. If abroad, the Commander-in-Chief or Senior Naval Officer on giving orders for the repairs, is to send the list to the depôt of naval stores for the necessary supplies to be made of the stores which cannot be spared from the ship, and he is to forward a copy of the list to the Admiralty with his report. 2*d*. If the ship is a Coastguard ship at home, the district captain is to forward two copies of the list with the tenders to the Admiral Superintendent of Naval Reserves, and when orders are given for the repairs, the list is to be sent to the dockyard which is to supply the stores. If the ship is at home, and not a Coastguard ship, the captain is to forward the lists to the Commander-in-Chief for transmission to the Admiralty for the same purpose. 2*e*. It should be stipulated also in the specification that all old copper, metal, lead, and other valuable arisings from repairs shall remain the property of the Admiralty. All these arisings are to be carefully collected and taken account of by the ship's officers, and the captain or commanding officer will cause all such articles to be returned as early as practicable to the nearest dockyard, having previously forwarded a list of them for the information and guidance of the dockyard officers. 2*f*. When the repairs are executed under the superintendence of a resident or visiting dockyard overseer, he is to see that the arisings are carefully collected, and that a list of them is prepared. The list and articles are to be forwarded as soon as practicable to the dockyard."

Viscount Hood's second son, the Hon. Horace Hood, a youngster not yet thirteen years of age, has past first in a large field of candidates for naval cadetships—a fitting position for a descendant of that doughty seaman, Sir Samuel Hood, who a hundred years ago was returning home with Rodney victorious from their memorable action with the Compte de Grasse. Among other successful competitors for cadetships is the Hon. Edward Boyle, fifth son of the Earl of Shannon, who joins the service in which his uncle and grand-uncle died. Herbert George Brand, who is in the passed list, is son of the Surveyor-General of the Ordnance, and nephew of Capt. T. S. Brand, R.N., who commanded the Bittern at the bombardment of Alexandria. It is always pleasing to find the old naval families and names represented in the cadets' list, and his many friends will therefore note with pleasure that Vice-Admiral Luard, the popular President of the Royal Naval College, has given a son to the service. Rear-Admirals Soady and Sholto Douglas have now also sons to represent them in the Navy, and a Hickley is in the passed list.—*Whitehall Review*.

The French Mediterranean Squadron, under the command of Vice-Admiral Krantz, has arrived in Suda Bay.

BIRTH.

Wilcox.—At Bedford, the wife of Major-General E. B. C. Wilcox late Bengal Staff Corps, of a daughter.

MARRIAGES.

Anton—Brown.—On the 6th inst., at St. Paul's, Holdgate, York, by the Rev. T. J. Clarke, M.A. Rector, assisted by the Rev. A. G. Tweedie, M.A., Rector of All Saints, North Street, Alexander Henry Gibbs Anton, Captain, 2nd Battalion, Connaught Rangers, eldest son of the late Colonel Anton, Governor of the Gambia, to Mary Louisa, only daughter of Henry Brown, Esq., York.

Harrison—Wilcocks.—On July 10, at St. James-the-Less, Plymouth, by the Rev. F. Gurney Vicar of the parish, assisted by the Rev. H. N. Purcell, Rector of Fowey, Garland W. L. Harrison, Fleet Surgeon, H.M.S. Cambridge, eldest son of the late G. F. B. Harrison, Surgeon, of Devonport, to Alice, eldest daughter of J. Carrall Wilcocks, of 4 Caeradden Terrace, Plymouth.

Landon.—Munro.—On the 7th inst., at St. Barnabas' Church, Kensington, by the Rev. George R. Thornton, Vicar, assisted by the Rev. H. H. Westmore, Harcourt Palmer Landon, of Romford, Essex, to Charlotte Elizabeth Bell, eldest daughter of William Munro, Esq., M.D., C.B., of 64 West Cromwell Road, W., Surgeon-General (Retired List).

ENGINEER SURVEYORSHIPS.

BOARD OF TRADE, MARINE DEPARTMENT.

NOTICE is hereby given that the Board of Trade are about to select Four or more Marine Engineers for Appointment in the Third Class of Engineer Surveyors attached to the Marine Department. Applicants, to be eligible for these Appointments, must have served an apprenticeship as an Engineer or Iron Shipbuilder, must be not less than 25, and not more than 45 years of age, and must have served at sea in charge of engines for at least five years. They must also, at the time of application, be entitled to, and at the time of appointment possess, First-class (Board of Trade) Certificates of Competency as Engineers.

The necessary "Form of application for appointment" will be forwarded, on a request being made by letter to the Assistant-Secretary of the Marine Department, Board of Trade, London.

The applicants selected for competition will have to be examined in Technical Subjects by the Board of Trade Officers, and the two successful candidates will then be appointed, subject to their passing a satisfactory Clerical Examination before the Civil Service Commissioners in :—

1. Handwriting and Orthography.
2. Arithmetic (including Vulgar and Decimal Fractions).
3. English Composition (moderate proficiency).

The Salary of the Third-class Engineer Surveyors commences at £200 per annum, and increases (subject to the Board's approval) by £10 per annum to £300 per annum. Third-class Surveyors are eligible for promotion to the Second and First Classes, for which the rates of salary are £300 to £400, and £400 to £500, respectively.

All personal applications upon the subject of these appointments are expressly prohibited, and if, notwithstanding this prohibition, personal application is made, the fact will be noted against the name of the applicant.

Copies of all letters of recommendation, and copies of Testimonials and Certificates, should be attached to the "Form of Application."

The Board of Trade will not hold themselves responsible for the safety of any original papers sent with the form of application.

No application will be considered for the Appointments above mentioned, unless it is received at the Office of the Board of Trade on or before August 8, 1883. THOMAS GRAY, Assistant-Secretary.

Board of Trade, Marine Department,
July 12, 1883.

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 22, 1883.

AN EXAMINATION of CANDIDATES for COMMISSIONS, to fill thirteen vacancies in the MEDICAL DEPARTMENT of the Royal Navy, will be held at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 13, 1883, and following days, at 10 o'clock.

Candidates are to attend at this Department at 11 o'clock on Thursday, August 9, for preliminary examination as their fitness for the Service.

The Forms to be filled up by Candidates will be supplied on application to this Department, and should be returned as early as possible.

JOHN W. REID, M.D.,
Director-General.

THE LATE ADMIRAL J. D. McCREA. —It is proposed to put a MEMORIAL WINDOW in the Dockyard Chapel, Portsmouth, to the late Rear-Admiral J. D. McCREA. Subscriptions are invited from friends of the Deceased who are willing to aid in the above object, and will be received by G. V. HEGAN, R.N., Flag-Lieutenant, Admiralty House, Portsmouth.

MILITARY INSTRUCTOR WANTED, in September next, by an old-established Army Tutor, to PREPARE his Class of Lieutenants of Militia for their final competitive examination. To secure a first-rate man, recently successful with pupils, a good salary will be given, or perhaps a partnership might be arranged.—"TUTOR," care o May's Advertising Offices, 159 Piccadilly, London.

REQUIRED, for the NORTH-WEST MOUNTED POLICE of CANADA, TWO CAVALRY DRILL INSTRUCTORS. Applicants must be under 35 years of age, and unmarried. Term of engagement, three years. Pay, 6s per diem, free kit, quarters, rations, fuel, and light.

Applications, accompanied by certificates as to character and proficiency, also medical certificate as to health, to be addressed to the COMPTROLLER, N.W. Mounted Police, Department of the Interior, Ottawa, Canada.

A SICK-BERTH STEWARD (Pensioner) seeks employment as ATTENDANT to INVALID GENTLEMAN. Can dress and dispense; or to a MEDICAL GENTLEMAN. Excellent testimonials. All letters punctually attended to.

N.B.—Mr. Norton has always on hand a large stock of present Regulation Uniforms, equal to new, at very low prices.

HOLLOWAY'S OINTMENT and PILLS need only a single trial to make known their capabilities. No external sore or internal inflammation can long withstand the cooling, purifying, and healing influences exerted by these twin Medicaments. Be the mischief recent or chronic, great or slight, painful or simply annoying, it will succumb before the curative virtues of these perfect remedies, which can be rightly applied by any person who will attentively read their accompanying directions, which are propounded in the plainest language, void of technical terms, and printed in the most legible characters. To the man of business, confined to his counting-house, and harassed by engagements, these Pills are invaluable; for the man of pleasure, addicted to free living, they are peerless.

ELEPHANT and CASTLE HORSE REPOSITORY, New Kent Road, London.— Sales by Auction of Horses, Carriages, and Harness, every Monday and Thursday, commencing at 1 o'clock. Stalls should be engaged two days before either sale day. Property sold on Monday paid for on following Thursday, and property sold on Thursday paid for on following Monday. Cheques forwarded to the country on written request. Sales and valuations in town or country.— GEORGE JAMES BRIGGS, Proprietor.

IMPORTANT SALE of MULES, by order of the Right Honourable the SECRETARY of STATE for WAR.—Mr. GEORGE JAMES BRIGGS has been favoured with instructions to sell by Auction without reserve at his ELEPHANT and CASTLE HORSE REPOSITORY, New Kent Road, London, on MONDAY NEXT, July 16, at about 1 o'clock, 27 very serviceable young mules, being the last consignment of those purchased in the Mediterranean expressly for the Egyptian Campaign. Mr. Briggs begs respectfully to inform the public that these mules are not what are termed "cast;" they have all passed a veterinary examination, and are certified to be sound, the very best being reserved for this, the last sale. On view Saturday, and until sale.

To GENTLEMEN'S SERVANTS, RETIRED MILITARY MEN, and OTHERS.

6d, 1/0, 2/6, **KEATING'S POWDER**

Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.

This Powder, so celebrated, is perfectly unrivalled in destroying BUGS, FLEAS, MOTHS BEETLES, and all Insects (whilst perfectly harmless to all animal life). All Woollens and Furs should be well sprinkled with the Powder before placing away. It is invaluable to take to the Seaside. To avoid disappointment, insist upon having

"KEATING'S POWDER."

No other Powder is effectual. Sold only in tins, 6d, 1s, and 2s 6d. Beware of Imitations. Don't be deceived.

THE
CHAMBERLAIN LIGHT.
TO BE SEEN IN OPERATION AT
43 NEW BROAD STREET, E.C.

The Best, Cheapest, Safest, and Purest Light in Existence.

Extract from the Report of Professor H. HUTCHINSON, C.E., F.C.S., &c, on the Apparatus and Light :—

"The apparatus is very simple, uses pure material. The gas does not contain sulphur or sulphur compounds, nor naphthaline. Can be made without the least offensiveness in any house or mansion. Will travel any distance without deposit or condensation.

Hygienically the qualities of this light far surpass those of any other.

May be used as ordinary coal-gas for heating and cooking purposes.

It is the cheapest, brightest, and purest gas known."

Estimates given on application.

ASKIN, GABBITAS, and CO., 38 Sackville Street, London, W. References kindly allowed to the Right Rev. the Chaplain-General to the Forces, and others.

EASTBOURNE. — St. ANDREW'S SCHOOL. ("The MEADS.")

Principal—Rev. F. A. SOUPER, M.A., formerly Head Master of Bradfield College, Berks, and Sub-warden of Trinity College, Glenalmond, N.B.

Young Boys prepared for Entrance Examinations at Public Schools, and for other qualifying and competitive Examinations. Terms for boys over Twelve years of age, 100 guineas per annum.

MILITIA MILITARY COMPETITIVE.

—MILITIA OFFICERS are PREPARED for the above Examination at the "MANOR HOUSE, LEE, S.E." During the last three years, no less than THIRTY-EIGHT MILITIA OFFICERS passed into the Line from this Establishment. The Studies of the Officers are under the immediate supervision of Major J. L. NEEDHAM, P.S.C., R.M.A. A SPECIAL COURSE OF INSTRUCTION OF EIGHT WEEKS' DURATION will BE GIVEN BY HIM to Candidates for the NEXT SEPTEMBER Examination, commencing on TUESDAY, JULY 10.—Apply to H. WOLFFRAM, the Manor House, Lee, S.E.

SCHOLARSHIPS.

BATH COLLEGE, BATH.

PRESIDENT.
His Grace the DUKE of CLEVELAND, K.G.
HEAD MASTER.—T. W. DUNN, Esq., M.A.
HONORARY SECRETARY.—Colonel HARBORD.

FOUR or MORE ENTRANCE SCHOLARSHIPS for Competition on September 19 and 20, next, from £25 to £50, to be increased to £85 in case of a Scholar who may need it.

Allowance for age in the case of younger boys.

Candidates from a distance can be provided for.

An additional Boarding-house (Rev. W. E. Sherwood's) will open Next Term.

MILITARY EDUCATION, GERMANY.

—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the last Militia Competition, which took place on March 8, for which 31 Commissions in the Line have been awarded, the under-mentioned officers passed from this Establishment, out of 18 sent up:—

Lieutenant	E. G. Wynyard	8th
,,	H. J. Morphy	11th
,,	I. H. W. Southey	13th
,,	N. G. Woodyatt	15th
,,	J. H. Heycock	16th
,,	D. S. A. Cosby	22nd
,,	F. K. O. Peile	26th

This completes a total of 32 commissions secured by Colonel WILKINSON and Lieutenant-Colonel SHAW at the last four Military Competitive Examinations, the total number sent up for these competitions being 76. The names of the successful pupils have already been published.

Also, at the recent Literary Examination for Militia Officers held in April, Lieutenant Lord Skelmersdale took FIRST place on the list.

The results obtained at the last SANDHURST EXAMINATIONS have added to the general score, which amounts altogether to SIXTY-ONE SUCCESSES, achieved by pupils during the past 18 months.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S.,

MILITIA, PRELIMINARY, &c.—CAREFUL PREPARATION for any of the above. Upwards of 130 successes during the past four years. Highest places in lists, Nos. 5, 8, 9, 15, 18, 29, 34, 37, 38, 52, 61, 63, &c. More Preliminary successes in February and March, 1883.

For full particulars, terms, references, &c., address, Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley-on-Thames.

MILITARY COMPETITIVE

for MILITIA OFFICERS.—Special Course, in charge of Colonel STORY, late South Lancashire Regiment. 8 years' experience as Garrison Instructor. In 1882-83, with a total of Twenty-four Candidates, Six were successful, an average of one in four.

Address, Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

LIEUTENANTS of MILITIA desirous

of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and steady work is insisted on. Since the introduction of the Military Competitive, out of Forty-two Lieutenants of Militia sent up, Twenty-six have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of pupils successful at all Examinations, INCLUDING THE LAST SANDHURST AND RECENT MILITIA COMPETITIVE.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

ARMY EXAMINATIONS.

MR. J. WINDER, M.A., Cranworth

House, Eastbourne, Sussex, PREPARES TEN PUPILS for Woolwich and Sandhurst. At recent Examinations Candidates prepared by Mr. Winder obtained 6th and 22nd places for Woolwich, and 20th and 27th places for Sandhurst.

THE REV. Dr. POLLOCK RECEIVES

a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

MILITARY COMPETITIVE EXAMINATION.

MAJOR DE THOREN and Major

MORGAN (late Rev. J. CARDWELL) PREPARE MILITIA OFFICERS for the above Examination. The great success they have hitherto had was even greater at the Examination on March 8 and 9, 1883. Out of the Eight Candidates sent up,

Mr. H. R. Pease passed 9th } at their first
Mr. A. Faulknor ,, 12th } attempt;

and Four others were in the first fifty, one being 33rd; the remaining two qualified, and were high up.

The fees at this Establishment are unusually low.

Major De Thoren was Professor of Tactics at Sandhurst, Garrison Instructor at Madras, and D.A.Q.G. in the Abyssinian Campaign.

Major H. F. Morgan passed the Staff College, and is the author of "Summary of Tactics" and "Summary of Law."

For further information, apply to Major MORGAN, 3 Douro Terrace, Jersey.

THE PRINCIPAL of a HIGH-CLASS

SCHOOL for GENTLEMEN'S DAUGHTERS has VACANCIES for Anglo-Indian CHILDREN, or for those whose parents are abroad. Special advantages for delicate or backward girls. The house is large, airy, and very comfortable. Gardens, fields, and the use of a quiet pony. For prospectus, with view of the House, apply to Miss PARROTT, Overton House, Congleton, Cheshire. References kindly permitted to the Hon. Mrs. Wylie, Congleton, Major Wylie (60th Rifles), the Rev. J. Colyer, Astbury Rectory, Congleton, and others; and in India, Arthur Pointon, Esq., 6 Russell Street, Chowringhea Calcutta.

BEDFORD MODERN SCHOOL.

SPECIAL ESTIMATES AND TERMS FOR CASH.

THE MIDLAND COUNTIES WATCH COMPANY,

OF VYSE STREET, BIRMINGHAM.

Let every reader of this send for our beautiful, new, Illustrated Catalogue, containing 1,000 unsolicited Testimonials (from all parts of the world), and over 500 fine, copper-plate Engravings of Watches, Jewellery, and Electro-plate, sent gratis and post-free on application to any part of the World.

GENTLEMEN'S FINE SILVER, flat crystal glass, 25s.
LADIES' FINE SILVER, flat crystal glass, 25s.
YOUTH'S FINE SILVER, flat crystal glass, 25s.
LADIES' GOLD LEVERS, in exquisitely chased cases, 70s.
GENTLEMEN'S GOLD LEVERS, engine-turned cases, 80s.

The Rev. Robert Cass, Settle, Yorkshire, writes, February 19, 1880:—"The Lady's Gold Lever Watch received from you for 70s, in size, workmanship, and beautiful appearance, resembles a watch usually sold at £10. It gives entire satisfaction."

From Mr. J. J. Harris, Schoolmaster, 2-18 The Royal Irish Regiment, Aldershot, September 22, 1880:—"I am very much pleased with everything I have had from your Company. The watch (25s) has proved to be an excellent one, and is a marvel of cheapness. It is fully equal to, or indeed superior to, many I have seen purchased by Regimental Clubs for treble the money."

These Watches are frequently sold for treble the money. Cheques or P.O. payable to

Mr. A. PERCY, VYSE STREET, BIRMINGHAM.

On receipt of which, any watch will be registered post free to any part of the United Kingdom, and for 2s 6d per watch extra to any part of the postal world.

Our Indian Agents are Messrs. King, King, and Co., Bombay, and Messrs. King, Hamilton, and Co., Calcutta, through whom remittances and orders may be sent, and catalogues obtained.

ARMY AND NAVY GAZETTE.

JOURNAL OF THE RESERVE, AND AUXILIARY FORCES.

No. 1,225.—Vol. XXIV.] SATURDAY, JULY 14, 1883. [REGISTERED FOR TRANSMISSION ABROAD.} GRATIS.

A RETROSPECT.

July 11, 1882.

My Dear Tom,—My evil genius so willed it, and executed it too, that I was grilling the remains of my poor liver in Aden when our extra-gallant fellows were about sunning themselves in the Desert this time last year. My brother Tom, son of your old friend, afflicted by the *kakodaimon* of the family, as first luff of H.M.S. Bouncer, was dodging Yellow Jack in the West Indies. Our hearts burnt within us with the petroleum of envy, when we learnt that our cousin Jack of the Diddlesex Highlanders and our cousin Joe of the Marines were actually about to be engaged against the enemy on the land and seas of Egypt. We did not know much of that enemy, but from all accounts he was very easy to beat. The Arab General-in-Chief had never seen a shot fired in his life. Those of his troops, officers or others, who had had that privilege in Abyssinia and in Turkey, were said not to have at all, or very much, enjoyed it. But they were well armed, and the Government at home were preparing a force which proved that they at all events thought the Egyptians were very formidable enemies indeed. There is a freemasonry, as you know, in the services, which lets us into official secrets, do what officials can to prevent it; and, soon after the failure of the negotiations for establishing a military dual control with France, and long before the bombardment, it oozed out that the Guards were ordered to hold themselves in readiness to embark for the East, and that a number of regiments had been warned for service. Indeed, the force which was put together in India and at home to fight Arabi Pasha's levies in Egypt, was in every respect more formidable than that which Abercrombie led to attack the veteran battalions of France in the same country. That was rather an astonishing fact, considering the manner in which the enemy were spoken and written of in England; but the wise fellows at our mess pointed out the danger of interference by some European Power, and the necessity of caution and foresight as to eventualities. Certainly it was a compliment to the Egyptians to prepare an expedition of a strength which exceeded that of their whole Regular Army. The bulk of these Egyptians had never seen service. It was comfort to be told, on the authority of the *Saturday Snarler* which knows all about everything, that they were undisciplined savages, who would run away at the first shot; for, if that were so, there was less chance of Jack and Joe appropriating all the glory due to the family, and of their probably receiving more than their share of family legacies. But it was plain that the Government did not think as the *Saturday Snarler* did. They employed all the corps which were warned, and more, and they made up battalions and drew on the Reserve freely as soon as they made up their minds to strike. Ships need no warning; they are always ready. Besides, the Egyptian enemy had no ships at all. Ismail Pasha's ironclads had been transferred to the Sultan, and the coast, though, except at three or four points, it was practically inaccessible to any attempt to land an army, under present conditions of warfare, was at our mercy. We were not at all inclined to repeat at Aboukir the landing on the beach, which was protected by batteries, afterwards made very formidable. The ports of Rosetta and Damietta are not open to transports, and Alexandria and Port Said were plainly the points to attack, if we desired to land an army. As to the fortifications of Alexandria, it might be said generally their age was past, and, indeed, it might be added that their age was the only thing which was great about them. I had been over them on my way to the East, and saw that the so-called forts were miserably weak, that the parapets were mostly of rubbish and mortar, that field-pieces could breach. The rifled guns in position were few and far between—most of them were *en barbette*. There was a great array, on their rubble walls, of smooth-bores, which did not count. There were, however, some ten or twelve heavy rifled guns, with carriages ready for mounting at Mex. There was not a rampart or parapet which could resist the lightest rifled gun at moderate ranges. One work alone—Pharos—possessed casemates of some substance, but the masonry was not fit to protect the guns. Even if the works had been strong, there were not gunners enough, and there were few or none who had ever been trained to actual shell-firing with large ordnance. They had immense stores of shell and powder, but they were in such wretchedly constructed magazines that the material constituted as great a danger to the defence as it did to the assailants. Nothing, as you know, takes the heart out of a garrison so thoroughly as the explosion of their own ammunition. Viewed as a serious menace to an ironclad fleet, the works of Alexandria were insignificant; but they were quite capable of destroying wooden ships. I believe, indeed, it would *not* be possible with wooden ships to encounter rifled guns, as we attacked works armed with smooth-bores at St. Jean d'Acre, as the French did at San Juan d'Ulloa, as the French and English did at Sebastopol, and as Farragut did at Mobile. But it did not seem likely, at first, that Great Britain would employ force against the Egyptians, for it was a principle on which our Government had formerly insisted that the right of revolution, if successfully asserted, must be recognised as sacred; and the Government at the head of which Arabi Pasha had been placed was apparently, to all intents and purposes, as complete and legitimate as that which was formed in Paris after the flight of Louis Philippe, or the Empire we acknowledged after the *coup d'état* of 1852, or the Republic which was proclaimed on September 4, 1870, after Sedan. The Khedive ruled as before, and with the new Ministry the work of Government went on as usual, and our good ally the Sultan was quite satisfied. But we were not content. The money-bags were in danger. So it was said. There was a dangerous ring about the words of this Arabi. He made speeches against the foreigner. The Fellah ventured to talk about Egypt for the Egyptians. If the new Ministry remained in office, the Suez Canal was in jeopardy; it stank in our nostrils that a military pronunciamiento should have been made without our consent, in such a country as Egypt. Diplomatic pressure to oust the Government and the "military adventurer," who was so in the same sense as Oliver Cromwell, Napoleon, Garibaldi, and many other adventurous gentlemen who used armed force to effect their purposes, was corroborated by the increase of ships in the harbour of Alexandria; and as they increased, so did the energy of diplomacy, till it became evident that nothing would satisfy the European Governments most interested in the question but the overthrow of the leaders of the national party, and as we then thought, the restoration of the *status quo ante*. I use the words "national party" to indicate those who supported Arabi and his friends, and who certainly included the great bulk of the Arab (Egyptian) population in Alexandria and the cities, and in Lower Egypt. The exasperation created among the natives in Alexandria, where the sight of our white ensign was very uncommon, was natural; and when the people were told by their leaders that the manifestation was intended to ruin their hopes, it is wonderful that they did not at an earlier period show their hostility to the Christian foreigner, whose purposes, after what the French had done in Tunis, could not be very doubtful. Could anything be more exasperating, and from a native point of view more unjustifiable, than the concentration of a foreign squadron in a friendly port, with the avowed purpose of supporting a demand for the overthrow of the popular Government? Put the case, if you like, in any country but Egypt, and remember that Egyptians are men, in their resentments and perception of affront and injury. Between the natives and the European mob of the city, there were long-standing feuds; and we may be sure that the latter, who felt keenly the danger to which the national movement exposed their privileges, did not abstain from making the most of the irritation produced by the sight of the ships, and accentuated the purposes for which they said the men-of-war were sent in unmistakeable Arabic. There was brought about, in a very short time, a situation of a very critical character, for the guidance or settlement of which no means whatever were provided. It is useless to inquire now whether the original version of the beginning of the massacre of June 11 given by Lord Alcester was correct or not, or whether there were deliberate preparations made by the Egyptians for the savage outburst, but it is agreed on all sides that the soldiery, once on the spot, put an end to the horrible scene with vigour and effect. It is averred, indeed, by some ingenious casuists, that the whole of the hideous butchery was arranged by the chiefs of the Military Party, to show that but for the troops, the city was at the mercy of the mob, and that Arabi and his friends desired to let the world see that they were masters. I confess it would need very strong proofs to convince me that the astute men who were at Arabi's side would have recommended such a desperate stratagem. They were aware, if he was not, of the power of the Fleet. They never could have supposed that the Admirals would have permitted any attack on Europeans to be made by a mob armed with bludgeons, without an attempt to protect their countrymen by landing a force from the ships. Could men like Toulba or Mustafa Fehmy have believed that France and England would have desisted from their demands, because the Egyptian soldiery had checked a riot? The notion is preposterous. As to the charge that the Khedive himself was the author of the massacre, and that Omar Lutfi was his agent and accomplice, I can only say that if it be proved, I will trust the evidence of my senses no more. The history of June 11 has yet to be told to the world. It is very much to be regretted that there has been no strict and close legal investigation into the facts. In the interests of truth, and for the sake of justice, criminals ought to be punished; and surely if there be truth in the allegations made against them, there were far greater criminals than the miserable wretches who were hanged day after day for their deeds. The Fleets sent to protect the European population not only failed in doing so, but exhibited such utter helplessness, that it was solely owing to Egyptian authority and soldiery any Europeans were saved. The Fleets were equally impotent to punish. The *timides avis* which prevailed in the navies were received with tingling ears, perhaps, but they were acted upon, while our diplomatists were hurling paper thunderbolts at the military leaders, whom they were to bring to reason by ships which could not land even a burying party for the victims.

As the language of the Powers and the additions to the men-of-war in the harbour left no doubt that it was meant to use force to overturn the Government *de facto*, it was natural that those who expected attack should busy themselves in the work of defence. The Egyptians set about brushing up and strengthening their old batteries and mounting guns with considerable energy. If any one will take a look at the map, he will see that the greater part of these works did not menace the harbour at all. Fort Pharos and Fort Adda are at the other side of the Ras-el-Tin promontory, and could not touch ships in the port, nor command the entrance, and these were the most formidable works. They were constructed to prevent a landing on the east side of the new town, towards Ramleh. The Lighthouse batteries, which faced the port, were by no means formidable, and the heaviest pieces pointed seawards. Along the curve of the shore towards Mex and Marabout, there were earthworks, but the guns were obsolete smooth-bores or mortars, with a few columbiads and rifled cannon; but at Mex considerable additions were made to the old defences, for the reason that the channel passes close to the shore, and that a force could be landed to turn the fortifications of Alexandria, and get round by the lake on the line of railway to Cairo. But so little was done, that of the heavy rifled guns which I saw on the ground a year before, seven or eight were found by us still on their sides when Mex was evacuated. The armament of Marabout was not of a very serious character, and evidently the sole thought dominating the plan of the Egyptian Engineers was resistance to a descent and invasion. There is not the shadow of a reason for supposing they would have dared to open fire on the ships, or that they could have put the ironclads in jeopardy. The word was defence, not defiance, and from the beginning to the end of the operations the Egyptians never fired a shot till we had set the example. Our cruisers ran in and out of Aboukir without a shell from the heavy guns above, they passed in and out of Alexandria, even after the ultimatum, unmolested, and the white flag, the use of which so irritated Mr. Gladstone, was never hauled down in any of their forts, even in the midst of the bombardment.

But preparations for an expedition were completed, and the situation had been thoroughly examined, and the plan of campaign sketched out, before the massacre of June 11,—aye, long before it! It was time to have a policy. Sir B. Seymour became becomingly uneasy about her Majesty's ships. There were those Egyptians mounting guns! There they were at work digging rifle-pits, to sink the ironclads with musketry! Eagle-eyed lieutenants and commanders screwed their glasses to their eyes, and saw batteries growing like Jonah's gourd on all sides. Telegrams flew to London, to organs which ground away their old tunes about the audacity of the Fellahs and the pusillanimity of the British Government. The public were alarmed; questions were asked in Parliament. The most gallant officers in the Fleet burst into perspiration as they repaired on board the flagship with more discoveries, and the Admiral became more distracted than ever about the Queen's Fleet, which Arabi might send to the bottom like so many cockboats, "if this sort of thing was to go on." Then some 'cute fellow reported that the Egyptians were sinking stones to block up the exit of the harbour, and there were horrid rumours of torpedo attacks and boats and gun-cotton preparations and dynamite devices! At last the fiat went forth—all was ready, and Sir Beauchamp sent off his famous last word. "But it's all wrong," quoth the Egyptian. "Come and see! We haven't mounted a gun since we promised to stop! We are quite ready to let you judge, but as soldiers, such soldiers as we are, and as Ministers of a State such as it is, we cannot consent at your bidding to disarm our fortresses, and hand them over to your keeping." Whereupon, to use the words of St. Arnaud, "the cannon of her Majesty spoke," and, as Sir F. Leighton told us at the Royal Academy dinner, "the walls of Alexandria crumbled into white powder." It was a very cautious, skilful, well-arranged attack, commenced at long range, and gradually pushed nearer, till all was silent. As far as I can learn, the most astonishing thing connected with it, in most people's minds, was the way in which the Egyptian gunners stood by their pieces, against fearful odds, on works which not only did not protect, but endangered them, so that they would have been safer if they had been standing in an open field. It is an idea which has been supported by authoritative statements, which I need not specify, that the city did not suffer by the bombardment, as the fire was directed at the works; but a glance at any plan will show it would not be possible to fire at long ranges, especially on Pharos, Adda, the Lighthouse, Ras-el-Tin, &c., without injuring the houses of the town behind, unless shells could be made to obey orders, and stop when they did not hit what they were fired at, or to drop as soon as they had gone through a rubble wall! The conflagration which followed when the Egyptian troops set fire to the houses on the road to the Ramleh and Rosetta gates, and the rabble spread the flames, covered over most of the damage done by our fire; but the Harem and a pile of buildings belonging to the Ras-el-Tin residence were certainly fired by the shells,—the Palace was struck, the ceilings of the State apartments destroyed, a part of Ismail Pasha's School was ruined; and had our shells only burst generally, there must have been much greater damage, for they were found unexploded in the houses and in gardens (two in the German Hospital), and in streets all over the city, and they lay in *dozens* out in the sand between Alexandria and Mex. It is only foolish to say it did not occur, or to suggest that any skill could have prevented the result, no matter what care was taken in the aiming of guns at sea. Sir B. Seymour's coolness and courage under fire are as remarkable, perhaps, as those of any officer in the Fleet, and his captains and crews displayed all the qualities which would have been needed in a naval combat with the most formidable of enemies; but it is ridiculous to treat the bombardment of Alexandria as a great military, though it assuredly was a very great political, operation.

NOTES FROM ALDERSHOT.

(FROM OUR CORRESPONDENT.)

H.R.H. the Field-Marshal Commanding-in-Chief, accompanied by the Adjutant-General and Quartermaster-General to the Forces, and Colonel R. Bateson, A.D.C., visited Aldershot on Monday morning last, and inspected the Infantry Brigades on the Queen's Parade, North Camp, in marching order, every available man being in the ranks. The morning was fine. The number on parade was 6,100 of all ranks, including the Kerry and Roscommon Militia and the 24th Middlesex (Post-Office) Rifle Volunteers. The Division marched past twice. His Royal Highness seemed much pleased with the marching of the Second Brigade, particularly the 84th Regiment, a magnificent battalion, about 800 strong. Some brigade movements of the simplest kind followed, the troops returning to quarters about mid-day, having been under arms about three hours. The Commander-in-Chief and Staff returned to town by an early afternoon train. It cannot be said that the troops have been unnecessarily worked or fatigued at sham-fights during the present season. Recently reveille has sounded as early as 3 a.m., to allow of operations being carried on during the cool of the morning. This is necessary, now-a-days; there are so many striplings in the ranks unable to stand the fatigue of a field-day under an English summer sun. There are men in the ranks of many of the regiments here to whom a field-day during the hottest weather experienced this season would be but child's play; but boys cannot do the work, and are knocked up and fit for the ambulance after a little exertion. The Infantry Sub-Committee on Dress assembled on Tuesday at the office of the Assistant-Quartermaster-General, for further deliberation. This sub-committee is now composed as follows:—Colonel Stevenson, C.B., 87th; Lieutenant-Colonel Hale, 26th; and Lieutenant-Colonel Jones, R.E. Under instructions received from the Head-quarters of the Army, one more examination for troop and company musketry certificates will be held, on September 17 next, under the syllabus dated Horse Guards, War Office, May 9, 1883. A special report will be made on every officer who, after this final examination, has not qualified to conduct the musketry training of his troop or company. The 2nd Battalion, Coldstream Guards arrived at Pirbright Camp from London on Tuesday, for its annual course of musketry. Since the lamentable occurrence at Frimley, no man of the troops at Pirbright is allowed to go more than a mile beyond the Camp. The three corporals of the Coldstreams who were arrested for causing the death or the unfortunate man William Brown, have now been committed for trial on the capital charge. The following officers have completed their four months' course of garrison instruction at Aldershot, and have been ordered to rejoin their respective regiments:—Major Cotton, 99th; Captains Hogarth, 2nd Battalion, 25th; Dickenson, 1st Battalion, 60th Rifles; Spurgin, 21st; Maclear, 2nd Battalion, 3rd; Garfit, 67th; Lieutenants McCalmont, 1st Battalion, 6th; Davis, 96th; Lynch and Bray, 66th. Field operations of a very instructive nature have been carried out in the vicinity of the Camp, on Thursday and Friday, in which all arms and branches of the service have been engaged. The 4th Royal Munster Fusiliers, 543 of all ranks, proceeded by special train at 10 a.m. on Wednesday to Portsmouth Dockyard, to embark in the Himalaya for conveyance to Queenstown, for further proceeding to Tralee, on completion of training. The remainder of the 2nd Dragoon Guards will arrive at Aldershot as follows:—One squadron on the 20th, one squadron (from Liverpool) on the 21st, one squadron and head-quarters on the 23rd, one squadron on the 24th, and a detachment with remounts on the 26th. The 24th Middlesex Rifle Volunteers have been doing good work here during the week. They have been exercised in conjunction with the Field Telegraph Troop, Royal Engineers, and seem to have little idle time on their hands. This corps supplied a post-office contingent for service during the late campaign, not a few of the men wearing the Egyptian medals. Two field companies for active service could be furnished by this Post-office corps, should their services be required. The Rev. T. Ryan, Roman Catholic chaplain to the Forces, is struck off the strength of the Division. The Rev. J. H. S. Escott, Church of England chaplain, and the Rev. T. O'Reilly, Roman Catholic chaplain, have arrived here for duty. Lieutenant C. E. Callwell has been ordered from Woolwich to Aldershot.

THE SUEZ CANAL.

The announcement made this week in the House of Commons by Mr. Childers regarding the arrangements entered into by the Government with M. de Lesseps for the construction of a second Canal through the Isthmus of Suez, has been received with consternation by the whole English Mercantile community. At a meeting of merchants and shipowners held in the City of London on Thursday, the following resolution was proposed and unanimously adopted:—"That this meeting has heard with extreme regret that the British Government has promised to use its influence in Egypt to obtain a concession for a second canal in favour of M. de Lesseps' company, in lieu of taking the steps which it was asked to take to secure such a concession for the construction of an independent British Canal. That this grave decision is further aggravated by the proposed extension of the period during which the monopoly of the present company is to run; the high rates of dividend on which the reduction of charges is to be made contingent; the fact that no increase is to be made in the number of British directors, and that the company declares to have a domicile in England. This meeting further expresses its extreme surprise that the Government should propose to place eight millions sterling at the disposal of the board of a foreign company, and that so far from solving the difficulties resulting from a foreign company holding such a position on the route to India, the proposed arrangement intensifies and prolongs them, and can hardly fail to produce grave complications in the future. The meeting, therefore, expresses its earnest hope that the House of Commons will reject the proposal."

Lieut. Prince Louis of Battenburg, who is betrothed to the Princess Victoria of Hesse, is to be appointed in August to the Royal yacht Victoria and Albert. The latter being dismantled, and the Queen being about to proceed to Osborne, the Enchantress, Admiralty yacht, is to proceed to Cowes, for her Majesty's disposal.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

FRANCE AND MADAGASCAR.

Affairs in Madagascar are beginning to assume a most serious aspect. On Wednesday last Sir Stafford Northcote questioned the Government regarding a serious occurrence which has taken place in Madagascar, when the Prime Minister made the following unexpected and startling statement:—"The House is aware, from the statements of the Under-Secretary for Foreign Affairs, that on June 14 a state of siege was proclaimed at Tamatave. The British Consul was, unhappily, at the time very ill, and the information received is to the effect that his illness was seriously aggravated by the political crisis. His secretary was arrested in his presence. In these circumstances he received an order from the French Admiral to quit the place within twenty-four hours, and seven hours before the expiration of that time he died. The French Admiral invited the British to attend the funeral, and the British officers and men of the Dryad attended in some numbers. The French Admiral stopped communication between the British man-of-war and the shore. The captain was allowed only verbally to protest against the proceedings, and the flags of all foreign Consuls have been pulled down. There is a portion of the telegram affecting another person, in addition to the secretary of the Consul. One British subject, a Missionary of the London Missionary Society, was arrested on the 16th, and remains in prison. The charge against him is not made public, but it is surmised to be for correspondence with the enemy, as the French phrase would be in the circumstances. The answer that has been received is that the law must take its course. In announcing these grave and painful occurrences, I have only to say that we wait for further information as to the facts, and for those communications from the Government of France required in such a case which we have intimated we expect, and which it would be our duty to make under similar circumstances."

The French Government assert that, up to the present, they have received no information with respect to the occurrences at Tamatave narrated in the House of Commons by Mr. Gladstone.

Mr. Consul Pakenham, whose death was referred to by Mr. Gladstone, had been for 21 years British Consul at Tamatave. Only two or three weeks have elapsed since he was gazetted Consul-General at Odessa, and it is, therefore, impossible (says the *Daily News*) that he could have heard of his promotion at the time of his death. "It is the intention of the Government to appoint a Consul-General to reside at Tamatave, but the new office has not yet been filled up. It is understood that Mr. Pickersgill, who is well acquainted with Madagascar, will be appointed her Majesty's Vice-Consul at Antananarivo." A correspondent, recently returned from Tamatave in the Seagull, informs us that Mr. Pakenham's secretary, who has been imprisoned by the French, is named Adrianisa, and is a brother of one of the secretaries to the Malagasy Embassy which lately visited this country. Mr. Pakenham is stated by the same correspondent to have resided for a number of years in Madagascar, and to have been possessed of considerable property there. He had married in the island, and had in a great measure become a native in his habits and thoughts. Mr. Shaw, the missionary, is described as a pleasant, genial companion, and is much respected. Our correspondent does not think he was at all likely to mix himself up with the disputes with the French, although the Malagasies have great confidence in their missionaries, and look to them on all occasions for advice.

A painful impression was made in the House of Commons by Mr. Gladstone's statement with reference to Madagascar. Members recognise with regret the tendency of recent incidents to strain the relations between England and France, but it is not generally believed that the affair will result in any serious rupture between the two countries. Up to the time of our going to press, no reply, beyond a formal acknowledgment of the receipt of the English despatch, had been received from the French Government to Lord Granville's demand for explanations, but it is believed that diplomatic correspondence will eventually lead to an expression of regret on the part of France, and the withdrawal of the French Naval Commander at Tamatave. It is probable, however, that before this conclusion is arrived at, some time may be occupied in correspondence as to the facts in the event of the French Government disputing the British statement of the circumstances complained of. Beyond the information communicated to the House, the London Missionary Society knows nothing of the arrest and imprisonment by the French of Mr. Shaw, the Society's representative at Tamatave. The Society has received no letters or despatches from Madagascar since the bombardment of Tamatave, and is anxiously awaiting the arrival of the next mails. Mr. Shaw has been in Madagascar about two years, and his wife is now on her way thither.

On Wednesday, July 11, the anniversary of the bombardment of Alexandria, Capt. Charles Hotham, R.N., entertained at dinner, at 20 Warwick Square, Admiral Lord Alcester, G.C.B., and several of the officers who served on board the Alexandra in Egypt, including Capt. Lord Walter Kerr, R.N., Col. Lord William Seymour, Coldstream Guards, Capt. the Hon. Hedworth Lambton, R.N., Capt. Thomas, R.N., Lieut.-Col. Holmes, R.M.L.I., Staff Capt. Hosken, R.N., Capt. Blaxland, R.N., Capt. Morrison, R.N., Lieut. J. de Vœux Hamilton, R.N., Lieut. Raith, R.M.A., Lieut. Parish, R.M.L.I., and Paymaster J. S. Moore, Royal Yacht.

LETTS'S POPULAR ATLAS is just now complete. The *Saturday Review*, May 12, 1883, says:—"We can honestly add that the unmounted edition (£2 2s) of Messrs. Letts's Atlas is beyond all question the cheapest full compendium of geographical information to be obtained, and the mounted form (£5) one of the most handsome." —Detailed Prospectus of LETTS, Limited, London Bridge, E.C.

COLONIAL NAVAL FORCES.

While the debate in the Upper House on Colonial Naval Forces was productive of no declaration on the part of the Government, yet it was the means of evoking opinions from noble lords, both in and not belonging thereto, which were not only substantial, but will be of great advantage in future consideration of this important subject. Viscount Sidmouth moved for correspondence on this question, and pointed out the immense and increasing value of the commerce with the Australian Colonies. That it was only protected by a small and insufficient squadron, and in case of war the harbours and shipping would be imperilled. If the Colonies procured vessels for their own defence, there would be no lack of officers, now on half-pay, to man them, which the Colonies would gladly avail themselves of. The Earl of Derby remarked that Australia was not likely to be attacked, as the wealth lay inland; the different seaports were in a good state of defence; and they were providing themselves with torpedo-boats and gun-vessels. Possibly his lordship is unaware of the large quantities of the "circulating medium" kept in hand by the different banks at each capital, presenting as it does a large amount of "portable booty" to an enemy, in addition to which they, being the principal depôts for goods, are well stored with immensely valuable stocks. Earl Carnarvon spoke in glowing terms of the value and importance of these Colonies, and the necessity for their proper protection, the commerce being enormous, and almost entirely British. He suggested that the Colonies should contribute towards the maintenance of the Queen's ships employed in Australia, and they should be under the absolute command, and at the entire disposal, of an Admiral. He would deplore the wasting of this opportunity which now offered of a solution of the question. If the position were thoroughly understood, there would be no practical difficulty in agreeing upon a principle of joint action. Lord Norton reminded the House that shortly before the close of the Crimean War, a Russian squadron from Western America was advancing towards the then defenceless Colonies of Australia. The Earl of Camperdown pointed out that it should be remembered that Australian commerce was protected not only by the men-of-war on the Australian Station, but also by the ships composing the squadrons stationed in the China Seas, the Pacific and Indian Oceans, and on other stations through which pass those ocean highways traversed by all merchant ships, and from this fact he concluded that Australian commerce was not so unprotected as it would appear to be, if only the small Australian Squadron were considered its protector. The Earl of Northbrook endorsed what the Earl of Derby stated about the defences of the principal Australian ports, and he did not think there was any fear of an Alabama entering them. The Government were always anxious to render them any assistance in their defences, and had lately presented them with a ship. The popularity of the Royal Navy in Australia was undoubted, and the relations between the Admiralty and those Colonies could not be on a better footing, while her Majesty's ships were most cordially received at every place. It was not desirable to localise Naval forces there, and that consideration would militate against the suggestion that the Australian Colonies should contribute towards the Navy in a monetary form. The whole question was most interesting, and would tax the energies of any Minister who suddenly found himself responsible for the safety of the Colonies. It appears to have been forgotten, however, by all speakers during the debate that naval officers have before now been lent to the colonies, as in the case of the Nelson and Cerberus, belonging to Victoria, and for the training-ship in Sydney. But this is not enough. In the event of England being forced into a war with France, the latter power would be able, from her base of operations in New Caledonia, to inflict incalculable injury on all our colonies in Australasia, and that before we could have time to reinforce our squadron at the Antipodes. What the colonies require are ships, guns, and men to man and fight them, as well as officers to command. This was most conclusively proved by Viscount Sidmouth. Whatever may be the views of the present Government, it is clear that the Australian Colonies are adopting measures for their own defence, and the protection of external interests. The suggestions of Earl Carnarvon that the Colonies should contribute towards the maintenance of the squadron in Australian waters, appears to be the best solution of the question. With the present intention of reducing squadrons, it cannot be expected that additional vessels will be sent to Australia at Imperial cost; therefore, if the Colonies are willing to share the expense, our dignity would not suffer by allowing them to do so. Offers of assistance tendered by the Government should be made in a definite form. Officers sent out to supervise defences both by sea and land should carry Imperial authority, and be of rank sufficient to enhance position and the importance of their duties, and be instructed that Imperial as well as Colonial interests are involved. Those hitherto sent to aid the Australian Colonies have generally been on the Retired List, and not of the scientific branches. In future, those detailed for the special duties of defence should be taken from the Active List of Naval officers who have qualified in the higher branches of torpedo and gunnery, and their being sent on such service should in no way operate against promotion. Retired officers should be appointed permanently for carrying out the works and officering the various forces. Colonial defence, especially that of Australia, is a question which will eventually demand the attention of this nation in its great commercial interests, and the measures to be adopted will, we believe, be those suggested by the Earl of Carnarvon.

"Time Tries all Things."—Of the numerous preparations announced for promoting the growth of the hair few survive, even in name beyond a limited period, whilst Rowland's Macassar Oil, with an unparalleled reputation of more than 80 years, is still considered by the public to be the best and safest preserver and beautifier of the hair ever yet produced. They who prefer it can now have the oil of a golden colour, without any way losing its beneficial effects. Sold everywhere. Sizes, 3s 6d, 7s, 10s 6d, and 21s.

Reviews.

The *Nineteenth Century* for July is rendered exceptionally attractive by a contribution of Sir Lintorn Simmons, on the subject of the critical condition of our Army. All that Sir Lintorn appears to aim at in his paper is to point out forcibly and emphatically the critical condition of the British Army, to sketch the temporary remedies which have been already tried, and to invite, from all willing to give them, suggestions as to how these temporary remedies may be substituted by one sufficiently comprehensive to make men contented in and with the service, and thus stop the waste which is ruining the Army. Unfortunately, there are a large number of people who are prepared to contend that it is useless to add to the expenditure that has already been incurred, until a supreme moment arrives when disturbances occur, and a military force has to be prepared for active service, when a lavish expenditure is suddenly called for, and our whole system becomes deranged. The expedition is, as a matter of course, sent out, as was in the case of the Zulu and Egyptian wars; but what is left at home? "Battalions resembling skeletons, and totally inadequate for the purpose of training either officers or men, and utterly unfit to receive and assimilate the Reserve men which might be sent to complete them. Batteries of artillery in a most lamentable state, broken up and reduced both in men and horses, so that many of them could have scarcely put a single gun on the field." Such was the state of things after the Egyptian Expedition was sent forth. Scarcely less lamentable is its condition at the present moment, when the troops are for the most part withdrawn from Egypt. Very many people who talk glibly of the splendid Army which England can boast of will perhaps be startled to hear that the Army at home is, at the present moment, more than 8,000 men below its appointed strength, and is daily dwindling away, so that at the end of the present year, unless some extraordinary measures are taken to recruit it, there will be a deficiency of between 15,000 and 20,000, which deficiency will probably become increased by a few more thousands at the end of the following year. These, which might be supplemented by many more, are dismal revelations, and Sir Lintorn Simmons has performed a stern and unpleasant duty in stating so forcibly the condition of the British Army. In one portion of the article in the *Nineteenth Century*, Sir Lintorn Simmons observes that, although Lord Wolseley has spoken in the highest terms of boy soldiers, he has not backed his opinions by his actions, having carefully excluded immature youths from the force he commanded in the field. It is no secret that the march from the field of battle to Zagazig was the most severe test to which the power of endurance of any part of the infantry in Egypt was put—that it was a march which redounds to the credit of the Army, and that it was performed by the infantry of the Indian Contingent, of which the Seaforth Highlanders and a battery of European artillery formed a very important part, all old soldiers who had accompanied Sir F. Roberts on the march from Cabul to Candahar. Having noticed in detail some of the temporary expedients which are to be in force till further orders, Sir Lintorn proceeds to consider what the country requires for its military service, and states that the conclusions he has arrived at from the foregoing considerations are that the outflow of men from the Army must be stopped without delay, and that if nothing be done in this direction it may become impossible to recover lost ground and to keep up our Army by voluntary enlistment. It is but right to say that the statements contained in the above article are questioned on the grounds of inaccuracy; the home army is not 8,000 short, but only 5,000, that it is not dwindling away, and that about 800 are recruited weekly.

The Handbook Dictionary. By George Chambers, F.R.A.S. (John Murray.)—This little work, which is brought out in the best style and convenient form, is a practical and conversational dictionary of the English, French, and German languages, in parallel columns. It is one of these books to which is really applicable the hackneyed words, "no person ought to be without it." The traveller and student will very often mutter some words of thanks when extricating themselves from the colloquial difficulties they may encounter by a reference to Mr. Chambers's dictionary, which they are sure to find in the breast-pocket of their touring coat.

Murray's Handbooks for Travellers.—Some very important handbooks are included in the list now published by John Murray. First comes "The Handbook Dictionary," a conversational dictionary of English and foreign languages; then, "The Handbook of Travel Talk," which contains dialogues as well as questions and vocabularies in German, French, Italian, and English. In the English list will be found some very important works, such as "London as it is" (with maps), "Environs of London" (in two parts), England and Wales, Eastern Counties, Kent, Sussex; Surrey, Hants, and Isle of Wight; Berks, Bucks, and Oxon; Wilts, Dorset, and Somerset; Devon, Cornwall, and many others, too numerous to dwell upon. The Foreign list also contains several handbooks of great interest; amongst them we may point out Algeria and Tunis, Spain, Portugal, the Mediterranean (with maps), Rome and its Environs, Egypt, Greece, Turkey in Asia, Russia (with maps), Bombay, Madras, Bengal, Punjab, the Holy Land (with maps). Although very many people cannot hope even to see a tithe of the places described in Murray's Handbooks, no little pleasure will be derived by them from a perusal of those which treat of the countries they may wish to become most familiar with. It would be difficult to estimate too highly the handbook of the Holy Land, and the maps which accompany it.

"Please send another 14lb. barrel of LENTILLA, an excellent FOOD TONIC of which I cannot speak too highly. I fully endorse all said in its favour.—Yours truly, H. H. Brooks, Tinwell Grange, near Stamford." Cures indigestion, dyspepsia, constipation, liver and stomach complaints, &c. Tins, 1lb., 1s 6d; ½lb., 10d. Barrels, 28lb., 30s; 14lb., 16s. Of all chemists. Proprietor, H. J Deacon, Beckenham, Kent.

Amusements.

At the Royal Italian Opera, "La Gioconda" was repeated on Monday; on Tuesday was revived Wagner's "Flying Dutchman," with Madame Albani as the heroine; on Thursday was repeated "Dinorah," with Madame Adelina Patti. "Le Prophète," for the last time this season, was associated with Madame Scalchi on Friday. A Saturday morning performance of "La Sonnambula" is supported by Madame Albani, Signor De Reszke, and Signor Ravelli; and this (Saturday) evening there will be the welcome repetition of "La Gazza Ladra," with Madame Adelina Patti as Ninetta.

At the Lyceum, on Wednesday, Thursday, and Friday, "Hamlet" has varied the programme, Mr. Henry Irving as Hamlet, being supported by the Ophelia of Miss Ellen Terry.

The Gaiety has been filled, as usual, through the attraction of Madame Sarah Bernhardt, who has appeared in "Fédora." The tragical pantomimical eccentricity of "Pierrot Assassin," and the three-act comedy of "Valerie," produced at the Théâtre Français more than half a century ago, have been also announced to be included in the week's programme.

The season will terminate at the St. James's Theatre on July 20, and the house will remain closed until Sept. 17, when the performances will be resumed with "Impulse." The earliest novelty of the ensuing campaign will be a new comedy entitled "Esmeralda."

Miss Lilian Russell, from America, is announced to make her first appearance on Monday next at the Gaiety, in Messrs. Solomon and Stephen's new comic opera of "Virginia and Paul."

The elaborate entertainment and costume ball given by the Savage Club, under Royal patronage, for the purpose of founding a club scholarship in the Royal College of Music, took place on Wednesday evening at the Royal Albert Hall, when a number of well-known public favourites, members of the Savage Club, prominently distinguished themselves.

The "National Panorama," opened about a year ago in York Street, Westminster, has now announced a second season with a well-painted view of the battle of Tel-el-Kebir, reproduced on a large scale from sketches made on the spot by French artists who accompanied the Egyptian Expedition. The Prince of Wales and several members of the Royal Family have visited the panorama and recorded their approval of it.

There is no lady amateur on the stage better known, perhaps, or more respected than Miss Zoe Clifford. Her many friends will regret to learn that this talented lady is now lying seriously ill. The Romany Amateur Dramatic Club gave a performance at St. George's Hall, on Thursday evening, for her benefit, when the proceeds reached £120. Lieut.-Col. Alt and the officers of the Central London Rangers lent their string band for the occasion. The programme included "Our Bitterest Foe," played with marked ability throughout by Mr. Trollope and Miss Woodzell, and "Woodcock's Little Game," in which Mr. Allen particularly distinguished himself as Woodcock. Acting such as that of the Romany Club is rarely seen on the amateur stage. The performance was very even and satisfactory.

The following is the latest return of Surg.-Gen. J. Irvine, principal medical officer to the army of occupation, of the health of the British troops in Egypt. Of a total strength of 440 cavalry at Cairo, 26, or 6 per cent., were on the sick list; of the Royal Engineers, out of 184 only nine, or about 4 per cent., were under medical treatment. The total troops at Cairo were 5,150, of whom 412, or 8 per cent., were ill. At Alexandria, 1,578 troops are quartered; out of these 134, or 8·5 per cent., are on the sick list; while at Port Said, where there are 95 men, only five are sick. Of the total number in Egypt, 6,820, 550 are under treatment. The Gordon Highlanders still suffer severely; 12·2 per cent. of the regiment being on the sick list, while the 42nd Royal Highlanders have only 9 per cent., King's Royal Rifle Corps 7 per cent., Cameron Highlanders 6 per cent., and sundry corps (Commissariat and Transport, &c.), 5 per cent. The prevalent diseases are dysentery and ophthalmia, many of the cases being slight.

The statement that, consequent on the prevalence of cholera in Egypt, the Indian troopships would, during the approaching season, not pass through the Suez Canal, is unauthorised. No change has so far been made in the outgoing arrangements, and it had been decided that several relieved regiments should return *viâ* the Cape before cholera was reported at Damietta. The following are the dates fixed for the sailing of the Indian troopships from Portsmouth during the ensuing season:—The Malabar, on Sept. 4; the Euphrates, Sept. 8; the Jumna, Sept. 12; and the Serapis, Sept. 16.

SPECTACLES *v.* BLINDNESS.—"Spectacles can only be perfectly adjusted by those having a thorough knowledge of the anatomy of the eye, combined with optical experience."—We have the highest medical authorities confirmed by daily experience, that imperfect glasses, together with the haphazard plan of selection generally employed by the mere vendor, is the cause of most cases of blindness and defective vision. Sir Julius Benedict writes:—"I have tried the principal opticians in London without success, but the spectacles you have adapted suit admirably. The clearness of your glasses as compared with others is really surprising." The Rev. Professor W. A. Hales, M.A. Cantab., 2 Minford Gardens, West Kensington Park, writes:—"The spectacles are perfect, and a most decided boon. I had occasion on Monday to write to Lord ——, and took the opportunity to mention your name and the wonderful power of your spectacles." Dr. Bird, Chelmsford, writes:—"I could not have believed it possible that my sight could have been so much improved and relieved at my age (82). I can now read the smallest type, although suffering from cataract on the right eye." Testimonials from Earl and Countess Lindsay; F. D. Dixon Hartland, Esq., M.P.; the Venerable Archdeacon Palmer, Clifton; Rev. Mother Abbess, St. Mary's Abbey, Mill Hill, Hendon; C. J. Alford, Esq., Gas Light and Coke Company, Horseferry Road, Westminster, &c. Mr. HENRY LAURANCE, F.S.S., Oculist Optician, 39 OLD BOND STREET, W. (late 3 Endsleigh Gardens, Euston Square), personally adapts his Improved Spectacles daily (Saturdays excepted), from 10 to 5. Special arrangements are made for invalids and others unable to wait on Mr. Laurance. Pamphlet, "Spectacles: their Use and Abuse," post free. City Branch, 6 Poultry, Cheapside.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 10, 1883.

20th Hussars—Capt. J. T. Browne to be Major, vice Brevet Lieut.-Col. G. W. A. FitzGeorge, retired on half-pay; Lieut. S. H. J. Stewart to be Capt., in succession to Major J. T. Browne, Adjt. of Auxiliary Forces (both dated June 20).

Royal Engineers—Lieut.-Cols. and Brevet Cols. G. H. Gordon to be Col., vice Sir C. B. P. N. H. Nugent, K.C.B., removed to the Unemployed Full-pay List (July 1); and W. B. Gosset, half-pay, is placed upon retired pay with an annuity; Major A. C. Hamilton to be Lieut.-Col., vice A. Parnell, retired (June 30); Major and Brevet Lieut.-Col. F. A. le Mesurier, to be Lieut.-Col., vice Brevet Col. G. H. Gordon; Major C. R. T. Davidson to be Lieut.-Col., vice Col. R. Grant, placed on half-pay (both dated July 1); Majors W. Shepherd (late Bengal) has been placed on half-pay (June 23); H. C. Reynolds retires on retired pay, with the hon. rank of Lieut.-Col.

Chaplains' Department—The Rev. P. Beaton, M.A., Chaplain to the Forces of the 1st Class, retires on retired pay.

MEMORANDA.

Lieut.-Gen. J. A. Fuller, C.I.E., Royal (late Bombay) Engineers, has retired on a pension and extra annuity, with the hon. rank of Gen. (June 1).

Qrmr. J. Cotton, the Gordon Highlanders, to have the hon. rank of Capt., in recognition of his services during the recent campaign in Egypt.

INDIA OFFICE, July 10, 1883.

The Queen has approved of the retirement of the under-mentioned officers of her Majesty's Indian Military Forces:—Lieut.-Col. and Brevet Col. W. A. Gillespie, of the Bombay S.C. (July 5); Majors C. J. Farquharson, of the Half-pay List, Bengal S.C. (May 3); T. Price, of the Madras S.C. (April 16); W. G. Sharp, of the Madras S.C. (May 24); W. R. Trevelyan, of the Bombay S.C. (May 20); and Surg.-Major J. J. Durant, of the Bengal Army (July 1).

BREVET.

The under-mentioned officers are granted a step of honorary rank on retirement:—

To be Major-General:—Lieut.-Col. and Brevet Col. W. A. Gillespie, of the Bombay S.C. (July 5).

To be Lieutenant-Colonels:—Majors C. J. Farquharson, of the Half-pay List, Bengal S.C. (May 3); T. Price, of the Madras S.C. (April 16); W. G. Sharp, of the Madras S.C. (May 24); W. R. Trevelyan, of the Bombay S.C. (May 20).

To be Surgeon-General:—Deputy-Surg.-Gen. A. C. C. de Renzy, C.B., of the Bengal Army (Dec. 9, 1882).

To be Deputy-Surgeon-General:—Brig.-Surg. J. Picthall, M.D., of the Bengal Army (Dec. 1, 1882).

To be Brigade-Surgeons:—Surgs.-Major G. W. Jameson, of the Bengal Army (April 4, 1882); L. F. Dickson, M.D., of the Bengal Army (Nov. 27, 1882); and J. Bilderbeck, of the Madras Army (May 17).

Lieut.-Col. J. M. Williams, of the Madras Army, who was permitted to retire from the service on Dec. 31, 1879, and received the hon. rank of Col. thereon (*London Gazette*, March 19, 1880), having since been promoted to the Brevet rank of Col. from Oct. 27, 1879, is granted the hon. rank of Major-Gen., with effect from Dec. 31, 1879.

The retirement and promotion in hon. rank of Col. C. J. Godby and Lieut.-Col. G. N. Money, C.B., of the Bengal S.C., notified in the *London Gazette* of Dec. 1, 1882, are antedated to July 1, 1882.

WAR OFFICE, PALL MALL, July 10, 1883.

THE HONOURABLE ARTILLERY COMPANY OF LONDON.—The under-mentioned officers retire into the Veteran Company with the hon. rank of Captain, and are permitted to wear their uniform on retirement:—Lieuts. E. A. Baylis and A. M. Soule. Lieut. and Assistant Instructor of Musketry J. A. M'Kenzie resigns his appointment of Assistant-Instructor of Musketry; Second Lieut. W. H. Bosanquet resigns his commission; Richard Birkett, gent., to be Lieut., vice Baylis, retired; J. W. Carlton, gent., to be Lieut., vice Soule, retired; Thomas Blashill, gent., to be Lieut., vice Bosanquet, resigned; Second Lieut. H. Bateman to be Assistant-Instructor of Musketry, vice M'Kenzie, who resigns that appointment.

MILITIA.

WAR OFFICE, PALL MALL, July 10, 1883.

ROYAL ARTILLERY.

2nd Brigade, Lancashire Division—Lieut. W. E. Thiselton resigns his commission.

7th Brigade, South Irish Division—Capt. H. Hall resigns his commission.

INFANTRY.

4th Battalion, the Buffs (East Kent Regiment)—Charles Edward Eagle-Bott, gent., to be Lieut.

3rd Battalion, the King's Own (Royal Lancaster Regiment)—John Acheson-Henderson, gent., to be Lieut. (June 29).

4th Battalion, the Devonshire Regiment—G. T. I. Swann, Esq., late Lieut. the Connaught Rangers, to be Capt.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry)—Capt. W. Leir is granted the hon. rank of Major.

3rd Battalion, the Bedfordshire Regiment—Capt. and Hon. Major T. J. Sunderland to be Major; Lieut. F. W. Pym to be Capt.

4th Battalion, the Bedfordshire Regiment—Lieut. G. D. Wetherall resigns his commission.

4th Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Lieut H. J. E. Gore resigns his commission.

3rd Battalion, the Cameronians (Scottish Rifles)—Walter William Meiklejohn, gent., to be Lieut. (July 3).

4th Battalion, the Royal Inniskilling Fusiliers—Willoughby Frank Thompson, gent., to be Lieut.

3rd Battalion, the Black Watch (Royal Highlanders)—Lieut. J. Swinburne resigns his commission.

3rd Battalion, the Manchester Regiment—Lieut. H. Kay resigns his commission.

3rd Battalion, the Highland Light Infantry—Lieut. T. S. G. H. Robertson-Aikman to be Capt.; Hugh Harry Robertson-Aikman, gent., to be Lieut.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, July 10, 1883.

West Somerset—Seymour Pleydell-Bouverie, gent., to be Lieut.

VOLUNTEERS.

WAR OFFICE, PALL MALL, July 10, 1883.

ARTILLERY.

1st Aberdeenshire—Lieut. W. A. Mellis resigns his commission.

1st Edinburgh (City)—Capt. W. G. Thompson to be Major. The under-mentioned Lieuts. to be Capts.:—F. T. Tyndall and G. D. Mackay.

1st Hampshire—Lieut. J. MacLachlan to be Capt.

1st Kent—Capt. C. J. Williams resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

5th Lancashire—Lieut. J. Hindle resigns his commission.

4th West Riding of Yorkshire (Sheffield)—Henry Branson Firth, gent., to be Lieut.

ENGINEER.

1st West Riding of Yorkshire—Surg. T. W. Hime resigns his commission; Acting Surg. G. Robinson to be Surg.; William Dale James, gent., to be Acting Surg.

RIFLE.

2nd Cambridgeshire (Cambridge University)—Qrmr. F. C. Wace resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Cheshire—Acting Surg. W. G. Laidlaw, M.D., resigns his appointment.

1st Cinque Ports—Major F. W. Robertson, 2nd Batn. the Royal Sussex Regt., to be Adjt., in succession to Capt. A. W. Whitworth, who resigns on appointment as probationer in the Army Pay Dept. (July 1).

1st Clackmannan and Kinross—Major and Hon. Lieut.-Col. J. Robertson resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Cornwall (Duke of Cornwall's)—Lieut. R. H. Blamey resigns his commission.

1st Glamorgan—Capt. C. S. B. Gardner resigns his commission.

1st Herefordshire—Alfred Henry Matthews, gent., to be Lieut.

3rd Volunteer Battalion, the Queen's Own (Royal West Kent Regiment)—Acting Surg. H. F. Bailey resigns his appointment.

6th Lanarkshire—Andrew Clark, gent., to be Lieut.

6th Lancashire (1st Manchester)—Lieut. A. H. Atkinson resigns his commission.

1st Volunteer Battalion, the King's Own (Royal Lancaster Regiment)—Wilfrid Burton Rowley Kennedy, gent., to be Lieut.

2nd Volunteer Battalion, the Lancashire Fusiliers—James Chadwick, gent., to be Lieut.

20th Lancashire (2nd Manchester)—John Scott, gent., M.A., M.B., to be Acting Surg.

2nd Volunteer Battalion, the Lincolnshire Regiment—Lieut. J. H. Burg resigns his commission; also is granted the hon. rank of Capt., and is permitted to continue to wear the uniform of the batn. on his retirement.

17th (North) Middlesex—John Oldridge Dicker, gent., to be Lieut.

21st Middlesex (the Finsbury)—John Horace Hooper, gent., to be Lieut. (supernumerary).

2nd Midlothian and Peebleshire—Ebenezer Dawson, jun., gent., to be Qrmr.

1st Monmouthshire—Frank Grove, gent., to be Lieut.

4th Volunteer Battalion, the Norfolk Regiment—John Sharman Forrester, gent., to be Lieut. (supernumerary).

3rd Volunteer Battalion, the South Staffordshire Regiment—Moses Taylor, gent., to be Acting Surg. (July 2).

1st Suffolk—Major the Hon. W. M. W. C. Burrell resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Sutherland (Highland)—The under-mentioned Capts. are granted the hon. rank of Major:—J. Brims and J. Peacock. Capt. C. G. Sinclair to be Major.

1st Volunteer Battalion, the East Yorkshire Regiment—Surg. J. A. Wallis, M.B., resigns his commission; Herbert Rendell, gent., M.B., to be Acting Surg.

(Where not otherwise specified, the foregoing commissions and announcements bear date July 11, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 13, 1883.

5th Dragoon Guards—Capt. J. F. Green has been seconded for service as an Adjt. of Auxiliary Forces (June 21).

8th Hussars—Lieut. T. H. Farrer resigns his commission.

16th Lancers—Capt. H. R. L. Howard has been seconded for service as an Adjt. of Auxiliary Forces (July 2).

21st Hussars—Lieut. W. Knox to be Capt., vice R. Owen, seconded (June 13).

Royal Artillery—Capt. C. S. Graham, on the Seconded List, to be Major; Major W. Taylor, from half-pay, to be Major, vice E. Bainbridge, placed upon the Seconded List (both dated July 1); Capt. and Adjt. G. Will to be Major, vice A. E. England, retired; Capts. O. F. T. Annesley to be Major, vice M. Moore-Lane, retired (both dated July 7); L. Tillotson, from the Seconded List, to be Capt., vice St. A. B. Warde, seconded for service as an Adjt. of Auxiliary Forces (June 8); Lieuts. W. A. Plant to be Capt., vice P. K. L. Beaver, promoted Major on half-pay (June 28); W. F. Bunn to be Capt., vice G. Will, promoted; R. M. Brady to be Capt., vice O. F. T. Annesley, promoted; R. D. Loudon to be Capt., vice T. J. Roch, retired (all three dated July 7); H. F. Mercer, from the Seconded List, to be Lieut., vice W. A. Plant, promoted.

Grenadier Guards—Lieut. J. T. L. Manners resigns his commission.

Coldstream Guards—Lieut. and Capt. R. Pole-Carew to be Capt. and Lieut.-Col., vice H. J. L. Bruce, retired on half-pay (July 4).

Scots Guards—Capt. and Lieut.-Col. the Hon. F. C. Bridgeman to be Major, vice Lieut.-Col. R. Vivian, retired; Lieut. and Capt. ffolliott W. Erskine to be Capt. and Lieut.-Col., vice the Hon. F. C. Bridgeman (both dated June 20).

REGIMENTAL DISTRICTS.

Lieut.-Cols. and Cols. S. A. Madden, C.B., commanding the 42nd Regtl. District (the Black Watch), Royal Highlanders), has been placed on retired pay, with the hon. rank of Major-Gen. (July 5); A. Cherry, from half-pay, to be Lieut.-Col., to command the 16th Regtl. District (the Bedfordshire Regt.), vice Col. W. C. Bancroft, who vacated that appointment on promotion; and F. G. C. Probart, from Lieut.-Col. commanding the 51st Regtl. District (The King's Own Light Infantry, South Yorkshire Regt.), to which is attached the 65th Regtl. District (The York and Lancaster Regt.), to be Lieut.-Col. to command the 9th Regtl. District (The Norfolk Regt.), vice Col. J. Miller, who is about to be placed on retired pay (July 25).

LINE BATTALIONS.

The Northumberland Fusiliers—Major C. de J. Græme retires on retired pay, with the hon. rank of Lieut.-Col.; Lieut. A. M. Caulfeild, from Princess Charlotte of Wales's (Berkshire Regt.), to be Lieut., vice C. A. Brown, appointed a probationer for the Indian S.C.

The Royal Warwickshire Regiment—Lieut. J. F. Greenwood has been appointed a probationer for the Indian S.C. (April 22).

The Royal Fusiliers (City of London Regiment)—Capt. and Brevet Major E. W. Adderley to be Major, vice G. A. Sweny, promoted (April 9); Lieuts. W. H. S. Heron-Maxwell to be Capt., in succession to Major J. H. C. Clarke, Adjt. of Auxiliary Forces (May 24); R. L. Appleyard to be Capt., vice R. B. Manning, retired (May 30); Serjt.-Major Henry Franklin to be Qrmr., vice H. Clowes, posted to the 4th Batn.

The King's (Liverpool Regiment)—Lieut. R. Johnston, from the Cheshire Regt., to be Capt., vice A. H. Cope, placed on temporary half-pay.

The Norfolk Regiment—Lieuts. J. Thompson to be Capt., vice O. Allcard, promoted (March 12); Lieut. A. S. Vesey to be Capt., vice J. H. Sewell, appointed Adjt. (June 27).

The Suffolk Regiment—Lieut.-Col. and Col. W. T. Baker retires on full pay, with the honorary rank of Major-Gen.; Lieut. C. C. A. Sillery, from the Royal Inniskilling Fusiliers, to be Lieut., vice A. J. Watson, promoted.

The Prince Albert's (Somersetshire Light Infantry)—Supernumerary Lieut. W. P. Cunningham, having ceased to be a probationer for the Indian S.C., to be Lieut., vice E. M. Poynton, promoted (May 23).

The Royal Irish Regiment—Lieut. J. C. Oughterson to be Capt., vice E. Tufnell, promoted (Nov. 11, 1882).

The Lancashire Fusiliers—Capt. C. G. Collingwood to be Major, vice H. R. P. Lindesay, retired; Lieut. T. E. Bland to be Capt., vice C. G. Collingwood (both dated June 27).

The Royal Scots Fusiliers—Capt. A. C. Dunn retires from the service, receiving a gratuity, with permission to retain his rank, and to wear the prescribed uniform.

The Cheshire Regiment—Supernumerary Capt. G. W. H. Cunningham to be Capt., vice G. A. Christian, retired (June 28).

The South Wales Borderers—The promotions to the rank of Major of Capts. H. B. Moffat and A. A. Morshead, dated June 9, 1882, J. J. Harvey, dated Sept. 30, 1882, and H. M. Williams, dated April 4, 1883, are cancelled. Capts. H. B. Moffat to be Major, vice Brevet Lieut.-Col. F. Carrington, C.M.G., seconded for service with the Colonial Militia, Cape of Good Hope; A. A. Morshead to be Major, vice H. B. Moffat, seconded (both dated Feb. 25, 1882); J. J. Harvey to be Major, vice R. Upcher, promoted (June 9, 1882); H. M. Williams to be Major, vice W. P. Symons, seconded (Sept. 30, 1882); Capt. and Brevet Major G. Bromhead, V.C., to be Major, vice T. Rainforth, retired (April 4). The promotions to the rank of Capt. of Lieuts. G. C. Palmer and W. Weallens, dated July 5, 1882, and April 4, 1883, respectively, are cancelled; Lieuts. G. C. Palmes to be Capt., vice J. J. Harvey, promoted (June 9, 1882); W. Weallens to be Capt., vice H. M. Williams, promoted (Sept. 30, 1882); Serjt. William Burton Watts, from the King's Own Light Infantry (South Yorkshire Regt.), to be Lieut., vice W. C. Godfrey, resigned.

The Duke of Wellington's (West Riding Regiment)—Colour-Serjt. Henry Smythe, from the King's (Shropshire Light Infantry), to be Lieut., vice S. J. Trench, promoted.

The Royal Sussex Regiment—Lieut. A. C. H. Bathurst to be Capt., vice A. T. Chapman, deceased (March 15).

The Welsh Regiment—Colour-Serjt. John Henry de Albini de Moutalt Farmer Stratford, from the Connaught Rangers, to be Lieut., vice W. S. Copland, transferred to the Leicestershire Regt.

The Black Watch (Royal Highlanders)—Lieut. A. G. Duff to be Adjt., vice Capt. E. Lee, deceased.

The Essex Regiment—Lieut. W. G. Carter to be Capt., vice E. C. Parker, retired (March 14).

The Sherwood Foresters (Derbyshire Regiment)—Lieut. L. A. D. Montague resigns his commission.

The Northamptonshire Regiment—Capt. E. Lovegrove to be Major, vice G. A. Lewes, seconded for service as a Deputy-Assist.-Comy.-Gen. (Dec. 16, 1882). The promotion to the rank of Capt. of Lieut G. F. Browne is antedated to Dec. 16, 1882, vice E. Lovegrove; Lieut G. H. McC. O. Whieldon to be Capt., vice S. A. Dodd, retired (May 6)

The King's (Shropshire Light Infantry)—Capt. C. E. Knox to be Major, vice G. W. Smith, seconded for service on the Staff; Lieut. J. Spens to be Capt., vice C. E. Knox (both dated July 1).

The King's Royal Rifle Corps—Lieut. F. S. Marsham, from Princess Charlotte of Wales's (Berkshire Regt.), to be Capt., vice C. Hope, retired.

The Queen's Own (Cameron Highlanders)—Capt. G. A. C. Reid resigns his commission.

The Connaught Rangers—Lieut. R. H. Townshend, from the 2nd West India Regt., to be Lieut., vice R. Egerton, who exchanges.

The Royal Munster Fusiliers—Lieut.-Col. W. H. Abbott to command a battalion; Major A. C. Maurice to be Lieut.-Col., vice M. Hall, retired on half-pay; Capt. G. Allen to be Major, vice A. C. Maurice; Lieut. J. Coulton to be Capt., vice G. Allen (all four dated June 13).

2nd West India Regiment—Lieut. R. Egerton, from the Connaught Rangers, to be Lieut., vice R. H. Townshend, who exchanges.

Chaplains' Department—The Rev. E. B. B. Kitson, M.A., Chaplain to the Forces of the Third Class, to be Chaplain to the Forces of the Second Class (June 22).

Medical Department—Surgs.-Gen. J. A. Woolfryes, M.D., C.B., C.M.G., has been granted retired pay; J. E. Clutterbuck, M.D., has been granted retired pay (June 1).

Army Hospital Corps—The under-mentioned Qrmrs., with the relative rank of Capt., to have the hon. rank of Capt. (June 25):—W. Ward, A. Platt, and G. W. M. Johnston.

Army Pay Department—Pymr. and Hon. Capt. W. Dawes, half-pay, to have the hon. rank of Major (April 1); Assist.-Pymr. in the Army G. V. Wellesley to be Pymr., with the hon. rank of Capt. in the Army (July 9).

Veterinary Department—Principal Vet.-Surg. J. Collins, having completed seven years' service in the appointment of Principal Vet.-Surg., has been placed on retired pay (June 28). The under-mentioned Vet.-Surgs. to be Vet.-Surgs., 1st class (dated April 1):—J. E. Elphick, A. A. Jones, and G. D. Whitfield.

BREVET.

Capt. R. F. Bros, retired pay, to be Major.

MEMORANDA.

Lieut.-Col. and Col. R. J. Hughes, C.B., half-pay, is placed on retired pay, with the hon. rank of Major-Gen.

The promotion to the rank of Col. of Lieut.-Col. G. F. Beville, Bombay S.C., is antedated to July 11, 1881.

The name of the officer of the Royal Artillery promoted Col. in the Army in the *London Gazette* of July 6, 1883, is Rideout, and not as therein stated.

The under-mentioned officers to be Cols.:—Lieut.-Col. C. J. Anderson, Bombay S.C. (May 20); Major and Lieut.-Col. R. T. Thynne, Grenadier Guards, Deputy-Adjutant and Quartermaster-General, Malta (July 5).

Lieut.-Col. M. Hall, half-pay, retires on a pension, with the hon. rank of Col.

Capts. and Brevet Majors R. E. Roe, half-pay, Staff Officer of Pensioners, has been placed on retired pay, with the hon. rank of Lieut.-Col. (July 7); R. F. Bros, retired pay, retires from the service, receiving the value of his commission.

Capts. R. W. Bastow, formerly of the 63rd Foot, who retired from the service on March 13, 1878, has been permitted to receive a gratuity instead of the value of his commission, as notified in the *Gazette* of March 12, 1878; J. D. Legard, retired from the Royal Artillery receiving a gratuity, has been permitted to retain his rank, and wear the prescribed uniform (Sept. 27, 1882).

Rdgmr. J. Lovell, R.A., to have the hon. and relative rank of Capt. (June 28).

Qrmr. T. H. Weatherhead, 3rd Batn. the Duke of Cambridge's Own (Middlesex Regt.), resigns his commission.

The under-mentioned Deputy-Assist.-Comies. of the Bengal Establishment to have the hon. rank of Lieut.:—M. Shanahan and J. Grant (both dated Jan. 10), P. J. Ryan (Jan. 11), and J. H. O'Farrell (Jan. 26).

RESERVE OF OFFICERS.

Lieut. J. Preston, Capt. 3rd Batn. Princess Charlotte of Wales's (Berkshire Regt.), to be Capt.; C. L. A. Skinner, Esq., late Lieut. 4th Hussars, to be Lieut.

(Where not otherwise stated, the foregoing commissions and announcements bear date July 14, and the current year must be understood.)

It has been determined to extend the term of service of Lieut.-Gen. Sir F. FitzWygram as Inspector-General of Cavalry until April next.

The Channel Tunnel controversy is one of which every Englishman should feel heartily ashamed. The Military authorities say that, were the tunnel constructed, a first-class fortress at Dover, or wherever it may *débouche*, is an absolute necessity, imperatively demanded for the safety of the country. But these authorities agree that the invasion would not be made through the tunnel. It would be made by boat, they say. Then how is it that Dover has never yet been surprised? asks the *Hampshire Telegraph*. Then, again, says Lord Wolseley, "were war to go against us, our enemy might demand the *tête-de-pont* of the Tunnel, and hold it until a ransom is paid." Could he not, now, without the Tunnel, if he did lick us, demand to occupy Portsmouth or any other English town under similar conditions? We really do feel ashamed of our countrymen when we hear such rubbish talked over the construction of a mere "rat hole" under the Channel. The French journal, *Le Progrès Militaire*, says on this subject that "One is aware of the opposition encountered in England by the project to construct a tunnel under the Channel. One would really say that Englishmen look upon us as their most inveterate and only enemy. But that would be nothing. Gen. Wolseley declared on Wednesday before the Commission of both Houses of the English Legislature that the tunnel would constitute a danger to England, whatever precautions might be taken, since even in time of peace a surprise is possible. One could hardly express more bluntly an opinion that Frenchmen are pirates, to whom the rights of property and of man are unknown, and whom one must look upon in the light of being at all times ready to swoop down, even in time of peace, without giving warning, upon their neighbours. Englishmen judge us really far too much after the tendencies which obtain among so many of themselves." Knowing the French as we do, we feel ashamed of the churlish feeling at the bottom of this childish opposition to an engineering work which must benefit the country. Besides how about the Navy? We thought that service was our "first line of defence," and as Lord Wolseley admits that invasion through the tunnel is impossible, every Naval man must feel ashamed at the little confidence placed by soldiers in the ability of the Navy to safeguard our shores.

"SAPO CARBONIS DETERGENS" is a physician's name for a remedy prescribed for the past quarter of a century for every variety of skin disease. The public have found that as a preventive of small-pox, scarlet fever, and measles, it is unequalled. See that the Latin name described above, and the words "WRIGHT, SOUTHWARK," are on each wrapper, and branded on each tablet without which none is genuine.

COLONIAL service, with its possibilities of honourable and lucrative employment, has appeared to many a soldier as one of the coveted prizes of his not over-rewarded profession. The recent experience, however, of Major-General C. G. Gordon with the Cape Government ought to prove a lesson to those who may come after him, and open the eyes of soldiers generally to the fact that there is another and very seamy side to the garment of honour represented by Colonial command. We have before us, "Minutes of Meetings and Correspondence on Affairs in Basutoland, by the Honourable Secretary for Native Affairs, Cape Town, presented to both Houses of Parliament by command of his Excellency the Governor." This pamphlet has, of course, been printed with a view to justify the action of the Cape Government in regard to General Gordon. The following is the story which it tells. In March, 1880, the Cape Government asked General Gordon to accept the command of the Colonial Forces, and its offer was declined, as the sympathies of the General were, in common with those of many Englishmen, on the side of the Basutos, with whom the Cape Government was at war. In April, 1881, however, General Gordon offered his services as a peaceful intermediary to assist in terminating the war and administering the country. Mr. Sprigg's Administration, then approaching its overthrow, took no notice of this proposal, but on the accession to power of Mr. Scanlon's Government, the General was earnestly requested to come to its assistance, on the terms of his offer of the previous year. This, with the sanction of the Home authorities, he did, and he accordingly left Mauritius to assume his new functions. On his arrival at the Cape, in a private and civil capacity, he was asked to accept temporarily the office of Commandant-General of the Colonial Forces, with a view to their reorganisation and consolidation. He accepted the post, and set to work with his accustomed energy at his task. Meanwhile, acting on his first and principal motive for going to the colony, he was busily engaged in compiling, from the sources at his disposal, reports as to the best method of action in the Basuto matter. His opinions, founded on these, he openly formulated, and though they did not coincide with those of the Ministry, the Government represented by Mr. Sauer, the Secretary for Native Affairs, requested General Gordon to accompany that gentleman to Basutoland. This, after some hesitation, he consented to do, openly affirming, however, that his visit would be useless unless more conciliatory terms were offered to the natives, than those then favoured by the Government. Accordingly, on September 16 last, we find a report of a meeting between the loyal chiefs and Mr. Sauer, accompanied by the General. The upshot of the meeting, at which General Gordon informed the natives of his friendly intentions and his refusal to fight against them, was that Letsie, the chief of the Basutos, offered to reduce Masupha, the rebel leader, his brother, to subjection. This proposition, in a memorandum to Mr. Sauer, dated September 19, General Gordon strongly deprecated, urging that neither Letsie nor his people would take any energetic steps against their friends and kinsman, and proposing instead, conciliation, the removal of the Government agent, Mr. Orpen, who was very obnoxious to the natives, and by these means, the gradual isolation of Masupha, through the contentment of the people. Partly in fulfilment, and partly as an alternative to this scheme, an arrangement was made that General Gordon should "in a completely private capacity," seek an interview with Masupha, listen to his side of the question, and endeavour to obtain from him an announcement of what he would be content to agree to. On September 25, then, the General was on his way to Masupha, having previously written formally to Mr. Sauer, explaining the motives and defining the limits of his mission. On his arrival at Shaba Bosigo, Masupha's station, he wrote announcing the terms on which he came, and the object of his visit, and reiterating his sentiments with regard to the war, the same sentiments which he had openly expressed, both before and since his coming to the Cape, and of which, when accepting, or rather asking, for his services, the Government must have been fully aware. In his expedition of conciliation, however, General Gordon was accompanied by a gentleman deputed by Mr. Sauer, nominally as an assistant, but, from the documentary evidence, apparently as a spy. This gentleman was the Paymaster-General of the Colonial Forces, Mr. Garcia, in whom, as a person whom he had recommended for promotion and increased emolument, General Gordon no doubt thought he could place implicit confidence. How little this confidence was deserved appears from the official correspondence, now published. During the time that Mr. Garcia was associated with the General to all appearances in a friendly capacity, he was keeping up an active correspondence with Mr. Sauer, and giving him *his* version of the state of affairs; nay, even in one or two instances appending comments of his own, to official letters written by General Gordon's direction. In fact, the whole tone of the correspondence between these two officials with respect to General Gordon bespeaks neither confidence in the mission which he had undertaken with the Government's consent, nor a desire to support him in it. On receipt of a copy of General Gordon's letter to Masupha, Mr. Sauer writes to Mr. Garcia expressing his doubts as to either Masupha or the Government agreeing to the policy indicated by the General, but adds, "As he is talking to Masupha privately, it does not much matter." Following this letter to Masupha came an interview between the General and the chief, at which the same ideas were expressed as in the written communication, and the General urged Masupha, for his own sake and that of his people, to come to terms with the Government, suggesting at the same time a *modus vivendi* likely to meet all the requirements of loyalty, without unnecessarily wounding the self-esteem of the natives. Masupha asked for time to consider the matter, but the next day all the plans of conciliation were upset by the intelligence that Lerothodi had been ordered by the Government at once to attack Masupha, who thereupon closed the negotiations, and matters then reverted to their former strained condition. The General, rightly, we think, interpreting this action of the authorities as a deliberate stultification of himself and his mission, immediately determined to return to the Colony and quit a service in which he had been treated with indignity and distrust. He accordingly wrote to Mr. Sauer, and telegraphed to the Under-Colonial Secretary to that effect. Mr. Sauer expressed his regret at the General's leaving Basutoland. Mr. Scanlon, however, in accepting his resignation, accompanied that acceptance with the ungenerous remark that "after his [General Gordon's] intimation that he would not fight the Basutos, and considering the general tenour of his communications to Masupha, the Premier regretted to record the conviction that his continuance in the position he occupied would not be conducive to the public interests." Without going into the voluminous correspondence following this decision, and teeming with directly opposite statements as to fact, on the part of General Gordon and the Government, the above statement of the occurrences referred to points but to one conclusion, namely, that General Gordon has been unjustly and ungenerously treated. He was asked to assist as a peacemaker, and then saddled with the onus and responsibility of a possible combatant by being induced to accept the temporary command of the Colonial Forces. After being summoned as an adviser, his advice was entirely disregarded, while its soundness was vindicated by the fact that, as he had foreseen, Lerothodi ultimately refused to march against Masupha, with whom at heart he was a sympathiser. Lastly, after being sent in his private and mediative capacity to negotiate with Masupha, his words and acts were slighted, on the one hand, as those of an irresponsible man, and on the other, visited with rebuke, because, according to Mr. Scanlon's idea, irreconcileable with his public position. We think it will appear to all unprejudiced readers that the action of the Cape Government has been irreconcileable with justice or fair-play, and that after inducing General Gordon to support and assist them in one capacity, they deliberately employed him in another, incompatible with the first; then, after permitting him to go upon a mission in accordance with that first capacity, sprung a mine upon him, because his actions were incompatible with the second. It is an acknowledged fact that the General refused military command and accepted a political post, the duties of which he conscientiously carried out. That he should have failed to satisfy the exigencies of two utterly inconsistent offices was entirely the fault of the authorities who induced him to assume them. The physical and moral impassibility of corporate bodies has passed into a proverb; while the ingratitude of peoples is at least as flagrant as that of Princes. Nevertheless, it is but fair that the British service should know how unjustly one of its best ornaments has been saddled with the responsibility of failure, and how undeservedly a career bristling with good and worthy deeds has been partly wrecked at the Cape of Good Hope.

THE Staff Officers of Pensioners have appealed to the War Office to ameliorate their position, which, they consider, has been seriously injured by the operations of recent Royal Warrants. Briefly stated, the case of the officers in question is as follows:—Staff Officers of Pensioners were first appointed in 1842-3, for the payment and organisation of from 600 to 1,200 pensioners in each district. They were granted the rank, pay, and allowances of a "Staff Captain," and the appointment was then declared and has ever since been acknowledged to be a full-pay appointment. This secured to these officers their promotion in the Army, and by this means many have risen by Brevet to the rank of Colonel, retiring as Honorary Major-Generals on £420 a year. The duties have been gradually increased, by the addition of pensioners from the Navy, Marines, Mercantile Marine, and Patriotic Fund, until the numbers now paid by each of the Staff Officers of Pensioners in England vary from 2,000 to 6,000, while the substantive rank and personal allowances remain the same. Previous to the issue of the Royal Warrant of August 13, 1877, there was no limit of age in holding these appointments.

By the Warrant in question, 60 years was fixed as the age at which all Staff Officers of Pensioners should retire. All Staff Officers of Pensioners, were at that time on equal terms; in fact, Majors and Captains frequently held, and still hold, as large, or even more important districts than Lieutenant-Colonels, Departmental service always giving the prior claim. By Army Circular 124 of 1877, it was directed that Brevet promotion by seniority should cease in October, 1880; this was subsequently extended until the issue of the Royal Warrant of June 25, 1881, so that Staff Officers of Pensioners who were then Brevet Majors and Captains found that, with few exceptions—viz., those who were then nearly senior of their respective ranks in the Army—they would rise no higher in the service. Many, if not all, of the officers appealed to the War Office and the Horse Guards in 1878 on what they considered was a breach of faith, but they failed to obtain any redress or satisfaction. It was then hoped that when the projected reorganisation of the Army was carried out, some means would be found of affording promotion; but on the issue of the Warrant of July 1, 1881, it was discovered that they had been quite overlooked, and they are thus the only officers serving on full pay and on the Active List to whom all chance of promotion is denied. A respectful remonstrance has been addressed by the officers individually to the War Office, but in all cases the reply has been to the effect "that the regulations do not admit of anything being done for them in the way of promotion." But the last Royal Warrant not only omitted to afford any promotion to Staff Officers of Pensioners who are Majors and Captains, but also for the first time created a distinction between officers of the Department as regards retirement, for whilst those officers who were Brevet Lieutenant-Colonels on July 1 last are permitted to hold their appointments until 57 years of age, retiring then on £350 a year, with a maximum of £400—if Colonels, £420—those who on the same date were Brevet Majors and Captains must retire at 55 years of age, their allowance being £300, with a maximum of £350. This pension cannot, however, be obtained on voluntary retirement, as 35 years' service is necessary. There are now 17 officers serving in the United Kingdom as Staff Officers of Pensioners, all holding the same substantive commission; of these, one is a Colonel, eight are Lieutenant-Colonels, six are Majors, and two are Captains, so that while nine can obtain £400 (or possibly £420) a year on voluntary retirement before reaching 57 years of age, the other eight can only hope to obtain £300, the "age" clause preventing them from obtaining the maximum of £350. And thus while all are in the performance of the same duties, and hold the same substantive rank, the Majors and Captains are placed in an inferior position to some of the Lieutenant-Colonels who are their juniors, both as Staff Officers and also in length of Army service. But although the Lieutenant-Colonels are still allowed to qualify for promotion, the War Office has refused to listen to the appeals of the Majors and Captains, on the ground "that there is no regulation under which they can be promoted." This difficulty has, however, been removed in the case of Captains and Majors of Royal Artillery and Royal Engineers, who receive Brevet promotion after seven years' service in their respective ranks; and the same concession has been made in the case of the Royal Marines. The Staff Officers of Pensioners, therefore, consider that steps should be taken to place them on a similar footing to the officers of the Royal Artillery, Royal Engineers, and Royal Marines. It is pointed out that as regards the Majors no extra expense would be entailed until their retirement; whilst the two Captains, both of whom are of twelve years' standing as such, and were Subalterns in the Crimea, it is hoped may be considered worthy of this trifling boon of brevet pay and rank, which, under the regulations in existence when they joined the Department, they would have received years ago. It must also be noted that the officers who are thus urging their claims are of from 28 to 33 years' standing, that they have all served in the field as combatant officers, many having only accepted the appointment of Staff Officer of Pensioners in consequence of the reduction of their regiments, or the abolition of their appointments in 1870. Until these points are conceded, Staff Officers of Pensioners must certainly consider themselves in a worse position than they were before the issue of the Royal Warrant, for they cannot see that an addition of £8 a year to the pension is a sufficient compensation for the loss of five years' full pay and allowances, stoppage of promotion, and being continually passed over by officers far junior to them in the services. The case of the Staff Officers is one of evident hardship. The officers have, in nearly every instance, a long rôle of war service. Their position has been a much more important and responsible one than that of a regimental officer, and yet they are afforded no chance of making up for what they have lost, notwithstanding that it was by the action of the Government in office in 1870 that many of them incurred what was tantamount to professional ruin, by the reduction of their regiments, &c. All the War Office has done for them has been to add £8 to their pensions. This cannot be considered an adequate compensation for the losses incurred, viz., five years' full pay and allowances, the stoppage of promotion, and the cutting-short of their regimental careers. It may be contended that the Staff Officers of Pensioners are only a small body. This is true; but the fact of their being so surely is the more reason why liberality should be shown to them, as they occupy a unique position, and have on all grounds well-established claims to the favourable consideration of those in authority.

THE debate on the Navy Estimates was continued on Monday night, and brought the Royal Marines Corps again to the front. The late First Lord of the Admiralty, Mr. W. H. Smith, desired to impress upon the Admiralty the importance of keeping up and increasing the efficiency of the Marines as a constituent part of the British Navy, and Mr. Gorst expressed extreme satisfaction that the corps had been mentioned. He said, "It was a remarkable fact that every one praised that body, and yet the force was never treated with proper justice and consideration in actual fact. He invited the attention of the Admiralty to their case, because, if the force was to be maintained, it must cease to be officered from the leavings of Sandhurst." Lord Henry Lennox also spoke, and urged that the corps should have some more direct means of communication with the Board of Admiralty than they now have. This last point was argued in March last, when, in reply to a question put by Viscount Lewisham as to whether a General Officer of Marines should have a seat at the Board, and thereby direct communication with the First Lord, the Secretary to the Admiralty said that, "The question had been considered, and it did not appear either necessary or desirable that an officer of Marines should have a seat at the Board of Admiralty." Mr. Campbell-Bannerman now replied to the effect that he had "done his best in the early part of the Session to explain what had been done for the Marines, and what the Government was prepared to do in future. Some of the points which had been complained of had been happily met. In the first place, the Admiralty had given Brevet promotion to officers, to place them on an equality with the Scientific Corps of the Army; and, in the second place, as to the point of discipline, a Marine officer in charge of a detachment away from the force could not administer discipline without a superior officer coming to supersede him, and placing him in an invidious comparison with officers of the Line. It had been proposed to remove this by a clause in the Naval Discipline Act, which, however, in consequence of the opposition of Admiral Sir John Hay, the Government had felt obliged to withdraw. Besides this, a Committee had been sitting at the War Office, on which the corps was represented by Sir Francis Festing, R.M.A., with a view of making efficient arrangements for admitting a larger number of Marine officers to employment on the Staff of the Army. With regard to first entries of officers into the Corps, the results of examinations before the Civil Service Commissioners in 1881-82 showed that they stood as follows, viz.:—In 1881, the three commissions given held the 48th, 89th, and 94th places, out of 105 who passed for Sandhurst; in July, 1882, of 12 commissions for the Marines, numbers 1, 9, and 73 elected for the Corps, out of 73 who passed, the other 9 being among the unsuccessful candidates for Sandhurst; but the last appointment was only 21st out of admission. In December, 1882, 6, 8, and 53, out of 75, entered the Marines. He mentioned this to show that the career of Marine officers was not thought so little of as the public were led to believe." Although this latter point has been brought forward by Mr. Gorst, it has always been understood that the greater number of first appointments to the Marines were from those gentlemen who had fully qualified for Sandhurst, and the positions held in the examinations by most of them was shown by the Secretary to the Admiralty to be satisfactory; but a confession has been made to the admission of nine who fell short of the mark, and this it is which has justified Mr. Gorst in bringing the matter forward. Rather than that the present state of things at Greenwich should be alllowed to continue, it would be far better to return to the old system of separate and distinct examinations for the Marines. It is unsatisfactory for the service that things should remain as they were with regard to the powers given to Marine officers in dealing with their own men when serving afloat. It was hoped, from what was said in January last on this point, that better times were coming. At that date Mr. Gorst and Mr. Dixon-Hartland referred to the status of officers of Marines when embarked, and to the anomaly of an officer of the Navy landing to adjudicate on Marines already landed under the command of a Field Officer. Hope was then held out by the Secretary to the Admiralty that such an anomaly would no longer be allowed to exist, as his reply was to the effect that the "Admiralty were fully alive to this, and had for some time past had the point under consideration, with a view to such modification as might be considered necessary." This, it appears, it was sought to carry out, but the attempt failed. We hope, however, that the subject will again be brought forward for consideration, when it may meet with better success.

Mr. Labouchere was rather "at sea" in his statement that the officers of the Royal Yachts had advantages of rank, pay, pension, &c., which were not enjoyed by those of other ships, and must have obtained his information from a very poor source. His remark that they only went to sea four times in the year, and for the remainder of that period were hanging about Southampton (which is wrong) and other ports, for which pleasant occupation they were promoted over the heads of other officers, is misleading and unjust. Admitting that they have easier times than the officers of the Fleet, it must be remembered that they are liable to be called on at any moment to proceed to sea, and are only granted the regular service leave in each year. The executive officers of the Royal yachts are selected from those who have already distinguished themselves in their present rank. The two Lieutenants now serving in the *Victoria and Albert* were in the Naval Brigades, 1878-9, in the Cape Colony and Zululand, and specially mentioned for their services. Subsequently they both served in the Egyptian Campaign with distinction. One of them received his Lieutenant's commission for the superior results attained in passing for that rank, and was wounded at the battle of Ulundi. The present commander of the Royal Yacht is an officer of twenty-six years' service. Mr. Labouchere will, therefore see that none of them are "carpet knights," and we assure him that these appointments are only conferred on most deserving officers. Promotion from the Royal Yachts is only extended to Executive officers, and it gives an opportunity for advancing those whose services could not be previously recognised. Excepting gunnery promotions, those of the Royal Yacht are the only special ones allowed in the service, other than those during war operations. As only one Commander is promoted every three years, and a Lieutenant each year, Mr. Labouchere has endeavoured to expose an injustice which does not exist. We hope that, after the good service of the two Lieutenants now in the *Victoria and Albert*, they will both be promoted this year, and we know that no heart-burning would be caused thereby. The three Sub-Lieutenants promoted from the Royal Yacht each year are carefully selected from those whose services have rendered them worthy of consideration. As loyalty cannot be expected of Mr. Labouchere, we are not surprised at his condemnation of the exercise of our gracious Sovereign's prerogative in her yachts.

The old Naval College at Portsmouth has of late years become a kind of refuge for the destitute, and will have, ere long, to be enlarged, in order to meet modern requirements. As the science of destruction by guns and torpedoes developes fresh intricacies, the number of students, voluntary and otherwise, is ever on the increase, and engineers from other ports, who are going through a torpedo course, are now ordered to be accommodated there, in addition to the usually large number of Acting Sub-Lieutenants and the periodical batches of full and half-pay officers. This is a step which has the merit of economy, as engineers who are offered accommodation in the College cannot, of course, claim lodging allowance.

It is satisfactory to learn that the armament of boats is receiving attention at the Admiralty, and that the whole system will probably be reorganised before very long. This is a matter in which the Naval authorities have been more than usually conservative, the old show "scrimmage" of "Man and arm boats" having survived many modern innovations after a marvellous fashion. This exercise is, of course, necessary; but it is to be hoped that it will in future be so conducted as to afford instruction to officers and men, both as regards the use of the various weapons employed, and the manner in which boats might most profitably co-operate under varying circumstances of warfare. Restrictions should also be placed on boats being laden to their gunwales with men, guns, and stores, until they are hopelessly out of trim. Commander A. Barrow has, since his promotion to his present rank, been retained on the books of the *Excellent* for special duties in connection with this important subject.

A Naval pension for Lieutenants of £50 a year is placed at the disposal of the Admiralty by the death of Retired Commander Francis Harris, a Trafalgar veteran, who served as a first-class volunteer on board the *Téméraire* during that memorable action. Commander Harris was 92 years of age at the time of his death. He was present at the defence of Cadiz, served on board the *Unité* at the destruction of three armed storeships at Sagone Bay, Corsica, and capture of the French frigate *Persanne*, in 1811.

It is strange that Asiatic languages should have the preference among those officers who have qualified as Interpreters in the Royal Navy, there being 72 Asiatic, comprising Hindustani, Persian, Swahili, and Arabic, against only 26 European,—viz., French, German, Spanish, Portuguese, and Italian; while there is one Fijian. Several officers combine three languages in their proficiency.

The special full-pay torpedo course commenced on board the *Vernon* on Wednesday last, when the following officers joined the class:—Captain G. H. Noel; Commanders J. E. T. Nicolls, W. C. H. Domville, and G. C. Langley; Lieutenants H. C. Baynes, C. H. Coke, F. Roope, T. P. Walker, F. G. De Lisle, T. H. Fisher, H. P. Williams, H. C. Kingsford, J. R. Jellicoe, G. J. Warrender, and L. C. Gordon, R.M.A. Six other officers of the Royal Marine Artillery failed to pass at Greenwich.

Mr. Broadhurst inveighs against the wanton extravagance and waste of public money in expending £20,000 on the repairs of the *Victoria and Albert*. Had a like amount been asked for the erection of a Government building, the material and labour being supplied by a private firm, the Member for Stoke-upon-Trent would undoubtedly have had no objection. It was charming to notice his suavity when the Vote for the new Admiralty offices was discussed; not a murmur of disapproval escaped him, but now, when the yacht accommodation of our gracious Sovereign is under consideration, he stoutly opposes the necessary expense for keeping it in repair. Probably he would like the passage arrangements of the Queen and Royal Family contracted for by a steamboat company, and the Royal yachts disposed of like "Seely's Pigs."

The French papers give an account of the trial of the guns of the *Dévastation*, which ship, they say, is the finest ironclad afloat, with the *Amiral Duperré*. The armament of the *Dévastation* is composed of four steel guns of 34 c., weighing 48,000 kilos., worked by hydraulic machinery. In addition to the four guns mentioned above, there are four guns of 27 c. on the deck, 16 guns of 13 c., and 12 Hotchkiss revolving guns. Two of the 34-c. guns have been tried on board, and are said to have given perfect satisfaction. Trials have yet to be made with the other guns, and with the apparatus for discharging Whitehead torpedoes. The *Dévastation* is now in full fighting trim, with all her modern improvements on board, which was not the case when a year ago she was in the reserve during the Egyptian difficulty.

The retirement of Mr. R. H. Sleeman, Chief Inspector of Machinery, removes the last officer from the Active List who served during the fearful epidemic of yellow fever which occurred on board the *Eclair*, 38 years ago. The vessel acquired the disease from the Bullom shore of Sierra Leone, and it developed itself with such intensity as to necessitate her removal from the African Coast. On her arrival at the Cape Verde Islands, the crew were landed, and the sick secluded in a fort some distance from any habitation; yet, in spite of every precaution, it extended itself to the remainder of the ship's company, as well as to the inhabitants, the majority of whom succumbed. Even after her arrival in Stangate Creek, the Second Lieutenant, Isaacson, who had escaped previous contagion, was attacked, and died in 48 hours, as well as the pilot, who had only been received on board while coming up the Channel. More than half the crew of 150 men were carried off by it. The attention of Parliament, as well as the Medical world, was much attracted by such an unfortunate event, and Dr. M'William, R.N., was sent to the Cape Verdes to inquire into it; his report was printed, for the information of both Houses. In addition to Mr. Sleeman, a brother-officer, Mr. James Barber, Chief Engineer, on the Retired List, also served in the ill-fated *Eclair*, and probably these two are the only survivors of the terrible episode of 1845. But few of our readers will remember it; still, there are several who recollect the vessel, renamed, as the *Rosamond*.

The *Sultan* has now been away from home for over a year, having been commissioned on June 6, 1882. During her commission she was prominently engaged at the bombardment of Alexandria, as well as in all the naval operations of the Egyptian War, and it is to be hoped that, now that she has returned home with the Channel Squadron, the Admiralty will order her round to Portsmouth, as soon as the exigencies of the service will permit, in order that both her officers and men may be granted the short spell of leave all on board have so deservedly earned.

Mr. Gourley's suggestion that Naval officers should take the trouble to provide recreation for seamen, in the shape of books, papers, lawn tennis, &c., may appear good in principle, to non-Naval people, but hardly practicable for those to whom it applies. On the evidence of Members of both Houses of Parliament it has been shown that the pay of Naval officers is insufficient, yet, in face of this fact, Mr. Gourley would levy an additional tax thereon, by asking them to procure the means of amusing their men, so as to keep them from the temptations of public-houses and their attendant evils. As long as the depôts for seamen are afloat, there will be no chance of affording them physical recreation as suggested, therefore Mr. Gourley should advocate the immediate erection of the Naval barracks which were commenced by the last Government and suspended by their successors, who have lately, however, renewed the work at Keyham, though not at the other ports. In the depôt ships, newspapers are provided, also a library, which could be improved; but what the men require is proper space on shore, within the bounds of their duty-post, where they could enjoy out-door exercise on terra firma. As the safety of the nation mainly depends on the Navy, everything should be done for the comfort of its personnel. There should be no hesitation in completing the Naval barracks, and attaching to them sufficient inducement for men to refrain from the evils besetting them in our large seaports.

Vice-Admiral Algernon de Horsey has this week published, through Messrs. Griffin and Co., a short treatise on the "Rule of the Road at Sea," containing remarks and suggestions relative to the regulations for preventing collisions at sea, as also practical directions for their observance. We can strongly recommend this most useful work to all Naval men, whether they belong to the Navy, the merchant service, or go down to the sea in yachts for their own pleasure.

Admiral Sir Astley Cooper Key, when addressing the Naval Cadets on Thursday on board the *Hindostan*, auxiliary to the *Britannia*, informed our future Nelsons that "it was useless for them in these enlightened times to be indolent, relying on influence of relatives or friends, or even political influence, with a view of rising in the service." We can only say that we wish it were true, as stated by the Senior Naval Lord, that "the days of political and friendly influence are gone by." It would require a large amount of argument to convince the Naval service, as well as ourselves, that the "back stair is not as broad" as of old.

The question who is to be the High Commissioner of the Western Pacific, and what are his functions, appear to be far from settled. The Secretary of the Admiralty remarked this week that the Naval officers of the Departmental Committee on the subject were absent; and that the Governor of Fiji was Acting High Commissioner until the question was determined. Considering the complications which from time to time arise in regard to natives, and the dealings of white men with then, no delay should occur in establishing clear and definite instructions for Naval Commanders who are called upon to settle affairs between traders and the natives, without a judicial functionary, or the legal representative of the High Commissioner, at their back. As Naval officers have to do the work unaided, it would be better to abolish the High Commissionership and allow the officer commanding the Australian station to be responsible only to the Home authorities, and not be troubled by civil interference, merely receiving requisitions from administrators when the action of the Executive was necessary in the Pacific Islands. The retention of this unnecessary post is mainly due to party influence and the gratification of self-importance. Were it uprooted, and the Naval Commander-in-Chief allowed to exercise independent authority, the Australian Colonies would be gratified by such a re-arrangement, as it largely affects their interests.

At the distribution of prizes to Naval Cadets on board the *Britannia*, on Thursday last, both the Senior Naval Lord of the Admiralty and the Principal Naval Instructor objected to the strictures lately passed by Members of Parliament on that establishment. If no reports of the results obtained by such a costly system of education have been published for several years past, the Admiralty must expect that complaints will find vent in the Lower House, as its Members naturally possess but little, if any, knowledge of the manner in which young gentlemen are trained for the service. Were it made a necessity that a Committee of independent Members should at uncertain periods officially visit the *Britannia*, there would be but slight chance of the public remaining in ignorance of the working of the system. Impartial opinion would ensure efficient remedy for any defects. The educational reports of both public and private schools are regularly published. The Admiralty are, therefore, to blame for not informing Parliament and the country what results are obtained by the expensive process of the Imperial training-ship at Dartmouth.

The colony of Victoria is making considerable efforts to establish a naval force on a sound footing, and of no mean strength. With the two gunboats recently launched in this country and the three torpedo-boats in course of construction, in addition to the turret ship *Cerberus*, Victoria will soon possess a naval force not to be despised. Lieutenant Robert Muirhead Collins, retired, R.N., who, four years ago, accepted service under the Government of Victoria, has recently arrived home to take charge of one of the gunboats, but before taking her out he will undergo a course of study at Greenwich and on board the *Vernon*. The *Melbourne Argus*, of May 19, says:—"Lieutenant Collins, of the Victorian Naval Forces, will leave by the mail steamer *Carthage* for England on Tuesday next. His stipulated term of service—four years—has expired, and before renewing his engagement he suggested to the Government that he should be allowed to requalify in the gunnery and torpedo branches of his profession, and thus acquaint himself with the very latest developments in those sciences. The proposal was accepted, and Mr. Collins expects to be absent from the colony about ten months. In view of the introduction of gunboats and torpedo-boats to Victoria, it is considered very necessary that the principal officers should possess the highest qualifications, and the Cabinet cordially adopted the suggestion. The gunboats are now being constructed—one will be launched in September and the other in December—and probably Lieutenant Collins will be instructed to take command of one of them on the voyage to Australia."

The result of the last examination held at the Royal Naval College, Greenwich, of the "Probationary Lieutenants" for the Royal Marine Artillery, is most unsatisfactory. Nine of these young officers were examined, after undergoing a course of study at the College for the last two years, with the result that one, Lieutenant Conway-Gordon, satisfied the requirements of the examiners. Considering that these young officers were taken from the top of the unsuccessful candidates at the open competition for the Royal Military Academy, Woolwich, when Lieutenant Conway-Gordon was 42nd on the list, and eighth in the mathematical list, and that they all had the additional advantage of two years' study at Greenwich, it certainly appears as if either the papers set by the examiners are too high, or that the mode of instruction which obtains at the College is deficient in point and tone, as it seems incredible that only one officer in nine should have been able to pass the required examination, after so long a probationary course.

Sir John Lubbock, and the gentlemen who supported the clause which he moved in the Standing Committee on Trade, on the 9th inst., to the effect that in future, in the event of any dispute arising between the Crown and an inventor, it will be referred to two arbitrators, to be appointed by the Board of Trade, has earned the gratitude of all who have, or are likely to have, dealings with Governmental Departments. The Crown will still have the right to use any invention that is considered to be of advantage to the public service, but it will no longer have the power of depriving inventors of the hard-earned fruits of their labours. It will also serve to make Government officials somewhat more cautious in placing contracts among their own friends or political supporters. Even should the arbitrators be biassed in favour of the Government, they will not dare let it be seen, as the inventor will then have his remedy against them.

It appears, from a Return made by the Admiralty to an Order of the House of Commons, that the lump-sum paid to Messrs. Samuda Brothers for the *Neptune*, at the instance of Sir E. J. Reed, was £600,000. Considering the accident which had happened to this ironclad, whereby her back was, if not broken, much strained, and certainly hogged, we can but regard this price as most exorbitant. A merchant steamer, under similar circumstances, would not have fetched £10 a ton; but here we have a defective ironclad, with an obsolete armament, costing more than £64 a ton while still in an incomplete state. After her purchase by the late Government, it was found necessary to alter her armament at a cost of £32,500, and to expend £83,464 on hull, machinery, &c.

The Government have withdrawn the Naval Discipline Act Amendment Bill, owing to the opposition that measure has encountered from Admiral Sir John Hay, M.P., as well as from all sincere Naval reformers.

Experiments are being carried out privately for the purpose of testing the invention of Mr. Shehan, the object of which is to prevent steam boilers from bursting explosively, and at the same time enable them to sustain a higher and more uniform degree of pressure. Hitherto, the experiments have been attended with sufficient success to warrant the hope that a remedy has at length been found for one of the greatest dangers attending modern steam navigation. A boiler 12 in. in diameter and 24 in. long, constructed of quarter-inch plates, withstood a pressure of over 500 lbs. to the inch before the steam escaped, which it did without producing any explosive effect whatever. The invention chiefly consists in the simple introduction of a certain chemical composition into the boiler, which is supposed to neutralise the effect of the gases evolved on the superheating of steam, which gases are held to cause the explosion.

There was nothing very remarkable about the review of the French troops at Longchamps on July 14. The military papers regretted to see the effectives so weak, and the *Progrès Militaire*, while acknowledging that the march-past was well executed, finds fault with the slovenly manner in which several of the battalions took up their ground on arriving at Longchamps; but this was no doubt owing to the scratch composition of the companies, which were not accustomed to work together. The year before last there was the presentation of standards; last year the drums, which had been abolished by General Farre, made their reappearance to the great delight, especially of the female element; this year there was nothing to excite enthusiasm. There is a certain amount of dissatisfaction in the Army; the War Minister is far from popular; no one would care to sacrifice his life for M. Grévy; and the weather was wet. There were reviews held all over the country, and it appears that at Roubaix alone was there any disturbance—not on the part of the Royalists or Imperialists, but on the part of the Anarchists. The 2nd and 17th Chasseurs attracted universal attention and were much applauded, as were also the Cuirassiers and the Artillery, which were in perfect condition. The review gave rise to a curious incident. *La Lanterne*, a Radical paper, accused a Colonel of Artillery of having confined his men to barracks on the day of the national *fête*; of having allowed them out only from seven to nine in the evening, and of having spoken ill of the Republic. Two Colonels called on the editor to invite him to rectify this statement, which was quite untrue. This the editor promised to do. Nine officers of Artillery then appear to have visited the editorial office with the intention of chastising the offender, but were appeased by the declarations of the editor that he had been imposed upon. The writer of the paragraph in question has retired from the staff of *La Lanterne*, and expresses himself ready and willing to give satisfaction. We cannot say how this affair will end. It reminds us of a duel which created a great deal of excitement in the days of the Second Empire, when M. Henri de Pène was called out by a number of officers for an insult offered to the uniform in its civil capacity. The journalist was run through the body by a Lieutenant Hyène, but he is still alive and well. If M. Léon Mirès gives satisfaction to the nine officers of artillery, he will probably be served as M. Henri de Pène was, before he gets to the end of the list.

In an article on "Army Hospital Services," in the *Fortnightly Review* for this month, Captain Douglas Galton, C.B., reviews the various changes that have been made in the Army Medical Department and in its auxiliary establishments since the Crimean War. In 1857, while Lord Panmure was War Secretary, a Royal Commission was appointed, under the presidency of Lord Herbert of Lea, to inquire into and report upon the sanitary condition of the Army, the state of the hospitals, and the rank, pay, and efficiency of the Medical officers. When Lord Herbert became Secretary for War in 1859, he carried into effect the recommendations of the Committee of which he had been President. The objects of the changes then introduced were raising the standard of attainment for Medical officers, improving their relative position, and relieving them from all non-professional duties; simplifying the management of hospitals, and adopting a system of sanitary precautions suitable to the circumstances of actual war. Of the results of the changes then made, Captain Galton writes in terms of unqualified praise. His temperate and carefully-written article leads to the conclusion that every change in the Medical Department of the Army since the Crimean War, which has proved beneficial, was either introduced by Lord Herbert of Lea or was carried into effect during his term of office; and that all the so-called reforms which have been tried lately are total failures. If Captain Galton be right (and of this we have no doubt), the sooner we undo all the vaunted reforms and revert to the regimental system and its accompanying details, the better it will be for the doctors, the soldiers, and the country.

Any one who has an opportunity of examining the helmets of the band of the Thuringian Regiment, now in London, will see that just under the metal boss which holds the chin-strap to the helmet is a small rosette of the national colour, black and white, the colour of the ribbon of the revered Iron Cross. This slight emblem, it seems, has a high significance, as the rosette is stripped off the helmet of any man who bears a bad character. *A propos* of this, a correspondent writes:—"When I joined the service a quarter of a century ago, defaulters used to wear a red ring round the right arm. I do not know what led the authorities to abandon this sign of disgrace. It must have made it less easy for a man to get out of barracks or to pass into the canteen when his name was 'on the gate,' but at any rate it seems that some not very obvious token, which would not be observable to the uninitiated, but would tell its sure tale to all soldiers, would be felt as a keen disgrace by the offender, and would even enable an inspecting officer to estimate at a glance the character of a battalion, such estimate to be confirmed, of course, by the inspection of the court-martial book, would be worthy of adoption."

We take the following extracts from a letter from our correspondent "Golundauze," who is in Germany:—

> "I have seen very little of the Prussian soldiers, but that little is very favourable to them, and quite satisfies me that we only copy them in outside trivialities and leave the principal question untouched, and that I consider to be *conscription*. I saw several parties of men at Cologne under arms; some, I think, returning from a long day's drill or exercise. The men were well set up, with an average of about 24. *There is a fair sprinkling of old soldiers among them.* On the move, they seem rather loose, and talk a good deal; but they march smartly, and are evidently well in hand. *The number of the regiment is on the shoulder-strap, but no nonsensical local designations.* At the entrance to every village there is a board painted thus:—'1 Nass. Land. Head-quarters, W——. 3rd Co., H——.' So every man in the village knows that the Company Head-quarters are at H——, and the Regimental Head-quarters at W——; and this is a true localisation. We saw a regiment of Uhlans at walking exercise or watering. Each mounted man led a horse stripped, and rode only on a cloth. The men had a good seat, and the horses looked well fed and groomed, and fit for any cavalry work, and quite as large as our horses. The men in the German Army are of two classes evidently, the lower and the better, brought together by conscription. All of the latter, or at any rate, a large number of them, are distinguished by wearing an inexpensive sword-knot on the sword-bayonet, and either have finer cloth or keep their clothes in better order than the former. In this way a sufficient distinction is made without a material difference. Something of this kind might be introduced into our service for young men desirous of soldiering, and who have failed to obtain commissions by competition."

In a debate upon artillery train in the French Senate, General Billot, ex-Minister of War, said that he had been accused of high treason for having refused to vote a credit of 30,000,000 francs, asked for by the present War Minister, while the 133 senators who voted with him were scouted as half-Orleanist, traitors, or idiots. General Billot expressed the opinion that military matters should be discussed independently of party feeling. And no doubt General Billot is right.

The South Australian Defence Force has been in existence between five and six years. On its formation Colonel M. F. Downes, R.A., was selected by the Commander-in-Chief to command it, and a better choice could hardly have been made, for to a scientific knowledge of his profession he adds a talent for organisation, foresight, and firmness. Colonel Downes had at first for staff officer Major Godwin, late of the 103rd, an old adjutant and thorough soldier, who made himself extremely popular. The Force consists of two distinct branches,—(1), a paid force, known as the Volunteer Military Force, which ought rather to be called a militia; and (2), the Rifle Volunteer Force, who resemble the Volunteers at home, and only receive an allowance of ammunition from the Government and a capitation grant for effectives. The paid force consists of artillery, mounted rifles, and infantry. The Artillery is divided into two batteries, one a garrison battery and the other a field battery. The former man the forts which guard Port Adelaide, and are armed with 10-in. guns and 68-pounders. The latter have 16-pounder field-guns of the same pattern as those in the British Army. The Mounted Rifles consist of only one troop, but could be increased to almost any extent by country enrolments, as all South Australians can ride, and this arm would be very popular. The present troop consists of very smart men, mostly of the farmer class. They ride well, and are first-rate shots. More than half of them are marksmen, and they are constantly practised in dismounting and skirmishing. The Infantry are known as the Adelaide Rifles, and are formed into two battalions. During the last five years about 2,500 men have passed through the ranks. Their recruit drills are conducted by experienced instructors who have been serjeants in the Army, under the superintendence of the Deputy-Assistant-Adjutant-General. But the non-commissioned officers of the Volunteers are beginning to take their share in the training of recruits, and on an average three per company are competent to undertake this duty. At the beginning of the drill season, the "setting-up" drills are conducted by them, after the fashion of the Army. Moreover, about 50 of the non-commissioned officers have been put through a short course of musketry, modelled on that of Hythe, and have gained certificates of their ability to carry on the musketry training of recruits. The Adelaide Rifles wear a scarlet uniform, and drill very steadily. Besides the ordinary company, battalion, and brigade drills, and the annual course of musketry, they frequently practise field-firing, and make good practice at unknown distances. Their skirmishing is, perhaps, the most satisfactory part of their drill. They extend from four-deep, somewhat in the way suggested by Colonel Macdonald, of the Edinburgh Volunteers, in his pamphlet, "Macdonald on Tactics." The front-rank men of fours form the fighting line, the second rank form the support, and the two remaining ranks form a local reserve. Thus each company is self-supporting, and the fighting line may be reinforced three times without companies being intermingled. The system works well, and is so simple that the recruits learn it in an hour. The men are remarkably intelligent, and pick up their drill sooner than recruits at home. The Rifle Volunteers are scattered all over the colony, but are all exercised on the same system. About 2,000 of these have been trained since 1877, so, including his gunners, Colonel Downes must have seen 5,000 men in all go through the mill. The South-Australian system has already begun to be imitated in other Australian colonies.

The security of the north-western frontier of Italy has for some time past been occupying the attention of the Government of that country. At the end of last year a tunnel through the Col di Tenda (Maritime Alps), nearly three miles in length, was opened for traffic, enabling communication between Nice and Turin to be kept up throughout the year. It is now intended to utilise this tunnel in order to connect Vingtimiglia—the Italian frontier fortress on the Mediterranean—with the existing railway system of Piedmont. The projected line, leaving the sea-coast at Vingtimiglia, will be carried up the valley of the Roja to Giandolo, where it will follow the course of the old Nice road to the entrance of the new tunnel, which is about half-way up the Col di Tenda. It will descend on the Piedmont side to Cuneo, which is already in railway communication with Turin and Alessandria. There can be no doubt that this line, when completed, will be a work of the utmost strategical importance. It will go far to render a hitherto dangerously weak point in the Italian system of defence secure from attack. In former years a French army could advance from Nice or Genoa with its left flank safely guarded by an impassable mountain barrier. This will soon be no longer possible. There are already railways over the passes at Genoa and Savona connecting these places with Alessandria. The new line by the Col di Tenda will complete the lateral communications with Upper Italy. Under these circumstances, the French, even if they had command of the sea, which they never had in the wars of the Revolution, could not safely advance on Genoa till Alessandria had fallen. Had even tolerable roads traversed the Maritime Alps and Apennines in 1800, Massena could not have held on as he did to Genoa, and the whole Austrian Army would have been turned against Napoleon, who would probably have been disastrously defeated, instead of victorious, at Marengo. The new railway will further strengthen the offensive power of Italy for attack, in the event of war with France, for she will then possess means for a rapid concentration on the Riviera which are not enjoyed by the French, whose position at Nice is isolated, and who would in all probability be compelled to retire behind the Var at the very outset of the campaign. Italy is too sensible to provoke an attack on France, but she is wisely using her opportunities for strengthening her position so as to be able to assume a strong and decided attitude, in case her interests in the Mediterranean are threatened by a further development of the recent aggressive policy of France in Northern Africa.

The following particulars, extracted from the Annual *Army List*, may be of interest, as showing the serious consequences to a large number of Artillery officers, entailed by the compulsory retirement of Majors at the age of 48, and largely due to the employment beyond five years of the Lieutenant-Colonels upon the Indian Lists. No less than 25 Majors, commissioned as such from July, 1879, can never become Lieutenant-Colonels, as they were over 41 years old when so promoted; while nine Captains are already past that age, 17 will reach it during the next twelve months, and some 40 more during the twelve months following. For those next below, the prospects are better:—First, because they entered the service earlier in life, owing to shortened residence at the Royal Military Academy, as well as to the reduction in the age laid down for their admission thereto; secondly, because nearly a hundred officers between them and Lieutenant-Colonelcies will be removed from their path, as above shown. It must be borne in mind that steps are no longer given by regimental full Colonels, and that those gained by secondings and by compulsory half-pay are subsequently cancelled by absorption, so that the source of promotion to Lieutenant-Colonelcy and ultimate £450 pension of the present senior Captains, and upwards, is confined to the removal, after five years, of the Lieutenant-Colonels upon the Imperial List. A glance will show that this is taking place from the present time in a constantly recurring quinquennial series of 5, 9, 9, 29, 25—total, 77; average, 15·4 steps per annum. To these few casualties can be added, as they would be among men in the prime of life, who have weathered the effects of tropical service, and from amongst whom those who leave the service before compelled to do so have mostly been eliminated. There are further results from "Henley's Clause," than which a less justly applied enactment of benevolent intention was never framed, its protection to some being only given at the expense of others. For example:—1. By mere seniority, in a few years every Royal Artillery District command, with its emoluments, will be held by an officer on the Indian Lists. 2. The establishment of officers in the junior ranks has been constantly increasing for the last 20 years, to fill Indian vacancies; these officers are subject to rules for compulsory retirement, from which half their seniors are exempted, and their due rate of promotion thereby retarded. Fortuitous circumstances, it is true, have pushed up the present junior Captains at an abnormal rate, and compulsory retirements at 48 will, at the expense of the sufferers, probably secure the continuance of their individual good-fortune; but the principle of making officers serve together under different conditions cannot be justified.

The position occupied by the Assistant-Paymasters of the late Pay Sub-Department of the Control who still have to be absorbed into the Army Pay Department is a cruelly unfair one, and we think that something might be done to help on the officers, and place them on a proper footing. Supersession is never a pleasant thing, but wholesale supersession such as these two or three officers are subjected to must naturally stamp out all zeal.

THE WIMBLEDON MEETING.

[FROM OUR CORRESPONDENT.]

Notwithstanding the by no means genial weather, and that camping-out has not been without its discomforts, the Meeting which closes this afternoon with the presentation of prizes by the Princess Mary, Duchess of Teck, is the most successful yet held at Wimbledon—so successful, indeed, in its main features as to warrant the hope that the day is far distant when the National Rifle Association will have to look out for new ground. Thirty-five squads competed on Monday for the Mullens field-firing prize of £250, the entries showing an increase of six over that of last year. Five squads of six men each were formed up at a time at 400 yards from the butt at the southern end of the Common, and on the word "advance," proceeded at the double to an unknown point between 300 and 200 yards, where independent firing was opened at five targets, representing scarlet-clad soldiers, six feet high, which were made to move laterally. As many rounds as possible were got off here in the time allowed, one minute, and it was a noteworthy fact that though "any position" was permitted, not one man adopted the "back." Another advance was then made to a point between 200 and 100 yards, where three volleys were fired kneeling, and the contest closed with a rush to about 50 yards from the figures, where independent firing, standing, was carried on for 30 secs. The competition was watched with much interest by a large assemblage of spectators, and the vast improvement which has taken place in this valuable practice among the Auxiliaries during the past year is shown in the fact that the squad of Colonel Loyd-Lindsay's Berkshire battalion beat the winning score of last year by 17 more hits. Another contest of a somewhat similar character, for the handsome Brinsmead Challenge Shield, came off on Tuesday, in the presence of the Duke and Duchess of Connaught, who, following the example of the Prince and Princess of Wales last year, subsequently went into the trench, where the mechanism for working the targets was explained. Twenty-three teams, each of six men, competed, two from the Royal Navy, three from Line battalions, two from the Royal Marine Light Infantry, one from the Honourable Artillery Company, and 15 from battalions of Rifle Volunteers. The competition took place at targets representing figures of men, as in the Mullens, which appeared and disappeared at intervals. Five teams were formed up at a time at 600 yards, in extended order, single rank, and the targets then appeared for 15 seconds, during which each man loaded and fired one shot. On the disappearance of the targets, the whole line advanced in quick time, and the targets subsequently appeared eight more times, the advance being continued in the intervals of disappearance. The winning score is three hits higher than last year, and was made by the 1st Cheshire Regiment (22nd). After this contest, the Duke and Duchess of Connaught drove to the Council enclosure, where they congratulated the young Scotch farmer (Serjeant Mackay, 1st Sutherland) on his success in winning the Queen's Prize, her Royal Highness subsequently pinning the gold badge on his breast. The Duke of Cambridge was also among the visitors to the Camp on Tuesday, and inspected the Canadian detachment, with the smart and well set-up appearance of which he was evidently much pleased. Besides the close of the International Military match to-day, the Royal Cambridge Challenge Shield will be competed for by sections of mounted men of the Household Cavalry and Cavalry of the Line. Appended are brief results of the contests :—

Albert, 1st Stage.—All comers; 32 prizes, value £135; 15 shots at 600 yards and 10 at 900 yards, any rifle :—£20—Lieut.-Col. Sir H. Halford, 1st Leicester, 117 points. £10 each—Major Scriven, 117, and Major Humphry, 2nd Cambridge, 116. £8—Pte. Stewart, 1st Edinburgh, 115.

Albert, 2nd Stage.—15 shots at 1,000 yards, any rifle : —The jewel, Wilson, Ulster Rifle Association, 66.

Any Rifle Association Cup.—Ten shots at 600 yards: —Lieut. Ferguson, 1st Inverness.

Any Rifle Extra.—Seven shots at 600 yards :—Serjt.-Major Gilder, 9th Middlesex, 34 points; Ptes. Braithwaite and Barnett, 10th Lanark, 34.

Armourers' Company Prizes.—All comers; ten prizes, value £40; seven shots, 900 yards, Martini-Henry.—£10—Pte. Paterson, 2nd Renfrew, 32 points. £8—Lieut. Bird, 1st Hereford, 31. £6—J. M. Gouldsmith, 1st Gloucester, 31.

Army and Navy, 1st Stage.—Seven shots, at 200 and 500 yards, with Martini-Henry :—£10—Chief Petty Officer Hawkins, H.H.S. Cambridge, 61 points. £5 each —1st Petty Officer Hampton, H.M.S. Excellent; Pte. Bradbury, 1st Dorset; Staff-Serjt. Skust, Royal Marines; and Serjt. Fisher, Royal Engineers, 59 each. £4 each.—Serjt. Mahon, 1st Norfolk; Colour-Serjt. Casbard, 2nd Leinster; Colour-Serjt., Sandland, 1st North Staffordshire; 2nd Petty Officer Madden, H.M.S. Excellent; A.B. Bennett, H.M.S. Excellent; Chief Petty Officer Rivers, H.M.S. Excellent; Pte. Shaw, 1st Manchester; Serjt.-Major Lowings, West Surrey; and Serjt.-Major Quirk, 2nd Highland L.I., 58 each; and Serjt.-Major Ward, 30th Regimental District, 57.

Ashburton Shield.—Teams of eight; seven shots at 200 and 500 yards, Snider :—The shield—Charterhouse, 405 points; Winchester, 403; Wellington College, 386; Eton, 382; Clifton, 370.

Bass.—All comers; 7 shots at 500 yards, M.B.L. :—£25—Lieut. Heap, 6th Lancashire, 82 points; £10—Major Humphrey, Cambridge University, 82.

Belgian Cup.—For volley-firing, teams of 10 from each battalion, 5 volleys at 400 yards.—The cup and £20—1st Hereford, 142 points; £15—1st Edinburgh, 138; £10 each —1st Roxburgh, 136; and 7th Lanark, 134.

Brinsmead Shield.—The Shield—1st Cheshire, 25 points; Chatham Division R.M.L.I., 24; 3rd Lanark, 23; 1st Middlesex, 21; H.M.S. Cambridge, 19; 1st Dorset Regt., 19; Portsmouth Division R.M.L.I., 19; 3rd Batn. Rifle Brigade, 19; and 20th Middlesex, 19.

Brownlow.—Seven shots at 600 yards, M.B.L. :—£8 each—Lieut. Heap, 6th Lancashire, 35 points, and Pte. Kydd, 2nd Forfar, 35. £4—Qrmr. Gouldsmith, 1st V.B. Gloucester, 34. £3—Serjt.-Instructor Morgan, 2nd West Kent, 34.

Cadet Corps' Match.—One file of each company; seven shots at 200 and 500 yards, Snider :—The trophy and £6 15s.—Winchester, 96 points; Cheltenham, 93; Marlborough, 86; Wellington, 83.

Chancellors' Challenge Plate.—Teams of eight, 7 shots at 200, 500, and 600 yards, Martini-Henry :—Oxford, 653; Cambridge, 635.

China Cup.—Thirty-four county teams of England, Scotland, and Wales competed for this prize, 10 men aside; 10 shots at 500 yards, Snider.—The cup and £30—Forfar, 357 points; £20—City of London, 356; £10 each—Lanark, 352; Carmarthen, 345; and Middlesex, 336.

Curtis and Harvey.—All comers; 16 prizes, value £77 10s; 10 shots at 1,000 yards, any rifle :—£25—Arrowsmith, Bristol Engineers, 48; £7 10s each—Serjt.-Instructor Gilder, 9th Middlesex, 48; and Capt. Thorburn, Peebles, 47.

Daily Telegraph—Open to all comers; 73 prizes, value £200; seven shots at 500 yards, Snider :—The cup—Serjt.-Instructor of Musketry Downes, 3rd Middlesex, 34 points. £15—Serjt. Sutherland, 8th Lanark, 32. £10—Qrmr.-Serjt. Paterson, 1st Middlesex, 32. £5 each—Pte. Griggs, 1st London; Pte. Thornton, 5th Lancashire; Corpl. Higgins, 3rd Somerset; and Pte. Bramwell, 2nd Derby.

Dudley.—Ten shots, at 1,000 yards :—Lieut. Millner, 21st Middlesex, 49 points.

Duke of Cambridge.—£50; all comers, 15 shots at 1,000 yards, military breech-loaders :—£25—Serjt. Roberts, H.A.C., 61 points; £10—Lieut. Lamb, 1st Cheshire Regt., 60.

Elcho Shield.—Teams of eight aside; match rifles, 15 shots at 800, 900, and 1,000 yards :—The shield—Ireland, 1,600 points; Scotland, 1,589; England, 1,564.

Field Memorial.—Ten shots at 600 yards; eight prizes, value £25 :—The cup and £7—Serjt. Pullman, 2nd Middlesex, 43 points. £5—Serjt. Hobbiss, 2nd Middlesex, 43.

General Eyre.—7 shots at 600 yards, Martini-Henry : —£10—Serjt. Wallace and Pte. Dixon, 1st Northumberland Fusiliers, 55 points; £5—Dr. Foot and Pte. Bradbury, 2nd Dorset Regt., 54.

Glen Albyn.—Open to all comers; 72 prizes, value £200; seven shots at 200 yards, Snider :—£15—Corpl. M'Kay, 1st Renfrew, 34 points. £10—Lieut.-Col. Burt, 1st Warwick, 34. £5 each—Corpl. Smith, 2nd West Kent, 34; and Pte. Elkington, 1st London, 34.

Grand Aggregate.—For highest aggregates in Queen's, Alexandra, Martin's, St. George's, Windmill, Alfred, *Daily Telegraph*, and Glen Albyn. Seventy prizes, value £300 :—£25—Pte. Paterson, 2nd Renfrew, 316 points. £20—Serjt. Dods, 1st Berwick, 309. £15—Colour-Serjt. M'Kenzie, 1st Stirling, 306.

Henry.—Nineteen prizes, value £65; 7 shots at 1,000 yards; military breech-loaders :—The rifle—Private Gibbs, 1st Gloucester. £10—Armr.-Serjt. Hargreaves, 16th Lancashire.

International Military Match.—Teams of twelve a side. Seven shots at 200, 500, and 600 yards; military breechloaders :—First Stage—America, 1,078 points; Great Britain, 1,070.

Kirkman.—All comers; seven shots at 800 yards, Martini-Henry.—1st prize, the pianoforte—Pte. Caldwell, 1st Renfrew, 34 points. £10—Capt. Young, 2nd Renfrew, 32. £6—Pte. Hay, 20th Middlesex, 32.

Kolapore Cup.—Teams of eight, 7 shots at 200, 500, and 600 yards, Martini-Henry :—The cup—Home Team, 698 points; £80—Canada, 679; Jersey, 638; Guernsey, 621; and India, 514.

Loyd-Lindsay.—Mounted contest; sections of four men; first prize, £20 :—1st, second section, Roxburgh, 88 points; second prize, second section, Roxburgh, 76 points.

Marquis of Hartington.—All comers, 23 prizes, value £75; seven shots, at 900 yards; military breechloaders :—£10—Capt. Godsal, 2nd Bucks, 34 points. £5—Corpl. Bates, 1st Warwick, 33.

Martin's Challenge Cup and prizes, for efficient Volunteers; 68 prizes, value £200; seven shots at 200 yards, Martini-Henry :—The cup and £15—Serjt. Lowton, 1st North Staffordshire, 34 points. £9 each—Serjt. 1st Paterson, 1st Cornwall, and Serjt. Jones, 1st Denbighshire, 34 each. £7—Corpl. Banks, 1st West York, 34. £5 each—Corpl. Sprinks, 1st Sussex, 34; and Lieut. Foster, 4th West Surrey, and Serjt. Peat, 2nd West Surrey, 33 each.

Mullens Competition.—Field firing :—£100—1st Berks, 52 points. £45—19th Lancashire and 5th Lancashire, 43 each. £24—20th Middlesex, 42. £15—3rd London and 2nd Lanark, 40 each.

National Challenge Trophy.—Teams 20 aside of England, Scotland, Ireland, and Wales :—Winners, Scotland, 1,805 points; next in order of merit, England, 1,769; Ireland, 1,696; Wales, 1,689.

Olympic.—Ten shots, at 600 yards :—Serjt. Mackay, 1st Sutherland, 48 points.

Permanent Staff.—Seven shots at 500 yards, Martini : —£10—Serjt.-Instructor Burton, 2nd Bucks, 35 points. £7—Serjt.-Instructor Groom, 22nd Middlesex, and Serjt.-Major Brock, 14th Middlesex, 33. £5—Serjt.-Instructors Davis, 2nd Middlesex, and Warwick, 1st West Surrey, 31. £4—Serjt.-Instructors Gibson, 2nd West Surrey; Deegan, 1st V.B. Leicester; and Morris, 3rd Batn. East Surrey, 30.

Prince of Wales's Prize.—Restricted to National Rifle Association Silver and Bronze Medallists, 7 shots at 200, 500, and 600 yards, Snider.—The Prince of Wales's prize of £100, Serjt. Lawrence, 1st Dumbarton, 80 points. Twenty prizes of £5 each were also awarded.

Queen's Prize.—1st Stage, Parts 1 and 2 restricted to efficient Volunteers; 360 prizes, value £1,668; Martini-Henry :—The first 300 in Part 1 fired 10 shots at 500 and 600 yards, for places in the "Sixty" :—Silver medal, silver badge, and £60—Capt. Young, 2nd Renfrew, 183 points. The following were among the next highest scores in the "Sixty," who took the badge and £12 each :—Pte. Warrick, 1st Berks., 178; Serjt. Palmer, 1st Warwick, 177; Pte. McVittie, 1st Dumfries, 175; Pte. Paterson, 2nd Renfrew, 175; Serjt. Sage, Tower Hamlets, 174; Corpl. Proctor, 1st Elgin, 174; Serjt. Yates, 3rd Lanark, 173; and Serjt. Heaton, 2nd Renfrew, 173. Queen's Prize.—2nd Stage. —10 shots at 800 and 900 yards : Winner of her Majesty's Prize of £250, the Gold Medal, and Gold Badge of the National Rifle Association, Serjt. Mackay, 1st Sutherland, 79 points.

Robin Hood.—Seven shots at 200 yards, Martini-Henry : —£5 each—Pte. Bailey, 1st Flint; Qrmr. Corben, Canada; Colour-Serjt. Foster, 1st Northumberland; Serjt.-Major Lowings, Queen's; Pte. Roberts, 1st Monmouth; Colour-Serjt. Wright, 1st Northampton; and Serjt. Yates, 3rd Lanark, 35 points each.

St. George's Challenge Vase, for efficient Volunteers; 135 money prizes, besides cups, jewels, &c.; seven shots at 500 yards, Snider :—The vase, dragon cup, gold jewel, and £30—Pte. Wilson, Queen's Westminster, 32 points. Silver jewel, silver salver, and £25—Lieut. Gibson, 1st Aberdeen, 32. Bronze cross, silver cup, and £20—Serjt. McCay, 5th Lancashire, 32. Winners of jewel and £10 each, with 31—Serjt. Ingram, 3rd Lanark; Qrmr.-Serjt. Grier, 3rd Renfrew; Qrmr.-Serjt. White, 1st Cheshire; Pte. Fletcher, 3rd Forfar; Pte. Border, 9th Middlesex; Capt. Gange, 18th Middlesex; and Serjt. Hounsell.

St. Leger.—Fifteen prizes, value £50; 10 shots at 900 yards, any rifle :—£10—Henman, U.S.A., 48 points. £8—Major Young, 21st Middlesex, 40. £6—Private Gibbs, Bristol Rifles, 48. £3 each—Majors Browne, Calcutta; and McKenna, B.R.A., 48 each.

Snider Extras.—Seven shots at 200 yards; all comers : —Corpl. Drinkwater, 35 points; Lieut. Dillon, Canada, 34; Lieut. Whitehead, 1st Lancashire; Lieut. Dutton, 2nd Cheshire; and Pte. Latrey, 1st London, 33 each.

Spencer Cup.—Seven shots at 500 yards, Snider :—Serjt. Caldwell, Glenalmond, 29 points.

Tyro.—£100 :—£10—Lieut. Stout, 1st Lanark, 91 points. £8—Pte. Ferguson, 4th Lanark, 90. £5—Serjt. Brown, 1st Durham, 88.

United Services Challenge Cup.—7 shots at 200, 500, and 600 yards, Martini-Henry; teams of eight aside :—Volunteers, 694; Navy, 673; Army, 661; Royal Marines, 655; Militia, 654; and Yeomanry, 646.

Veterans' Public Schools Match.—Teams of five; 10 shots at 500 yards; Snider :—The Trophy—Cheltenham, 184 points.

Vizianagram Challenge Cup.—Lords and Commons Match.—20 rounds at 500 yards.—Commons—Lieut.-Col. Walrond, 94 points; Hon. R. T. Bruce, 91; Lieut.-Col. Vivian, 90; and Capt. Monckton, 86; total, 361 points. Lords—Earl Spencer, 97 points; Lord Cloncurry, 94; Earl Brownlow, 94; and Earl Waldegrave, 66; total, 351 points.

Wills.—All comers; seven shots, 800 yards, military breech-loaders. Thirty-seven prizes, value £100.—£10—Pte. M'Vittie, 1st Dumfries. £8—Serjt.-Instructor Gilder, 9th Middlesex, 34 points. £5—Pte. Lowe, 13th Middlesex, 34.

Windmill.—Open to all comers; 72 prizes, value £200; seven shots at 500 yards, Snider :—£15—Pte. Hyde, 2nd Hants, 35. £10—Pte. Wallace, 8th Lanark, 34. £5 each —Serjt. Harrod, 2nd Wilts; Pte. Lansdale, 2nd East Kent; and Pte. Conochie, 1st Lanark, 33 each.

Yeomanry Inter-Regimental Challenge Cup.—Teams of eight; 15 shots at 500 yards, Snider carbine :—The cup—1st Dorset, 339 points; Wilts, 330; Ayr, 321; East Kent, 304.

The Prince and Princess of Wales, accompanied by the Duchess of Saxe-Meiningen, visited the Camp on Thursday night, and were received by Earl and Countess Brownlow, the Duke of Portland, Earl and Countess of Pembroke, Countess Spencer, Earl and Countess of Dufferin, Lord and Lady Charles Beresford, Sir Henry and Lady Fletcher, Sir H. Wilmot, Lord Baring and Lady Emma Baring, Colonel Howard, U.S. National Guard, Colonel Otter, Canada, &c. Their Royal Highnesses inspected the butt arrangements, and went round the Camp, making a long stay at the Running-Deer target, at which the Prince had several shots.

In future, no non-commissioned officer under 5 ft. 6 in. in height is to be sent to the School of Gunnery, Shoeburyness for long courses of instruction. All warrant officers, including conductors of supplies and stores, will in future receive medical attendance in their own quarters; their wives and families will also be allowed medical attendance and medicine at the public expense. A colonel, major-general, or lieutenant-general gazetted as promoted for distinguished service will take his seniority for promotion or otherwise from the date of his permanent rank as published in the *London Gazette*. He will be supernumerary to the establishment of the rank to, and the branch in, which he may be promoted, until the occurrence of the next vacancy. Officers who retire, whether by sale of commission or otherwise, between October 1, 1877, and February 5, 1880, will be allowed to receive, instead of the retirement awarded to them, such amount of gratuity or rate of retired pay as they would have been entitled to had the Royal warrant of February 5, 1880, been in operation at the date of their retirement.

Cholera.—Appalling as are the reports from Egypt, how few think of our enormous annual sacrifice of valuable lives from scarlet fever, measles, and small-pox. All heads of families should insist upon the daily use, in bed-room, bath-room, and nursery, of Wright's Coal Tar Soap, the only true and simple preventive of infectious disease, and a certain cure of all disorders of the skin.

REMARKS ON THE PRESENT STATE OF THE ARMY, AND SOME SUGGESTIONS FOR ITS REMEDY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Owing to the recent discussions which have taken place as to the state of the Army in general, and more especially as regards its want of recruits to fill its ranks, I am induced to make a few observations, with the hope that my suggestions may bear some little fruit, which may benefit not only the British soldier, but my country in general. As regards the mode of filling our ranks, much has been said of late years since the short-service system has been introduced, as there always must be a great difficulty in replacing such a large number of men who are annually sent to the "reserve." Now, taking it for granted that a "reserve" is absolutely necessary for a country like England (and I think it is generally believed to be the best and only system by which we can cope with other nations with far larger standing armies than our own), the question naturally arises, how can we supply this "reserve" and at the same time keep our regiments, or at any rate, a large proportion of them, in an efficient state to meet any emergency. I think every commanding officer of the present day will admit that, in order to train the young recruits which are so constantly drafted into his battalion, one of the most necessary adjuncts is to have, at least, one old soldier to every two recruits, exclusive of non-commissioned officers, to, what is called, "look after him," "teach him punctuality," "the advantages to be gained by implicit obedience to his superiors," "how to dress and clean himself," or, in one word, to teach him "discipline." At the present time, I do not suppose that in any of our regiments there are more than 50 men (exclusive of non-commissioned officers) out of 750, who have more than 10 years' service; and consequently, there is no one who lives with and associates with the recruit who can point out to him the advantages of "discipline." Again, one of the great complaints of commanding officers is that their men are scarcely ever at their disposal for drills and other instruction parades, but that they are always on some employment other than that which appertains exclusively to a soldier's duty, necessary, but still highly detrimental to that course of instruction which is required to make a man a thoroughly trained soldier in such a limited period as is now given to commanding officers to make them efficient. To remedy, and to meet this certainly justifiable complaint of commanding officers, I would suggest that in every battalion a "reserve" or "civilian company" be formed in addition to the present strength, consisting entirely of men who have completed their first term of service with the "colours," and who would be eligible for the 1st Class Army Reserve. The conditions required of a man who should be permitted to join this company should be as follows:—(1), It should be voluntary; (2), he should be of good character; (3), he must show that he has been in some trade or employment before enlisting, which would fit him for employment such as would be required in a regiment; (4), he should receive his Reserve pay, free rations, free barrack accommodation, one suit of regimental clothing per annum, his deferred pay should continue up to twelve years as at present, his service should count towards pension on final discharge, and he should receive whatever money he could earn for himself in his particular employment; (5), he should be permitted to wear civilian's clothes whenever employed in civil duties, and should be obliged to undergo instruction in military duties for a period of at least 21 days in every year, but should not be required to go to any other parades, and should the 1st Class Army Reserve be called out, then civil-employed men should be the first ones to join the ranks of their regiments. The strength of these companies should never exceed 100 men, including non-commissioned officers, and should be put under the command of the quartermaster, strictly supervised by the second-in-command and the commanding officer. The various employments for these men should be as follows:—Officers' servants, staff serjeants' bâtmen, officers' grooms, tailors, shoemakers, clerks, telegraphists, butcher, baker, cooks, carpenter, smiths or assistant-armourer, pioneers for cleaning barracks, &c., hospital orderlies, and other miscellaneous employments connected with a regiment. The men joining this company should be under the same discipline as they were previous to re-engaging, and should be compelled to remain with their regiments during the period they would remain in the Reserve, but it should be left to the commanding officers to discharge any man to the unemployed reserve, for misconduct at any time, with the approval of the General officer commanding. Should this suggestion be carried out, a large majority of the men of a battalion would be available for instruction and practice in matters appertaining exclusively to a soldier almost daily, and the great grievance of commanding officers would be done away with. One hundred old soldiers would be added to each battalion, who would go far towards teaching the young soldiers "discipline." A large number of men who on discharge are cast on the world to begin life over again, would at once have employment, instead of wasting the whole of their small stock of deferred pay in keeping themselves until they can find something to do, and at the same time would be perfecting themselves in a trade or employment which they would find most beneficial in earning a livelihood in after-life. The extra cost to the State would be trifling, in carrying out this scheme, in comparison to the advantages derived from it and the benefit that would accrue to the service in general. There is, of course, much that might be said on this subject which I cannot enter into now, but I feel sure that some such scheme as I have suggested might be prepared which would go far to remedy one of the chief defects in the present state of the Army. Apologising for the length of my letter on a subject on which so much has lately been written, I am, &c.,

SCRUTINEER.

OFFICERS FROM THE RANKS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I have read a letter in your paper signed "Observer," and I write now to ask you to allow me to point out further disadvantages under which officers promoted from the ranks suffer. There are officers now serving who were promoted from the ranks, and had at the time they were promoted upwards of 18 years' service. Counting this (as laid down in Article 67, Royal Warrant for 1882), it will give them nine years' service. An officer so promoted must be at least 37 years of age. He will probably get his captaincy by the time he is 42 years of age, when he suddenly discovers by the Royal Warrant of 1882 that he is ineligible for further promotion, and is advised to go into the Army Pay Department. On inquiry, he is greatly surprised by being informed that he is "too old," and finds there is nothing else open to him but to complete his service for a pension. To do this, he has to serve six years without the least prospect of promotion or increase of pay. It must be very painful and humiliating for an old officer to see young officers promoted over his head (during the time he is compelled to serve for his pension), as in many cases those young officers have actually been taught by him whatever they know of their duties. I venture, therefore, to suggest that all officers promoted from the ranks should after 25 years' service receive a step of rank, carrying with it pay, or at any rate, that such officer should not be considered ineligible for promotion on the ground of being "too old," unless he receives his full pension without requiring to suffer the humiliation of serving for so many years under his former juniors. I feel quite sure that this oversight on the part of the authorities in the Royal Warrant only wants pointing out to be remedied.—I am, &c.,

X.

THE WASHING OF PATIENTS' CLOTHING IN A FIELD HOSPITAL.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Amongst the various subsidiary services in a field hospital which contribute to the comfort and rapid recovery of the sick or wounded, the washing of the soiled underclothing and towels, sheets, and linen used for the sick is most essential. The existence of lice about sick and wounded men is certain to occur if their underclothing is not washed. For this washing of clothing, regular men told off for this special purpose are needed in a field or base hospital. They should be part and parcel of the Hospital Corps, for the washing of a sick man's linen is almost as important as his food. No provision whatever is at present made for this all-important duty by the Medical Department itself. A field hospital is supposed to send its soiled linen to the Commissariat for washing; but the Commissariat themselves have no staff for this purpose, and in Egypt and on board the Carthage much trouble was caused by this state of affairs. It seems absurd to think that in a great ship like the Carthage, no provision was made to do all the washing for the sick on board, and that at Ismailia and Alexandria the clothes had to be sent to native contractors or to chance fatigue men of the regiments to have it done. Any medical officer who in future embarks in charge of a field hospital should say to himself,—"I am responsible for keeping my sick men while in hospital clean, and free from vermin. How am I to do it?" He should there and then protest his inability to carry out the washing of the sick men's clothes, and decline all responsibility in the matter unless men are given him to do it. The evidence of the Commissary-General in Egypt before Lord Morley's Committee very clearly points out how the thing should be dealt with. Four men are needed to wash for 100 sick men, and every 100-bed field hospital should have such a staff added to its numbers. Every hospital ship should have the same proportion added to its complement. Every base hospital should have the same proportion—if it be for 200 sick, it needs eight washermen, if for 400 sick, 16 men, and so on. The country desires above all things efficient hospital organisation in the field. If it desires the sick men to be covered with vermin, then give no washermen; if it desires them to be clean, then washermen are needed. Any private soldier can see the absolute logic of this statement.—I am, &c.,

WASHERMAN.

MARKSMEN.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Your columns I consider the best-suited place for a few remarks on above subject. I hope I have not formed a premature judgment when I say that the new Musketry Regulations are calculated to be accompanied with results the most discouraging to soldiers, and the most fatal to the best interests of the Army. If the performance of half a battalion of infantry (containing 80 marksmen under the old and but four under the new system) be a justifiable guide, then, indeed, I may almost say, "Marksmen are no more." And if an Army wilfully deprived of this valuable arm of hidden power be not undergoing a change for the worse, then I am done. Now the real question is,—Has too much been asked of men? The answer is, undoubtedly, yes; because men who have with their final shot carried a regimental team to victory, on more occasions than one, find themselves now wasting all their experience in pursuit of a prize standing outside the bounds of either reason or possibility to achieve. I said outside the bounds of reason. What other expression can be used when a man is put with a rifle in his hand 15 yards from the 300 yards' distance, and told to fire at the legs of a man painted on a single target 285 yards away, with 100 yards' sight. Why, a soldier who makes shooting his study recognises as much minute machinery in the back-sight of his rifle as in the works of a watch; and yet he is not allowed to touch it, but fire with 100 yards' sight between 285 and 140 yards. Out of the ten rounds thus fired, seven must hit as follows:—Two the legs, between 285 and 240 yards; three the body, between 240 and 180 yards; and two the head, between 180 and 140 yards. The target is checked after each distance, when a hit on body or head after first distance is crossed out as useless, and so on. So it will be seen that the ten rounds may actually hit the figure and yet be useless, though he is firing with a sight in contradiction to all the rules which he has ever and often been taught. Another piece of this forlorn hope is firing at a head and shoulders painted on the end of a target or its side. This shows a front of two feet. A similar bust is on the other end of the target for a second man, and it not unfrequently happens that one man has more hits than he had rounds. It will be seen how possible this is. And now, after all this, where is the inducement to the young soldier to ever again interest himself in shooting? He has nothing to pursue, nothing to gain, and everything to discourage him, for in one part of his training will be impressed on him the utter foolery of ever expecting to hit an object if his back-sight be not properly adjusted. And when there is a hope of gaining one pound or one penny, as the case may be, he is told in substance (for the Order means nothing else), 'Now you are firing for money, you can use these legitimate means to win no longer.' It is, indeed, to be hoped that some regulations bearing the stamp of common-sense (and absence of studied meanness) will decide the qualifications of a marksman, for when you come to exact impossibilities, you find "that a soldier can be but a man."—I am, &c.,

RICOCHET.

The *Bombay Gazette* says:—"As was generally anticipated, Col. Bannerman, commandant 4th Rifles, has been granted the good-service pension, and no officer in this Presidency deserves it better. Looking at the record of his services from the days of the great Sikh war, through the brief Persian campaign, and the dark days of the Mutiny, then on to China at the Taku Forts and up to the gates of Pekin, and lastly all through the late campaign in Southern Afghanistan, and we think even the most exacting critic must own that this is a record to entitle a man to something more than the good-service pension. For it should be remembered that Col. Bannerman must vacate this reward when he succeeds to the off-reckonings, which will be on February 3, 1884, when he will have completed 38 years' service, he having entered the Bombay Army on February 3, 1846. Now can this be considered a sufficient reward for such war services as Col. Bannerman can show. He has been in desperate hand-to-hand fights, he has been over and over again mentioned in despatches, and he has been through campaigns which were both bloody and glorious; and he gets a good-service pension for a few months! How many men have received a brevet, a C.B., even a K.C.B., for a couple of months' campaigning in Egypt? Yet a distinguished soldier like Col. Bannerman has no decorations but his medals. This is little less than a scandal. Col. Bannerman served with the Bombay Column Army of the Punjab, 1848-49; siege and surrender of Mooltan, battle of Goojerat, pursuit and surrender of the Sikh Army (medal and two clasps); with the Field Force which penetrated into the Eusoofzaie country, north of the Peshawur, in December, 1849, capture and destruction of the villages of Sugoa, Pulai, Shurkannes, and Tjoomunda, in the Bhagdurrah Valley; Persia, 1857, bombardment and capture of the forts of Mohumra, and pursuit of the Persian Army (medal and two clasps); as second-in-command of the Detachment Southern Maratha Horse in the pursuit through Central India, Meywar, Marwar, and Rajpootana, of the rebels under Tantia Topee, Rao Saheb, the Nawab of Banda, and Ferozeshah of Delhi; at the action at Chota Oodeypoor (despatches as having distinguished himself; horse severely wounded by sabre cuts; medal and clasp); China 1860, horse transport service at the landing at Peh-tang, battle of Sinho, bombardment and capture of the entrenched village of Tangkow, assault and capture of the Taku Forts, accompanied the advance of the army on Tientsin and Pekin, including the battles of Chang-kia-Waman Tungchow, and occupation of Pekin (medal and two clasps). Afghan war, 1879-80, in command of 4th N. I. (Rifles); defence and battle of Candahar (despatches, medal with clasp)."

The Duke of Cambridge has approved of the following officers of the British Army attending the autumn manœuvres of the German and Italian Armies:—German Army—Manœuvres of the 4th Army Corps: Major-Gen. Sir D. C. Drury-Lowe, K.C.B.; Col. E. F. Chapman, C.B., Royal Artillery; Lieut.-Col. K. G. Henderson, King's Royal Rifle Corps. Italian manœuvres, which take place between Alessandria and Piacenza, from Aug. 30 and Sept. 10 next, in parts of two Army Corps; the cavalry manœuvres will take place in Lombardy: Major-Gen. A. J. Lyon-Fremantle; Capt. J. W. Murray, Royal Artillery. Lieut.-Col. W. W. Bennett, 6th Dragoons, only will attend the cavalry manœuvres.

"Under Orders" writes:—"Can any of your correspondents inform me what is the pay in India (rupees, per month) of a paymaster with five years' service in the Army Pay Department, and, therefore, with rank of major?"

"R. B." writes:—"I see in your paper of this day a paragraph on the subject of the wearing of distinctions (unearned) by the Volunteers and Militia. May I point out to you that it is a fact that many of the Militia battalions of the Rifle Brigade and 60th Rifles have assumed our battles, and carry them on their pouch-belts. I saw a man the other day with 'Waterloo, &c.,' emblazoned on his breast, the connection of his regiment with the same being possibly 'Waterloo Station,' not more. To the credit of the authorities, I hear this practice is 'discouraged.'"

A correspondent writes:—"Any matter affecting the Garrison Library, Gibraltar, must be of interest to both services. I hear with much regret that some 4,000 volumes of old and rare works are about to be sent to England for sale. There must be some grave financial reason for such an action, though we doubt if much money can be raised by such means, as a consignment of books commonly realises about the price of waste paper. The collection of books contained in the library is one of the finest out of England, and it should be most vigilantly guarded. If the shelves of a public library are thus liable to be denuded of their contents according to the caprice of those who, for the time being, may be in charge, we imagine that there will be a woful falling off in donations of books from authors and others to such institutions. I trust, however, that the contemplated act of spoliation will not be allowed to be carried out."

The Army.

1st Life Guards arrived at Aldershot on Wednesday from Windsor, and are quartered in the North Camp.

2nd Dragoon Guards. D and F troops arrived at Aldershot yesterday from Manchester, C and E troops will arrive to-day, head-quarters and A and B troops on Monday, and G and H troops on Tuesday.

4th Hussars. The regiment shortly proceeds from Hounslow to Aldershot, for the summer drills.

6th Dragoons. Lieut.-Col. Bennitt has been selected by the Commander-in-Chief to attend the cavalry manœuvres of the Italian Army, to be held during August in Lombardy. We regret to learn the sudden death of Capt. and Rdgmr. Malone, V.C., of the Inniskillings, at Pinetown, South Africa. The deceased obtained his commission, Sept. 7, 1858, and was promoted hon. capt., July 1, 1881. He served with the 13th Light Dragoons throughout the Eastern campaign of 1854-55, including the affairs of Bulganak and M'Kenzie's Farm, battles of Alma, Balaclava (horse shot), Inkerman, and Tchernaya, siege and fall of Sebastopol, and expedition to Eupatoria under Gen. D'Allonville. At daybreak, on Sept. 24, 1854, when marching on Balaclava, volunteered with three troopers and captured an escort of the enemy's cavalry, also the baggage which they were taking to Sebastopol (Victoria Cross, medal with four clasps, and Turkish medal). He obtained the Victoria Cross for the following act of gallantry:—"For having stopped under a heavy fire (on Oct. 25, 1854) to take charge of Capt. Webb, 17th Lancers, until others arrived to assist him in removing that officer, who was, as it afterwards proved, mortally wounded. Serjt. Malone performed this act of bravery whilst returning on foot from the charge at the battle of Balaclava, in which his horse had been shot." A correspondent writes:—"Having known this officer for a great number of years, I am in a position to say what an excellent, energetic, hard-working officer he has always been, and in what an admirable manner he has always performed his duty. I know that his death, at a comparatively early age, will be very much regretted in the regiment, where he had so many friends, and in which he served for so many years. He had been ailing ever since he arrived in South Africa with the regiment in 1881, but he would not be invalided home, which he could have been, as his great wish was to end his service (he had only one more year to serve) in the Inniskilling Dragoons, and then to retire. He, however, has died at his post, and the country has lost a faithful officer." Another correspondent writes:—"I presume there was no better ridingmaster in the service than Capt. Malone, and even such an exacting inspector-general of cavalry as Sir F. FitzWygram never failed to compliment him most highly. I understand that he would, if he had lived, been appointed next year to the Royal Military College. What a contrast between the fine old soldier, with his four Crimean clasps and V.C., and the bedecked and bemedalled young heroes of Tel-el-Kebir! I hope when the time comes —and it looks stormy—that our ranks may produce many more brave Irishmen like Capt. Malone, but I doubt it!"

ROYAL ARTILLERY.

An unfortunate accident occurred on Wednesday to Major T. C. Price, commanding the 3rd Baty. 1st Brig., Scottish Division, at Sheerness. Preparations were being made for a general inspection, when Major Price visited the parade on a horse belonging to Major T. W. Roberts. The animal suddenly became restive when the band struck up, and Major Price lost his stirrup. He was thrown over the head of the animal to the ground, falling very heavily on his head and face. He was picked up insensible, and carried to the officers' mess, where he was instantly attended to by the military surgeons, and upon a minute examination being made it was found that he had sustained two deep wounds on the head and a bruise on the face. Major Price is making satisfactory progress.

1st, or Royal Scots. Lieut. Campbell-Copeland, who lately obtained his commission from the ranks of the 73rd, is a candidate for entrance to the Staff College.

13th Somersetshire Light Infantry. The 1st Batn. proceeds from Dublin to Enniskillen.

14th West Yorkshire Regiment. The 2nd Batn. proceeds from Belfast to the Curragh.

30th East Lancashire Regiment. Mr. William Kennedy, late of the regiment, died on the 7th inst., at his residence, Nisbet House, Barnes. The deceased was cousin of the present Marquis of Ailsa, and only son of the late Lord William Kennedy. He was born Jan. 13, 1851, and entered the Army in 1870, being gazetted to the 30th Foot, in which regiment he served until he retired from the service in 1875.

38th South Staffordshire Regiment. The following summary of the history of the regiment will, no doubt, be interesting at the present moment, when steps are being taken to raise a regimental memorial:—"The regiment was raised at Lichfield Feb. 13, 1702; embarked on the sea establishment 1707, and on sea service in West Indies till 1710; landed in Antigua in 1710, remained there till 1739. Employed in expeditions in the West Indies from 1739 to 1759; on March 28, 1759, lost severely at Guadeloupe; returned to Antigua, and came home in 1765, after a foreign service of 58 years. Embarked for America in 1774; at Bunker's Hill in 1775, Colonel Robert Pigot commanded; he afterwards, as Sir Robert Pigot, became, as a general officer, its colonel, and so remained from Dec. 11, 1775, to his death, Aug. 1, 1796. Engaged under him at Long Island, 1776; returned to England in 1783. Embarked for Flanders in April, 1795, and went again to the West Indies in 1796, returned in 1800, and was quartered in Lichfield (so that in those days of less promise counties did see their regiments). Oct. 17, 1804, a 2nd Battalion was raised in Lichfield. In 1805 the 1st Battalion embarked for the Cape of Good Hope; part of the regiment landed, and was at the capture of the Cape on Jan. 3, 1806. Aug. 29, 1806, went to South America; engaged at Maldavido, Oct. 29, 1806, at Monte Video, Feb. 3, 1807, and at Buenos Ayres July 5, 1807, and returned to England in Dec. 1807. Under command of Sir Charles Greville, who embarked with it for service in Spain, June 16, 1808, engaged at Noleia, Vimieira, and Corunna; returned to England in May, 1809, and in July the same year again embarked for Holland; returned in Dec. same year. The 2nd Batn. embarked for the Peninsula in 1810, and suffered severely in the storming party at the siege of Badajoz. The 1st Batn. again embarked for the Peninsula early in 1812; was with its 2nd Batn. engaged at Salamanca, July 22. Both battalions suffered severely; in 1st Batn., killed and wounded, 14 officers and 229 non-commissioned officers and men. Both battalions were present from Oct. 6 to 10 at the siege of Bujos, and both battalions suffered so severely that all effective men of the 2nd Batn. were drafted into the 1st Batn., and the staff and officers of the 2nd sent home to recruit. They were re-formed at Winchester. The 1st Batn. returned to England in August, 1814, when the 2nd Batn. was disbanded. In 1815 the regiment embarked for the Netherlands, and landed at Ostend in June, and formed part of the army of occupation in Paris; they were attached to the 1st Brigade, 4th Division. In 1816 the regiment returned to England. In 1818, embarked for the Cape, and was there for three and a half years. In 1822, Col. Archibald Campbell succeeded Sir C. Greville in command, and embarked with the regiment for India. In 1824, embarked at Calcutta for Burmah, and were present in every engagement from 1824 to 1826 (the 13th and 38th Regts. specially mentioned in general orders). In May, 1826, returned to Bengal, and in January, 1836, sailed for England. In 1837, marched across England and embarked for Ireland. on Feb. 13, 1839. Sir Henry Pigot (nephew of Sir Robert Pigot, who commanded in 1775 to 1796), presented at Enniskillen new colours to the regiment, then commanded by Col. Piper. The old colours were sent to England, from which time there is no record of them until now, when they were restored to the battalion by the Earl of Dartmouth, who became possessor of them in purchasing an estate which had belonged to the Pigot family. In September, 1840, the regiment embarked for the Mediterranean, and to 1845 was in the Islands and at Gibraltar. In January, 1846, embarked for Jamaica; in 1848, a detachment, under command of Gen. J. W. Smith (then Capt. Smith), went on particular service up the River San Juan de Nicaragua; Capt. Smith and detachment thanked in the general order dated March 13, 1848; went to Halifax, March, 1848, and returned to England in 1851; in 1854, embarked for the Crimea; in June, 1856, embarked for England; in August, 1857, embarked for India, served throughout the Indian Mutiny; embarked for England in 1878, landed January, 1879; embarked for Malta, August, 1880; embarked for Egypt July, 1882, under command of Lieut.-Col. Eyre, landed in Alexandria July 17, 1882, and formed the first regiment of Sir A. Alison's force; embarked, May, 1883, under command of Lieut.-Col. Eyre, for Malta. The regiment is now 181 years old, during which time it has served abroad 131 years. May it long continue to render its country such valuable service."

53rd Shropshire Light Infantry. The officers and men have decided to erect a marble tablet in St. Chad's Church, Shrewsbury, to the memory of the non-commissioned officers and men of the regiment who died during the late campaign in Egypt. Capt. Hitchcock, who has been at home on leave, left England on the 17th inst. for Egypt, *viâ* Paris and Marseilles. He returns to Abbassiyeh, as Brigade-Major to Brigdr-Gen. Arbuthnot.

59th East Lancashire Regiment. The 5 *and* 9 *Lilywhites Gazette* has the following, "The Lilywhites, old 59th, Club Dinner came off on June 6 at the Grosvenor Gallery Restaurant, and was well attended, seven past and seventeen present Lilywhites availing themselves of this opportunity of renewing old acquaintances. The band of the battalion played a charming programme under the direction of Mr. Gordon, which was very much appreciated. It is to be regretted that more old Lilywhites are not present at these dinners, as they afford opportunities for past and present regimental officers to meet and discuss old times, renew old acquaintances, and foster that *esprit de corps* still dear to all Lilywhites; more especially is this to be regretted now that two years have passed since our old titles and numbers were taken from us, and new territorial titles granted in their place, and a—so to speak—new *esprit de corps* is gradually forming, which will of necessity outlive the old. Without, however, wishing in any way to advocate a proposal which might endanger the continuance of these old Lilywhite (59th) annual dinners, which could scarcely happen unless old Lilywhites cease to support this cherished institution, we would ourselves like to see a greater *rapprochement* between the several battalions or integral parts of our territorial regiment. This might be attained by, we would suggest, a Burnley or East Lancashire week, to be held at a time most convenient to all concerned, say either at Burnley, or during the training of our 3rd Battalion at or near their camp; to include, say, a tournament or round of sports, such as cricket, billiards, shooting, tennis, &c., to conclude with an East Lancashire dinner on same terms as the usual annual regimental dinner. We feel sure that some such proposal, if started by some one in a position to carry it out, would meet with success, and be the means of welding the otherwise scattered parts of our territorial regiment into a homogeneous whole, and give a fillip to this new and very essential *esprit de corps* without, we think, destroying the old and entirely distinct *esprit de corps* handed down to us respectively in our several old numbers, distinctions, and titles, which long may we revere and remember with love and respect, as giving us not only our existence, but a history such as it will take many years to equal."

71st Highland Light Infantry. The regiment proceeds from the Curragh to Dublin.

79th Queen's Own Cameron Highlanders. Major Miers has been presented with a sword of honour by the officers of the 3rd Glamorgan Rifle Volunteers, in recognition of his gallant services in Egypt, and in memory of his former adjutancy of that corps.

90th Cameronians (Scottish Rifles). The amateurs at Cawnpore have driven off some of the hot season's depression by means of variety entertainments. Their latest programme consisted entirely of "nigger work," performed throughout in an admirable manner by the "Apollo" Minstrels, a troupe of twenty, mostly bandsmen. The programme ran for three nights, an extra performance testifying to the success of the undertaking. The entertainments have been managed and conducted by Mr. Townley, schoolmaster.

105th King's Own Light Infantry. Major Spence arrived at Cape Town on June 24, to take up the appointment of Deputy-Assist.-Adjt. and Qrmr.-Gen., vice Major G. E. Boyle, Rifle Brigade, appointed Military Secretary to His Excellency Sir Hercules Robinson.

108th Royal Inniskilling Fusiliers. The regiment proceeds from Enniskillen to Belfast.

Pay Department. "Granted" writes:—"Your able synopsis of the concessions granted to the Army Pay Department by the Army Circular, dated May 18, has, I am sure, been read with pleasure by many of the officers of this long-suffering Department. Assuming that the object of the framers of the Circular above referred to was to attract recruits from the Line, it is about the most successful case of 'how not to do it' which the War Office has manufactured in recent years. If the Secretary of State for War is really anxious to fill the ever-increasing number of vacancies in the ranks of the Army Pay Department, he will have to yield on the following points:— Firstly, and foremost, he must insist on the Treasury authorising the expenditure necessary to pay for a head to the Department, with an assistant and staff of clerks. Nothing which may be hereafter conceded will have the effect of filling our depleted ranks unless we are placed in this respect on a par with all the other Departments of the Army. Secondly, the rank of Lieutenant-Colonel must be granted to all Staff Paymasters with five years' service as such. As this will cost nothing, it is inexplicable to me that so obviously necessary a concession should have been excluded from the recent Circular. Had it been granted, it would have soothed the feelings of such of the senior officers who from any cause may be passed over for promotion to the rank of Chief Paymaster. Thirdly, administrative duties must be granted to Chief Paymasters, by which I mean that all inspections of junior officers must be done by them, instead of by War Office clerks. There is nothing which perhaps tends to rile the officers of the Department more than to see their senior officers quietly ousted from the performance of their proper duties, in order that a few civilian clerks in the War Office may take trips into the country at the public expense. Fourthly, forage allowance must be granted to all field-officers in the Department. It is useless to call a man a Major if you deprive him of one of the principal accessories of his rank, and the War Office plea that the nature of his duties do not require a paymaster to be mounted is absurd, as it is well known that he requires a horse fully as much as Commissariat and Ordnance Store officers. Fifthly—The qualifying service in the Line must be reduced from ten to seven years. When an officer has been ten years in his regiment he has usually become too fixed in his groove, and sees his chance of regimental promotion dangling too closely before his eyes to care to enter a department with its—to him—novel rules and different style of work."

The Auxiliary Forces.

MILITIA.

Royal Fusiliers (3rd Battalion). Capt. Forster has been appointed Instructor of Musketry.

The next examination of lieutenants of Militia who are candidates for commissions in the Line will be held by the Civil Service Commissioners, at the London University, Burlington Gardens, W. (by permission of the Senate), on Friday, Oct. 12, and following days. Applications for permission to attend must be made in accordance with the instructions contained in the Regulations issued with Army Circulars, January, 1881, and are required to be forwarded by commanding officers not later than Aug. 15 next.

THE VOLUNTEERS.

12th Middlesex (Civil Service) Rifles. A most successful entertainment was given in the mess tent at Wimbledon on Thursday evening, when some 200 friends of the regiment accepted the invitation of Lord Bury and the officers. The entertainment opened with some songs and recitations, noticeable among which was an original sketch, "How I Saw the Egyptian Contingent," by Mr. G. W. Allen, which kept the audience in roars of laughter from first to last. In the farce of "Little Toddlekins," Qrmr. Trollope shared the honours with Mr. Allen. Nothing could well have been better than the acting of these two gentlemen. Mr. Walks made a good Capt. Littlepop. The performance was most creditable, considering the great difficulties against which the actors and singers had to contend.

"A Sufferer" writes:—"Can any of your readers tell me why a man re-engaging and coming under the full provisions of the 'Army and Discipline Act of 1881' does not gain the benefit of that Act? Now, that Act provides that all service from the day of attestation shall count towards good-conduct pay and pension. Yet I am debarred from gaining the first advantage, although by the same Act I presume I am the loser of about £10 in regard to deferred pay. Had not the Act come out, I should have received deferred pay for three years and four months longer; that is, I should have received deferred pay up to the day I had twelve years' man service, whereas now it ceases at twelve years from the day of attestation. Now, I should think it nothing but just that I should count my boy's service towards good-conduct pay, and that I should have got my third good-conduct badge after twelve years' service from the day of attestation."

STORY BROTHERS AND TRIGGS,

152, 154, AND 156 QUEEN VICTORIA STREET,

For many years Upholsterers and Cabinet Makers to the ARMY AND NAVY CO-OPERATIVE SOCIETY, Have OPENED the above Extensive SHOW-ROOMS, and respectfully request the favour of a visit.

Where to Take a Holiday (Smith, Elder, and Co.)—The Edinburgh Review, July (Longmans and Co.)—The Quarterly Review, July (J. Murray)—The Hygiene of Armies in the Field, by R. Rawlinson, C.B. (Wyman and Sons)—Epping Forest and its Management (W. H. and L. Collingridge).

NOTICES TO CORRESPONDENTS.

M.—We have no means of ascertaining. No record is kept.

DIVER.—One expresses our own opinion, the other that of a contemporary.

WEARING MEDALS.—The instructions as to how medals are to be worn are explicit. The first decoration or war medal or medals bestowed by the Queen are worn on the left breast, nearest the buttons of the jacket or tunic, or knot of the silk handkerchief, —that is to say, farthest from the left shoulder; then the Medal for Long Service and Good Conduct, and then foreign decorations and medals. A man entitled to the Egyptian Medals and the Long service Medal should wear the latter between the Queen's Medal and the Khedive's Star.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire; Bulletin de la Réunion des Officiers; L'Armée Française; L'Italia Militare; Rivista Europea; Rivista Militare; Memorial de Ingenieros; La France Militaire; Moniteur de la Flotte; Le Progrès Militaire; Der Veteran; Streffleur's Oesterreichische Militärische Zeitschrift; Jahrbücher für die Deutsche Armee und Marine; Militär Wochenblatt; Giornale d'Artiglieria e Genio; Organ der Militär-Wissenschaftlichen Vereine; Vedette; Deutsche Heeres Zeitung; Militärische Zeitschrift; Armeeblatt, Wien; Army and Navy Journal of New York; The American, Philadelphia; Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 21, 1883.

AN article in *Blackwood's Magazine* for this month, entitled "Red-hot Reform," touches upon most of the radical changes in the Army which have been rushed into during the last few years. The most staunch Conservative who ever lived would not desire to see all things remain *in statu quo*, as in the days of Marlborough or Wellington, but would be ready to accept such changes as must necessarily be desirable with the advancement of the times and new inventions. There are, however, reformers who are satisfied with nothing as it was or is, whose fingers itch to overthrow and change everything to meet vague and fantastical views, and who have no sooner effected what they consider one reform than they rush headlong into another. That this has been the case with the rapid changes that have been made in the Army, one succeeding another, there can be little doubt, when we read the long list of so-called reforms quoted in the article referred to, amongst which are "The Abolition of Purchase," the introduction of "Short Service," "the Limitation of Officers' Age," "Territorial Titles," "Abolition of Flogging," "the Double-Battalion System," attempted (?) "Creation of a Reserve," "Incessant Changes of Terms offered to Intending Recruits," and other items. It would occupy too much space to enter fully into all that has been said upon these points, and it is sufficient to remark that the subject has been well handled. It is shown that th "Short-service" system, which was copied from the Germans, does not answer; that neither are the men satisfied with it, nor does it keep the Army up to its required strength, nor has it created a Reserve at all equal in numbers to that calculated upon. The attempt to remedy the Short-service system by the offer of a bounty to men of six or seven years' service, to induce them to remain for the completion of twelve years, has not been found to answer. Few men, having completed six years, would care to throw away another six of their lives, to be shunted at the end of that period, to begin their time anew in civil life at thirty years of age. The only inducement would be to offer the re-engagement to complete twenty-one years, with the certain prospect of a pension, under which circumstances men would gladly remain with the colours, but not otherwise. But Mr. Childers says that the abolition of pensions has already resulted in a saving of £2,000,000. Well, so be it! The saving may be made on the one hand, but what is the effect upon the Army upon the other? "Red-hot Reform" rightly says, "It is better to add another million to the Estimates, than to sit down in silence, under the semi-comic motion of Sir Wilfrid Lawson, 'That the total charge for the Army be omitted, as it is no longer of any use.'" It is the opinion of many that short service will ultimately mean conscription, and the Duke of Cambridge has said that "the system of short service is a peculiar and a simple one, but can only be carried on by conscription." The article we quoted last week from the *Nineteenth Century*, on "The Critical Condition of the Army," pointed out how conscription was fit only for those countries whose armies rarely left their own territories, and that it was incompatible with service in the Colonies or in India. This point, together with the general effect upon the population, upon trade, and upon young men entering professions, should be well considered, before it is decided to hold fast to short service, at the risk of conscription being the result. A few millions more of the country's money would be better spent in giving pensions to willing soldiers, than that the evils of conscription should creep into a hitherto free country. The writer says, "Short service" has left our Army "in a state of disintegration, with a deficiency of 8,500 men at home, of 4,941 in India, of 20,000 men in the Militia, and a Militia Reserve 20 per cent. under its strength." Other portions of the article speak of the break-down of the Medical Department in Egypt, and consequent suffering entailed upon our soldiers, caused by recent "reforms" in that Department; the confusion caused by the adoption of territorial titles instead of the old regimental numbers, and of the consequent loss of *esprit de corps*. A good deal is touched upon as to the excessive examinations required from officers, not only on entering the service, but on passing from rank to rank; and the article agrees with the general opinion held throughout the country that the present grinding system of examinations fails to produce a better article for service than we formerly possessed. "Red-hot Reform" may be a little "warm," but on the whole is a sensible diatribe upon things that be.

According to a recent telegram from Alexandria, the number of men of the Army of Occupation in Egypt sick in hospital was 588 out of a strength of 6,825; in other words, the ratio of sick to strength for the entire force is upwards of 8 per cent. This ratio, however, is very unequally made up. For example, of the Royal Engineers only 4 per cent. were under treatment; of the 42nd Highlanders, 9 per cent.; 60th Rifles, 7 per cent.; while of the Gordon Highlanders, 12 per cent. are in hospital. To give effect to these figures, a statement would be useful, and also suggestive, showing how many men of the regiments named—and of others—have died, or been sent as invalids to England, since the corps mentioned went to Egypt. Without such information, the statistics given are really of no use whatever. Telegrams further state that the prevalent diseases are dysentery and ophthalmia. Regarding these diseases, much has of late been said as to their dependence upon what doctors call "removeable causes." At one time their absence from the Army in Egypt, as compared with their prevalence in the Expeditionary force of 1801, was proclaimed as being a clear proof that this difference was due to the advance of scientific hygiene in the present time as compared with that period. Now, the fact is that it was not until the Army on the first occasion had been in Egypt for a considerable time that dysentery did occur among the troops to any great extent; it followed the prevalence of fever among them. On the present occasion, it is taking precisely a similar course, and this, too, notwithstanding all the boasting we have heard about "sanitation," and so on. And similarly as regards ophthalmia. The prevalence of that disease in Egypt is entirely seasonal. When, therefore, a flourish of trumpets took place by way of proclaiming that assumed triumph of hygiene over that disease, the simple fact was that the season for its prevalence had not then arrived. According to records extant, "ophthalmia prevailed most from May to December" among the troops in Egypt in 1801. This little circumstance gives point, and furnishes an easy explanation of the telegraphic message that ophthalmia is now one of the prevalent diseases among the troops in that country. How, then, about "scientific hygienic measures"? They have so far been simply useless in averting dysentery and ophthalmia.

Among the precautionary measures taken to protect our troops in Cairo against cholera, arrangements have been made to move them into camp, in case of matters becoming urgent, and preparations are being made with this object. Every confidence may safely be placed in Surgeon-General Irving that he will use every means that can be made available for the good of the soldiers under his charge. At the same time, this question of moving troops under canvas, and, as must happen in the present instance, into the desert, away from supplies of food and from water, involves many serious difficulties, of which the public have, or can have, only a very partial conception. Hence it is that we deprecate discussion, such as that already begun in the morning papers, as to what is the proper time to make such a move,—before cholera has attacked them or afterwards, assuming that it attacks them at all, which is by no means an inevitable necessity. Circumstances and conditions can only be judged of on the spot, and Dr. Irving is perfectly capable of arriving at a sound opinion as to the most suitable measures to be taken under them.

As regards the debate which is likely to take place on the 24th inst., in the House of Commons, on the state of the Medical arrangements and Department in Egypt, we may point out that at the end of the Zulu War confidential reports were called for from all Generals and Colonels commanding regiments. In these reports, very strong opinions were expressed on the medical arrangements in the field. The publication of these reports would be highly advantageous at the present moment. They were nominally "confidential," but were in reality not so. As regards the Egyptian campaign, it is clear to all impartial observers that the Commander of the Expedition should have taken the Principal Medical Officers into his confidence when he was about to change his base, so that he could have arranged with the Naval Commander for the hospital storeships to be in the right place when wanted, without exciting any particular attention. This omission was clearly a great error on the part of the General or his Chief of the Staff, and led to the confusion which ensued.

It has been recently proposed to simplify the forage-cap badges or devices for infantry regiments, as follows:—For English corps, the rose; Irish, the shamrock; Scotch, the thistle; Welsh, a dragon; Fusiliers, a grenade; and Light Infantry, a bugle. The matter has been referred to the "Cap Committee," at Aldershot.

One of the most ill-advised changes introduced in the Army in connection with the recent reforms has been the turning of so large a proportion of our regiments into Irish regiments. Formerly there were only five Infantry regiments of pure Irish nationality, viz.:—the 18th, 27th, 86th, 87th, and 88th, of which the 18th, 86th, and 87th were distinguished with the title of "Royal." Now there are 16 battalions localised in Ireland, and the 83rd, 89th, 94th, 101st, 102nd, 103rd, and 104th were turned into Irish regiments, and five more regiments were granted the title of "Royal," viz., the 27th, 83rd, 89th, 101st, 104th, 102nd, and 103rd. Six of the eight Irish regiments now bear the Royal title, which formerly was granted as a mark of high honour.

An old Crimean officer sends us an account of a recent visit to the scene of his first active service. He says:—"I paid a visit to Sebastopol. It is in ruins; but here and there houses of a better description are cropping up. There is a new Admiralty, and a large new church, the latter on the top of the ridge near the old ruined Church of St. Peter and Paul. It is built of Inkerman stone, and, with the new Church of Vladimar and the great memorial edifice to the memory of those who fell in the siege, situated on the north side of the harbour, form three very conspicuous white objects, seen from the deck of the ship as one approaches Sebastopol. There is a good fish-market at daybreak each day, and the city has three good hotels. The newest, or Grand Hotel, is very comfortable. There are plenty of horses for riding and carriages for hire, so one disposed to revisit the fields of his early battles can easily do so, and without either much trouble or expense. The trenches are easily discerned by those who have any knowledge of them. Bits of sole leather, heels of boots, buttons, the tin inside of pouches, are about in all directions, and innumerable pieces of broken bottles. The monuments, from long exposure to the weather, are in many cases illegible. The sites of camps are now great meadows with fair crops. The windmill has its roof decayed and gone. Our roads are our greatest and grandest monuments. There they are unused and useless, as the Tartars never travel on macadamised roads if they can go on grass. The battle-field of Inkerman is now a forest of stunted trees. Not even the road up to the Redoubt is passable for a carriage. The two-gun battery can't be seen until you are in it. The Plains of Balaclava are now under cultivation, and are covered with enormous fields of corn, vineyards, and orchards. The town has some pleasant new houses recently built, and a good hotel. It is recreation ground for those who like to get away from the dust and dirt of Sebastopol. There has been a good deal of property recovered from the wrecks in the harbour, money, wine, beer, &c.; and hopes are entertained that some of the £60,000 in gold known to be in the captain's cabin of the *Prince* may yet be recovered. I visited Alma, then; it lies in solitary grandeur. The cattle and sheep avoid the deadly slopes. The few tombs covering the remains of compatriots are ruinous and neglected. The monument over the officers of the 23rd is falling to pieces. This is to be lamented, as it is a beautiful memorial of white marble, and conspicuous for many miles, as you approach the battery where so many fell to rise no more. The field of battle is not more than 15 miles from the north side of Sebastopol, and the road, though hilly in places, can easily be got over in two hours with three horses abreast; cost, 12 roubles, or 12s. At Yalta there is a splendid hotel now,—250 beds, and fare very reasonable. There are also two other hotels. The Edinburg is a very large one. Plenty of horses and carriages can be hired for tours to any part of the Peninsula. A tourist would do well to take a gun of some kind, as there are plenty of specimens of birds of all kinds to be shot. A large deer of Persian origin is wild about the Tchatyr Dagh. One can fill a basket with trout on the upper waters of the Alma, Katchka, and Belbeck. There are some deep, long pools, and the fish take very freely. The best way to get to Sebastopol is by Constantinople. The steamer sails every Wednesday morning. Good and excellent vessels, and food first-rate. One will be much pleased with the wines of the Crimea."

Lord Foxford will on Monday in the House of Lords move that an humble address be presented to her Majesty for return by battalions of the number of serjeants wanting to complete Militia permanent staffs; and to call attention to the difficulty now experienced in obtaining properly qualified serjeants to serve on the permanent staffs, and in obtaining a sufficient number of Volunteer serjeants. From the Militia (training establishments) Return for 1882, presented to Parliament some months ago, it would appear the total numbers required to complete the Permanent Staff of the Militia in England and Scotland amounted to 2 quartermasters, 131 serjeants, and 80 drummers. The same return gives the details by battalions.

It has been finally decided that Lieutenant-General Sir Archibald Alison, Bart., K.C.B., shall succeed General Sir Daniel Lysons, K.C.B., in the Aldershot command on the 1st prox.

Colonel King-Harman will on Monday ask the Chief Secretary to the Lord-Lieutenant of Ireland if it is true that an order has been issued stating that, although men belong to the Army Reserve who have been serving in the Auxiliary Constabulary Force are eligible for re-engagement in the Royal Irish Constabulary, such men are not to be re-engaged as long as there are other candidates for vacancies in the Force; and whether, as there are now a large number of candidates for admission into the Constabulary, this order is not tantamount to a dismissal of the men who joined the force and rendered good service in difficult and dangerous times.

We understand Major-General N. O. S. Turner, C.B., Royal Artillery, is about to retire from ill-health, which prevents him from being employed on active service. Colonel Leslie, R.A., will become, therefore, a Major-General on the fixed establishment.

We have before alluded to the unaccountable delay on the part of the War Office in filling up the Chief Paymasters' vacancies in the Army Pay Department. Three of these appointments have been unfilled from April 1. Surely, in three months the authorities might have been able to exercise their powers of selection. Three Staff Paymasters and three Paymasters are most injuriously affected by this delay, for when these promotions are gazetted, the increased rates of pay will only be drawn from the date of the *Gazette*, consequently the officers concerned will be the losers by each day that the promotions are delayed from the date of the original vacancies.

A memorial is in course of signature for presentation to the Prime Minister, praying that a committee of experts may be appointed to advise upon the completion of the Wellington Monument in St. Paul's. The officers of the Army will fully sympathise with the object the memorialists have in view. It is a disgrace to the nation that the monument should be relegated, as it is, to an obscure corner, and left for year after year in an unfinished condition.

The Navy.

◆

ST. JAMES'S PALACE, July 7, 1883.

The Queen has been pleased to direct that Letters Patent be passed under the Great Seal of the Most Noble Order of the Garter to nominate, constitute, and appoint Admiral the Hon. Sir James Robert Drummond, G.C.B., Gentleman Usher Daily Waiter, to be Gentleman Usher of the Black Rod, in the room of General the Right Hon. Sir William Thomas Knollys, K.C.B., deceased.

ADMIRALTY, July 13, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Staff Captain Sir Alfred Balliston, Knt., has this day been placed on the Retired List, with permission to assume the rank and title of retired Captain.

ADMIRALTY, July 16, 1883.

The under-mentioned Engineer has been promoted to the rank of Chief Engineer in her Majesty's Fleet, with the seniority stated against his name:—Hugh Burstow (July 9, 1883).

ADMIRALTY, July 17, 1883.

Staff Commander Samuel Libby has been promoted to the rank of Staff Captain in her Majesty's Fleet, with seniority of July 16, 1883.

In accordance with the provisions of her Majesty's Orders in Council of February 22, 1870, and April 30, 1877, Chief Engineer Ronald Taylor has been placed on the Retired List of his rank from the 15th instant.

APPOINTMENTS.

Staff Commander—James B. Walker, to the Hercules, and to act as Queen's Harbourmaster at Portland, vice Haynes.

Lieutenants—George Langford, George R. Lindley, and Francis A. Brookes, to the Excellent, additional; William W. Smythe, to the Achilles, vice Lindley; George A. Callaghan, to the Cambridge, vice Smyth; Frederick E. Poulter, to the Agincourt, vice Brookes; Hugh Talbot, to the Excellent, vice Poulter; William P. Shakespear, to the Shannon, vice Sherard; William G. Rees, to the Cambridge, vice Shakespear; Robert L. G. Noel, to the Indus, for the Thalia; John D. Deane, to the Indus, for the Raleigh; Frederick R. Gransmore, Arthur K. Du Pré, and Charles A. Buckland, to the Frolic.

Navigating Lieutenant—Richard J. Rogers, to the Duncan, for the Trent, vice Jackson.

Midshipmen—William H. F. Montanaro, to the Northumberland; G. B. Sheppard, to the Achilles, complement incomplete.

Fleet Surgeon—Ingham Hanbury, C.B., to the Malabar.

Chief Engineers—Alfred J. Allen, to the Espiègle, vice Lucas; Adam Shoolbread, to the Enchantress, temporarily; Robert Pattison, to the Frolic; William F. Innes, to the Indus, additional, vice Taylor.

Surgeon—Samuel W. Vasey, to Haslar Hospital.

Paymasters—William J. Brown, to the Frolic; Samuel E. Lark, to the Duke of Wellington, vice Brown.

Assistant-Paymaster—William J. Kilroy, to the Sultan, complement incomplete.

Engineers—Caleb J. North, to the Victor Emanuel, for Hong Kong Yard, vice Scott; Hugh Hawkins, to the Asia, additional, vice North; Henry W. Ross, to the Royal Adelaide, for the Vivid; Charles H. Pellow, to the Vernon, for the Bloodhound, vice Riley.

Gunners—Stephen Hopes, to the Indus, for the Thalia; George Wheeler, to the Indus, for service in the Iron Duke.

Boatswains—George White, to the Asia, for the Speedy, vice Marsh; William Glover, to the Serapis, vice White; Nathaniel Fudgelow, to the Britannia, vice Blake; William Cotter, to the Indus, vice Fudgelow; Edward Down, to the Indus, for the Thalia; John E. Libby, to the Defence, vice Oliver; Benjamin Blower, to the Euphrates; James Steel, to the Orontes; John Widgers, to the Indus, for the Raleigh; George B. Vickery, to the Indus, for the Prince Albert, vice Widgers.

Carpenters—James May, to the Euryalus, vice Diamond; Michael McEvoy, to the Indus, for the Thalia.

PROMOTIONS.

Staff Commander Samuel Libby to be Staff Captain; James Attrill to be Carpenter.

RETIREMENT.

Chief Engineer Ronald Taylor—Age.

COASTGUARD.

Chief Officer—G. Prior, Ballywalter, to Donaghadee, vice Nelson, pensioned.

ALEXANDRA, Capt. H. H. Rawson, C.B., flagship of Vice-Admiral the Lord John Hay, K.C.B., Commanding-in-Chief in the Mediterranean, was at Corfu with the Squadron on July 17. The Superb would rejoin the flag from Malta about July 17. The Invincible arrived at Malta on June 30, and would rejoin the flag about the 17th inst. The Bittern arrived at Beyrout on June 30, and is due at Larnaca about the 25th inst. The Humber left Malta on the 17th inst., for Portsmouth, calling at Gibraltar.

BOADICEA, Capt. Edmund Church, flagship of Rear-Admiral Noel Salmon, V.C., Commanding-in-Chief on the Cape of Good Hope and West Coast of Africa station, was at Simon's Bay up to June 26, and would leave early in July to cruise to ports of Cape Colony and Natal. She was at Port Elizabeth on July 13, and would leave for East London, Durban, on the 17th inst. The Starling was at Simon's Bay, and will rejoin the West Coast cruising squadron at St. Helena, on their arrival about October. The Flirt left Ascension on May 19 for Sierra Leone and Cape Coast Castle, and was at Cape Coast Castle on June 18. The Bullfrog was at St. Helena on May 30, and was to leave for Ascension and Cape Coast Castle on June 8. The Stork was at St. Paul de Loando, and on relief by the Algerine will proceed to St. Helena and Ascension.

CYGNET, Lieut. and Com. H. H. Jauncey, proceeded out of Malta Harbour on the 10th inst., with orders to cruise off Malta, and returned the same evening.

DUNCAN, Capt. J. D'Arcy, flagship of Vice-Admiral E. B. Rice, C.B., Commander-in-Chief at the Nore. A court-martial was held on Monday for the trial of George Carter, ordinary seaman, for deserting from the Royal Naval Barracks. Mr. W. B. Risk, the Admiral's secretary, officiated as judge-advocate, and Capt. D'Arcy prosecuted. From the evidence adduced, it seems that prisoner was paid off from H.M.S. London, and should have returned to the Royal Naval Barracks at Sheerness at the termination of his six weeks' leave. Instead of doing so, however, he remained absent for a fortnight, and was apprehended in civilian's clothes in London. Prisoner pleaded not guilty, and said he had no intention of deserting from the service. The court considered the charge of desertion was not proved, and sentenced the prisoner to ten weeks' hard labour for being absent without leave.

ECLIPSE, Capt. Garforth, left Aden for Devonport on July 18.

FROLIC is to be commissioned at Sheerness at an early date by Com. A. W. Moore, for service on the North America and West Indies station. She is at present attached to the 1st Division of the Medway Steam Reserve, and some important alterations are to be made to arrangements for the guns before she is commissioned.

GANNET, Com. E. G. Bourke, has been dismantled in the steam basin at Sheerness Dockyard, and was paid out of commission yesterday (Friday) morning, the crew being granted the usual leave of absence. The Gannet is ordered to be placed in the 4th Division of the Medway Steam Reserve, and she will be removed to Chatham Dockyard until she is required for further service.

HECLA, Capt. A. K. Wilson, arrived at Bantry Bay on July 16.

LORD WARDEN, Capt. Kennedy, flagship of Rear-Admiral Sir Anthony H. Hoskins, K.C.B., with the Reserve Squadron, was at Invergordon, N.B., on July 16. The Reserve Squadron would leave Invergordon for Leith on the 18th inst.

MERLIN, Lieut.-Com. Brenton, arrived at Madeira on July 18; would leave on July 20 for St. Vincent, Cape de Verdes.

NORTHAMPTON, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., Commanding-in-Chief on the North America and West Indies station, remains at Halifax, Nova Scotia.

SLANEY was put into No. 5 dock at Sheerness Dockyard on Wednesday, to undergo her annual overhaul and refit. She was removed from Chatham on Tuesday, where she has been moored for some time.

SUPERB, Capt. Le H. Ward, arrived at Malta on July 7 from Ancona and Brindisi, and was put in quarantine for ten days. The Superb will probably leave harbour to join the Fleet at the end of next week; she will take empty stores from the dockyard for England.—*Malta Times.*

THALIA, Capt. Brackenbury, C.M.G., was paid off on July 18, and placed in the First Division of the Steam Reserve

TRENT, tender to the Duncan, took out a large number of Marines for target practice near the Maplin Sands on Wednesday, and returned to Sheerness Harbour in the evening.

TRIUMPH. A deserter, named Michael Stone, was apprehended at Sheerness on Sunday evening last by Serjt. Wenham, of the Kent County Police. It transpired that he was an able seaman on board the Triumph during her last commission, and deserted on April 3, 1881, whilst his ship was lying at Valparaiso. He has since followed the music-hall profession as an Irish comedian, and has travelled in various parts of England, without being detected. Prisoner was arrested at 9.30, and handed over to the Naval authorities at 10.30 the same evening.

WOODLARK, Com. Nesham, was at Busreh on June 4, and would leave for Bushire about June 17. The Arab was at Karachi on May 23, and would remain at Karachi about 14 days, and then return to Muscat. The Philomel was at Lingeh on May 25, and after the end of May would proceed to Muscat and Jask.

FRANCE AND MADAGASCAR.

The Dragon, Com. Bolitho, arrived at the Mauritius—not at Zanzibar, as reported last week—on June 17, with despatches for the Governor, and the news, which has since reached this country, of the bombardment of Tamatave. The French ships under the command of Admiral Pierre at Tamatave were the Flore, Nievre, Forfait, Creuse, Beautemps Beaupré, Boursaint, Pique, and Vaudremel, all vessels of high speed, and armed with breech-loaders. The Euryalus and Tourmaline are on their way to the Mauritius, so that the British squadron off Madagascar will shortly consist of the Euryalus, flagship of Rear-Admiral Sir William Hewett, V.C., the Briton and Tourmaline, corvettes, and the Dryad and Dragon, gun-vessels. Luckily, there is little chance of a rupture taking place at present with France, or the Squadron under the command of Sir William Hewett would stand but a poor chance of ever visiting an English port again; but the uncertainties of modern politics are so great, that our flag should never be placed in such a predicament as it is in at this moment on the East Indies station. As yet, however, the French Government have received no news of the high-handed conduct of Admiral Pierre, complained of last week by Mr. Gladstone in the House of Commons, on information supplied by Sir Donald Currie, but we have received the assurance of M. Challemel Lacour, delivered in the French Chamber of Deputies, that, "If, which we cannot suppose, any serious mistake or misunderstanding has occurred, in which passion played a part, we should not hesitate to fulfil the obligations imposed on us by the spirit of justice and the interests of the country." This, being interpreted, means, that in the event of Admiral Pierre having so grossly exceeded his instructions, as has been represented, he will be relieved of the command of the Malagasy Expedition.

The members of the Naval Club gave their annual dinner to the First Lord of the Admiralty, at Willis's Rooms, on Wednesday evening. Admiral Sir Edward G. Fanshawe, K.C.B., filled the chair, and the guests were the Earl of Northbrook, Sir Thomas Brassey, M.P., Mr. George W. Rendel, and Lieut.-Col. P. Smith, R.E..

THE CHANNEL SQUADRON.

(FROM OUR CORRESPONDENT.)

Berehaven, Bantry Bay, July 10, 1883.

The Squadron left Corcubion last Tuesday, the 3rd, in the forenoon. The Neptune had an accident with her steam capstan in unmooring, which occasioned her some delay; but she came on afterwards, and took her station soon after the others had cleared the harbour. After passing Cape Finisterre, we stood to the northward under easy steam, and the following morning spread for target practice. The usual prize-firing was held; as it takes the greater part of the day to complete, the squadron was not reassembled and again on its course till about 7 in the evening. On the morning of the 5th we made sail with port stud sails to a fair wind. In the forenoon the flagship and the Sultan shortened sail and dropped out of line. The Admiral went on board the Sultan, and gave her a short inspection. In the evening there was sail drill, and later on, as the wind fell, sails were furled. The next day we had steam tactics in the forenoon, made sail in the afternoon, and had drill, reefing, &c., in the evening. On Saturday we carried stud sails all day; in the evening we furled sails. The columns exchanged positions under steam, the first division being now to starboard, and made sail again. Sails were furled on Sunday forenoon, and soon after, at about 11 o'clock, land was observed ahead. At noon, we formed single-column line ahead, and stood in for Bantry Bay. The weather certainly did not give us a bright welcome home on our return from foreign parts. It began to rain soon after noon, and continued a steady downpour all the time we were rounding Bear Island and coming-to. We arrived at 3.30, and moored in nearly the same order as at Corcubion. The flagship let go abreast of what is generally known in the Squadron as the Achilles' Pier, the Sultan and Neptune passed her and moored nearer to Castletown, but not in line with the rest of the ships, as, owing to the depth of water, they had to take up berths nearer to Bear Island. The second division closed up into their places, and came to in line as they had come in. Yesterday, we were all busy with our Whitehead torpedoes, making runs from the ships and from steam-pinnaces. In the afternoon, we unbent sails, and are preparing for coaling and a slight refit. Two steam colliers have already arrived, and two more are expected. The Minotaur has completed, and the Northumberland and Achilles are busy coaling now. The weather appears to be very variable, as after the rain of Sunday, yesterday was beautifully fine and bright, while to-day it is cold, wet, and as unlike July weather as possible. The natives say we are to have a spell of fine weather, and we all fervently hope they may prove right. Coaling, refitting, and firing away our quarterly allowance of boats' guns' ammunition will occupy us till the arrival of the Hecla, when an elaborate course of torpedo practice is to be gone through. She is expected on July 16. The torpedo operations will occupy about three weeks. As far as the Admiral is concerned, nothing is settled as to our future movements, though we shall probably go to Cork for ten days or so. That will leave us about a couple of months to get rid of, before the time arrives for the annual refit of the Squadron at Portsmouth and Devonport, but no news has yet been received from the Admiralty as to our movements in the meantime.

Berehaven, Bantry Bay, July 18, 1883.

Last week was principally occupied in coaling. All the ships have filled up; the Neptune, which was the last to get hers, finished off on Saturday. Last Wednesday, this day week, the Discovery, store-ship, arrived with stores for the Squadron, and the following day the Valorous came in in the morning, with supernumeraries, &c., and left again for Plymouth, after a few hours' stay, with invalids, of whom, I am sorry to say, there were a good many. The bad weather continues; there is almost constant drizzle or rain, and a strong north-west wind. Sunday was, fortunately, an exception to the rule; the afternoon was bright and warm, and a great number of liberty men landed for a run. The natives were prepared for them, and all the ponies and cars in the neighbourhood were collected at the landing-place to receive them. The road from Waterfall on to Castletown, and a mile or two beyond, was alive the whole afternoon with strings of heavily-laden cars; and detachments of "saddle flappers," beating records and making imaginary finishes, occasionally, indeed, "finishing" in a way they had not intended. On Monday forenoon we exercised at "out stream anchor and cable," and the steam pinnaces were engaged at tactics; in the evening, the Hecla arrived. Yesterday forenoon, the captains and torpedo or gunnery lieutenants of all the ships attended on board the flagship to see the plan, and receive instructions as to the details of the operations which are to be carried on under the direction of Capt. Wilson, of the Hecla, for the defence of the entrance of the harbour with submarine mines. Each ship has prepared six observation, six electro-contact, and three mechanical mines for the purpose, and has been supplied with a copy of a chart showing how they are to be placed. At half-past 7 this morning a signal was made to commence operations, and the work of laying down mark buoys for the mines is now in progress. The Hecla has moved to the eastward and anchored off Roancarrig Light-house, from whence she will direct the operations.

The under-mentioned men have been awarded the medal for long service and good conduct:—James J. Noonan, writer, 1st class, H.M.S. Repulse; William Barker, writer, 1st class, H.M.S. Hercules; Philip Hurrell, and Frank J. Dawson, commissioned boatmen, Coastguard.

ACTIVE SERVICE cannot wear out the teeth that are brushed night and morning with ROWLAND'S ODONTO, the purest and most fragrant dentifrice ever made. All dentists allow that neither washes nor pastes are as efficacious for polishing the teeth and keeping them sound and white as a pure and non-gritty tooth-powder; such ROWLAND'S ODONTO has always proved itself. Ask any dealer in perfumery for ROWLAND'S ODONTO, and avoid spurious imitations, theirs being the only original and genuine Odonto.

SALUTES, FLAGS, CEREMONIES & DISTINCTIONS.

Fleet Circular, No. 21 M.)

Admiralty, July 4, 1883.

My Lords Commissioners of the Admiralty have had under consideration the Regulations under which distinguishing flags (not naval) are to be hoisted afloat, and with a view to defining more exactly than heretofore the procedure to be observed on such occasions, have decided, with the concurrence of the Secretary of State for Foreign Affairs, the Secretary of State for the Colonies, the Secretary of State for War, and the Secretary of State for India in Council, to make the following alterations and additions in the Queen's Regulations and Admiralty Instructions :—

SECTION III.—SALUTES IN INDIA.

Distinguishing Flags in India.—Page 11, after Article 37, add the following Article :—37*a*. The following rules, (A), (B), and (C), are established by the Government of India in respect to the Viceroy's flag in Indian waters :—(A.) When the Viceroy and Governor-General is on board, the Viceroy's flag is to be hoisted at the main. (B.) When a Governor or Lieutenant-Governor is on board within the limits of his government, or on duty elsewhere in territories under the authority of the Government of India, the Viceroy's flag is to be worn at the fore. (C.) When a Chief Commissioner or political officer is on board within the limits of his jurisdiction, or on duty elsewhere in the territories under the authority of the Government of India, the Viceroy's flag is to be worn at the mizen. 2. With reference to the foregoing Rule (A), whenever the Viceroy and Governor-General shall be embarked on board one of her Majesty's ships, his distinguishing flag is to be hoisted at the main, and kept flying while the Viceroy is on board in Indian waters. 3. With reference to rules (B) and (C), the Viceroy's flag is to be hoisted at the fore or mizen whenever any of the functionaries referred to are saluted on visiting the ship. 4. Whenever a requisition is received for the embarkation or conveyance of a Governor, Chief Commissioner, or Political Officer, the senior officer present may direct the Viceroy's flag to be hoisted at the fore or mizen topgallant masthead, as the case may be, of the ship in which he is embarked; provided that the senior officer after consultation with and on requisition from that official, considers it for the benefit of the service about to be performed that such flag should, within the prescribed limits, be hoisted. If the senior officer considers it, under the circumstances, undesirable to hoist the flag, he is to inform the official of his reasons, and at once report the same to the Commander-in-Chief for the information of the Admiralty. 5. In the event of any such functionary being detached on a foreign mission in his official capacity outside his particular jurisdiction, a special intimation will be given by the Government of India in each case as to the flag being carried by a man-of-war in which he may be embarked; in the absence of which the senior officer present is to exercise his discretion in consultation with the official proceeding on the mission.

SECTION VII.—COLOURS TO BE HOISTED WHEN SALUTING, &C.

Masthead Flags, saluting British Functionaries.—Page 15, Article 56, Clause 2, add :—If the ship has neither a red or blue ensign, a white ensign may be hoisted at the fore topgallant masthead when saluting any of the British functionaries referred to.

SECTION IX.—DISTINGUISHING FLAGS AND PENDANTS.

Flags and Pendants of Ships in Commission.—Page 18, after Article 71, add :—71*a*. An admiral's flag, a commodore's broad pendant, or the ship's pendant is to be hauled down from the masthead of a ship when the Admiralty flag is hoisted in that ship. 2. The Royal Standard, the flag of the Governor-General and Viceroy of India, and the flag of the Lord-Lieutenant and Viceroy of Ireland, are when indicating the presence on board of personages entitled to hoist those flags, to be always carried at the main, subject, in the case of the flag of the Viceroy of India, to the provisions of Art. 37*a*, B, and C. 3. The flags of other functionaries directed by Art. 60 of the Queen's Regulations, 1879, and the foregoing Article, to be hoisted in certain circumstances in ships of war are not to displace, at the mastheads they are directed to be carried, the flag of an admiral of any grade or the broad pendant of a commodore of either class. When therefore, the flag or broad pendant is flying at the fore, the distinguishing flag of the civil or military functionary authorised to be hoisted at the fore may be displayed at the mizen.

SECTION X.—DISTINGUISHING FLAGS.

Distinguishing Flags (Civil).—Page 19, after Article 74, add :—74*a*. Whenever any of the functionaries particularised in Article 60 and 74 is embarked—I. In a boat, for the purpose of paying visits of ceremony, or on other official occasions, the proper distinguishing flag may, within the respective limits prescribed by the following Clause II., be hoisted at the bow, but when the boat belongs to one of her Majesty's ships, she is to keep her white ensign flying; or,—II. In one of her Majesty's ships for passage,—(*a*), If a general or other Military officer commanding a station, the proper distinguishing flag may, with the approval of the senior Naval officer, be hoisted at the fore topgallant masthead, and kept flying within the general or military officer's command, provided he is proceeding on public military service; (*b*), If a diplomatic functionary and in charge of a mission, the proper distinguishing flag may, with the approval of the senior Naval officer, be hoisted at the fore topgallant masthead, and be kept flying within the limits of the mission, provided the diplomatic functionary is proceeding on the public service; (*c*), If a Governor or High Commissioner, or a Lieutenant-Governor or other officer administering the Government, the proper distinguishing flag may, with the approval of the senior Naval officer, be hoisted at the fore topgallant masthead, and kept flying within the limits of his government, or, in the case of a High Commissioner, within the limits of his commission, provided the colonial functionary or High Commissioner is proceeding on the public service; (*d*), The distinguishing flag of consular authorities is to be hoisted in boats only and not in ships, except when they are being saluted. III. In one of her Majesty's ships to pay an official visit.—The distinguishing flags are to be respectively hoisted at the fore topgallant masthead whenever any of her Majesty's military, diplomatic, colonial, or consular functionaries are receiving salutes to which they are entitled. IV. In British ships and boats, other than those of her Majesty, these functionaries (except consular officers as to ships) are, with the sanction of the owners or masters, authorised to fly their proper distinguishing flags on the same occasions and within the same limits, and these regulations shall be deemed a sufficient warrant to the master under the Merchant Shipping Act for so doing, but the permission to hoist such masthead flags, indicative of the presence on board of any of these functionaries, in no way affects or alters the character or status of the merchant ship in time of peace or in time of war, whether her Majesty is belligerent or neutral.

74*b*. With regard to the previous approval of the senior officer, whenever a requisition is received for the embarkation or conveyance of any of the functionaries particularised in Articles 60 and 74, the senior officer present will, in the absence of special orders from superior authority, issue the necessary directions; provided that he, after consultation with and on requisition from the official to be embarked, considers it for the benefit of the service about to be performed that such flag should be hoisted within the authorised limits. Should the officer who has to determine the question consider it, under the circumstances, undesirable that the distinguishing flag should be hoisted, he is to inform the functionary of his reasons, and at once report the same for the information of the Admiralty. 2. In the event of an Ambassador being embarked, or a Governor, High Commissioner, &c., of a colony being detached on a foreign mission in his official capacity as Governor or High Commissioner, special instructions will be issued in each case as to the flag which should be carried by a man-of-war in which he may be embarked. In the absence of instructions from superior authority, the senior officer present is to exercise his discretion in consultation with the official about to embark.—By command of their Lordships, G. TRYON.

To all commanders-in-chief, captains, commanders, and commanding officers of her Majesty's ships and vessels.

HONORARY RANK CONFERRED ON OFFICERS OF THE ARMY AND NAVY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Your able remarks regarding the Warrant Officers of the Royal Navy in the *Army and Navy Gazette* of last week, induce me to ask you to insert in your next number the following observations with regard to honorary rank. In the first place, what was the origin of rank or precedence being conferred on our Crown soldiers and sailors? It was for the sake of discipline, as promotion was the reward for efficient and meritorious services. Is it not therefore unconstitutional to advance a public servant to any rank for which he is not qualified or required? Honorary rank materially detracts from the value of substantive rank. There are major-generals and colonels, who have not served as fighting-men since they were captains, received into the foremost places in society because they have been awarded these titles; and there are quartermasters retired with the rank of captain and major who have never passed as a lieutenant. The quartermasters of the Army and warrant officers of the Navy have most responsible duties to perform, and should be paid according to their merits; but the public should not be mocked by these officers having false rank conferred upon them, instead of substantial money awards. They might have relative rank, according to the position they hold, but they should retire without changing their service designations, as do engineers and others.—I am, &c., OBSERVER.

["Observer" is quite right. To save a few shillings, the authorities care not how much they derange the whole social fabric of the land.—ED. *A. & N. G.*]

AN ARMY RIFLE TEAM CLUB, AND SHOOTING AT WIMBLEDON.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—Will you kindly permit me, in the same issue of the *Army and Navy Gazette* as that in which appears the report of the United Services Match, which was fired at Wimbledon on the 18th inst., to make the following address? —I am, &c., THE CAPTAIN OF THE ARMY TEAM.

London, July 19.

TO THE OFFICERS AND MEN OF THE REGULAR ARMY.

I am sure you will read with interest the results of the great annual match between representative teams of the United Services which has just taken place, and will observe with mingled feelings the position taken by our team in the order of merit; sorrow at their not having won a higher place; sympathy for the poor fellows who, trying their very best, broke down in their scoring under some "adverse overshadowing fate;" satisfaction that six out of the eight made the excellent average of 88, and that one of them, the steady four-badged private (the first of his rank who ever shot in the Army Team), did so well. Now, my object in directing your attention to this match is twofold,—first, to assure you that the very greatest interest is taken in it by all who have the good shooting of the Army at heart, also, that there exists a keenness of desire to be members of the team which is most encouraging; and secondly, to propose means of increasing the scope of choice which a captain of the team is at present confined to, by making the match more widely known, and by getting a larger number of candidates to assemble during the Wimbledon Rifle Meeting, thereat to be tested as to their worth as reliable and "knowing" rifle shots. The following suggestions are, therefore, put forward. First, the formation of an "Army Team Club," after the model of the English and Scotch "Twenty" Clubs, to be composed of officers and men who are prepared to strive for entrance into the team, or who will join out of pure desire to do what they can for it. One feature would be the holding of local competitions on certain days of certain months in the year; another, the provision of a tent (or tents) at Wimbledon as a place of call, assembly, and conference. Second, the institution of a competition (to be proposed to the National Rifle Association) for commissioned officers only of the Army, Navy, Marines, and Militia, on the lines of the N.R.A. Army and Navy Challenge Cup, or of Gen. Eyre's prize. At present, there are very few contests in which the Martini-Henry is used open to officers of the above-named services, although there are three special ones for warrant and non-commissioned officers and men. Such a competition would at one and the same time encourage more officers to come to Wimbledon, and afford a test for judging of individual merit which would be most valuable to captains of teams. Besides, every one must admit that now, when officers have so much to do with the musketry training of their men, it is more important than ever to get as many as possible to become good shots themselves, in order to "show the way" to those under them. If these proposals meet with approval, I beg that officers (one from a battalion will do) will write to assure me thereof. The next steps, if the encouragement is sufficient, will be to bring the matter before the proper authorities, and, if approved, to form a committee, to decide upon what is best to be done, and to ask for donations to form a fund for the provision of a "Challenge" prize or prizes to be won by officers under conditions similar to those for General Eyre's Prize. I have one other proposal to make, and that is that the teams in the United Services Match be each twelve strong, as in the first three years, and not eight, as at present.—I am, &c., F. M. SALMOND, Major,

D.A.A.G. for Musketry, Captain, Army Team, 1879-83.

"HOTCHKISS *v.* GARDNER."

This important machine-gun patent case has lately been tried in the Chancery Division of the High Court of Justice, before Mr. Justice Denman, and has resulted in favour of the defendant, with costs. The plaintiff's case was that the principle adopted in his (Hotchkiss) gun, whereby the motion of a single shaft placed transverse to the axis of rotation of the barrels performed the three operations of loading, firing, and extracting the empty cartridges by means of putting into motion the mechanism for these purposes, has been introduced into the mechanism of the Gardner gun for performing the same operations. Both the Hotchkiss and Gardner machine-guns have rotatory motion of their mechanism, but in the former weapon the barrels rotate, while in the latter they are fixed. The precursor of machine-guns having rotating barrels and rotatory motion of their mechanism is the well-known Gatling gun; and it would seem from the summing-up of the Judge that both the plaintiff's and the defendant's guns are but clever adaptations of the principles adopted in that weapon, though, at the same time, these later productions are meritorious inventions.

ARMY AND NAVY CO-OPERATIVE MEMBERS ARE SUPPLIED AT

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 22, 1883.

AN EXAMINATION OF CANDIDATES for COMMISSIONS, to fill thirteen vacancies in the MEDICAL DEPARTMENT of the Royal Navy, will be held at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 13, 1883, and following days, at 10 o'clock.

Candidates are to attend at this Department at 11 o'clock on Thursday, August 9, for preliminary examination as their fitness for the Service.

The Forms to be filled up by Candidates will be supplied on application to this Department, and should be returned as early as possible.

JOHN W. REID, M.D.,
Director-General.

SITUATION WANTED, as CHEF, in CLUB or OFFICERS' MESS. Three years' personal character. — Apply, Camille Fauvin, 23 High Street, Old Brompton, Kent.

A LADY who has the Charge of the Little Daughters of an Indian Officer, is desirous of having TWO or THREE more YOUNG CHILDREN to bring up with them, in her country home, within a few miles of Brighton. She has a superior governess and nurse. References in India and England. Inclusive terms, with clothing, 100 guineas per annum.—Address, "L. E.," care of PAGE, 108 Fleet Street, E.C.

GOODWOOD RACES.—TO be LET, for the week, a COMFORTABLE RESIDENCE, within three miles of the Course, containing 3 reception-rooms, 5 bedrooms, and 1 dressing-room, garden and lawn. Two servants left in the house; also linen and plate.—For further particulars, address, Mrs. WELCOME, Wickham Road, Chichester.

NOTICE.—An exceptional opportunity offers to Gentlemen desirous of living at Bath to PURCHASE a very old-established MANUFACTORY, making considerable profits and in full working order. Previous knowledge unnecessary, as departments have efficient managers. Ill-health sole cause of sale. Capital necessary, £5,000.—Principals only, address "LEX," care of Collier and Bowdick, 28 Moorgate Street, E.C.

MANITOBA and the CANADIAN NORTH-WEST.

Prairie and Timber Lands.—Rich Soil.—Healthy Climate.—Good Water.—320 Acres reserved by Government for each Settler as Homesteads and Pre-emptions.

HOLLOWAY'S OINTMENT and PILLS need only a single trial to make known their capabilities. No external sore or internal inflammation can long withstand the cooling, purifying, and healing influences exerted by these twin medicaments. Be the mischief recent or chronic, great or slight, painful or simply annoying, it will succumb before the curative virtues of these perfect remedies, which can be rightly applied by any person who will attentively read their accompanying directions, which are propounded in the plainest language, void of technical terms, and printed in the most legible characters. To the man of business, confined to his counting-house, and harassed by engagements, these Pills are invaluable; for the man of pleasure, addicted to free living, they are peerless.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDREDS.

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

PRICE LISTS SENT FREE ON APPLICATION

THE
CHAMBERLAIN LIGHT.
TO BE SEEN IN OPERATION AT
43 NEW BROAD STREET, E.C.

The Best, Cheapest, Safest, and Purest Light in Existence.

Extract from the Report of Professor H. HUTCHINSON, C.E., F.C.S., &c, on the Apparatus and Light:—

"The apparatus is very simple, uses pure material. The gas does not contain sulphur or sulphur compounds, nor naphthaline. Can be made without the least offensiveness in any house or mansion. Will travel any distance without deposit or condensation.

Hygienically the qualities of this light far surpass those of any other.

May be used as ordinary coal-gas for heating and cooking purposes.

It is the cheapest, brightest, and purest gas known."

Estimates given on application.

6d, 1/0, 2/6, KEATING'S POWDER

Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.

This Powder, so celebrated, is perfectly unrivalled in destroying BUGS, FLEAS, MOTHS, BEETLES, and all Insects (whilst perfectly harmless to all animal life). All Woollens and Furs should be well sprinkled with the Powder before placing away. It is invaluable to take to the Seaside. To avoid disappointment, insist upon having

"KEATING'S POWDER."

No other Powder is effectual. Sold only in tins, 6d, 1s, and 2s 6d. Beware of Imitations. Don't be deceived.

ARMY EXAMINATIONS.—Captain W. H. JAMES, F.G.S., P.S.C., late R.E., and Major E. J. LYNCH, late Garrison-Instructor, London, 19 Lexham Gardens, Cromwell Road, W., PREPARE Gentlemen for the Army, *viâ* WOOLWICH, SANDHURST, and the MILITIA. Special Classes for the STAFF COLLEGE and Promotion Examinations. Captain James passed from the Staff College in 1877 with honours, Major Lynch in 1876, with honours and special mention in military art and history, reconnaissance, and topography. Eighty-three successes last year.

RECENT SUCCESSES.

WOOLWICH:—Five out of seven sent up in 1882, viz., 4th, 7th, 17th, 22nd, and 25th.

SANDHURST:—6th, 25th, 55th, 61st, 74th, and 2nd Queen's Indian Cadet.

SANDHURST PRELIMINARY:—Thirteen out of Eighteen this year.

MILITIA MILITARY:—Messrs. JAMES and LYNCH have passed thirty-six under the present regulations. viz.:—March, 1881, *FIRST, *25th, *59th; September, 1881, *8th, 16th, 21st, *23rd, *25th, *33rd; March, 1882, *FIRST, 4th, 12th, 14th, *19th, 28th, *30th, and three Cavalry commissions; September, 1882, *FIRST, 2nd, 8th, 10th, *14th, *19th, *20th, 25th, 27th, 28th, 30th, 33rd, *36th, and one (42nd) Cavalry commission; March, 1883, *4th, 10th, 28th—the 4th passed his first trial after only 16 weeks' reading.

(Those marked * passed first attempt.)

At three out of the five examinations held, Major Lynch passed the First Candidate.

MILITIA LITERARY:—Twelve out of thirteen in 1881, ALL in 1882; March, 1883, ALL, viz., 16th, 20th, 22nd.

STAFF COLLEGE:—1881: FIRST, 4th, 16th. 1882: FIRST, 7th, 10th, 15th, 22nd, 23rd, 26th.

PROMOTION EXAMINATION:—Messrs. JAMES and LYNCH have passed 178 officers for promotion. Only three have failed.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, &c.—Address Rev. E. BARTRUM, Head Master.

ASHFORD SCHOOL, KENT. HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, assisted by the Rev. W. FULFORD, M.A., and Colonel COATES, late 99th Regiment, PREPARE CANDIDATES for Woolwich and Sandhurst. Also, in separate Classes, LIEUTENANTS of MILITIA for the Military Competitive Examinations, and Officers for admission to the Staff College.

Colonel Coates's private pupil, Lieutenant Hill, Cheshire Regiment, passed Sixth at the March Examination.

References will be given to Officers of very high position in the Service.

For particulars, apply to H. ZOBEL, Poulton House, Hampton.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of PUPILS to Prepare for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to 12. Five pupils out of six were successful at the last Sandhurst Examination (July, 1882). —Terms, references, and other information sent on application.

SANDHURST, WOOLWICH, MILITIA, INDIAN FORESTS, and other COMPETITIVE EXAMINATIONS.—Prospectuses of Tutors in England and Abroad who have been successful in passing Students at all the Recent Examinations forwarded (gratis), on application to Messrs. ASKIN, GABBITAS, and CO., 38 Sackville Street, London, W. References kindly allowed to the Right Rev. the Chaplain-General to the Forces, and others.

EASTBOURNE.—St. ANDREW'S SCHOOL. ("The MEADS.")
Principal—Rev. F. A. SOUPER, M.A., formerly Head Master of Bradfield College, Berks, and Sub-warden of Trinity College, Glenalmond, N.B.

Young Boys prepared for Entrance Examinations at Public Schools, and for other qualifying and competitive Examinations. Terms for boys over Twelve years of age, 100 guineas per annum.

SCHOLARSHIPS.

BATH COLLEGE, BATH.

PRESIDENT.
His Grace the DUKE of CLEVELAND, K.G.
HEAD MASTER.—T. W. DUNN, Esq., M.A.
HONORARY SECRETARY.—Colonel HARBORD.

FOUR or MORE ENTRANCE SCHOLARSHIPS for Competition on September 19 and 20, next, from £25 to £50, to be increased to £85 in case of a Scholar who may need it.

Allowance for age in the case of younger boys.

Candidates from a distance can be provided for.

An additional Boarding-house (Rev. W. E. Sherwood's) will open Next Term.

HOME EDUCATION.—St. Leonard's-on-Sea.—The Committee of the Working Ladies' Guild desire to recommend a Lady residing in the above neighbourhood who receives Indian Children, or Girls requiring home care to educate with her youngest daughter, aged 14. Her house is situated in one of the best parts of St. Leonard's, 10 minutes' walk from the Sea; and she can offer the advantage of a refined home, with superior teaching in modern languages and accomplishments. High references can be given.—Address, the SECRETARY of the WORKING LADIES' GUILD, 9 Anglesea Terrace, St. Leonard's-on-Sea.

MILITARY EDUCATION, GERMANY.—Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the last Militia Competition, which took place on March 8, for which 31 Commissions in the Line have been awarded, the under-mentioned officers passed from this Establishment, out of 18 sent up:—

Lieutenant	E. G. Wynyard...	8th
,,	H. J. Morphy ...	11th
,,	I. H. W. Southey	13th
,,	N. G. Woodyatt	15th
,,	J. H. Heycock ...	16th
,,	D. S. A. Cosby ...	22nd
,,	F. K. O. Peile ...	26th

This completes a total of 32 commissions secured by Colonel WILKINSON and Lieutenant-Colonel SHAW at the last four Military Competitive Examinations, the total number sent up for these competitions being 76. The names of the successful pupils have already been published.

Also, at the recent Literary Examination for Militia Officers held in April, Lieutenant Lord Skelmersdale took FIRST place on the list.

The results obtained at the last SANDHURST EXAMINATIONS have added to the general score, which amounts altogether to SIXTY-ONE SUCCESSES, achieved by pupils during the past 18 months.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, PRELIMINARY, &c.—CAREFUL PREPARATION for any of the above. Upwards of 130 successes during the past four years. Highest places in lists, Nos. 5, 8, 9, 15, 18, 29, 34, 37, 38, 52, 61, 63, &c. More Preliminary successes in February and March, 1883.

For full particulars, terms, references, &c., address, Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley-on-Thames.

MILITARY COMPETITIVE for MILITIA OFFICERS.—Special Course, in charge of Colonel STORY, late South Lancashire Regiment. 8 years' experience as Garrison Instructor. In 1882-83, with a total of Twenty-four Candidates, Six were successful, an average of one in four.

Address, Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and steady work is insisted on. Since the introduction of the Military Competitive, out of Forty-two Lieutenants of Militia sent up, Twenty-six have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of pupils successful at all Examinations, INCLUDING THE LAST SANDHURST AND RECENT MILITIA COMPETITIVE.

TO ARMY TRAINERS and MILITARY STUDENTS.

THE REV. Dr. POLLOCK RECEIVES a Few RESIDENT PUPILS, to prepare for Sandhurst, Woolwich, and the Universities. At last Sandhurst Examination, a Pupil obtained 5,136 marks.—Neville Hall, Middleham, Bedale, Yorkshire.

MILITARY COMPETITIVE EXAMINATION.

MAJOR DE THOREN and Major MORGAN (late Rev. J. CARDWELL) PREPARE MILITIA OFFICERS for the above Examination. The great success they have hitherto had was even greater at the Examination on March 8 and 9, 1883. Out of the Eight Candidates sent up,
Mr. H. R. Pease passed 9th } at their first
Mr. A. Faulknor ,, 12th } attempt;
and Four others were in the first fifty, one being 33rd; the remaining two qualified, and were high up.

The fees at this Establishment are unusually low.

Major De Thoren was Professor of Tactics at Sandhurst, Garrison Instructor at Madras, and D.A.Q.G. in the Abyssinian Campaign.

Major H. F. Morgan passed the Staff College, and is the author of "Summary of Tactics" and "Summary of Law."

For further information, apply to Major MORGAN, 3 Douro Terrace, Jersey.

Trade Mark—"BLOOD MIXTURE."

2/- TEA OF EXTRAORDINARY QUALITY,
As Supplied to Dukes, Earls, Barons, and the County Families of England.

THE unprecedented depression in the Tea Market now enables COOPER COOPER and CO. to offer such value in Tea as would, a few years ago, have been considered simply impossible, but is now a realised fact, for at

TWO SHILLINGS
A POUND,

COOPER COOPER and CO. are able to supply Tea of amazing strength and exquisite quality, while the choice kinds at Three Shillings a pound, which are coming to hand in lessening quantities year by year, COOPER COOPER and CO. have the greatest difficulty, after ransacking the markets of China and India, in procuring in sufficient quantities for their consumption. These choice and selected Teas COOPER COOPER and CO. have the honour to supply to many Foreign Princes, Potentates, Ambassadors, &c.

THE enormous success—without competitors and with no rivals—which has attended the sale of COOPER COOPER and CO.'s Teas is perhaps unparalleled in the annals of this or any other trade, and can only be accounted for by the way in which their business has been conducted, which has gained the patronage of all classes. COOPER COOPER and CO. number among their customers Princes, Dukes, Earls, Barons—in fact, a large per-centage of the entire Peerage—Church dignitaries of every grade, and ministers of all denominations, County Families from every county in Great Britain, and from all classes of the community. COOPER COOPER and CO. are also shipping their Teas every day to foreign parts. Paris would appear to draw its supplies from COOPER COOPER and CO.'s Stores, and in almost every large city, and especially in the seaport towns of Europe, Asia, Africa, and America—in fact, to the very ends of the earth—COOPER COOPER and CO.'s Teas and COOPER COOPER and CO.'s name are known.

COOPER COOPER and CO. have their own Agents in China and India, and are consequently able to sell their Tea at a price which is actually under that which wholesale merchants, brokers, &c., charge to ordinary dealers. They are enabled to do this as they have not the expense of travellers, and no bad debts to provide for, their terms being strictly for nett cash before delivery. They also save an immense amount by keeping no horses and vans—many houses having from 20 to 100 horses, vans, and two men to each, to deliver, sometimes, half-a-pound of tea miles and miles away, this overwhelming expense having all to come out of the quality of the Tea.

COOPER COOPER and CO. have, in fact, no expense but indispensable rent and labour, which in consequence of still-increasing business, amount only to a fraction on the price of the Tea they sell.

COOPER COOPER and CO. may mention that they include among the regular buyers of their Tea a great many London Tea Brokers, from the simple fact that it can be purchased cheaper and better from them than from the importers themselves.

COOPER COOPER and CO. sell their Teas for ready money only. They have thus no provision to make for bad or doubtful debts.

AND now a word about this year's crop. It is hardly satisfactory on the whole, but some of the choice crops secured by COOPER COOPER and CO. are simply delicious, COOPER COOPER and CO. are still enabled to sell the very best at Three Shillings a pound, and it is veritably a marvel of goodness—a "thing of beauty" and "a joy for ever." But the most astonishing thing of modern times is the Tea at Two Shillings a pound which COOPER COOPER and CO. are now selling. The rich and wealthy buy this Tea. Ladies drink it in their boudoirs and at their early drums, and, as one of our country patrons writes, "It is lovely."

COOPER COOPER and CO. may add that Indian Tea is becoming day by day a greater favourite among the best judges, and this year's crop has been prepared with greater care than ever. It is strong, pungent, with most agreeable flavour, and the better it is known, the more it will be liked. The Tea is 3s a lb., for the best.

COOPER COOPER and CO. charge threepence a package (of any size) for delivering their Teas at any of the Railway Stations in London, or any place within the limits of the London Parcels' Delivery Co., thus putting all on an equality; those who send for their tea, and those who require it sent.

COOPER COOPER and CO. do not pay railway carriage, but are willing to compound for the same on receiving the sum of 6d. in addition to the price of the Tea, to any Railway Station in England, on quantities of the value of £2 and upwards. Families residing in the country can thus, by clubbing together, have their Tea sent almost carriage free, as well as save about 9d a lb. in the cost.

Horses	1,033	45	4·3
Mules	783	4	·5
	1,816	49	2·5

Leave of absence has been granted to Major T. S. St. Clair, Garrison Instructor, from July 11 to August 31; Major W. Tolson, Royal Sussex Regiment, from July 15 to October 31; Lieutenant W. L. Harvey, 2nd Duke of Cornwall's Light Infantry, from July 3 to October 18; Lieutenant W. Francis, 2nd Duke of Cornwall's Light Infantry, from July 4 to September 18; Brevet Major J. Flood, 19th Hussars, from July 10 to October 24; Lieutenant and Adjutant J. Ker Fox, 19th Hussars, from July 6 to October 20; Captain W. S. Anderson, Kings' Royal Rifle Corps, from July 10 to October 25; Lieutenant-Colonel Gordon, Brigade-Major, 2nd Brigade, from July 11 to September 10; Lieutenant-Colonel Ardagh, C.B., from July 11 to September 10; Brevet Major Hunt, Cameronian Highlanders, from July 8 to October 22; Veterinary-Surgeon Thomson, from July 9 to October 8.

During the absence of Colonel Minto Elliot on leave, the command of the Royal Artillery in Egypt devolves on Major Macdonell, commanding Royal Artillery, Alexandria.

The Very Rev. Dean Butcher, Chaplain at Cairo, formerly Dean of Shanghai, is appointed temporarily Acting Chaplain to the Forces during the absence on sick list of the Rev. F. W. Agassiz, Chaplain to the Forces.

Quartermaster W. McKay, A.H.C., is struck off the strength of the Army in Egypt, from the 23rd ult.

It is notified in General Orders that commanding officers will be held responsible that no parties of men on duty, or guards, or individuals are allowed to leave barracks in the early morning before being supplied with a cup of coffee.

H.M.S. Humber left Malta for Alexandria this morning (10th), and will return to England with details.

The 46th Regiment are quartered at Ramleh, about two miles east of the public slaughter-house. In view of the possible invasion of Alexandria by an epidemic, the slaughter-houses were visited by a sanitary commission, and were found in such a filthy state, that Dr. James Mackie, C.M.G., does not hesitate to declare that it must be considered a source of danger to the regiment during the prevalence of west winds.

The health of the troops in Alexandria is, it will be seen, far from satisfactory, and if it may be questionable whether this can be traced to malaria carried two miles, it is less so that their health must suffer from having to eat meat which, as Dr. Mackie's report says, is cut up over open, stinking drains.

By order of the Secretary of State for War, twenty-seven mules that were purchased for the late Egyptian Campaign were sold by auction on Monday last by Mr. Briggs, at the Elephant and Castle Horse Repository, New Kent Road. These mules, which were large and well-bred, were purchased in the Mediterranean, and sold for a total of 491½ guineas, or an average of over 18 guineas. The best of these animals realised the exceptional price of 26 guineas.

NOTES FROM ALDERSHOT.

(FROM OUR CORRESPONDENT.)

Field operations of a most instructive nature, in which the whole of the troops in the command were engaged, took place in the vicinity of the Camp on Wednesday and Thursday. The general idea was that the advanced guard of a Northern army marching on London had reached the Chobham Ridges, and heard that a Southern force had moved out to cover the town of Aldershot. A brisk engagement was fought in the evening, previous to the formation of the encampments, with the result that the superior Southern force (under the command of Major-General Willis, C.B.) drove the Northern troops (commanded by Major-General Mark Walker, V.C., C.B.) across Pirbright Common and the South-Western Railway; the beaten force then retired to Colony, and encamped for the night. The Southern force retired to Normandy Common, where it also encamped. Both camps were laid out as in war, and the points covered with outposts. General Sir Daniel Lysons and Staff, who also camped out, visited the encampments, and inspected the outpost lines of both forces. Reveille sounded at sunrise on Thursday, and the Northern force, having been reinforced during the night by the 1st Life Guards and Royal Westminster and 3rd Surrey Militia, advanced at 6 a.m. to the attack. The Southern force, hearing of the reinforcement, took up a defensive position near its outpost line, but, beaten back by superior numbers, it eventually retired on Aldershot. Colonel Williams, R.A., and Colonel Sir Howard Elphinstone, R.E., V.C., K.C.B., C.M.G., were umpires for the Northern and Southern forces respectively, each being aided by a staff of assistants. As far as military instruction is concerned, next week will be an off week at the Camp. The annual musketry course will be suspended at the Cæsar's Camp ranges during the entire week. On Tuesday night will be held the grand farewell ball to Sir Daniel and Lady Lysons, preparations for which, under the able management of Lieutenant-Colonel Sartorius, V.C., are being made on a scale worthy of those in whose honour the ball is given. On Wednesday, the Annual Divisional Flat and Hurdle Races will take place on the ground between the two Camps. Six races are on the programme, and the entries are equal to those of former years. This year, the arrangements of the course have been much altered for the better, thanks to the hon. secretary, Colonel Toogood. The whole of the course can now be seen from the grand stand. On Thursday, Friday, and Saturday, the Fifth Annual Army Rifle Meeting will take place at the Cæsar's Camp ranges, when prizes to the value of £500 will be shot for. General Sir Daniel Lysons has intimated to commanding officers, during the week, that he finds the system of regiments parading varies considerably in the Division, some regiments requiring only about 15 minutes and others 30, and even up to 45 minutes, on their private parades before the regiment is finally formed ready to march off to the brigade parade. Sir Daniel considers that when troops are going out to a field-day or a march, 15 minutes on the regimental parade-ground, including the "Staff parade," is quite sufficient, and that men should not, on any account, be kept on that parade longer. Whatever the order of the parade may be, it is not possible to make any change in a man's equipment at such a time, and if anything is wrong he should be paraded again, otherwise good and smart men are kept standing on parade waiting for the careless or slovenly soldiers. The General Commanding does not, however, wish in any way to interfere with the regimental parades which a commanding officer may think proper to have, or order, to inspect the clothing or equipment of his men, or for any other regimental purpose. The above is further evidence, if such were necessary, of the watchful care of the veteran commander at Aldershot, whose constant solicitude for the comfort and well-being of those under his command is well known to [all. Sir Daniel is an exceedingly popular General Commanding, and particularly so among the rank and file—such a commander as men would go anywhere with and do anything for. It is a matter much to be regretted that the rules of the service compel the premature retirement of a General officer of such great experience, vigour of mind, and active habits. With reference to the foregoing remarks on unnecessary parades, it may be mentioned here that a certain battalion commander at Aldershot has an unpleasant custom of inflicting on his jaded men, on return to the regimental parade-ground from a divisional field-day, a short series of minor operations, previous to dismissing them to their huts. Notwithstanding habits of discipline, this "bad quarter of an hour" is the cause of much strong language in the ranks, not loud, but deep, and which, under the circumstances, can scarcely be wondered at. The Riding Troop from the Royal Military College arrived here during the week for musketry practice, and is attached to the Cavalry Brigade. Captain E. G. Bennet, 48th Foot, took up the duties temporarily of Inspector of Army Signalling on Monday last, during the absence of Captain A. Davidson, 60th Rifles, who will be unable to perform the duties for some months, having sustained serious injuries to his spine by being thrown from his horse. The Pontoon Troop, R.E., will proceed to Egham (as at present arranged) during the ensuing month, for the purpose of carrying on bridging operations there. Inspecting Veterinary-Surgeon T. P. Gudgin has been granted leave of absence to September 10 next, during which period his duties will be performed by Veterinary-Surgeon Hinge, R.E. The Royal Westminster Militia, about 800 of all ranks, will leave Camp to-day (Saturday) for Hounslow, on completion of annual training. The Roscommon Militia, 400 strong, will leave Camp on Tuesday next, *en route* to Boyle, on completion of annual training. Surgeon-Major Pollock, A.M.D., has assumed medical charge of the officers, women, and children, Permanent Barracks, vice Surgeon-Major Macnamara, M.D., under orders for Egypt. Surgeon-Major Briggs has assumed medical charge of the Cavalry Brigade.

ROYAL HIBERNIAN MILITARY SCHOOL.

On Thursday, July 12, the Crimean Banquet Fund prizes for 1883 were distributed to the successful competitors by Gen. Sir Thomas Steele, K.C.B., Commander of the Forces in Ireland. The Crimean Banquet Fund prizes originated in a sum subscribed by the people of Ireland for the purpose of entertaining the soldiers of the Army returning from the Crimea in 1856. After a sumptuous banquet, of which 4,000 non-commissioned and men partook, a balance of upwards of £1,000 remained, which amount was invested for the benefit of the boys of the Royal Hibernian Military School. £30, part of the interest of this sum, is annually distributed in prizes of various amounts, from £5 to £1, the money being placed in the Savings' Bank for the benefit of the boy on his leaving the school. The prizes were distributed in the dining-hall, which was tastefully decorated for the occasion. In addressing Sir Thomas Steele, Col. Hill, Commandant of the School, said that of 1,013 boys educated at the school and now serving in the Army, 23 had been promoted to commissions, 28 were warrant officers, 11 were schoolmasters, 12 were bandmasters, 595 only, including boys and musicians, remained in the position of private soldiers. Of the total number, the recorded characters of 977 were "very good" or "good," 9 "bad," 2 only being "very bad." The conduct of the boys during the past year has been very satisfactory, and the reports of the examiners at the recent examinations are very creditable, both to the boys and to the masters and instructors in the various subjects of examination. The prize-winners having been called up, Col. Hill thanked Sir Thomas Steele, in their names and in behalf of all connected with the school, for the honour he had conferred upon them in his distribution of the prizes, and he also thanked Lady Steele and the ladies and gentlemen present for their attendance. Sir Thomas Steele replied :—"Col. Hill,—It gave me great pleasure indeed to come here to-day, and to receive such a satisfactory account of the school. I am very glad to have this opportunity of saying that it reflects the greatest credit on yourself and on those acting under you that you have brought the school to the highly creditable state in which it is now." The boys then formed on parade, and were put through a number of movements by Serjt.-Major Lindsay. The steadiness and precision with which the drill was performed was remarkable, and elicited high praise from Sir Thomas Steele, who complimented Serjt.-Major Lindsay on the result of his training in drill, saying he "wished all our regiments were as steady on parade as the boys of the Royal Hibernian Military School." The gun-drill was also most steadily gone through, and with smartness creditable alike to the boys and to the instructor, Serjt. Watson. The day, which had been dull and showery in the morning, changed to a bright and warm afternoon. The excellent band of the school played several selections, under the able bandmaster, Mr. Bailey, and the many visitors present had no reason to regret their coming.

THE NAVY.

Last Monday night was essentially a "Naval night" in Parliament, when Commander Price, M.P., did good service in calling attention to the increase of insubordination in the Navy since corporal punishment was abolished; but we do not think that either the Admiralty or the public will be convinced yet awhile that flogging is necessary to the due maintenance of discipline in her Majesty's service, by such assertions as that of Sir John Hay, "that the Admiralty would fail in their duty if they did not give authority to courts-martial to inflict the only punishment for crimes that were a disgrace to the service, which would bring criminals to their senses, and would preserve valuable men to the Navy." We fail to see how "criminals" who commit "crimes" which are "a disgrace to service" can, by any stretch of imagination, be termed "valuable men," or be considered worthy of being "preserved." It is just for the backs of such worthies that we would like to see a rod kept in pickle, as we feel assured that the lash is the only deterrent with such natures. They fear no imprisonment. Some of them rather like it, and most assuredly prefer it to a service in which they may be called upon, not only to risk their skins, but their lives. It is not the "criminal characters" of the Navy who are hardly used by the abolition of corporal punishment, but the really good, honest seaman, who, under provocation of one sort or another, such as the incessant nagging of an irate superior, and in the heat of the moment, or of an extra glass of grog, may forget himself, and become liable to a punishment which leaves its stigma on him in after-life by branding him as the associate of felons. As Commander Price most justly observed, the Admiralty must look the facts of the case in the face; and the facts are that in ten years since 1870, there have been 695 cases of striking superior officers, and that the yearly average thus established has been on the increase during the last three years. Other offences have also largely increased, and 78 men have been sentenced to various terms of penal servitude, many of them young men of previous good character. It may, of course, be said that in such cases the officers forming the court should not pass so severe a sentence. But those who venture on such an expression of opinion know nothing of the service. When a court-martial is assembled, the officers composing that court are sworn to faithfully and impartially administer the written law of the Navy; and it is with that law, and not with those called upon to administer it, that fault should be found. Hence we are glad to see Commander Price lending his aid to the cause of good order, discipline, and sensible reform in the Navy; and we can assure the Admiralty that few measures would be more popular on the lower deck of our men-of-war than the reimposition of corporal punishment, within certain narrow and well-defined limits, in lieu of penal servitude, as now enforced in cases for which flogging would act as a more efficacious deterrent. Commander Price also referred to the Steam Branch of the service, with regard to which little or nothing had been done. He desired to mention the Circular issued recently to the engine-room artificers, and hoped he should receive an answer with reference to the replies received by the Admiralty to the proposals made by it. It was quite possible that all the answers might not have been received, but he wished to know whether it was not a fact that out of 600 answers only 11 had accepted its terms, and those were men holding comfortable berths, who did not wish to risk them. At first sight, the scheme appeared an inviting one, for it offered an increase of pay of 3d. a day to those who entered the service. On the other hand, the first rise was delayed for two years, and it would be found that the total increase throughout the whole period of service amounted only to £3 6s. 8d., while the men became subject to the liability of being disrated, a penalty which before they had always escaped. Again, he thought the men unfairly used by the inadequacy of the allowance made to them when they did not take up their rations. The value of the ration was 11½d., and the amount of allowance was 6d. It was part of the contract with the men that they should have full rations, if they chose to take them up, and the cost to the Admiralty would be very much greater, not only on that head, but in respect of freight and storage also. The Admiralty saved between £60,000 and £70,000 a year, and it had been proposed that this should be devoted to a pension fund for the widows of seamen; but, however it might be disposed of, it was clear that the men should not lose the amount. Sir John Hay followed, urging the Committee to insist on flogging being reimposed in the Navy as a punishment for the grave offence of striking a superior officer, but we would suggest that the superior officer in such cases should be legally justified in using his side-arms, and in summarily dealing with his aggressor, as is the custom in the Navies of Continental Powers. The offence would then be instantaneously stamped out. Sir H. Wolff drew attention to the grievances of warrant officers and engineer artificers. The warrant officers had published a pamphlet, in which they set forth the grievances of their class. They were nine in number, the more important of them being that sea-going pay was not given to warrant officers detained in harbour; that they desired a more distinctive mark with regard to uniform; and the question of the Greenwich pensions. The engineer artificers also had grievances of which they reasonably complained, and one of them was likewise in regard to uniform, and he hoped that as some of those grievances could be remedied without much expense to the country, the Admiralty would favourably consider the representations made to them. Mr. P. Rylands, while admitting that the present state of things in the Navy was unsatisfactory as regarded the question of flogging, thought that the Government could take no further steps in the matter until they had been able to ascertain the opinion of Parliament on the question. The object should be to raise the personal character of the Navy not so much by means of punishment, as by the withdrawal of temptation to excess. He also desired to draw attention to the system of victualling our ships, which had enabled numberless frauds to be committed. He concurred in the suggestion that an officer of experience and judgment should be sent from time to time on board the ships, in order to examine and check the books relating to rations. In his opinion, the report made on questions of this kind ought to be laid upon the table, in order that the House might know all the steps that the Admiralty were taking to prevent abuses and secure economy. Mr. Puleston followed in the same strain; while Mr. Jenkins was glad that flogging had once for all been abolished in the Navy. But then Mr. Jenkins, when talking about the officers of the Navy being able to prevent insubordination, by developing "a kindly and sympathetic spirit" towards the men, clearly demonstrated that he knew nothing whatever of the subject he took upon himself to discuss. Certainly, Mr. Jenkins would not long maintain discipline among any body of men. He would be the first to set an example of insubordination if a subordinate, and to breed mutiny if in command. The late First Lord of the Admiralty, Mr. W. H. Smith, would not take upon himself the responsibility of abolishing corporal punishment in the Navy, as he observed that from the returns which have been presented, the men sentenced to penal servitude and made to herd with felons for simple breaches of discipline had previously borne characters returned as "fair," "good," and in many instances "very good." These men had been treated as criminals, and had been ruined, when a simple flogging, for which they would have been thought none the worse of by their shipmates, would have answered all the purposes of each case. The Parliamentary Secretary of the Admiralty answered all these criticisms of the policy of the present Board with, we may say, a simple promise to look into the matter, provided honourable Members would leave him alone, and vote the supplies required by the Admiralty. He declined to produce the report of Messrs. Martin and Laycock, published in these columns, on the ground that it was a confidential document, and was thereupon accused by the Member for Burnley of trying to hoodwink the Committee, while Members on the Conservative benches accused the Admiralty of endeavouring to hush up the disclosures made in the columns of the *Army and Navy Gazette*. To this Mr. Campbell-Bannerman replied that:—"The document which he had been asked to lay upon the table was a report made by an officer of the Admiralty and a gentleman acting in a legal capacity under the Admiralty, who were asked to inquire into the matter. These gentlemen furnished a report, which he regretted had appeared bodily in the *Army and Navy Gazette*, but how that newspaper obtained possession of a document known to be confidential, he could not say. The only objection they had to produce the report was that, in the first place, these gentlemen would have been much more careful if they had known the report was to be made public; and in the second place, it was very undesirable it should be made public until the Admiralty had taken action upon it. The first thing the Admiralty had done, on receiving in that report a very full account of this complicated matter, was to request the Accountant-General of the Navy to go down to the several seaports, and inform them of what changes of system he would propose. That report, which had only been received a few days, was of a very important character, and was under their consideration. He quite agreed that in this matter they must look in future rather to a more rigid system of inspection than to a more continuous or elaborate system of check." Then, referring to the various classes whose claims to consideration have been so justly advanced in these columns, the Parliamentary Secretary of the Admiralty made the following official announcement:—"He was unable to give a promise that any change would be made in the case of the Naval engineers. Their case, however, would be very carefully looked into. With regard to the engine-room artificers, it was scarcely to be expected that the Government would reopen a question that had been so recently settled after due deliberation, especially in the face of the awkward fact that the Government could, under the present conditions, get as many good men of their class as they required. He made that remark, not with the view of speaking hardly of the men, but to show that there was no great prospect of a change being made in their favour at the present moment. The general question of the petty officers and of the warrant officers was being specially looked into by the Admiralty." We congratulate the Warrant Officers, and hope the Admiralty will expedite the "looking into" process. Mr. Ashmead-Bartlett—who occupies his time in the House of Commons chiefly in watching the foreign policy of the Government, being apparently desirous of proving by his criticisms thereof that he would blossom into a better Secretary of State for Foreign Affairs than any of his predecessors—next moved to reduce the Vote of £187,387 for the Admiralty by £1,000, the salary of the First Lord, who, in the opinion of Mr. Ashmead-Bartlett, "had grossly neglected his duty, in not providing a squadron which might have prevented the recent deplorable occurrences in Madagascar." Mr. Campbell-Bannerman pointed out that the strength of our Fleet in the East Indies was a question affecting the policy of the Government, for which Lord Northbrook was not responsible, when the motion was wisely withdrawn. Nevertheless, it is a fact that the Squadron at the disposal of Rear-Admiral Sir William Hewett, V.C., is lamentably deficient in fighting efficiency. On the Vote to complete the sum for the Naval Reserves, Lord Henry Lennox called attention to the recommendations contained in the Report of H.R.H. the Duke of Edinburgh, on vacating the command of that force, and advocated an increase of the 2nd class. Sir Thomas Brassey, in reply, stated that the whole question was under the consideration of a Departmental Committee, presided over by Captain Tryon. Their labours were far from complete, but, without going into details, he was able to give, as a general result, the following figures:—To man the ships now in commission, 27,000 seamen and 4,800 marines were required. To man the ships which could be commissioned in three months, they required 16,000 more seamen and 2,600 marines. To man the additional ships which could be commissioned in twelve months, they required 10,000 more seamen and 1,500 marines. These numbers provided for an ample proportion of gunboats, torpedo boats, and armed mercantile vessels. The total force that could be embarked was 53,000 seamen and 9,000 marines. Having stated their requirements, let them see how they stood to meet such a demand. According to the latest returns, they had serving in the Fleet 31,000 men; in the Coastguard, 4,000; in the Naval Reserve, 17,000; Seamen Pensioners' Reserve, 1,700; Volunteers available for harbour defence, 1,400; Marines, 12,200. In addition, they had 4,000 pensioners under 50 years. The total force, therefore, was 72,000, or 10,000 in excess of extreme requirements on the outbreak of war. Many of the ships included in the list as available for commission were scarcely to be reckoned as fighting ships. For those ships it would not be necessary to provide crews with the high training which we gave to those of our men-of-war; for the command and the manning of such vessels they might safely rely on the mercantile marine. Mr. Gorst then moved the reduction of the vote for the scientific branch of the Navy by £9,181, the cost of the maintenance of the Britannia, as he considered that ship in a most discreditable state as a school. The cost for each cadet was £280 a year, of which the country paid £210, and yet no school could be in a worse state. The Britannia was maintained out of the taxes of the country, and it was the duty of the House of Commons to see that the money was properly spent. It was because of the contempt with which the Admiralty had regarded the judgment and the wishes of the House that he again brought the subject forward; and he now asked the Secretary of the Admiralty to state whether the schools were in a more efficient state than they were two years ago, whether the reports of the examiners would be laid on the table, and, if not, whether they were favourable or unfavourable. Another point raised in connection with this question was the tender age at which we entered officers, and the opinions of honourable Members on this matter also had been treated with summary contempt by the Admiralty. In the navies of other countries, officers were not appointed under 17 or 18 years of age, and we ourselves carried out that principle in relation to the Army. He asked whether the same course could not be applied to the Navy, and concluded by moving the reduction of the vote. Commander Price supported the motion, arguing that Naval cadets should be educated at the expense of their parents, and not at that of the country, and that they should receive all the education they could obtain as gentlemen, before becoming officers. If they first went to sea at 16, and subsequently spent two years at the Royal Naval College, they would become more efficient officers. Sir John Hay, amongst other Members, supported the motion, contending that it would be far better for the service, if young officers did not join it before they had attained the age of 17 or 18. Mr. Campbell-Bannerman scarcely knew what answer to give to the honourable and learned gentleman, because whatever he said might be taken as a fresh instance of the sovereign contempt with which the honourable and learned Member said the Admiralty were in the habit of treating the House of Commons. As regarded the early age at which Naval cadets were admitted into the Navy, the majority of those who were acquainted with the subject strongly approved of the system. He agreed that the school on board the Britannia should be subject to an independent examination, and he would lay the suggestion before his colleagues. Mr. W. H. Smith, on this assurance, appealed to Mr. Gorst to withdraw, as did also Sir H. Wolff, and the amendment was consequently withdrawn; but we sincerely hope that next year Mr. Gorst, or some other honourable Member, will press this important motion to a division, and continue bringing it forward until the Britannia, an institution now without a *raison d'être*, is abolished, and one or more sea-going training-ships established in her stead, so that Executive officers may join ships on active service as ward-room officers, and the gun-room mess, as now established, be superseded by a general mess, in which all commissioned officers shall meet, when off duty, on equal terms, as in the Army. On the Dockyard Vote coming on, Captain Price wished to be informed whether the Admiralty would lay the Report of the Committee on Naval Design and Construction on the table of the House, or whether that Report, like sundry others already mentioned, would be considered of a confidential nature; and, he might have added, be left to the *Army and Navy Gazette* to make public. Mr. Campbell-Bannerman evidently understood the point, and promised to issue the Report in question. Mr. Henry Broadhurst then drew attention to the absurdity of the Admiralty employing shipwrights to do the work of engineer fitters. He wished to ask if the Secretary to the Admiralty would continue to assert in the House and to the country that they were capable of producing in one person the art of three distinct trades when other employers had utterly failed to do anything of the kind. Mr. Gourley then rose to move the reduction of the vote by £12,000, as, in the opinion of this hon. Member, the amount being spent on the maintenance of the Royal yachts is excessive. The Victoria and Albert, her past cost and her present repairs, gave rise to a lively discussion, but in the end, the Committee divided, negativing the motion by 113 to 40, it being pretty generally understood that her Majesty prefers the Victoria and Albert, from past associations, to any yacht it is now within the power of man to design or construct. Under these circumstances, it is to be hoped that we shall hear no more cavilling at the expense of repairing that yacht. If only for "auld lang syne," let us prize the Victoria and Albert. It seems strange, however, that in matters affecting the welfare of the service, honourable Members were but too ready to withdraw their amendments when pressed to do so by Mr. W. H. Smith, either on the score of expediency or otherwise, but that no amount of pressure could induce the clique, having Mr. Gourley at its head and Mr. Labouchere at its tail, to withdraw a motion which, whether carried or not, could but give pain to their Sovereign. These gentlemen evidently care very little about the welfare and efficiency of the Navy, and only utilise Supply nights to air their levelling, cosmopolitan,—we had almost said disloyal,—crotchets. Mr. Campbell-Bannerman then adverted to the grievances of Dockyard men, and assured Mr. Gorst that the subject was receiving the attention of the Admiralty, and he hoped soon to be able to announce the decision of their Lordships. With regard to the Dockyard fitters, who had been mentioned by the honourable Member for Stoke, he found that the work of the fitters and shipwrights was now all but identical, and it had been resolved, therefore, that fitters should serve part of their apprenticeship with the shipwrights, and the shipwrights with the fitters. The great desire of the Admiralty was to endeavour to put an end to a distinction which practically existed no longer. Mr. Rylands, impatient, as usual, of all control, would abolish Dockyards, and place the Navy at the mercy of private contractors. He compared the cost of Government work with that executed by private firms, and argued that great economy would result from employing the latter instead of keeping open our Dockyards. We presume that all the wire used in the Navy should, in the honourable Member's opinion, come from Warrington. Probably it does not, at present. Mr. W. H. Smith was afraid that the true reason of the increase in the Naval Estimates was due to the increased cost of the instruments of warfare. He regretted that so important a question as that involved in the Vote should have to be discussed to empty benches during the small hours of the morning. He wished to know what the policy of the Government was with regard to the ships on which the country would have to rely in the event of war. With regard to those ships which were awaiting repair in the dockyards, he held that if any of them were not intended to be used, they ought at once to be removed from the list of the vessels on which we could rely in case of war. A vessel was a paper vessel if she was incapable of leaving the dockyard and taking her place in the line of battle. There were many ships of that kind in our dockyards at the present moment—the Black Prince, the Iron Duke, the Resistance, the Triumph, and others. Several vessels, again, must be greatly repaired if they were ever to serve us in an emergency, and a Government that should delay to repair them would incur very grave responsibility. Unarmoured ships ought likewise to be repaired, when repairs were needed, for vessels of that description were most valuable as cruisers and training-ships in time of peace. He held that they were the best ships to use in ordinary times, and that our line-of-battle ships should be reserved for a time of war. A member of the Government stated not long ago that our Fleet ought to be superior to the fleet of any other nation, and to be ready to discharge any duties which it might be required to perform. Now, what were the duties which our Fleet was called upon to discharge? We had to keep a squadron in the North-American seas, in the Pacific, in the China seas, in the East-Indian seas, on the West and East Coast of Africa, at the Cape of Good Hope, and in the Australian seas, the Mediterranean Fleet, the Channel Fleet, and the Reserve Fleet for coast defence. Considering the protection of commerce at sea, and the progress made by foreign navies during the last three or four years, he felt that the strength of the Navy at the present time was not adequate to the duties that might be required of it, not adequate to the safety of the country; and the responsibility of the Government was a grave and a serious one. The Estimates must be increased, unless some other means could be found of providing ships. He did not see how the general Naval Estimates could be reduced, so as to admit of a larger amount being devoted to shipbuilding. If we had no resource in the Merchant Navy, our position would be serious; but we could not rely wholly upon merchant ships, which it would take months to equip, and the merchant ships would not be available as against armoured ships or protected cruisers. Further provision than had been made was necessary in present circumstances. Mr. Puleston, Sir Massey Lopes, and Sir John Hay supported the views of the late First Lord of the Admiralty, and in reply, the Parliamentary Secretary of the Admiralty stated that the Benbow would carry two 100-ton guns, like those recently tried at Spezzia. He was surprised to hear his right hon. friend advocate increased expenditure, seeing that he had not made any such suggestion when the shipbuilding policy of the Government was discussed in May. If the Navy were deficient now, it was because the late Government had not provided for the building of more ships. We had, however, 25 ironclads in commission, and eight more in reserve, which was almost equivalent to the combined Naval forces of France, Italy, Russia, and Germany. His hon. and gallant friend proposed that a dozen more ironclads should be laid down at once, and should be gradually proceeded with, but that was a method of building which experience had shown to be very extravagant. The most economical plan was to lay the ship down, and complete it as soon as possible. With regard to particular ships, no decision had yet been come to as to the Resistance and the Black Prince, the case of certain other ships being more urgent. The repairs of the Iron Duke were in a forward state, and the Thunderer was nearly completed. Thus attacked, Mr. W. H. Smith made haste to assure the House that he knew it took five years to build an ironclad, and that his remarks had reference to the progress of ships now being built in this and other countries. He made no complaint whatever, but only wished to emphasise the responsibility of the Government in this respect, and he once more showed himself most zealous in assisting Mr. Campbell-Bannerman in getting his Votes through the Committee, until progress was reported, and the House adjourned at 3 in the morning, after a somewhat unusually lengthy Naval wrangle. No wonder the Admiralty treat Parliament with "sovereign contempt," as stated to be the case by Mr. Gorst. To us it is much more astonishing that any answer at all is vouchsafed to Naval questions, considering the supreme indifference manifested by the House of Commons when matters of vital interest to the Navy, and consequently to the country, are under discussion. At such times the House is empty, and those few Members who do take an interest in the service have to address themselves to long rows of empty benches.

An extract from the opinion of Mr. Kekewich, Q.C., on the sentence passed by court-martial on Commander Maxwell Heron has been circulated among Members of Parliament, and Captain Maxwell Heron, M.P., will bring the whole question of the Clyde scandal before the House, when it next goes into Committee of Supply on the Navy Estimates. The opinion of Mr. Arthur Kekewich, Q.C., is as follows:—

> "I think that the character and position of the witnesses are matters of the first importance in such a case as this, and that the court did not pay sufficient attention to them. Even if there were no disposition on the part of the other witnesses to make the most of what they had to say against the accused (which cannot, I think, be lightly assumed), there were two, and those the most important of all, whose evidence ought to have been received with suspicion, and to have been submitted to the strictest criticism. The witness Hadden had a distinct grievance against Commander Heron. Not only had his charge against others been rejected, but he himself had been made the subject of punishment which must have been bitterly felt. He really occupied the position of prosecutor in a case in which he was personally interested, and his evidence ought to have been treated on this footing. I find no trace of this having been done. The evidence of the witness Fitzgerald deserved to be treated still more strictly. He obviously was the person against whom Hadden's charges were originally made. He was the officer on whom Commander Heron had relied. He was directly implicated in many of the charges made against Commander Heron, in such a manner that it was his interest to shield himself by attacking his superior officer, and he gave his evidence under the influence of a caution (with which no fault can be found) not to criminate himself. It is too much to say that such a witness ought not to be believed, for that would amount to saying that he ought not to have been called, but in my opinion he ought to have been examined most carefully. Leading questions ought to have been avoided, his evidence ought to have been severely tested in every possible way, and no credence ought to have been given to it except where corroborated by the clear evidence of other witnesses, or the undoubted facts of the case. My conclusion, from a careful perusal of the notes of evidence, is that this was not done, and that the verdict of the court must, as regards many of the charges, be the result of treating Fitzgerald as a witness worthy of independent credit. For these reasons, I think that Commander Heron may fairly say that justice has not been done to him, and that the charges and evidence against him ought to be submitted to another tribunal."

Reviews.

Cruising in Many Waters. By John W. Dorville, Vice-Admiral. (Griffith and Farran.)

This really interesting little book of travels is remarkably well suited for the author's purposes. His primary object, no doubt, is that of creating an interest in a most deserving charity, "The Egyptian War Fund;" his secondary object, that of recalling happy memories of times gone by, when all the whole world lay before him. He has during his years of travel seen much, and is evidently naturally gifted with a facility of describing what he saw, such as does not belong to many. In 1828, the author entered the service as first-class volunteer on board the Samarang, 28 guns, then fitting-out at Woolwich for the Mediterranean station. At that time, the Duke of Clarence was Lord High Admiral, with his flag on the Royal William yacht, and Sir Thomas Hardy was Nelson's flag captain. During the author's stirring career, he served in some department or other upon no fewer than thirteen of her Majesty's ships, and in each instance relates some interesting facts connected with them, which he himself took part in, or which he heard of from others. The following description of what occurred at the Island of Scio will rather startle some readers:—

> "A day was passed at Scio. This town was completely destroyed, and most of its inhabitants massacred by the Turks in 1822. Soon after a few English people landed from a yacht, and on looking about the ruins thought they heard the cry of an infant. Further search led them to a copper by a fireplace. On lifting the lid off, a female child was discovered; no doubt put there by its parents at the last moment in hopes of its being saved. With tender care she was carried on board the yacht, and there being a goat on board she was fed with milk, restored to health, adopted by the kind finders, Mr. and Mrs. Freere, who had no children of their own, brought up, educated, and when married years after was given £10,000 as her portion. I often saw her at the opera in Malta, where she attracted much notice."

In the author's opinion, the bane of the Naval profession is slowness in promotion. Many schemes have been adopted to remedy this evil, and it was a wise determination not to keep young fellows toiling on so long before giving them their first step, that of Lieutenant,—"Another immense advantage was the doing away with interest and allowing merit to have its chance." *Cruising in Many Waters* contains a great deal of matter interesting to all readers, but more particularly to youths who have a natural predilection for the sea and everything connected with it.

The Edinburgh Review.—With the exception of a short article on "The French in Anam and Tonquin," there is an entire absence of any military element in the current number of the *Edinburgh Review*. One of the papers, entitled, "The Ancient Mediæval and Modern Stage," will in all probability be read with interest, at a moment when the "Stage" seems to be in the zenith of its glory, under, no doubt, the combined exertions of Miss Terry and Mr. Irving. Not more than forty years ago, the immediate present and the prospective future of the stage were at a low ebb indeed, the tide of popularity which flowed so freely some dozen years previously appeared to have exhausted itself. It is somewhat amusing to speculate on what the feelings of the principal members of the profession who "strove for a living" at that period would be if they could awake, look up, and see the Lord Chief Justice of England, supported by a goodly number of his Peers, occupy the chair at a noble banquet given in honour of a stage-player; or again, if the fact was imparted to them that £800 to £1,000 per night was considered as scarcely excessive for one *prima donna* to receive; or, again, if they could be made to understand that the theatres springing up in the metropolis are almost countless, and that in each of them the stalls are nightly occupied at a most costly price. Mr. Percy Fitzgerald has given some valuable contributions to literature in his new history of "The English Stage." In the article in the *Edinburgh* of the present month, the writer concludes with two interesting anecdotes, one regarding the incomparable "Rachel," the other telling of the scarcely less famous Mdlle. Aimée Désclée. "Asseyez-vous, Mademoiselle," said the Emperor Nicholas to Rachel, after she had thrown several crowned heads and a crowd of serene highnesses into extasy at Potsdam. She had risen to meet the great Czar, one of the most imperial and chivalresque figures that ever wore an order, but he declined the homage, he came to pay it. "Asseyez-vous," he said, "les royautés comme la mienne passent, la royauté de l'art ne passe pas." This, from him of All the Russias to her, the little Jewish girl, who had risen from the lowest to the highest round of the histrionic ladder, as a singer for stray sous at a café chantant, in Paris! An accomplished lady now no more was so moved by admiration for Mdlle. Desclée, that she resolved to call on her. Such an incident had never occurred to Desclée before in the course of her existence. She was extremely touched by it, and after having received her visitor with every mark of respect, she said to her, as they parted, "Voudriez-vous me permettre, Mademoiselle, pe vous embrasser?" She felt, perhaps, for the first time, the sisterhood of human kindness.

STIMULANTS and insufficient amount of exercise frequently derange the liver. Eno's Fruit Salt is peculiarly adapted for any constitutional weakness of the liver. A world of woes is avoided by those who keep and use Eno's Fruit Salt.—"All our customers for Eno's Fruit Salt would not be without it upon any consideration, they having received so much benefit from it.—Wood Brothers, Chemists, Jersey, 1878." CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the capsule is marked "Eno's Fruit Salt." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages, how to Prevent Disease. Prepared only at Eno's Fruit Salt Works, Hatcham, London, S.E., by J. C. Eno's Patent.

The Gazettes.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 17, 1883.

5th Dragoon Guards—Her Majesty has been pleased to approve of the following notification being substituted for that which appeared in the *Gazette* of Feb. 21, 1882, relative to Lieut. F. E. F. Polhill-Turner:—Lieut. F. E. F. Polhill-Turner resigns his commission (Feb. 22, 1882).

12th Lancers—Supernumerary Capt. W. Colquhoun to be Capt., vice G. H. Dean, seconded (April 6).

15th Hussars—Regimental Serjt.-Major James William Humphrey to be Qrmr., vice S. H. Staniland, retired (July 18).

Grenadier Guards—Supernumerary Lieut. the Hon. C. R. W. Colville (Master of Colville) to be Lieut., vice J. T., Lord Manners, resigned (July 14).

LINE BATTALIONS.

The Royal Warwickshire Regiment—Capt. E. A. Ball to be Major, vice N. F. Mansergh, deceased (April 10).

The Royal Fusiliers (City of London Regiment)—Lieut. J. G. King, from the Queen's (Royal West Surrey Regt.), to be Lieut., vice W. H. S. Heron-Maxwell, promoted.

The Lancashire Fusiliers—Lieut. R. B. Nedham has been appointed a probationer for the Indian S.C. (May 7).

The King's Own Borderers—Lieut.-Col. N. C. Ramsay has been appointed to command a batn.; Major G. T. L. Carwithen to be Lieut.-Col., vice Col. A. S. Cameron, V.C., placed on half-pay; Supernumerary Major R. T. Higgins to be Major, vice G. T. L. Carwithen (all three dated June 27).

The East Surrey Regiment—Qrmr.-Serjt. James Harrison to be Qrmr., vice W. L. Proudfoot, posted to the 4th Batn.

The King's Own Light Infantry (South Yorkshire Regiment)—Lieut.-Col. N. Huskisson has been appointed to command a batn.; Major J. D. Gregson to be Lieut.-Col., vice W. S. Daniell, retired (both dated July 4).

The Duke of Cambridge's Own (Middlesex Regiment)—Serjt.-Major William Fitzpatrick to be Qrmr., vice T. H. Weatherhead, resigned.

The Duke of Edinburgh's (Wiltshire Regiment)—Serjt.-Major Samuel White, from the Grenadier Guards, to be Qrmr., vice C. Chard, posted to the 3rd Batn.

The Prince of Wales's (North Staffordshire Regiment)—Lieut.-Col. J. L. Watt has been appointed to command a batn.; Major J. W. Keogh to be Lieut.-Col., vice C. H. Sams, deceased; Capt. E. R. S. Richardson to be Major, vice J. W. Keogh (all three dated June 17).

The Highland Light Infantry—Capt. H. E. Lacon retires from the service receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

Princess Louise's (Argyll and Sutherland Highlanders)—Lieut.-Col. H. G. Robley has been appointed to command a batn. (June 27).

Commissariat and Transport Staff—Deputy-Assist.-Comy.-Gen. W. T. Whitehead to be Assist.-Comy.-Gen., vice E. C. Saunders, promoted (July 1).

MEDICAL DEPARTMENT.

Deputy-Surgs.-Gen. J. Irvine, M.D., to be Surg.-Gen., vice J. E. Clutterbuck, granted retired pay (June 1); J. Lamprey, M.B., to be Surg.-Gen., vice J. A. Woolfryes, M.B., C.B., C.M.G., granted retired pay (June 14).

Brig.-Surgs. T. Tarrant to be Deputy-Surg.-Gen, vice J. Irvine, M.D. (June 1); A. D. Gulland, M.D., to be Deputy-Surg.-Gen., vice J. Lamprey, M.B. (June 14).

Surgs.-Major J. Warren to be Brig.-Surg., vice T. Tarrant (June 1); W. Tanner to be Brig.-Surg., vice A. D. Gulland, M.D. (June 14); W. Sly to be Brig.-Surg., vice B. T. Giraud, M.D., granted retired pay (June 20).

Ordnance Store Department—Qrmr. W. S. Cox to have the hon. rank of Capt., in recognition of his services during the late Zulu and Sekukuni campaigns.

Army Pay Department—Pymr. and Hon. Major J. W. McFarlan, 9th Lancers, has been placed on retired pay, with the hon. rank of Lieut.-Col. (July 16).

MEMORANDA.

Major and Col. C. V. N. Pole, half-pay, Fort Major, North Britain, has been placed on retired pay, with the hon. rank of Major-Gen. (July 1).

Cols.-Comdt. H. W. Mawbey, retired Royal Marine Artillery, to have the hon. rank of Major-Gen. (July 3); W. H. W. Bennett, retired Royal Marine Light Infantry, to have the hon. rank of Major-Gen. (July 4).

The under-mentioned Lieut.-Cols. of the Royal Marine Light Infantry to be Cols.:—J. F. Sanders (June 21), and C. B. Nurse (July 5).

Qrmr. and Hon. Capt. W. H. Herring, retired Royal Marine Light Infantry, to have the hon. rank of Major (July 4).

The under-mentioned Deputy-Assist.-Comies. and Hon. Lieuts., late Bengal Establishment, to have the hon. rank of Capt. on retirement:—W. Willson (Dec. 1, 1881), and G. S. Beckett (Sept. 15, 1882).

INDIA OFFICE, July 17, 1883.

The Queen has approved of the following admissions to the Staff Corps made by the Governments in India:—

BENGAL STAFF CORPS.

To be Lieutenants:—Lieuts. E. L. Hight, from the Hampshire Regt. (dated July 29, 1881, but to rank from Aug. 18, 1879); C. Le G. Justice, from the Wiltshire Regt. (dated June 16, 1880, but to rank from March 13, 1880); E. J. Medley, from the Suffolk Regt. (dated March 10, 1882, but to rank from May 28, 1880); B. W. Cracroft, from the North Lancashire Regt. (dated March 13, 1882, but to rank from Dec. 1, 1880); C. G. F. Edwards, from the Dorsetshire Regt. (dated Nov. 6, 1881, but to rank from Dec. 18, 1880); D. C. F. Macintyre, from the Seaforth Highlanders (dated Jan. 1, 1882, but to rank from July 1, 1881); and C. H. Billings, from the East Lancashire Regt. (dated March 6, 1882, but to rank from July 1, 1881).

MADRAS STAFF CORPS.

To be Lieutenants:—Lieuts. H. Lawson, from the 1st West India Regt. (dated March 15, 1880, but to rank from Aug. 12, 1875), and W. W. V. Pakenham, from the Royal Scots (dated April 9, 1880, but to rank from Nov. 13, 1878).

BOMBAY STAFF CORPS.

To be Lieutenants:—Lieut. T. R. A. G. Montgomery, from the Cheshire Regt. (dated May 2, 1880, but to rank from April 23, 1880); 2nd Lieut. P. J. H. Aplin, from the East Yorkshire Regt. (May 22, 1880); Lieuts. C. A. S. Montgomery, from the Dorsetshire Regt. (dated April 28, 1882, but to rank from June 9, 1881); A. Beale, from the Leicestershire Regt. (dated Nov. 8, 1881, but to rank from July 1, 1881).

WAR OFFICE, PALL MALL, July 17, 1883.

THE HONOURABLE ARTILLERY COMPANY OF LONDON.—The name of the gentleman appointed Lieut. in the *Gazette* of 10th inst. is T. W. Carlton, and not J. W. Carlton, as stated.

MILITIA.

WAR OFFICE, PALL MALL, July 17, 1883.

ROYAL ARTILLERY.

2nd Brigade, Welsh Division—Lieut. R. B. Robertson to be Capt.

INFANTRY.

3rd Battalion, the Buffs (East Kent Regiment)—Samuel Joseph Finiston O'Neil Murphy, gent., to be Lieut.

3rd Battalion, the Suffolk Regiment—Lieut. A. P. Mack resigns his commission.

4th Battalion, the Prince Albert's (Somersetshire Light Infantry)—Clement Phipps Tudway, gent., to be Lieut.

4th Battalion, the Princess of Wales's Own (Yorkshire Regiment)—Lieut. A. G. Pease to be Capt. (July 2).

3rd Battalion, the Royal Scots Fusiliers—Lieut. C. V. E. Bayley to be Capt. (June 28).

4th Battalion, the South Wales Borderers—Major A. A. Morshead, 1st Batn., to be Adjt., in succession to Capt. J. S. Langlands, the Oxfordshire Light Infantry, whose term of service in that appointment expires (July 20).

4th Battalion, the Worcestershire Regiment—Major R. Prescott-Decie, from 3rd Batn., to be Lieut.-Col. (July 7).

3rd Battalion, the Border Regiment—The under-mentioned gentlemen to be Lieuts.:—William Fox, jun., and George Arthur Mounsey-Heysham (both dated July 6).

3rd Battalion, the Duke of Cambridge's Own (Middlesex Regiment)—Capt. R. Child resigns his commission.

4th Battalion, the Duke of Cambridge's Own (Middlesex Regiment)—Capt. G. Godson resigns his commission; also is granted the hon. rank of Major, and is permitted to wear the prescribed uniform on his retirement.

4th Battalion, the Prince of Wales's (North Staffordshire Regiment)—Cecil Wedgwood, gent., to be Lieut.

3rd Battalion, the York and Lancaster Regiment—Lieut. D. C. M. Fitzmaurice resigns his commission.

4th Battalion, the Durham Light Infantry—Lieut. F. G. L. Purchas resigns his commission.

5th Battalion, the Prince of Wales's Leinster Regiment (Royal Canadians)—John Naper George Pollock, gent., to be Lieut.

3rd Battalion, the Royal Munster Fusiliers—Hon. Lieut.-Col. C. M. Davidson, retired pay, to be Capt. (July 4).

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, July 17, 1883.

Berks—Lieut.-Col. G. S. Willes is granted the hon. rank of Col.

Buckinghamshire—Sub-Lieut. C. Flower resigns his commission.

Denbighshire—Lieut.-Col. T. Naylor-Leyland is granted the hon. rank of Col.

Herts—Lieut. T. A. Smith-Dorrien-Smith resigns his commission.

East Lothian—Capt. W. A. B. Hamilton to be Major; W. J. G. Baird, late Lieut. 7th Hussars, to be Capt.

West Somerset—Capt. W. H. Evans resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, July 17, 1883.

ARTILLERY.

1st Fifeshire—Charles Stuart Grace, gent., to be Lieut.

1st Midlothian (Coast)—Lieut.-Col. Sir J. G. Baird, Bart., Col. and A.D.C. to the Queen, resigns his commission; Sir J. G. Baird, Bart., Col. and A.D.C. to the Queen, to be Hon. Col. of the corps.

The Tynemouth—James Brown Nelson, gent., to be Lieut.

1st Orkney—Lieut. R. Bailey, Coast Brigade, R.A., to be Adjt., in succession to Major C. E. Beadnell, R.A., promoted; R Bailey to have the rank of Capt. whilst serving as Adjt. in the corps.

1st Sussex—Lieuts. C. W. Catt to be Capt., and C. H. Henderson-Roe resigns his commission.

ENGINEER.

1st Lancashire—Frederick Joseph Pilcher, gent., to be Lieut.

RIFLE.

1st Bedfordshire—Andrew Hawkins Tanqueray, gent., to be Lieut.

1st Brecknockshire—Edward Morgan Whitting, gent., to be Lieut.

2nd Devonshire (Prince of Wales's)—John Restarick Rolston, gent., to be Acting Surg.

3rd Durham (the Sunderland)—Capt. E. W. Harding resigns his commission.

1st Glamorgan—The under-mentioned officers resign their commissions:—Capt. H. P. Charles and Lieut. A. S. Gardner.

1st Hampshire—Capt. G. H. Powell resigns his commission; Lieut. E. J. Humphery to be Capt.

1st Herefordshire—The under-mentioned Lieuts. resign their commissions:—H. P. James and E. Goldring.

2nd Hertfordshire—Charles Healey, gent., to be Lieut.

1st Kincardineshire and Aberdeenshire (Deeside Highland)—James Cowie Thom, gent., to be Lieut.

3rd Middlesex—Lionel St. George Beckwith Hudson, gent., to be Lieut.

12th Middlesex (Civil Service)—Surg. D. Duckworth, M.D., resigns his commission.

20th Middlesex (Artists')—Lieut.-Col. Sir F. Leighton resigns his commission; Sir F. Leighton, late Lieut.-Col., to be Hon. Col. of the corps; Major R. W. Edis to be Lieut.-Col. (all three dated July 7).

21st Middlesex (the Finsbury)—Albert Percy Bowyer, gent., to be Lieut. (supernumerary).

2nd Volunteer Battalion, the Norfolk Regiment—Acting Chaplain the Rev. J. Lancaster resigns his appointment.

1st Northamptonshire—The under-mentioned gentlemen to be Lieuts.:—William Willoughby and Thomas Shepard, jun.

2nd Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—Acting Chaplain the Rev. C. E. Cornish, M.A., resigns his appointment.

2nd Volunteer Battalion, the South Staffordshire Regiment—Lieut. A. C. Greatrex resigns his commission; Herbert Edmund Proctor, gent., to be Lieut.

2nd Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—Lieut.-Col. W. D. Paine resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the battalion on his retirement. Thomas Cawley Eager, gent., to be Acting Surg.

7th Surrey—Surg. C. L. Jones, M.A., M.D., resigns his commission.

1st Volunteer Battalion, the Royal Warwickshire Regiment—John Barnsley, gent., to be Lieut.

1st Wiltshire—Acting Chaplain the Rev. G. J. Cowley-Brown, B.A., resigns his appointment.

1st Volunteer Battalion, the King's Own Light Infantry (South Yorkshire Regiment)—Edwin Lee, gent., to be Acting Surg.

(Where not otherwise specified, the foregoing commissions and announcements bear date July 18, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 20, 1883.

REGIMENTAL DISTRICTS.

Lieut.-Cols. and Cols. F. Morley, from half-pay, to be Lieut.-Col., to command the 63rd Regtl. District (the Manchester Regt.), vice Col. R. C. Whitehead, C.B., transferred to the command of the 48th Regtl. District (the Northamptonshire Regt.) (July 12); and L. S. Warren, from half-pay, to be Lieut.-Col., to command the 51st Regtl. District (the King's Own L.I., South Yorkshire Regt.), to which the 65th Regtl. District (the York and Lancaster Regt.) is attached, vice Col. F. G. C. Probart, who has been transferred to the command of the 9th Regtl. District (the Norfolk Regt.) (July 25).

STAFF.

Lieut.-Gen. Sir A. Alison, Bart., K.C.B., to be a Lieut.-Gen. on the Staff, to command the troops at Aldershot, vice Gen. Sir D. Lysons, K.C.B., about to be placed on the Retired List (Aug. 1).

Majors R. H. L. Anstruther, the Rifle Brigade (the Prince Consort's Own), to be Aide-de-Camp to Lieut.-Gen. Lord A. G. Russell, C.B., commanding the troops in the Dominion of Canada; W. T. Dooner, the Royal Inniskilling Fusiliers, to be a Garrison Instructor, vice Major R. H. L. Anstruther, the Rifle Brigade (the Prince Consort's Own), who is about to vacate that appointment (both dated Aug. 10); J. Spence, the King's Own Light Infantry (South Yorkshire Regt.), to be a Deputy-Assist.-Adjt. and Qrmr.-Gen. on the Staff, vice Major G. E. Boyle, the Rifle Brigade (the Prince Consort's Own), who vacates that appointment (June 21).

Capt. H. L. Sapte, the Royal Sussex Regt., to be Aide-de-Camp to Major-Gen. Sir R. Biddulph, K.C.M.G., C.B., High Commissioner and Commander-in-Chief in the Island of Cyprus (March 9).

The report has been issued of the Committee appointed to inquire into the Royal Hospitals at Chelsea and Kilmainham, and into the educational establishments at the Royal Military Asylum, Chelsea, and the Royal Hibernian Military School, Dublin. The Committee recommend, among other things, that the pension business be transferred from the Chelsea Commissioners to the War Office, and that both Chelsea and Kilmainham Hospitals be maintained, at least for the present, as in-pension establishments.

The 80-ton guns were fired on Monday at Dover. Five shots were fired. Three ranges were at an elevation of two degrees; the fourth at point blank, and the fifth at a depression of two degrees. The last three shots were fired with full charges, 450 lb., one-fifth of a ton of powder. The first shot was fired with half a charge, and the second with three-quarters charge. The guns were fired by means of electricity. No damage whatever occurred to the turret. While the guns were fired the gunners and several officers remained in the gunroom of the turret. Very little vibration was felt in the town from any of the explosions.

Amusements.

The ROYAL ITALIAN OPERA, Covent Garden, this week terminates its season. The Promenade Concert season will commence on Saturday, Aug. 4, under the lesseeship of Mr. W. F. Thomas. Mr. Gwyllym Crowe resumes his position as conductor, the numerous orchestra will be led by Mr. Carrodus, and Madame Rose Hersee, Madame Enricquer, Mr. Maas, and Mr. Maybrick are engaged as principal vocalists.

At the LYCEUM, Mr. Henry Irving is successfully continuing the series of revivals which will form a portion of his programme in America. On Monday, Tuesday, and Wednesday, "The Merchant of Venice" was performed, and the remainder of the week was occupied by a condensed version of "Eugene Aram," and "The Belle's Stratagem."

To the GAIETY has been transferred a two-act comic opera, called, "Virginia and Paul," without, however, having the slightest reference to the old French love-story connected with the Island of Mauritius. The piece was originally produced last year in New York, Mr. H. P. Stephens contributing the absurdly whimsical libretto, and Mr. Edward Solomon composing some lively, but not very striking music. The interpretation is effective. Miss Lilian Russell, an American vocalist, with a pleasing voice of no great compass, agreeably represents Virginia. Mr. W. H. Hamilton, an excellent actor, with a fine bass voice, characteristically impersonates a certain Monsieur de Ville, who, in possession of magical powers, causes the lovers to readily exchange the objects of affection, and the other parts are efficiently filled by Miss Maud Taylor, Miss Harriet Coveney, Mr. Arthur Williams, and Mr. Elton. The comic opera was favourably received.

The summer season at the VAUDEVILLE has commenced with a revival of Mr. Joseph Derrick's farcical comedy of "Confusion." Mr. Charles Groves and Miss Larkin as the elderly lovers, Mr. Charles Glenny as the bewildered husband, Miss Winifred Emery replacing Miss Kate Bishop as Rose Mumpleford, Miss Kate Phillips as the secretly-married domestic, Mr. Frederick Thorne as the butler, and Mr. W. Lestocq as the doctor are to be accredited with a large share of the success attained. "An Old Master," with Mr. Thomas Thorne as the aged village pedagogue, continues to serve as a pleasant prelude.

The AVENUE THEATRE is now occupied by a musical and pantomimical entertainment of the "variety pattern," entitled, "A Dream; or, Binks's Photographic Gallery." All the personages introduced indulge in the wildest antics imaginable. Much activity and some cleverness of portraiture are exhibited by Mr. Willie Edouin, and he is ably assisted by Misses Alice Atherton, Dora Wiley, and Victoria Reynolds.

The experiment has been tried at the FOLIES DRAMATIQUES of producing a three-act Italian opera entitled "La Regina di Scozia," written and composed by Mrs. Mary Stuart Stresa, a lady of English birth. Italian vocalists give the benefit of well-trained voices to a libretto which illustrates in very undramatic fashion some scenes in the life of Mary, Queen of Scots. Other light Italian operas are announced to be included in the repertory of the temporary lessees, Signor Pompeo and Signor Vairo, but the prospect can hardly be considered encouraging.

The title of the new sensational drama, by Messrs. G. F. Rowe and A. Harris, with which DRURY LANE will be re-opened on Saturday, August 4, is announced as "Freedom."

TOOLE'S THEATRE will be opened on July 26 for the production of the late T. W. Robertson's comedy of "M.P.," which has not been acted in London for several years.

PURCHASE ENSIGNS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—I notice a letter from a "Retired Officer," in which he pleads the claims of Purchase ensigns to have their £450 returned to them. Your columns are always open to such pleadings; may I ask your powerful advocacy of the claims of those ensigns who obtained their first commissions free by passing a certain competitive examination? My case is similar to many others. I went to Sandhurst because I believed I could obtain a commission free, thus saving my parents £450. In this belief, and on the strength of this possibility, I was content to remain there one year or 18 months (in my case the latter), paying the small necessary annual payment. I obtained my commission free, and was, of course, perfectly satisfied. Now, however, my £450 has disappeared, and I am in the same position as officers who passed for direct commissions. Would any sane person have thus voluntarily lost one year or 18 months' service, to say nothing of the annual payment required? Surely not. I take the standard of examination for direct commissions and for entrance into Sandhurst to be about the same, so no greater expense would be incurred for cramming, &c., in the latter case than in the former. Blood cannot be got from stones, nor money from the present Government, but it would cost nothing to allow those officers whose case I plead one year's service towards pension, of course only on retirement,—*i.e.*, say at the end of 19 years, to be allowed to retire on £200 a year.—I am, &c.,

A. H. F.

A CORRECTION.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—In my letter, "A Degraded Rank," which appeared in your issue of July 14, kindly allow me to make the following corrections:—Line 7, read, "the instructor;" line 9, read, "the commanding officer;" line 40, read, "on garrison F.O.;" line 86, read, "horse allowance;" line 87, after £7,300, read, "besides other allowances, or a total of £109,772."—I am, &c.,

MR. RICHARD JAMES WOOD,

AT THE OFFICE, 16 WELLINGTON STREET, STRAND, *and* NOT *to the* EDITOR *of the* ARMY AND NAVY GAZETTE.

The subscription to the paper is 7s. per quarter, or 28s. per annum, PAYABLE IN ADVANCE, *inclusive of postage to any part of the United Kingdom.*

To India, £1 12s. 6d. per annum.

The ARMY AND NAVY GAZETTE *can be obtained in Paris of our Agent,* Mr. J. W. S. NEAL, *English Stationer,* 248 *Rue de Rivoli, to whom Advertisements and Orders for the Paper may be sent.*

THE present condition of the Army Medical Department must be a source of considerable anxiety to all those who desire to see our hospital services maintained in a proper state of efficiency. We have had occasion several times lately to discuss matters affecting the organisation of this Department. Our views on the subject are, therefore, pretty generally known. Our object now is to draw attention to a very serious evil which exists, and which there is every reason to fear will assume formidable dimensions, unless something is done to nip it in the bud, before it goes too far. We refer to the question of Promotion. Now, there is nothing which is more damaging to the interests of any public department than a knowledge of the fact on the part of the *personnel* that they have no prospects. Offer men a reasonable hope of future advancement, and they will exert themselves to their utmost; but once damp their ardour, and cause them to feel that the higher professional positions are beyond their reach, and good-bye to all proper professional zeal. What is the state of the Army Medical Department to-day? There is no branch of the service upon which so much depends in war-time; and yet a careful examination of the *Army List* discloses a most undesirable state of things. For the majority of Medical officers there are no prospects whatever. By slow degrees the whole of the senior ranks have become blocked, and in the absence of special provisions for the removal of the difficulty, promotion to all but a few senior officers will soon become an impossibility. In other words, stagnation is within measurable distance, and unless the War Office has the good-sense to recognise the fact, and adopt precautionary steps, the most serious consequences will follow. We have before us a most interesting pamphlet on the subject, entitled "The Present and Future of the Army Medical Department." The writer has evidently devoted great care and attention to his work, and the views he expresses are so sound that they cannot fail to recommend themselves to those in authority. As is pointed out, for the immediate cause of the present block we must go back twenty-eight years,—to the period of the Crimean War, when the enormous influx of Medical officers during 1854 and 1855, and again in 1857-59, swamped the service with young men, who are simply holding on to qualify for the highest rate of pension. No one denies that by the last Warrant Medical Officers have gained enormously. Their position, so far as pay and relative rank are concerned, is as good as they can well expect it to be. Starting as they do, on first appointment, with a liberal rate of pay and the rank of Captain, they certainly are far better off than any other class of officers. That the advantages extended to them by the new Warrant are appreciated, is shown by the number of candidates who have come forward for the Department at all recent examinations. But it is not enough to fill the service at the bottom. We must also see that a proper leakage is provided for at the top, or it will very soon fall into disrepute again, and then the old question will arise once more. An examination of the Surgeon-Generals' List shows that in the present year there will be three retirements from age, three more will follow in 1884, in 1885 there will be none, in 1886 there will be one, in 1887, 1888, or 1889 one, in 1890 none, in 1891 one, in 1892 one, and in 1893 one, giving a total of eleven in ten years. The prospect is certainly not a bright one. During the next eight years twenty-one Deputy-Surgeon-Generals will obtain the rank of Surgeon-General, holding it for periods varying from three months to—in one case—five years. In the same period, four Deputy-Surgeons-General will be retired on account of age. In other words, twenty-one Brigade-Surgeons will be promoted to Deputy-Surgeon-General's rank. We now turn to the junior ranks. Taking the the Surgeon-Majors' List, we find that there are 135 officers who, having completed 20 years' service, hold the relative rank of Lieutenant-Colonel. In about two years more, 67 others will qualify for the same rank and pay, and within the succeeding twelve months the number will be increased by 58 more, so that, allowing for retirements, promotion, deaths, &c., there will be, in three years from the present time, some 200 Surgeons-Major on the higher establishment with Lieutenant-Colonel's rank. The pay of these officers averages from £600 a year each on home service and £1,300 in India. The question naturally arises,—Is this a desirable state of affairs? Will the country profit by the arrangement? We doubt very much whether it will. A man at 45 years of age is surely too old for executive work. He will naturally feel that he has missed his mark, and though some may still retain sufficient interest in their profession, the majority will lose heart and the service will suffer. As matters now stand, few of the Surgeons-Major can hope ever to become Brigade-Surgeons. But how is the difficulty to be removed? It is suggested, and the idea is one well worthy of consideration, that the higher or inspector's grades should be constituted seven-year appointments, on the same terms as the period of regimental command is now limited; and further, that the grade of Deputy-Surgeon-General should be abolished. According to this scheme an officer promoted a Surgeon-General would for the first four years have the relative rank of Colonel, as the Deputy-Surgeons-General do now, and have the same pay and allowances. For the last three years in the rank, the officer would have the relative rank of Major-General, and the pay and allowance now drawn by the Surgeons-General. The effect of this would be to provide thirteen retirements in 1883, three in 1884, one in 1885, two in 1886, five in 1887, six in 1888, nine in 1889, and thirteen in 1890; total, 52, in seven years. In addition, 28 officers would be retired in the same period from age, which would create altogether some 80 vacancies. It is calculated that, under this scheme, the present thirtieth Surgeon-Major would stand first for promotion in 1890, with 32 years' service,—or adding 35 per cent. for casualties of all kinds, the Surgeon-Major who entered the Army in 1859 would be next for promotion, with a total of 31 years' service. This plan has very much to recommend it, the more so as the arrangement has the advantage of not increasing the cost to the Government. On the contrary, there would be a large saving in travelling expenses and in the pay and allowances of officers moving from one end of the world to the other, whose services for the time being are lost to the State. Now as to Pensions. The rates provided in the present Warrant are most unfair to the body of officers. Some few fortunate men reap an advantage, but many individuals suffer considerably. It is proposed, therefore, that instead of the pension being granted according to rank, the scale should, in future, be regulated by length of service, viz., after 20 years, £365; after 25 years, £500; and after 30 years, £600. This is on the same principle that the Indian Medical Service is worked. The Indian Government gives similar pensions at 20 and 25 years, £700 at 30 years, and £250 extra to all administrative officers after their five years' tour. These are the main features of a scheme which is well-conceived, and deserves to be gone into by those who are responsible for the administration of an important public service.

A SPECIAL Circular, lately issued by the Admiralty, announces that several more commissions for the Indian Staff Corps are to be offered to the Royal Marines. This indicates that the recommendation of the Army Commission as to appointment by direct commissions has not as yet been accepted, and that the supply of Line officers is still short of the India Office demand. In all other branches of its administration, Civil Service, Public Works, or what not, India has the pick of the intellect, and—as Mr. Wren, the well-known "crammer," some time since assured the *Times*—the physique of British youth. Why, then, has its Military Department to tout for officers when the best material, and that in abundance, is ready to its hand? Uncertainty as to how long the present *régime* is likely to last, the expense of putting him into the Line, only as a preliminary to his joining the Indian Army, and the probability that at the outset he will encounter a contempt, or at least a dislike, for his future service, doubtless induce the friends of many a promising lad, anxious to carve his fortune with his sword, to throw up the idea of his doing so as a dangerous experiment. It has to be remembered that should the young soldier-aspirant join the Line, and not elect for the Staff Corps, or fail in either of the examinations, he has, by their own act, been committed to an expensive profession, and sacrifices must be made to maintain him therein. Hence, of those who join it, very few have looked forward to an Indian career from their boyhood, and so the once familiar "Griffin"—green, gawky, but full of "go"—is almost as rare an animal as the dodo, and when found is invariably welcomed and petted. Of the rest, some have turned to India as an after-thought, others as a necessity, and a very disagreeable one. The latter look on, and often speak of the country as a kind of purgatory. Others, again—and they are a large number—regard India from the Garden-of-Eden point of view. They take unto themselves Eves, and imagine that thenceforth they are together destined to wander at will, and pluck political and other luscious fruits. Those in this category, in after years, take their pleasures sadly, as a rule. But even with all the temptations now offered, the number of candidates for the Staff Corps is insufficient, and West India and Marine officers, who never dreamed of joining a Sepoy regiment, have recently had the advantages of the Staff Corps brought to their notice in a manner ludicrously suggestive of the circulars in which "Eligible young men" and "God Save the Queen" are such conspicuous features. Why is all this touting required? Wherein lies the difficulty in, or objection to, obtaining direct candidates? It cannot be urged that the best Line officers elect for the Staff Corps; there are too many prizes in the former for that to be the case. Why, then, we would ask, should the India Office be only too pleased to accept anybody it can get? Hundreds of lads who could creditably pass the preliminary examination,—lads with Indian names, Indian reminiscences, who could jabber Hindustani before they spoke English, and lots of whom can still recollect being drilled on Sepoy parade-grounds, are reluctantly obliged, for some such reasons as those given above, to accept clerkships or go off to the Colonies. Why cannot those who wish to volunteer for the Indian Army present themselves at the usual preliminary, and declare, on going up for the competitive examination, which service they elect for? Were this the case, we venture to predict that a large number of those noted "Indian Army" or "Staff Corps" would stand high in every published list. A limited number of commissions might still be given to officers of British regiments, and exchanges might still be permitted, as the system tends to assimilate the two services; but we maintain that, as a general, rule admission to the Indian Army should be by direct commission, for early association has much to do with the zeal evinced in their work by all classes of officers. If the complaint urged against the practice of frequently transferring officers from corps to corps, that they show little acquaintance with or concern for their men, carries weight, it must doubly apply to those posted from British to Native regiments. How many young officers so transferred can conscientiously say they are as much interested in their new as their old companies? If it is essential to attach an officer of the Native service to the British, to learn its interior economy, &c., he will best do so after mastering the details of the one with which he is destined to serve. In carrying out such a system, only one difficulty presents itself, that of drill-instruction where all the instructors are natives. This objection, however, did not prove a very formidable one in the case of those sent out to India direct in 1876. These officers, by the way, appear to have taken very kindly to their Native regiments. and been cordially received in them. A good deal of nonsense is talked about the futility of sending officers unacquainted with the language to native regiments. Practice in, more than study of a language, is the essential to fluency in speaking it, and that practice cannot be obtained half as well elsewhere as in a Native corps. The "higher-standard" is, however, someone's hobby. The "prestige" of the Indian Army will last as long as British India exists; its *esprit de corps* lingers in a few regiments to which old officers have stuck, and who keep up old traditions and customs; these are, at best, moral influences little appreciated by us as a nation, and have no English equivalent. "Self-respect," however, is reputed to be an Englishman's pet characteristic, and if on no higher ground than this, we appeal to the India Office on behalf of a body of officers who have deserved well of their country, to spare them the humiliation of seeing the attractions of their service—eagerly sought after in the days of the East India Company by cadets of the best families—fall so low in the estimation of its sister service, the Line, that officers will not accept Indian commissions, even second-hand.

Her Majesty the Queen embarked on board the *Alberta*, at Portsmouth, on Tuesday, and proceeded to Cowes.

Admiral Lord Alcester distributed the prizes on Tuesday to the successful students of the Royal Naval School, New Cross, an institution which has sent so many young gentlemen into the service who have in time become distinguished officers and bright ornaments of a profession second to none in the whole world. Lord Alcester, at the close of the distribution, recommended the pupils to emulate the example of three gallant officers whom he numbered among his own personal friends,—Sir F. Richards, his colleague and friend, who had attained the position he now held entirely by his own exertions; Sir George Nares had done the same; and the third name was that of one who had earned undying fame in connection with Arctic exploration, he meant Captain Bedford Pim (applause). He regretted that that gallant gentleman should have left the sea to take to the law—(laughter)—after having so greatly distinguished himself in Parliament. In conclusion, Lord Alcester impressed upon the pupils the necessity of studying foreign languages, which he pointed out would be of the greatest value to them through life. He regretted to say that with regard to this branch of education there was far less proficiency in the Navy than there should be, but he hoped in time that omission would be remedied. We cordially agree with Lord Alcester in this latter recommendation.

The *Pioneer* arrived this week from the West Coast of Africa, after an absence of seven years. Either from faulty design or interference with the original plans, she was found to be a failure before leaving England in 1876. Her draught of water exceeded the specifications by nearly 2 ft., thus preventing the cabin scuttles being opened, excepting in harbour and with perfectly smooth water. As she has been a source of discomfort to those on board when within the tropics, we trust that she will either be consigned to the "firewood and scrap heap," or, if retained, merely used as a dockyard tug, though we doubt her capabilities even for that work.

Naval officers who frequent places of amusement situated in questionable localities if not actually of questionable repute, should be prepared at times to get into difficulties, and thereby endanger their commissions. At Portsmouth, last week, a disgraceful brawl occurred in such a place of entertainment as we have just alluded to, in which several young Naval officers were concerned. A local journal, in a leading article on the subject, has favoured its readers with what can only be regarded as an ex-parte statement of the case for the proprietors of the music-hall in which the scene of riot and confusion happened, and has no word of excuse for, or in extenuation of, the offence said to have been committed by Naval officers. We have taken the pains to sift this matter, and have arrived at the conclusion that the management of the music-hall was as much, if not more, to blame than the Sub-Lieutenants on whom were let loose a mob of roughs. However, if Naval officers will frequent such places, and indulge in the not very creditable amusement of "drawing the chairman," they must be prepared to take the consequences. The remedy—and we strongly recommend young officers studying at Portsmouth to adopt it—is in their own hands. Let them refrain from patronising such places of amusement.

The selection of Captain Alan B. Thomas to command the Naval forces of the Victorian Government will be viewed with satisfaction by his brother officers, and prove of undoubted advantage to the colony. Captain Thomas's professional ability and administrative tact, combined with geniality of manner and gentlemanly bearing, are qualifications which will ensure him success. It would materially enhance the importance of his position were the Admiralty to allow him to be borne on the books of the *Nelson*, for special service in connection with Colonial defences, thus accrediting him with a direct Imperial appointment, and we trust that Lord Alcester and Captain Tryon, who are well acquainted with the qualifications of Captain Thomas, will see the advantage of such a step.

Better arrangements might be made than at present exist for the accommodation of officers, who, after paying-off, are borne to close the ship's accounts. At Portsmouth they can be accommodated on board the flag and depôt ships, but the inconvenience and delay of going to and from the dock and victualling yards, together with the trouble of taking cabin and other necessaries on board, which are generally packed up on paying-off, induce them to provide for themselves on shore. At the other ports, Sheerness excepted, they are equally, if not more, inconvenienced. Lodging allowance and compensation for provisions are withheld, and the officers have no option but that of providing their own "bed and board" if they wish to complete their accounts within the number of days allowed for the purpose.

Mr. Labouchere seems determined to continue the agitation concerning the personnel of the Royal Yachts. In addition to commenting last week on the iniquity of promoting officers serving in them over the heads of others (which statement we pointed out was both unnecessary and unjust), he further inquired how the officers and crew would be employed while the *Victoria and Albert* was under repair. The Secretary of the Admiralty told him that the repairs of that vessel would not be commenced until the House had expressed an opinion thereon, and that the employment of the officers and crew was a matter now under consideration. Mr. Labouchere ought to have remembered that during seven months of the year the ship's company are nearly all employed as riggers in the dockyard, a few being retained on board to keep the yachts in order. This has been frequently mentioned in Parliament. With regard to the officers, we hope that, in spite of such frequent questioning, the right of the Sovereign to retain a small number of officers who have been selected for appointment to the Royal yachts on account of their good services, will in no way be interfered with. It would be an injustice to those who are thus the recipients of the Royal favour to supersede them merely to gratify the economical ideas of sensational legislators, when the amount gained by placing a few officers on half-pay would be unappreciable in the Naval expenditure. Were it insisted on, it would be viewed as an ungracious act to her Majesty, and be productive of an undesirable precedent.

Interest in the annexation of New Guinea and the New Hebrides has grown apace throughout Victoria, where resolutions of the different Municipalities in support of the address to her Majesty from the Legislature of the colony have been adopted. The feeling in New Caledonia is immensely in favour of a French annexation, and an address in support thereof has been presented to the Governor. His Excellency, in reply, expressed concurrence, and considered the New Hebrides to be necessary to the development of New Caledonia, and promised to adopt measures to counteract the designs of the Australian Colonies.

The departure of Major-General Sir Frederick Goldsmid, K.C.S.I., late a Controller of the Daira Sanieh, for the River Congo, on a special mission from the King of the Belgians, in the interests of the International Association, will be viewed with general satisfaction, as the known ability of this gallant officer will induce every one to hope for his success in this undertaking. The interest of Members of Parliament on this subject appears as great as ever. Mr. Gladstone stated this week, in reply to Sir M. Hicks-Beach, that negotiations were still in progress in reference to the Congo, but no treaty had been concluded, and that whenever the latter was effected, it would be presented to Parliament, in accordance with his promise of April last. In furtherance of Sir Frederick Goldsmid's mission, we hope that the Senior Naval Officer on the West Coast of Africa has been instructed to afford him every assistance.

Portsmouth Harbour wears a somewhat holiday aspect just now, from the number of yachts and the dearth of commissioned ships, the jetties being unoccupied save by the dismantled *Warrior* and the *Seahorse*, and a couple of gunboats armed with new guns mounted on experimental carriages. The *Himalaya* left on Tuesday. This vessel, by the way, is completely spoilt as regards outward appearance by recent alterations, and is a great eyesore to those who have for so many years admired the symmetry of her form, which has scarcely been surpassed hitherto by any modern vessel. It is to be hoped that interior advantages are gained in proportion to this decided loss in exterior beauty, and, perhaps, sea-going qualities. The deafening clang of the rivetters testifies to the progress being made with the *Calliope* and *Camperdown*, on the slips, which, however, is not very easily discernible by the sense of sight; the afterpart of the latter vessel, in particular, appears to be at a standstill. The *Colossus* has both her turrets armoured, and gun-slides in position, but there is still a vast amount of work to be done on her; while a board, conspicuously placed, testifies to the not very encouraging fact that she has already been over four years in hand. The *Cordelia* has her yards aloft, and the gun-fittings on her sponsons are in a forward condition. In dock are the *Polyphemus*, with her hull, for some reason, painted black, instead of grey, as heretofore, which will certainly not detract from her ugliness; and the *Victoria and Albert*, the latter vessel awaiting the overthrow of Mr. Labouchere's disloyal and ridiculous machinations to have her repairs proceeded with. The *Triumph*, in the old steam basin, is undergoing extensive repairs to her decks and machinery; there is, however, no sign of any alteration in the gun-fittings, so she is presumably considered to be too old to have a new armament, though her four 64-pounders will probably be replaced by breechloaders. The *Devastation* came in from Spithead on Wednesday, the trials with Whitehead torpedoes having been brought to a conclusion. The object was to test the feasibility of causing the torpedo to "dive" somewhat deeply at first, so as to clear the vessel's stem, subsequently rising again to the depth for which it was set; and this, we understand, was successfully accomplished, the weapon being discharged at a considerable angle of depression. Some experiments were also carried out to test the relative holding-power of the Admiralty anchor and Martin's, in which the latter came off victorious, the former failing to hold the ship when steaming astern. The block-making machinery in the Dockyard, which has for so many years delighted visitors, has apparently no other function left nowadays, the old plan of making blocks from a single piece having been abandoned, than to make small blocks. By the new system, large blocks are built round an iron gin, with an ordinary-sized metal sheave, the iron, though not externally visible, thus bearing all the strain.

Retired Commander William F. Gregory has been awarded the Naval pension for lieutenants of £50 a year, vacant by the death of Retired Commander Frank Harris on July 9, 1883.

The bathing-place for the Royal Marines at Plymouth has been materially improved since the last season, the Admiralty Department of Works having erected a row of eight or nine covered compartments in which the men can dress and undress. These compartments face the beach, are substantially built, and are provided with rows of iron pegs, fixed over each seat, on which the bathers can hang their clothes,—a great convenience for the men.

We have already referred to efforts being made by several corps to raise subscriptions with a view to erecting stones or memorials over the graves of their comrades who were killed in action or died of disease during the Egyptian Campaign; but surely such a service as this should not be left to the goodwill of officers and men, but should be carried out at the Government cost, for it certainly is not too much to expect from a country like England that she should place tombstones to mark the graves of her sailors and soldiers who have lost their lives in her service, and are buried in foreign lands.

To most impartial people it would seem to be about time that the Admiralty should begin to inquire into the value of Greenwich Naval College as a nursery for Marine officers. Once more almost all the probationary Lieutenants have failed to pass their examinations to qualify for the Royal Marine Artillery, and we cannot but think that there is something almost disgraceful in this failure recurring with unvarying monotony year after year. The questions to be determined are,—Whose fault is it, and what remedy is to be provided for it? 1. Whose fault is it? To this there would appear only one possible answer. The fault must be primarily in the Staff of the College. Assume that the lads are idle or dissipated, is it not the duty of schoolmasters and College Dons to correct these faults, to stimulate and encourage hard workers, and to maintain discipline, so as to prevent any neglect of the opportunities for study afforded by the College? Again, is the examination too difficult, and the period of probation too short? Then it is clearly the duty of the Director of Studies to represent this to the Admiralty, and endeavour to obtain a modification of the existing regulations. Unless he has done so, we do not hesitate to assert that he has failed in his duty. The fact is, as we have already on a former occasion pointed out, all these elements contribute to the failure of young officers. The standard is unquestionably too high. It is higher than that exacted at Woolwich for the Royal Artillery, and no one will venture to say that it is necessary for the Royal Marine Artillery officer to pass a fuller or more scientific examination than his brother-officer in the Artillery. Again, we have reason to believe that the discipline for the Marine probationary Lieutenants is much more lax than for the Sub-Lieutenants of the Navy. But, however this may be, there can be no question that these repeated failures are in the highest degree discreditable to the College Staff, and we trust that Lord Northbrook will take the matter in hand, and cause a most searching investigation to be made into the causes which produce such disastrous results, and will provide a remedy.

The French have just launched another ironclad, in the shape of the *Furieux*, built at Cherbourg, on the plans of M. de Bussy. She is a mastless ironclad, having two turrets, two screws, and is constructed of iron and steel. The hull is divided into nine large and several lesser water-tight compartments, which, it is said, will render it impossible for her to be sent to the bottom. She will carry two heavy steel guns, of 32c., and several Hotchkisses, in order to repel the attacks of torpedo-boats. It is calculated that the *Furieux* will cost £280,000, a sum which, of course, does not include labour.

Lord Henry Lennox, in returning thanks at Portsmouth, on Wednesday last, for the Navy, dwelt strongly on the apathy shown by Members of Parliament when Naval expenditure was under discussion. The front benches were empty on such occasions, but when questions of highway rates, agricultural, and like matters were under discussion, those seats were always occupied. Were a panic to arise, necessitating a warlike attitude, the House of Commons would vote millions of money in less than an hour, and numbers would flock down for the purpose; yet, in the present time of peace, important votes are discussed at two in the morning with hardly sufficient Members to form a quorum, and, in consequence of the lateness of the hour, only three representatives of the Press to report such important matters. His lordship, who has persistently followed up, in various parts of the country, his exposure of our deficiencies as the greatest maritime nation, again referred to the rapid strides France is making in the building of ironclads, pointing out that, while we had ten in course of construction, she had seventeen, and was employing a greater number of workmen in the public arsenals for that work only, and not for repairing or refitting ships. The Secretary of the Admiralty had admitted that the French were adding double as many ironclads to their Navy as we were; and nothing could be a greater disgrace to us. His lordship regretted that Members would not repeat in the House what they said in the lobbies,—that if France continued her present outlay for the next two years, either her Navy would be ahead of ours, or we must increase the expenditure for the same; and he hoped that Parliament would adopt the latter solution of the matter. We know that his lordship's opinions will be endorsed by every right-thinking Englishman, and that the ultra-Radical policy of only expending four millions for the protection of our interests and commerce will be accorded the contempt it deserves. The free-breakfast-table principle cannot be carried out at the expense of our first line of defence; therefore, its advocates had better adopt some other outcry. They would be the first to exclaim in case of a national emergency, but, in time of peace, take the lead against such able advocates of the Navy as the noble Member for Chichester.

Lord Alcester, in distributing prizes at the Royal Naval School, New Cross, the other day, impressed on the students the necessity of acquiring a knowledge of foreign languages. He was sorry to find less proficiency in the Royal Navy in that respect than there ought to be. We fully endorse his Lordship's remarks, and while regretting the small number of officers who have qualified as interpreters in French, we hope that, while his Lordship holds a seat at the Admiralty, he will cause greater facilities to be held out to officers for acquiring a knowledge of this important subject, and that young gentlemen who have to pass therein on entry will be obliged to make further progress. Although of late years there is a greater desire on the part of Naval officers to become acquainted with foreign languages, still the matter is not insisted on as it should be, and the inducements offered to them for qualifying as interpreters are militated against by the few appointments to that duty, even when qualified. In the present age, every Naval officer should understand the German and French languages.

The outbreak of cholera in Egypt will cause an alteration to be made in the programme drawn up by Lord John Hay for the cruise of the Mediterranean Fleet, which will now in all probability leave Corfu, and after visiting one or two of the Grecian isles, proceed west, towards Gibraltar.

Vice-Admiral G. O. Willes, C.B., has collected the ships under his command, and commenced the annual summer cruise inaugurated by him since his arrival on the China station. The officers of the squadron have visited Nankin, while in the Yangtse.

The Earl of Northbrook, when replying last week to the Earl of Ellenborough in the House of Lords, said that the pilot on board the *Lively* when she was lost was one of the best and most experienced in the district. In this manner the man primarily responsible for the loss of one of her Majesty's ships has his fault publicly condoned by the highest Naval authority, and to all intents and purposes has received an official recommendation for further employment. We would much like to know when, if ever, an officer of her Majesty's Navy has received similar consideration for the like offence?

The Admiralty will really have to take steps to arrest the increasing disposition on the part of seamen and marines to strike their superiors. Three cases are reported this week, and we do not doubt but that others have yet to come to light.

The Admiralty have visited their displeasure on Lieutenant Hughes, the navigating officer of the *Miranda*, for allowing that ship to ground on a coral reef in the South Seas, a locality but slightly surveyed, by superseding him in his appointment. We do not anticipate that any member of the Board will rise from his place in the House and testify to Lieutenant Hughes's competency, in the same manner that the First Lord of the Admiralty recently did in the case of the special pilot who lost the *Lively*, while the officers of that ship still suffer under the stigma of incompetency and neglect of duty so unjustly passed upon them.

That celebrated swimmer Captain Webb, who swam the Channel, has met his death, by trying to swim the rapids below the Niagara Falls. He was sucked under by the whirlpool, where the surface water apparently descends to form an under-current, whose waters do not reappear on the surface for many miles below the spot at which they enter the vortex, where, so far, the depth has never been fathomed.

The French papers announce the death of Comte Henri de Bouillé, General of Division, who was born in 1824, and was educated at the School of St. Cyr. The deceased General saw a good deal of rough service. In the Crimea, he was a captain on the staff of the 3rd Division, was mentioned in an order of the day for his conduct during a night attack, and obtained the Legion of Honour. He afterwards served in the campaigns of China and of Italy, and when the war of 1870 broke out he was military attaché at Vienna; he obtained leave to join the Army in the field, and after serving on the staff of the 17th corps was promoted to the rank of General of Brigade. He contributed in a great measure to the success of the French arms at Patay, where General de Charette and the Papal Zouaves distinguished themselves, and was severely wounded by a shell. Two years ago, the Count was made a General of Division, and he held a command in the 7th Army Corps when he died. The deceased, who thus served the Third Republic, was the grandson of the celebrated Marshal Bouillé, whose name figures in such an unenviable manner in the present national anthem of our neighbours. In fact, in the "Marseillaise," patriots, after being recommended to show themselves magnanimous warriors, are told to be down on those sanguinary despots,—

"Les complices de Bouillé :
Tous ces tigres sans pitié
Déchirent le sein de leur mère !"

And most of the said tigers without pity were massacred.

Colonel Milne Holme will, on Monday, ask the Secretary of State for War if, having regard to his promise on June 28, to consider the subject of Army entrance examinations, he can now state what modifications, if any, it is proposed to make in the educational tests required of candidates for first commissions in the Army.

We are reminded that the much talked-about French Cavalry manœuvres are about to commence at the Camp of Châlons, under the direction of the Marquis de Galliffet, who, rather in spite of the War Minister and the Radicals, retains his post as Chief of the Cavalry. The force which is going to take the field, go under canvas, picket horses, &c., is thus spoken of:—General Director of Manœuvres, General de Galliffet, commanding the Twelfth Army Corps, member of the Superior Council of War, and President of the Committee of Cavalry; Chief of the Staff, Lieutenant-Colonel H. von Donop. Then comes a list of the Generals of Division of the first, second, and third series. The manœuvres will last from August 1 until September 3, and no less than 36 regiments of Cavalry and 18 batteries of Horse Artillery will turn out. Germany is to be represented at Châlons by Major de Gorsler, first Aide-de-Camp to Marshal von Moltke; Russia, by Lieutenant-General Baron Taube, commanding the Twelfth Army Corps; Austria, by Colonel Bach de Hausberg, of the 7th Hussars; Italy, by Major-General Colli de Fellizano, commanding the Cavalry Brigade of Rome; England, by Colonel Villiers, Military Attaché. The United States, Spain, Belgium, Holland, Denmark, Switzerland, Portugal, Servia, and Roumania will also be represented, and perhaps China. It will be remembered that last year the Cavalry Manœuvres were conducted with the greatest secrecy, and the supposition was that the effectives were so weak, and the condition of the regiments so unsatisfactory, that it was not advisable to expose them to foreign criticism. This year everything is to be changed, and the doors of the camp are to be thrown wide open. The general autumn manœuvres will not begin until September 1, when the 5th, 6th, 7th, 8th, 9th, and 13th Army Corps will turn out. There will be some very interesting operations in the east, where the 7th and 8th corps will operate against each other. An army will be supposed to have invaded France by the defiles of the Jura, and after having invested Besançon, to have marched upon Dijon.

Retired officers with war service may be reminded of the fact that there are two vacancies for Military Knights of Windsor, by the deaths of Colonel Graham and Major Gee. The first of these existing vacancies was created as far back as last April. As a sign of the times, we may mention that two General officers were last year applicants for an appointment to the Lower Foundation at Windsor, and were somewhat disgusted to learn that they were not eligible.

On the occasion of July 14, a French General inflicted fourteen days' arrest on the bandmaster of the 63rd, for having played the "Marseillaise" without orders. General Thibaudin ordered the release of the bandmaster, on the ground that the law of 1875 has become obsolete, and that it is now obligatory to perform the "Marseillaise" on all official ceremonies, and optional to perform it in all other cases.

Lieutenant-Colonel C. G. Slade, 3rd Battalion, Rifle Brigade, has submitted to the "Dress Committee," an Infantry undress frock, fitted with loops and pockets for carrying cartridges, which seems to be a suitable active-service dress for the British soldier. The Aldershot multifarious Committee are still hard at it, and there seems but little prospect of their labour terminating before the November fogs.

We find ex-Lieutenant Saint-Genest making a very violent onslaught upon the French War Minister, on the occasion of his receiving promotion in the Legion of Honour. The opportunity was a fine one for the enemies of the Minister to wash dirty linen in public, and to cry *urbi et orbi* that General Thibaudin broke his parole when a prisoner in Germany. However, what M. Saint-Genest says is very serious, especially for the French Army. "The journals on the other side of the Rhine," he writes, "speak thus,—'General Thibaudin, does he or does he not represent the true opinion of the country in France? Must we henceforward regulate our relations with France in accordance with his case? It is nothing much for a man to break his word of honour; that has often been seen, and in all countries. France is no more responsible for General Thibaudin having violated his parole than England was responsible for what Captain Carey did in deserting the Prince Imperial. Only, Carey died abandoned by the English Army; whereas, M. Thibaudin has just received an exceptional reward.'" And M. Saint-Genest, admitting the justice of these observations, says that the question to know is whether honour, yes or no, is a feeling still recognised in France. He then treats us to the position of a French officer taken prisoner in some future war, and, on offering his parole, receiving this reply, "But, Sir, your parole has no value; there is no longer any honour in France, since a man who broke his parole has been placed at the head of the Army. You say that the treason of General Thibaudin is an isolated case; it is not, however, a question of him, but of the homage which has been rendered to him. . . . . . . You say that this time you are sincere, but you forget that your writers have declared that a prisoner, not being free, is never obliged to keep his engagements. You have the right of lying. You must remain." And unless something be done, M. Saint-Genest fears that in future French officers taken prisoner will have to find bail,—ten, twenty, or thirty thousand francs!

Advices received at Plymouth from Shanghai, dated June 1, report that the Audacious, in bringing up on the previous night against an ebb tide, grounded a little above the upper lightship. She heeled over so far that the water came in at her ports. Two Marines who got frightened jumped overboard, and were drowned. Mr. Nelson was the pilot. The Audacious soon righted, however, and went on to Chefoo the next day.

The *Times* says:—"Major-Gen. H. G. Woods, who was appointed in April last to the command of the Belfast District, has vacated that appointment through ill-health, and will be succeeded by Major-Gen. G. S. Young, who was lately on the Staff of the Dublin District."

RECRUITING.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Mr. Gladstone has promised that the Government will do their best to bring on at as early a day as possible the subject of Recruiting, Sir W. Barttelot having reminded him that "opportunities had been promised" for discussing it. I desire, in addressing you, to aid the discussion, for I do not doubt that those who will take part in it in the House will ascertain for themselves the views of your paper, and I therefore beg not only space for what follows, but that you may be pleased to offer remarks upon the one special point I raise, and that point is how recruiting is affected by the training which recruits undergo. Seven thousand one hundred and seventy-seven men, having less than one year's service, deserted in the three years 1880-81-82; while 5,581 men under 21 years of age were discharged during the same three years—that is, were invalided, or purchased their discharge. Thus a total of 12,758 men, all young, and having an average service of about sixteen months, left the service in those three years. Those years are not exceptional. Only a day or two ago, Lord Morley said in the House of Lords:—"In regard to the assumption that waste, whether from desertions, fraudulent enlistment, or discharges, was due entirely to the Cardwell system, he found, on a comparison of figures, that desertions were quite as numerous during ten years of long service as they had been in ten years of short service." And so with the invaliding of young men who have never gone abroad; 5,581 men under 21 years of age, inclusive of the few who can purchase their discharge, is about the average for any three years. Surely there must be—among, perhaps, many causes—some special cause for this state of things. Gen. Sir Lintorn Simmons has recently written:—"The young soldiers by thousands yearly purchase their discharge, or desert; while many break down under training, and return to their homes, without pensions, to drag out a miserable existence, and earn their living as best they can as invalids." Break down under training! Why? The training which the British recruit undergoes is supposed to be eminently beneficial to him. Why, then, should he ever break down under it? Have we ever inquired whether the recruits are rendered physically uncomfortable, let us say, by their training? Nothing will induce a man to change his lot in life more than being made physically uncomfortable; but the training does much more than that, and I state without the possibility of contradiction that this so-called "training" is the very reverse of beneficial. I state that it is an unphysiological, and therefore a false system of training. That is strong language, but it contains the truth. Further, that this training is productive of heart and lung disease is certain. To what extent it produces these diseases, and to what extent it causes desertion from the ranks, and the purchase of "discharge during the first three months of their service" (spoken of by Sir L. Simmons, in his paper in the *Nineteenth Century*), I do not attempt to say. I say that it does produce disease of the circulatory organs, because that statement is so easily proved. Anybody may read the proof in the Army Medical Report for 1876, Appendix No. VI. It may be thought men would desert for mere devilment to the extent of 7,177 in three years; but, at all events, Medical Boards would find no amusement in invaliding 5,000 and some hundred young men in the same period, all of whom had been carefully examined at enlistment. To find £10 to purchase discharge is also a serious matter. As to the prevalence of heart and lung disease, I quote a few lines from the late Dr. Parkes' book on Hygiene. He says:—"Out of a hundred men discharged (invalided) under two years' service, heart and lung disease together constituted, in one year 47·85, and in the other 40·59." "How, he asks," "is this to be accounted for? The recruits are carefully examined, they have no heart or lung disease; how is it that such diseases are developed during their first two years' service?" &c. It is to be accounted for very largely by the training they undergo. One man may say drink accounts for it; another that tobacco accounts for it. But the soldier neither drinks nor smokes by regulation. He is drilled by regulation, however; and it behoves us to see that the regulations are founded on science and reason. You know, Sir, that the invaliding of young soldiers for heart and lung disease is enormous, and a cause of heavy charge upon the State. I trust you will glance at the No. VI. of the Appendix to the Army Medical Report for 1876, and call attention to the training of the recruit. It seems so outrageous a proposition that we are inflicting heart and lung disease on recruits only to invalid them as useless within a few months, that one hesitates to look into the matter. May it not be so any longer. The physiological facts upon which the argument rests are easily mastered, and the paper is at the disposal of Members of Parliament, and those who intend to take part in the discussion on recruiting might profitably know how we treat our recruits when we get them, and the reason why we so quickly get rid of so many of them. Every man who deserts (as did those 7,177 within a year of joining), and every young soldier who is invalided, and recounts all that led up to his invaliding, is a kind of recruit-deterring centre. The question,—How is the drill which recruits undergo injurious? is one for which I, of course, cannot ask space to answer. I have stated where the answer is to be found. It is impossible for any one to defend a system which can be proved to be injurious to the body, but if any one is desirous of defending it, I would advise him that the only ground he can take is, that (what is deemed) Military necessity overrides all other considerations. That ground, and that only, would justify the damage to the men and loss to the State now being inflicted under the name of training. Sir, if I have written strongly, it is because I know the mischief that is being done. The present seems a favourable opportunity of considering how we treat the recruits who are so hard to be found. We can prove that heart and lung disease is produced by the "training." We invalide men of 21 years of age and under by the hundred for heart and lung disease. What is the inference? At the least, that the training has produced some of it, in these carefully-selected men. But I trespass on your space. Trusting you may be able to insert this before the discussion on Recruiting comes on in Parliament.—I am, &c., F. Arthur Davy, M.D., Surg.-Major, A.M.D.

Woolwich, July 11.

MOUNTED INFANTRY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I regret that, not being in England, I could not be present at the recent lecture at the United Service Institution on the subject of Mounted Infantry, as I should have submitted the ideas of an old Staff Officer to the appreciation of my military *confrères*, in the hope of inducing some one possessed of the necessary technical knowledge to take them up and work them out. I entirely concur in the view that every force in the field should have a body of picked infantry—in the full acceptation of the word, not a dismounted dragoon taken from his legitimate duties—capable of accompanying and of moving as fast cavalry and horse artillery, so as to seize positions, establish posts, destroy or repair communications, whether they be roads, railways, bridges, canals, or telegraphs. I, however, would propose carted, instead of mounted, infantry men, transported in light, strong carts, going wherever guns could travel, and having this advantage, that whereas the dead-weight of the gun has to be transported on its carriage, the dead-weight on the cart is relieved by the men literally putting their shoulder to the wheel, helping the vehicle over any bad ground or obstruction. Of course, there are some countries, Afghanistan, for instance, where such carts cannot travel, neither can guns, while cavalry, and also mounted infantry, would be of little use. The men such as I propose, however, would be available if, like the guns, they were put on the backs of camels, elephants, or baggage animals. My proposal is the formation of a corps of moveable or carted pioneers, in troops or companies, of 100 fighting men each. The men should be selected from thoroughly trained infantry soldiers, who, if possible, had been on active service, men in the prime of life, say from 23 to 28, not over 5 ft. 8 in.; they should be all marksmen and known for their intelligence, and should be re-enlisted on higher pay for a certain time,—a certain proportion being taken from the Royal Artillery, for the special purposes required, such as telegraphists, &c. On joining, every man should go through a thorough course of practical instruction in (if I may so term it) Hasty Field Engineering, which course, along with his musketry, should be repeated every year. It should comprise all the essentials for seizing a house, position, &c., and rendering it tenable; throwing up breastwork for an advanced post, destroying or re-establishing communications, and, in fact, every work necessary to aid in an advance or cover a retreat. The carts should be strong and light, so as to carry as many men as possible, with arms, ammunition, and the necessary tools. Possibly, should such a construction as the old Irish stage-cars be adopted, then the well—in which the stores might be placed—might be made to be removed, and, being an air-tight box, might, with the foot and back boards, serve to form part of a light raft. The cart should, moreover, have hooks to which to fasten the led horses, which, should a move take place, would thus follow the cart. I do not enter into the question of construction, as I feel convinced that our carriage department will easily manufacture one far better than I can devise. The carts, however, should be drawn by six or eight horses, each horse being, as was the case in the old Bengal Artillery, mounted, the riders' rifles being in the cart. Presuming such a cart to be adopted, with seven men on each side and one on the top of the box, we would have per section of one cart,—one officer mounted, one horse; 15 men on cart, three men on off horses, three drivers, six horses; six mounted detachments, six horses; with lasso harness, &c., or one officer and 27 men, or 25 combatants for 13 horses. Four sections would form a troop, to which might be attached an extra cart, with hospital and other stores. My system, therefore, seems to offer the following advantages:—1. It brings more men into action with fewer horses, and requires fewer men to look after horses. 2. It enables the Infantry to carry entrenching and other tools. 3. It prevents what would be sure to result in time of peace, *i.e.*, the Mounted Infantry men aping the dragoon. 4. As less stable duties and riding drill will be required, it gives more time for musketry and engineering training. 5. It is far less expensive. 6. It would afford to the service columns, say, after an action, the services of light, useful carts, for the conveyance to the rear of wounded, &c. 7. It would greatly save the weary Infantry, as, say, in a long march, such as was daily the case in the Mutiny, if the troops could push on or take the outlying picquets, throw up a breastwork, and hold them till the column came up, and till the men for picquet had a rest, a meal, and a wash; it would be a boon that none but those who have come off a long march and had to go on picquet on arrival can appreciate. 8. Finally, this organisation is most suitable for our Volunteers, among whom the Cavalry element is so wanting, and who are so largely composed of men of superior intelligence and good marksmen. I do not profess to any originality in my ideas, for I remember when the late Sir H. Grant determined to cross the Raptee and attack the enemy in front with his infantry, he went round with his cavalry, taking with him on the guns and limbers of the Artillery as many men of the Royal Engineers as they could carry, who cut a way for the column through the terrai. Our present Adjutant-General was with the Cavalry on the occasion and the writer with the Infantry, so perhaps the recollection may recommend the scheme to Lord Wolseley's support.—I am, &c., Bonté.

The Royal Commissioners of the Patriotic Fund have been able to raise the weekly allowances to the widows of the seamen and marines lost in the Atalanta as under:—Seamen and privates, from 2s. 6d. to 3s.; first-class petty officers and serjeants of Marines, from 3s. to 4s. 6d.; chief petty officers, stewards, engine-room artificers, and colour and staff serjeants, from 3s. 6d. to 5s. The Atalanta Fund did not exceed £9,000.

EQUIPMENT FOR MOUNTED INFANTRY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I observe in your paper of June 23 a notice of a boot for cavalry, artillery, &c., patented by Brevet Major F. W. Hemming, 5th Dragoon Guards. It seems simple and excellent, and is worth a fair trial. A few years ago I left at the Military Equipment Office, War Office, a boot and legging for mounted infantry. I had served along with mounted infantry when on the staff of Sir Benjamin D'Urban, in the first Kaffir war, and I knew their great value. My boot is a short wellington, 8 in. high, sole straight, and 4 in. broad; heel, 1 in. high. The boot wears equally, and not to one side, as the usual boot does, is shifted daily, and lasts longer. The legging is merely the leg of an easy, long boot, 15 inches high in front, and 13½ inches behind. The trousers being tied at the ankle, the legging is pulled on to the knee, then the short boot, and the legging pushed down over the boot; a strapped spur and spur-piece in front conceal the junction of the legging and boot. The spur is removed and worn at the belt, in skirmishing on foot. Box spurs would not answer Mounted Infantry.—I am, &c.,

J. E. Alexander, General.

Teignmouth, Devon, July 17.

QUARTERMASTERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—As to "Observer's" remarks in your issue of July 21, about Quartermasters being unfit creatures to hold her Majesty's commission as captain or major, although that rank be only honorary, I trust you will allow me as publicly to say that *we* consider that the granting of honorary rank instead of substantive rank of captain while serving is a great slur on our position, and has doubtless been done so that, even in the execution of our own countless duties, we cannot command officers. A quartermaster is a combatant officer; his duties are as military as those of company officers; he is always amongst the men of his regiment, and it has been most conspicuously apparent lately that in war his place is at the front. His proper Army rank should be lieutenant for ten years, and then captain, with a limit to powers as is prescribed for adjutants of Militia in General Orders of 1881, No. 113, to wit:—"Quartermasters will invariably act as such, and will not, under any circumstances, assume command of the regiment." Common-sense will at once prove that there is no reason for treating quartermasters as at present with regard to their rank, of course I mean common-sense not benumbed by prejudice. I would add that the rank of major conferred on five of the captains and quartermasters for distinguished service in Egypt is empty. Your correspondent fastens on Quartermasters, and forgets Ridingmasters, Paymasters, and Inspectors of Schools. Ridingmasters should have substantive rank, but "Observer's" remarks about the inappropriateness of honorary or titular rank applies less to Quartermasters than to these other officers. I heartily sympathise with the Naval Warrant officers in their grievances, and I trust that they will get what they want, but I fear that they and the Army Quartermasters will be kept down as long as possible.—I am, &c., Quartermaster.

On the recommendation of his Royal Highness the Field-Marshal Commanding-in-Chief, 480 silver medals "for long service and good conduct" have just been awarded to as many non-commissioned officers and men of the Army, viz.—Household Cavalry, 12; Cavalry of the Line, 28; Artillery (including Royal Malta Fencibles), 48; Royal Engineers, 21; Brigade of Foot Guards, 20; Infantry of the Line, 321; Commissariat and Transport Corps, 9; Army Hospital Corps, 12; Ordnance Store Corps, 5; and General Staff, 4.

In reference to a paragraph in last week's issue, we would point out that the 102nd and the 103rd Fusiliers were not given the title of "Royal" when the reorganisation took place in 1881, but received the honour on the amalgamation of the Imperial and H.E.I.C.'s troops.

A rather unusual military demonstration took place at Chatham on Saturday. The winner of the Army and Navy Challenge Cup at the Wimbledon Meeting was 1st Drill-Serjt. Clunies, of the Chatham Division, Royal Marines, and his comrades, with the sanction of Col.-Comdt. Bland-Hunt, A.D.C., determined to give him a triumphal march to the barracks on his return to Chatham. He was met at the railway station by the full band of the division and some hundreds of his comrades, the band playing "See, the Conquering Hero Comes!" He was then placed in a chair and carried on the shoulders of six of his comrades to the barracks, accompanied by the band playing lively airs. The route was crowded with spectators, who loudly cheered the winner. On arrival at barracks, he was welcomed by Col.-Comdt. Bland-Hunt and other officers, and was carried triumphantly round the parade-ground.

Lieut. Stuart P. Garde, of the Asia, now at Portsmouth, has been placed under arrest, for trial by court-martial, for breaking out of his ship. He is said to have been one of several Naval and Marine officers who were concerned in a riot at a music-hall at Portsmouth on two occasions last week, and it is alleged that it was for the purpose of attending a renewal of the disturbances that he improperly left the ship. The police-court summonses in the matter have been withdrawn.

The Rev. J. H. Knapp, Chaplain to her Majesty's Dockyard, Devonport, announced last Sunday the relinquishment of his appointment, after nearly 30 years' service, he having attained an age when compulsory retirement steps in. The Queen has, however, appointed Mr. Knapp to the living of South Reston, Lincolnshire. It is understood that the Rev. F. C. Autridge, chaplain to the Impregnable, will succeed Mr. Knapp as chaplain to the dockyard.

The keel of a new unarmoured composite sloop, to be named the Pylades, has been laid at Sheerness. The vessel will be constructed upon the same lines as the steel corvette Comus, and will carry 12 breech-loading guns. Her principal dimensions are as follows:—Length between perpendiculars, 200 ft.; breadth, 37 ft.; displacement in tons, 1,420. She will be fitted with engines of 950 horse-power, and is estimated to cost £70,000.

NORTH BORNEO.—CRUISE OF H.M.S. FLY.

H.M.S. Fly left Singapore on April 3 on a visit to North Borneo. She first touched at Sarawak, where the ship's company gave a most interesting theatrical performance in honour of Rajah Brooke. The drama of "The Seven Clerks" and a farce entitled "The Two Potts" were most successfully rendered, both pieces going off remarkably well, thanks to the acting of several of the men, the ship's cook, Burnard, and Brown, an able seaman, acting especially well. From Sarawak the Fly proceeded to Labuan and Brunei, and then began the North Borneo tour. Papar and Gaya, on the West Coast, were the first places touched at. The country was found to be fine and rich-looking around Papar, but the bar at the mouth of the river, which is frequently impracticable, even for boats, during the north-east monsoon, has proved to be a great drawback to the prosperity of this settlement. At Gaya, some twenty miles up the coast, is a sheltered little port, suitable in every way for coasting steamers that can go alongside the wharves, but the anchorage is not very good, as the sheltered port is small, and surrounded by coral reefs; but in time, Gaya will, in the opinion of our correspondent, become the chief commercial centre of the West Coast of Borneo. That this district has not gone ahead as fast as places on the East Coast is not to be wondered at, considering all the adverse circumstances its inhabitants have had to contend against. They have been decimated by cholera in the first place, the epidemic being so bad last July and August as to stop all trade. In January the district was swept bare by tremendous floods, which drowned a great number of people, nearly all natives, besides washing away most of the cattle put out to graze. The Fly next went to Kudat, the seat of government of the North Borneo Company. It was found that the Governor was most energetic, being seldom to be found at Government House, as he spends most of his time travelling about the various stations. Kudat has greatly improved since the Fly was there in August last. The trade of the place had sensibly increased, and a goodly number of Chinese have arrived, some to start planting and others to establish stores and become traders. Pearl shells have been found in Marndu Bay, just outside Kudat, which are said to be of very good quality, and which will, doubtless, form an important item in the trade of the place by-and-by. The country, some few miles beyond Kudat, was found to be composed of rich soil, which Sumatra tobacco-planters assert well suited to the cultivation of the fragrant weed. From Kudat the Fly was taken by Com. Hope through the Mallewalle Channel to Sandakau, in reality the most important place in the whole of the territory owned by the North Borneo Company. It has progressed most marvellously since last August. Chinamen were found to have come in, in great numbers, and are said to continue arriving by every steamer from the Straits and from China. Sulus, Badjus, and natives of other tribes were also coming in, and the place presented quite a lively appearance. There is a very considerable export trade from Sandakau, done in birds' nests, damur (gum), trepang (bêche-de-mer), rattans, gutta-percha, and other jungle produce. The import and export duties, without counting other sources of revenue, were estimated last January to have produced 800 dollars a week for the past year, but in April had run up to over 2,000 dollars, and were still increasing when the Fly left. Indeed, there seemed no reason to doubt that, like the Australian colonies, the revenue of North Borneo will continue steadily increasing until it reaches several millions a year. A considerable acreage of land round Sandakau has already been taken up by the companies for planting tobacco, sugar, &c., and the tobacco crop was found to be very promising. In the town, named Elopura, land was fetching high prices. Several fairly-good houses have been built, and the Government have nearly completed a good wharf, at which large steamers will shortly be able to find every accommodation. There are already in existence, at Elopura, two jimbattans, or wharves built of nibong, which steamers drawing from 14 ft. to 15 ft. of water can go alongside. The foreshore is about to be reclaimed by a company formed in China for the purpose. Mr. Danby, the civil engineer of the company, had visited Elopura, and had laid out a large part of the new town. He was very sanguine about the success of the undertaking. Sandakau is a splendid harbour, and Elopura was found to be a most flourishing and promising town. From Sandakau the Fly visited Silam, in Darvel Bay. This place is not much as yet. The company have here started experimental plantations of coffee (Siberian), tea, cocoa, chinchona, manila hemp, and other tropical products, and so far as could be judged at the time the Fly visited the place, everything was in a most forward and promising condition. The soil appeared to be rich. Elephants and rhinoceros are met with in this part of the Island of Borneo. Walking out of the plantations, or "gardens," as they are called, a party of officers belonging to the Fly came across the track of a large elephant, which had, to all appearance, passed along the path but a very short time before their arrival on the spot. A tuskar had been seen in the neighbourhood the day before. From Silan the Fly went to Timba Mata, a large island in Darvel Bay. The soil here was found to be extremely rich, supporting a most luxuriant vegetation. Large numbers of deer and wild boar were seen, but none were shot. No settlement has yet been established in this island. From Timbumatta the Fly returned to Sandakau, and thence steamed to Sulu, a most lovely island, in which the Spaniards have a settlement, now some seven years established, but they dare not as yet go more than a mile or so from their fortified town, for fear of the natives. These, however, seem friendly enough to other foreigners. A Captain Schuck, a German, for example, has a plantation some miles out in the country, and is doing well. Here the steam-yacht Marchesa, with Mr. and Mrs. Kettlewell and party on board, was fallen in with. They had been some weeks in Sulu, and had secured a very good collection of birds, some believed to be entirely new. This yacht was again met at Sandakau on the return of the Fly, and accompanied her back through the Mallewalle Passage to Kudat, where the two parted company. The Fly and Marchesa were at Kudat on the Queen's Birthday, and dressed ship for the occasion, the battery—we can hardly call it a "fort"—of the North Borneo Company firing a Royal salute, the day being spent in general rejoicings ashore and afloat. On the return journey, the Fly again touched at Papar, where the officers indulged in pigeon-shooting, accompanied by the Resident, and enjoyed good sport. The birds are small, with bright-green plumage, and fly at a great pace. They travel in flocks, and are only to be shot just before sunset, when returning to their roosts from their feeding-ground in the jungle, during the season when the fruit they feed on is ripe. Fourteen birds apiece was the average bag on this occasion, made during the three-quarters of an hour the flight shooting lasts. A drive for deer was also attempted, but the native beaters did not succeed in driving any game before them to the guns. The deer all turned, and, as is nearly always the case in covert, ran back. All the guns having been posted in front, no deer were shot, though the piece of jungle beaten was full of game. The Fly returned to Labuan on May 31, where H.M.S. Magpie was met, Com. Vereker having just joined. The Fly then proceeded to Singapore, where she arrived on June 12, and would remain in the Straits until the return of the Champion, expected about the beginning of August. Our correspondent at Singapore, in summing-up the news he had gleaned during a visit to the Fly, remarks, in regard to North Borneo, that the opinion of all on board regarding the future prospects of the settlements visited had greatly changed since the last time the Fly was on the coast in August, 1882. The prevailing opinion on board is that the North Borneo Company will in time pull through, and do some good, but that the shareholders will have to wait for at least two or three years, if not more, before receiving any dividend to speak of. The officers were unanimous in their praise of Mr. Alfred Dent, the energetic managing director of the North Borneo Company, who arrived in England by the last mail. In the opinion of all who have visited the territory of the Company, he has been instrumental in doing a great deal of good, and during the time he has been out he has created an organisation throughout the settlements which speaks most highly for his abilities as an administrator. At the time our correspondent wrote, June 20, nothing was known at Singapore, or on board the Fly, of the recent changes made by the Admiralty in the command of several ships on the China station, whereby Com. John Hope, after being appointed to the command of the Linnet, vice Com. Harris, has been superseded in that command by the appointment, on July 7, of Com. G. W. Hill to the Linnet, while Com. Jones, of the Victor Emanuel, had been ordered to assume the command of the Fly, the Admiralty filling the vacancy thus created by appointing Com. Davis to the receiving ship at Hong Kong. In this manner, Com. Hope would be left without a command, so we can only suppose that some mistake has been made, unless, indeed, it is intended to recall Com. Hope, a step which, we are assured, would be deeply regretted by all on board the Fly.

NAVAL GRIEVANCES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—In one of your articles in the *Army and Navy Gazette* of April 28, I see you invite officers of all ranks to communicate with you respecting the grievances they now labour under, and to give their suggestions as to what reforms they would recommend. To attempt to enumerate them all would be a never-ending task, but I would draw your attention to one, perhaps only a minor one, but which still causes great discontent, in the hope you may bring it into prominence,—I mean the miserable amount of full-pay leave granted after foreign service—a fortnight for each year. It seems monstrous that, if serving in a Channel or home ship, you are allowed six weeks in each year—three times as much as after having served abroad, perhaps on some unhealthy or disagreeable station, like the East Indies, West Coast, &c. It is not that the former get too much leave, nor would reducing the amount benefit any one, but it is that the latter get much too little. It is a common saying amongst Naval officers that England is the only country they do not know; they might almost add, the only people they have not met are their relations. It is well known that, as an executive, to be in the running at all for that will-o'-the-wisp, "Promotion," you must serve continuously and in sea-going ships; so, after a long and trying commission of four years abroad, you get eight weeks' leave, and are then probably packed off for another four years. Many who can afford to do so would prefer to remain a short time on half-pay; but to refuse an appointment is damaging to one's prospects, whilst to apply for a harbour ship is asking for a sloping billet. The service has already much to thank you for; I think if you could bring your influence to bear on this subject, it would have more.—I am, &c.,

One of the Sufferers.

A correspondent sends us particulars of a "Hard Case":—"An officer now serving joined the service in 1855, obtained his lieutenancy by purchase 1856, his company by purchase 1863, brevet majority by seniority 1877, majority July 1, 1881, and has now, in 1883, been in command of a company for 20 years, and is still commanding one, with a total full-pay service of 28 years. Surely an officer of this standing is entitled to a brevet, if only to put him on an equality with the officers of the Indian Staff Corps, who, after 26 years' service, are promoted lieut.-cols.?"

Cholera.—Appalling as are the reports from Egypt, how few think of our enormous annual sacrifice of valuable lives from scarlet fever, measles, and small-pox. All heads of families should insist upon the daily use, in bed-room, bath-room, and nursery, of Wright's Coal Tar Soap, the only true and simple preventive of infectious disease, and a certain cure of all disorders of the skin.

THE ARMY MEDICAL DEPARTMENT.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—May I ask the indulgence of a few lines in your paper, to suggest one or two points in connection with the late discussion in the House on the above heading? It does not appear to have struck the disputants on one side that the conclusions at which they have arrived are illogical, even based, as they are, on their own premisses. They state that the medical officers are incapable of properly exercising disciplinary powers, and suggest, as a remedy for this inability, that they, the medical officers, be attached to regiments, with the view to their learning discipline. Now, as a matter of fact, the very officers of whose administration they complain are those of senior rank in the Army Medical Department, nearly all of whom have not only been attached, but until the last ten years actually belonged to regiments or batteries. The regimental training which in their case has failed to impart the desired knowledge, stands convicted as inefficient for this purpose, and is hardly the remedy to be adopted for the evil in question, granting that it exists. With regard to the inspection of hospitals, it is laid down in the "Queen's Regulations" that "General and other officers commanding stations will frequently visit the hospitals under their command, to satisfy themselves that they are conducted conformably to the Regulations," sec. xiv., para. 2; and the next para. lays down that other officers detailed by General officers commanding shall visit the hospitals daily. Surely, if her Majesty's orders be obeyed (not an unimportant point in "discipline"), no further legislation on this point is necessary, as it may fairly be presumed that General and other officers commanding stations, having all of them been at least attached to regiments, are disciplinarians, and therefore conform to regulation. It is further suggested that Medical officers, in order to be *au courant* professionally, shall, if attached to regiments, also do duty at the station hospital; but no increase of pay or other compensation is proposed for this extra duty. Under the present circumstances, medical officers, working as they do on Sundays and holidays just as on week-days, give more than two months' work per annum in excess of that given by any other officer, combatant or non-combatant. While acknowledging that in the "good old days" the "doctor" was the "father of the regiment," &c., it is also to be recorded that his sons were far from patterns of filial duty, for they snubbed and "sat upon" their "father" whenever he presumed to differ from them, and any semblance of authority on his part was given by privilege and concession to individual worth, not by virtue of his rank or age, but rather in spite of them. The duties of the Army Hospital Corps are essentially medical in their nature, and medical officers wish and have a right to control and command their subordinates in the great work of assisting the sick or wounded soldier, just as the combatant has the right to command his subordinates in his task of destroying human life. That the medical officers have been, and still are, most unjustly slandered by their combatant "brethren" (?) has only just begun to dawn upon the minds of the unbiassed few. Some, who gave tongue loudest at the first rush in the "doctor hunt," a little startled at their own voices, would now wish to alter or withdraw some of their statements; "the engineer fears he may be hoist with his own petard." The time has come when the question must be finally decided. Are the Army Medical Department to be allowed, and when necessary assisted, to govern their own house in peace and harmony with their combatant neighbours, or are they to exist humiliated and embittered, as in former days, the pariah appendages of regiments in the honours and distinctions of which they can have no part, either to sow or to reap? A truce to this jangling! Give us powers and privileges such as are given to our non-combatant brethren of the Commissariat and Transport Corps, and in our ranks will be found the "fathers," "guides, philosophers, and friends" to the young fellows, not of one regiment, but of any or all in the British Army.—I am, &c.,

"Semper Fidelis."

DOCKYARDMEN'S GRIEVANCES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—The speeches of Sir Thomas Brassey and Mr. Campbell-Bannerman, in moving the dockyard votes on Monday week, would tend to convey an impression that the present Board of Admiralty have, for the first time, granted permission to the dockyard *employés* in their several departments to have personal interviews, through deputation, with their Lordships unaccompanied by the head of departments. I wish to correct such impression. This boon was granted for the first time so far back as 1865, when the Duke of Somerset was First Lord, and I can speak with authority to the fact—having had the satisfaction of personally bringing the requests of the dockyard men under the notice of the Duke of Somerset through my gallant friend, Lord Clarence Paget, who was the secretary to the Board. If Sir T. Brassey and Mr. Campbell-Bannerman will refer to the newspapers of July 29, 1865, they will there see that on the previous day the Board of Admiralty, in commencing their annual tour and visiting Chatham Dockyard, then received the various deputations, inviting them to send in their applications and requests to the Board. Though I was not aware of it, that wholesome practice, which commenced in 1865, has, I presume, been allowed to fall into disuse, and while I am glad it is now renewed, it is right and proper that those who first granted the boon should have the merit of so doing, namely, the Board of the Duke of Somerset, and not the present Board of Admiralty; and I may further mention the sundry failures on the part of various M.P.'s for dockyard boroughs to carry this important object into effect.—I am, &c.,

64 Warwick Square, July 23. J. Heron Maxwell.

James Climo, the ship's corporal of the Himalaya, who narrowly escaped being buried alive in a haystack on Wednesday evening, has been sent to Haslar Hospital for treatment, as his mental faculties were found to be seriously impaired. When discovered in the rick, under the circumstances already reported, he had been absent without leave for a fortnight.

The Army.

1st Life Guards. The regiment returns to Windsor next week from Aldershot. The Rev. Arthur Robins, chaplain to the Household troops at Windsor, and rector there of the important parish of Holy Trinity, completed the tenth year of his arduous all-round work in the Royal borough on the 19th inst., and in the address which he has just written and circulated in commemoration of the occasion, he makes it very clear that the work he has done amongst the soldiers has been from first to last a labour of love. To their ready sympathy, co-operation, and liberal contributions at all times in response to his many calls, he thankfully and proudly attributes much of his success. He points to one church built and out of debt, and another, Holy Trinity, restored, with pulpit, font, choir stalls, and windows, as special gifts in aid of the restoration, and all from past or present members of the Household Brigade. It was, indeed, only a few days ago that the Royal Horse Guards, now quartered at Hyde Park, quite spontaneously got up an entertainment at the Kensington Town Hall to start a fund for the purchase of a new organ for Mr. Robins' church at Windsor. No one, indeed, doubts or could doubt the extent or the reality of the far-reaching good-will which exists between the "Bishop," as Mr. Robins' friends in the brigade are wont, we have heard, to call him, and the Household troops. All our readers will sympathise with him in his touching allusion to the health of Mrs. Robins. Years ago, he says, a celebrated physician told him that in Windsor her health could never be re-established. Some time since a great effort, we remember, was made by the three regiments of Household Cavalry to get Mr. Robins appointed to the then vacant vicarage of Kensington, where he would still have been associated with the Life Guards and the Blues, but he was passed over by Lord Cairns in favour of a very young and not very experienced man, who was many years his junior. A correspondent, writing from Windsor, pointed out in these columns some weeks ago, that the late Dean Wellesley, who used to declare that Mr. Robins was one of the best preachers he had ever heard, had, on several occasions, mainly recommended him both to Lord Beaconsfield and Mr. Gladstone for high preferment. We do not doubt it. But it is the old story. Here is a man who has never spared himself, who has actually preached over 2,500 sermons in these ten years, whose congregations are immense, whose church is too small, and whose labours have brought him conspicuously to the notice of the Prime Ministers, and a host of influential people! But for him there is no promotion, although he has never been afraid of work, and has always tried to do his duty.

19th Hussars. The command will be conferred on Lieut.-Col. Webster, in succession to Col. Coghill, C.B.

ROYAL ARTILLERY.

A distinguished-service reward of £100 per annum has been conferred on Major-Gen. G. Pearse.

Major T. W. Price, 3rd Baty., 1st Brig., Scottish Division, R.A., who was thrown from his horse and seriously injured last week at Sheerness, is progressing satisfactorily.

On Thursday afternoon, No. 4 Baty. 1st Brig., Northern Division, R.A., under command of Major H. S. Clarke, left Sheerness, and proceeded to Tilbury Fort, on completion of their annual gun and competitive practice at Sheerness.

A "Taxpayer" writes:—"Your remarks last week on the prospects of a large number of Majors of the Royal Artillery, call attention to a subject which seems likely soon to become interesting to more than the individuals personally affected. It is hardly to be supposed that the authorities remain in ignorance of the number of the above-mentioned officers who must of necessity be relegated to the Half-pay and Retirement Lists within the next few years, in consequence of having completed seven years' service in the rank of Major. Yet it is well remembered that one of the arguments adduced in favour of the new retirement scheme was, that the compulsory element would operate in the mildest form, and that only extreme cases would be affected. The compulsory-retirement rules for Majors come into operation on October 1, 1884, and a glance at the *Army List* will show how far-reaching their action must be with the present rate of promotion, unless something be done to relieve the present block. Apart from the cruel injustice and hardship to individuals, the question is one of some interest to the taxpaying public, who will hardly recognise the advantage of driving from the service a number of deserving and perfectly efficient officers, particularly when a large increase to the pension list is involved thereby. Had the rules for compulsory retirement, when first decided on for the Royal Artillery, been made to apply to the top of the tree and at once, the present outcome of a most illogical course would have been avoided. To most minds it would appear that to create a healthy flow of promotion throughout a long list of officers, it would be more reasonable to apply the remedy to the top rather than to the middle of the list. That course has, however, either through inadvertence or intention, not been adopted, or at least only in so mild a form that it is the middle that is now about to bear the brunt. How, may one ask, is the supply of professional officers, whatever they may be, promised us by Mr. Cardwell, to be kept up, in the face of enactments by which a poor man finds himself liable to be turned loose on the world at 40 or 48 years of age, without a profession and with only a pittance to starve on? All those officers about to be sacrificed took the Queen's shilling under the impression that the then Regulations would apply to them, and that they would serve as long as they were found efficient in their various grades; but now they see that the law, which is considered binding for John Company's heirs towards Indian officers, is disregarded in their case, and that what is held as a contract for one man is waste-paper for another. Space will not permit a consideration of details, else it would be easy to demonstrate how capriciously and unevenly the compulsory-retirement rules, as applied to the Royal Artillery, must affect that regiment. I trust a remedy may be found ere it is too late."

We regret to announce the death, after a brief illness, of Gen. Sir W. Fenwick Williams, G.C.B., of Kars. The gallant and distinguished soldier passed peacefully away on Thursday night at Garlant's Hotel, Suffolk Street, Pall Mall, at the ripe age of 83. He was the second son of Mr. Thomas Williams, commissary-general and barrack-master at Halifax, Nova Scotia, by the daughter of Captain Thomas Walker, and was born at Annapolis, Nova Scotia, in 1800. He was educated at the Royal Military Academy at Woolwich, and entered the Royal Artillery in 1825, becoming first lieutenant in 1827, and captain in 1840. He was employed in Turkey till 1843, and for his military services there received the brevet rank of major. Having been sent to Erzeroum, to meet the Turkish and Persian Plenipotentiaries, he took part in the conferences preceding the treaty concluded there in May, 1847, and for these services obtained the brevet rank of lieutenant-colonel. In June, 1848, he was appointed English commissioner for the settlement of the Turco-Persian boundary, and was admitted a Companion of the Order of the Bath in 1852. On being nominated British Commissioner with the Turkish army in the East in August, 1854, he was promoted to the local rank of colonel; and a few months later, to that of brigadier-general. The victory won, under his auspices, over the Russian General Mouravieff on the heights above Kars, on September 29, 1855, after the city had been invested for four months, made his name familiar to the British public. Gen. Williams and his brave comrades, amongst whom was the Hungarian the late Gen. Kmety, did all that men could do in defence of Kars, holding out sternly with the scantiest hope. Gen. Mouravieff summoned the garrison to surrender on November 14, and Gen. Williams, after holding a council of officers, sent a flag of truce, to demand a suspension of hostilities. This medium failed through unforeseen difficulties, and Gen. Williams, having demanded an interview with Gen. Mouravieff, accepted terms of capitulation. Gen. Williams, on being restored to liberty, returned to England, and was rewarded with a baronetcy and a pension of £1,000 for life, the rank of K.C.B., the first class of the Turkish Order of the Medjidie, with the rank of "Mushir," the honorary title of D.C.L. at Oxford, and the freedom of the City of London. He was also made a Grand Officer of the French Legion of Honour. He was returned member in the Liberal interest for Calne in July, 1856, and again at the general election in March, 1857, and retired in 1859 to assume command of the troops in Canada, which post he held for some time. In August, 1870, he was appointed Governor-Gen. of Gibraltar in place of Lieut.-Gen. Sir R. Airey, and this honourable post he held till November, 1875, when he was succeeded by Lord Napier of Magdala. He was for a few weeks only Constable of the Tower in 1881. The gallant general finally retired from the Army in October, 1877.

ROYAL ENGINEERS.

A distinguished-service reward of £100 per year has been conferred on Col. T. G. Medley.

Scots Guards. The Queen, at Windsor, on Saturday, decorated Pte. Robert Gaw, 1st Batn., with the medal for distinguished service in the field. Pte. Gaw was shot in the head at the battle of Tel-el-Kebir on Sept. 13, 1882, but although severely wounded, he marched with his battalion to the railway station at Tel-el-Kebir (a distance of four miles). Here the battalion was halted, and Pte. Gaw saw the surgeon and made so light of his wound that it was thought to be slight. Though suffering great pain, he remained with his battalion, proceeded to Cairo, and did duty there for five days, during which time he took his share of the guards and other duties furnished by the battalion. At the expiration of this period he could no longer continue at his duty, and was sent to hospital at Cairo, and from thence home to Netley. On March 16, 1883, the bullet was with difficulty extracted from his skull, and he is now convalescent.

21st Royal Scots Fusiliers. The *Fusee*, the regimental newspaper of the 2nd Batn., gives the following reasons to account for the fact that service in India is not so popular in the ranks as it might be:—"1. The soldier complains that his pay is calculated at 1s. 10½d. per rupee, whereas the actual value of the rupee this year is only 1s. 7¾d.; last year 1s. 8d., and therefore he is serving abroad for about seven weeks' pay less a year than he would receive anywhere else than in India. 2. He has to purchase and maintain at his own expense khaki clothing (an expensive, ill-wearing material, which makes him ashamed of himself), which he believes is issued free to his comrades at home. Why not to him? 3. The intense heat of the country, and the placing out of bounds of all topes and villages, within a radius of three miles of cantonments, on account of epidemic diseases, debarring him from the enjoyments of shooting, butterfly, &c., catching, and other out-door sports, to say nothing of walking out, render confinement to barracks compulsory, and are matters of real importance to men of spirit—of which the Army is, and should be, composed—and are worthy the thoughtful attention of administrators. A concession of the first and second subjects given above would," the *Fusee* adds, "be a small equivalent for the hardship described in the third, and a liberal bounty would be an inducement for men to re-engage who at present are banking their savings to add to the £18 or more of deferred pay waiting on them when they arrive in old England."

22nd Cheshire Regiment. Brevet Major Hare completed his period of Staff service as brigade-major at Aldershot on Monday.

23rd Royal Welsh Fusiliers. A correspondent writes:—"Having read lately about the favouritism shown to some of the most distinguished regiments, allow me, as one interested in one of those regiments, viz., the 2nd Batn. Royal Welsh Fusiliers, to state that that corps has much cause to complain. There is not, I believe, a more monotonous station for soldiers than Pembroke Dock. The place is utterly devoid of life, and it is very seldom that the men, after having done their day's duty, can find any relaxation in canteen. We have now been stationed at Pembroke since Nov., 1881, and during that time many regiments have had two or more stations."

32nd Duke of Cornwall's Light Infantry. Brevet Major Cochrane has been appointed brig.-major in China, vice Major Bury, R.A., resigned.

36th Worcestershire Regiment. Capt. Oakes has been appointed superintendent of Gymnasia at the Curragh, in succession to Capt. T. H. B. Foster, Duke of Cornwall's Light Infantry.

45th Sherwood Foresters (Derbyshire Regiment). Capt. Fort is about to retire from the service.

49th Berkshire Regiment. Mr. J. Gibbon, late bandmaster, has received from the officers of the regiment a very gratifying present of plate, on his retirement. Mr. Gibbon, who is now residing in Dover, received from Gibraltar, where the regiment is stationed, the following notification:—"I have directed Messrs. Gibson and Co., of Belfast, to forward to you a teapot, coffee pot, sugar basin, and cream jug, which the officers and myself hope you will accept as a parting present. With our best wishes for the future welfare of yourself and family, I am, &c., W. W. Corban, Colonel commanding 1st Batn. Berkshire Regiment." The articles are of massive silver, beautifully ornamented. On the teapot is engraved the following:—"Presented to Bandmaster J. Gibbon, on his retiring on pension, by Col. W. Corban and officers of the 1st Batn. Berks Regiment, as a token of respect and esteem. June, 1883."

ROYAL MARINES.

Lieut.-Col. J. Philips, C.B., R.M.L.I., who was senior Marine officer of the Mediterranean fleet during the bombardment of the Alexandrian Forts, and who subsequently did excellent service under the orders of Capt. Lord Charles Beresford in restoring order in the city of Alexandria, has arrived at Stonehouse Barracks, having disembarked from the Alexandra, and proceeded on leave of absence.

Major G. H. T. Colwell, R.M.L.I., has been ordered to embark in H.M.S. Wye, at Devonport, on the 7th prox. for passage to H.M.S. Alexandra, to replace Major and Brevet Lieut.-Col. J. Philips, C.B., who has arrived home invalided. The latter officer has been granted three months' leave of absence, and is then to be resurveyed.

Major C. F. La Coste, R.M.L.I., has been ordered to proceed to Aldershot on the 1st prox., to undergo a course of veterinary instruction.

Major C. Frampton, R.M.L.I., who was disembarked to hospital from H.M.S. Neptune, has been granted six months' leave of absence, for the benefit of his health.

The following officers of the Royal Marines will join the Excellent in October, to undergo a course of instruction in Naval gunnery:—Capt. William T. Adair; Lieuts. Ernest F. David, John L. R. Maclurcan, Shofield P. Peile, Frederick L. Prendergast, and John Stamper.

The annual inspection of the Plymouth Division of Royal Marines by Sir Charles Adair, K.C.B., Deputy-Adjutant-General of the corps, took place on Thursday and Friday of this week. A brigade of two battalions, under Col. Jones, C.B., A.D.C., was formed in the Devonport Park at 10 a.m. on Thursday, the battalions being commanded by Brevet Col. Sanders and Lieut.-Col. Graham, C.B., when a number of officers were called to the front. In the afternoon the Gun-Drill Battery was visited, and on the following day the General inspected the battalion on the parade, and concluded by seeing a party at the rifle-range. The inspection went off very satisfactorily.

54th Dorsetshire Regiment. Lieut. Prior is a candidate for the Indian S.C., and has been appointed to the 2nd Bengal N.I., on probation.

60th King's Royal Rifles. The appointment of brig.-major to Major-Gen. Walker, V.C., C.B., commanding the 1st Infantry Brigade at Aldershot, fell vacant on Monday, on the expiration of Major Hare's term of appointment. Major Hare is succeeded by Major Hutton, late assist.-military secretary to Lieut.-Gen. Sir A. Alison, in Egypt.

79th Queen's Own Cameron Highlanders. The sword presented to Major Miers was a testimonial from the officers from the 3rd Glamorgan Rifle Volunteers, in recognition of his services for five years as adjutant of that battalion, and not, as stated, in appreciation of his services in Egypt. Major Miers was an exceedingly popular Volunteer adjutant, and his old brother-officers determined not to allow him to vacate his appointment without showing in some manner the high esteem in which they hold him.

81st Loyal North Lancashire Regiment. Lieut. Wynell-Mayow, having passed the higher-standard examination in Hindostanee, has been appointed interpreter.

90th Cameronians (Scottish Rifles). Lieut. Hopkins has been granted leave from India to England for twelve months, on private affairs.

102nd Royal Dublin Fusiliers. An exchange of battalions has been sanctioned between Capt. Povah and Capt. Oates, the former officer joining the 104th and the latter the 102nd.

108th Royal Inniskilling Fusiliers. Major Dooner, now a brig.-major at the Curragh, takes over the appointment of garrison instructor at Aldershot on the 10th prox., in succession to Major Anstruther, Rifle Brigade.

Rifle Brigade. Capt. Wingfield-Stratford has been granted leave from India to England for fifteen months, on private affairs.

Pay Department. An inquiry was made in our last issue as to the rates of pay of officers in the Pay Department serving in India. They are as follows:—Paymasters, on appointment, 476 rupees per mensem; after five years' service, 506 rupees per mensem; after 10 years' service, 537 rupees per mensem. Staff paymasters, on appointment, 850 rupees per mensem. "One of Them" writes:—"I was much pleased to notice that you had drawn the attention of probationers to the great boon granted in the late Warrant, viz., permissory retirement after 25 years' service on £200 a year; but I hardly think you gave the 'concession' the prominence it deserves. When it is considered that, if a man retains his combatant commission, he will, if he has been unlucky in promotion and is compulsorily retired before obtaining a majority, be entitled to £200 a year after 20 years' service; or, if he has been more fortunate and has obtained his majority, to £250 a year after 23 years' service, or even by no means impossibly, to £300 a year after 25 years' service, it seems almost incredible that any man in his senses should voluntarily resign his combatant commission for a Department which offers him in the future a thus sadly reduced pension and *ad interim* an ambiguous and frequently very disagreeable position, heavy responsibility, and work increased, indeed, in quantity, but in kind reduced to the level of that of a junior clerk in a bank."

The Auxiliary Forces.

MILITIA.

Royal Scots. The presentation of new colours to the 3rd Batn. took place at Glencorse Regimental Depôt on the 19th inst., in presence of a large company of ladies and gentlemen who had been invited by the officers, the weather, fortunately, being most favourable for the proceedings. About 12 noon, the battalion, under the command of Col. the Marquis of Lothian, K.T., marched from the camp to the barracks, where it was formed up in line in front of the officers' mess. The usual parade of trooping the old colours having taken place, the battalion formed square, when the ceremony in connection with the presentation of the new colours was then proceeded with. The consecration service was performed by the Rev. Dr. Lees, one of her Majesty's chaplains, assisted by the Rev. Mr. Strong, of Glencorse parish church. At the conclusion of the service, the Marchioness of Lothian, accompanied by her two daughters, and Lord Charles Kerr, stepped forward in the square, when the new colours were handed to handed to her by Col. Gordon and Major Dudgeon, when she presented them to Lieuts. Carrington Smythe and Menzies (both kneeling), after which Lady Lothian addressed the battalion as follows:—"Lord Lothian, officers, non-commissioned officers, and men of the 3rd Batn. Royal Scots,—I have great pleasure in presenting these colours to you. I have a special interest in this regiment, commanded by my father for so many years, and connected so long with his family and that of my husband. With your old colours I have been familiar since my childhood. I have, therefore, the greatest pleasure in presenting these new colours to you, feeling confident that you will preserve and defend them in all honour. I have only now to express the fervent hope that the blessing of God may rest on the battalion, and the regiment of which it forms a part." The Marquis of Lothian then, on behalf of the regiment, made a most appropriate and effective speech, referring to the old colours which were presented by the Duchess of Buccleuch 26 years previously, on the occasion of the battalion receiving directly at the hands of the Sovereign herself their former title of "Queen's Regiment of Light Infantry." He remarked, with reference to the recent change of title, that the battalion had great reason to be proud of having become an integral part of so famous a regiment as the Royal Scots, and he felt confident the battalion would always do credit in its new position. In conclusion, he expressed regret that the colonel of the battalion, the Duke of Buccleuch, was unable to be present in consequence of public official duties. All the movements in connection with the proceedings were performed with the greatest precision and efficiency, which elicited the highest praise from many officers of the Regular Forces who were present on the ground.

THE VOLUNTEERS.

City of London Artillery Brigade. This corps, which has had a somewhat chequered career since its origin, about two-and-twenty years ago—having been at one time in administrative alliance with the old 1st Middlesex Artillery, which it finally absorbed, as it has now absorbed the 1st Surrey Corps, a much bigger body than itself—made a very fine appearance, so far as mere numbers go, at the official inspection last Saturday. This was the first inspection since the old City and Surrey Brigades have been consolidated; and whereas the former corps, at last year's inspection, mustered 266, and the latter 554—together, 820—the inspection strength of the reconstituted brigade was 957, out of an enrolled strength of 1,118, only 24 of the absentees being without leave. This parade of 957 is only beaten by one other corps in the Metropolitan District, the 3rd City of London (over a thousand). The brigade retains its 16-battery establishment, and formed a battalion of that number of companies at the inspection, but a large portion of the muster was made up of recruits, and a band or bands unnecessarily large, two-thirds of which might very well have been used to widen the too narrow company fronts, some of them but sixteen strong. Lieut.-Col. Hope, V.C., was in command. The corps assembled at Wellington Barracks, and some time was lost in marching to the Horse Guards for the march-past, for nothing but the march-past. The manual and firing, and about five minutes' very elementary battalion drill (by only half the corps, too), were performed there, all of which have frequently been managed at Wellington Barracks by corps of much greater width. The ugly formation of the City of London Artillery Volunteers was a great hindrance in starting for the march-past, and suggested that half the number of companies would have been much more handy. In the column movement, distance appeared to have very little attention. The dressing was better, as it could hardly fail to be with such moderate companies. The best part of the march-past was, however, the double. The manual and firing exercises were not a grand performance, and the corps evidently needs brushing-up in these respects. After some work with the guns at Wellington Barracks, the corps was dismissed, after some encouraging words from Col. Finch, R.A., but it has evidently a good deal of leeway to make up, before it equals the other metropolitan artillery corps.

3rd V.B. Essex Regiment. This battalion was inspected on Saturday in West Ham Park by Col. Hand, commanding 44th Regimental District. Under Lieut.-Col. Birt, the muster was 563 of all ranks. It is to be hoped that on another occasion a more suitable site may be found for the drill, which on Saturday was carried out amid hostile demonstrations of cricketers and others.

13th Lancashire Rifles. Col. Bell inspected this battalion on Saturday last at Southport, when 448 out of the 477 on the rolls were on parade. He commended the drill and muster, but remarked strongly upon the talking in the ranks, and hoped, on the next occasion he had to inspect the corps, some of the officers would be better up in their work.

17th Lancashire Rifles. This, the Salford Battalion, was inspected last Saturday by Col. Cotton, 47th Regimental District. Lieut.-Col. Sharratt's command turned out strongly. At the close of the inspection, Col. Cotton touched upon several points in which there was room for improvement, but said the members were a fine body with a smart appearance, and, as far as he had the opportunity of seeing the drill, it was very satisfactory.

The trial of the guns of the Chinese corvette Ting Yuen, a few days ago, at Swinemünde, with a scratch crew from the German Navy, seems to have ended somewhat comically. The vessel has two turrets, each armed with a couple of Krupp guns of 30·5 centim. calibre, which had already successfully stood the test of an extra charge of powder at Essen; but it was also necessary to test the effect of the concussion of these monster cannon on the corvette itself. According to an account published in the *North German Gazette*, a large quantity of skylight and window-glass was smashed, a thick iron rail on the bridge was wrenched off, a funnel was snapped in two, the deck was strewn with coals jerked up from the coal bunker, some wooden furniture was shattered into splinters "which the gentlemen could put in their pockets and carry away with them as mementoes of the occasion," while one of the visitors was knocked down. The same fate would certainly have befallen others had they not held with steadfast determination to rails and tackle. The greatest effect was naturally produced when the four big guns were fired together. The cannon being loaded, the turrets, for safety's sake, were cleared of the men, and then, on a given signal, one solitary gunner pulled "with all his might" at the ends of four long cords which had been attached to a bar. The shock was tremendous, and the damage in smashed glass, wrenching off of iron rails, and disturbed coal-bunkers, &c., was immense. "Truly a triumph of German industry," writes the Naval correspondent of the *North German Gazette* with reference to the fact that the Ting Yuen, or "Everlasting Peace," was put together at Stettin.

"J. W. B." writes:—"Anent what appears in your last issue concerning special marks worn by defaulters, may I be allowed to remark that in the Italian Army all defaulters are obliged to don the 'nappina nera,' or black cap-band? As in most other matters, however, we must acknowledge that this detail has been thoroughly thought out by the Prussians, and admit that their principle of temporarily depriving a soldier of an honourable distinction (just as we deprive an officer in arrest of his sash and sword), is preferable to the plan of compelling a defaulter to wear a dishonouring mark. In this country we might mark defaulters by depriving them of their collar badges, or some such small ornament, while they were undergoing punishment."

Mr. Silas Winter Parker, R.N., paymaster of the Duncan and Royal Naval Barracks, Sheerness, has been appointed to the Alexandra, flagship of Vice-Admiral the Lord John Hay, K.C.B., Commander-in-Chief on the Mediterranean station. This officer, during his lengthened stay in Sheerness, has won for himself the golden opinions of all. He was always ready to extend a helping hand in a good cause, and thoroughly earnest in everything he took in hand. He will be greatly missed by a large circle of friends, who most cordially wish him a happy and a prosperous future. Mr. Henry H. P. Shanks has been appointed as Mr. Parker's successor.

A correspondent writes:—"In illustration of your correspondent 'Observer's' letter in the *Army and Navy Gazette* of the 21st inst., and your remarks on the system of conferring honorary rank on officers of the Army and Navy, permit me to instance a recent occurrence:—Amongst the visitors at a country house were a colonel serving on full pay and an honorary major-general, accompanied by their wives. The colonel was senior to the honorary major-general, both by length of service and as colonel, but the honorary rank obtained by the latter on retirement obtained for him and his wife precedence over his senior officer and his wife, the matter being further improved by the fact that the honorary major-general had not been a soldier for years, he having actually given up his profession and taken a civil appointment in India, which, no doubt, he found to be more agreeable and profitable than soldiering. This will give some idea of how honorary rank detracts from that actually gained in the service, the country being flooded with officers masquerading in ranks to which they have no real claim, as witness the Retired List, with men retired actual captains having the honorary rank of lieutenant-colonel, colonel, and major-general. For goodness' sake, let there be no more of this! Let us be known for what we really are, and let there be an end, so far, at all events, of sham."

The Admiralty have sent instructions to Chatham directing that the last of the large steam basins constructed at that dockyard is to be opened without the formal ceremony which was proposed to be carried out. In the order dispensing with the opening ceremony the Lords of the Admiralty gave expression to their high appreciation of the zeal, ability, and satisfactory manner in which Mr. E. A. Bernays, the superintending engineer at Chatham Dockyard, has carried out the important works in connection with the new docks, basins, and other works at Chatham, their Lordships adding their deep regret that the Crown will shortly be deprived of his invaluable services by his retirement on pension.

THE ARMY RIFLE MEETING.

(FROM OUR CORRESPONDENT.)

The Fifth Annual Army Rifle Meeting, for prizes of a total aggregate value of about £500, opened on Thursday, at the Cæsar's Camp Ranges, Aldershot, and with fine weather and a large number of entries, upwards of 1,500, promises to be successful. The Meeting is under the patronage of the Field-Marshal Commanding-in-Chief, the President is Gen. Sir Daniel Lysons, K.C.B., and the Executive Committee consists of Major-Gen. H.R.H. the Duke of Connaught, Lieut.-Col. Field, 15th Hussars, Major Egerton, 1st Dorset Regt., Lieut.-Col. Simpson, York and Lancaster Regt., Col. Stevenson, C.B., Royal Irish Fusiliers, Lieut. Bond, Royal Engineers, and Major Burton, D.A.A.G., and hon. secretary and treasurer, assisted by a staff of officers. Some 22 targets were brought into requisition for the various matches, brief results of which, up to Thursday night, are given below:—

1. The Soldiers' Plate.—20 guineas, in 38 prizes, subscribed at Lloyd's, per Major W. H. Allsopp; open to rank and file only of the Regular Army who have enlisted since July 26, 1881.—Sapper Goddard, R.E., 31 points; Sapper Gibbs, R.E., 30; Pte. Cox, 3rd Batn. Rifle Brigade, 30; and Pte. Hodges, 1st Dorset, 29.

2. The "Army."—200 yards, seven shots; open to rank and file of the Army and Royal Marines, and to seamen of the Navy; 45 prizes.—Corpl. M'Leod, R.E., 32 points; Bugler M'Coombie, 2nd Shropshire, 31; Corpl. Alger, 1st Dorset, 31; Pte. Bradbury, 1st Dorset, 31; Wheeler Faulkner, R.E., 31; and Corpl. Johnson, 3rd Rifle Brigade, 31.

3. The "Serjeants."—200 yards; 25 prizes; open to serjeants of the Army and Royal Marines, and petty officers of the Navy.—Colour-Serjt. Hennessy, 3rd Rifle Brigade, 32 points; Colour-Serjt. Smith, 15th Regimental District, 31; Serjt. Lowe, 2nd Shropshire, 31; Troop-Serjt.-Major Carter, 4th Hussars, 31; Serjt.-Major Carruthers and Serjt. Keen, of the 33rd Regimental District, 31 each; Serjt. Broderick, 2nd York and Lancaster, 31.

4. The "Officers."—200 yards; five prizes; open to the Army, Navy, and Royal Marines.—Lieut. Banon, 2nd Shropshire, 31 points; Qrmr. Dimmer, 3rd Rifle Brigade, 30; Lieut. Sandbach, R.E., 30; Lieut. Ward, 1st Scottish Rifles, 30; and Lieut. Bagnall, School of Musketry, 30.

5. The "Carbine."—Open to all corps of the Regular Army, armed with the Martini-Henry carbine; 7 shots at 200 yards.—Farrier T. Hall, 3rd Hussars, 31 points; Sapper White, R.E., 29; Pte. Leigh, 2nd Dragoon Guards, 29; Pymr. Hill, 4th Hussars, 29.

The competitions in progress yesterday were the Young Soldiers', the Army, 500 yards; Serjeants', 500 yards; Mappin and Webb, 500 yards; and the Regimental Trophy, results of which, as well as those of to-day, will be given next week. To-day's contests are of a very interesting character, and include a mounted competition, the Infantry Running Match for the Challenge Cup, presented by the Duke of Connaught, and the match for the Bowyers' prizes at moving targets and unknown distances.

A correspondent of the *Shanghai Courier* writes as follows:—"The British Squadron, under the command of Admiral Willes, which has been lying at this port for several days, left on June 5 for Chefoo. The Admiral and his Staff and H.M.'s Consul left at the same time in the Vigilant for Nanking, on a visit to the Viceroy. The visit of the squadron has caused great excitement, and has been the source of most extravagant rumours amongst the natives. The Taoutai left suddenly, if report may be credited, to avoid receiving the Admiral, and to prevent any display of retinue in the native city. The subordinate officials have been rushing about amongst foreigners to ascertain the reasons for this display of Naval power on the part of the British authorities. Telegrams received from Nanking stated that the Viceroy had assembled 10,000 troops within the city; but whether the Admiral saw and was duly impressed with this parade of military strength, or why or wherefore such a review was held, we have not yet been informed. The great event, however, remains to be mentioned, which was an exhibition of the electric light on board the Audacious, which took place on two evenings during the stay of that ship in port, and was carried out in connection with torpedo experiments. Anything more beautiful has never been witnessed by residents, especially when the bright, clear light brought out in full relief every vessel of the Fleet, even the white sides, rigging, and people on board. The duplex signalling, with double arms of light visible six miles distant, afforded tens of thousands of Chinese a sight they had never before seen. It is said that hundreds of them were so frightened that they packed up all their worldly goods and prepared to clear out, as they were under the impression that an attack was intended. Others witnessed and admired it from the shore, uttering exclamations of surprise at every turn of the light."

On Saturday Rear-Admiral Sir Anthony Hoskins, commanding the Reserve Squadron, paid a return visit to the Lord Provost of Edinburgh. The Reserve Squadron weighed in the afternoon and left Leith for the south, arriving at Spithead on Thursday.

"Observer" writes from Durban:—"I see in the columns of the last edition of your paper that has reached here that rolls are called for of the married families of the non-commissioned officers and men of regiments serving in Egypt. I venture to call your attention to the fact that there are regiments serving in South Africa whose married people have been separated for close on three years, and still no sign of their being united, viz., the 6th Dragoons, C Baty. 1st Brig. R.A., and the Welsh Regt. I only ask,—Is this fair? and entreat you, in your usual generous spirit, to bring about the reunion of these families so long separated. We all know to what expense they are put, as well as what anxiety must exist on both sides. I must tell you that these regiments are losing many valuable and old non-commissioned officers and men, on account of this prolonged, unnecessary, and unjust separation."

AYALA & Co.

CHÂTEAU D'AY CHAMPAGNE.

EXTRA QUALITY DRY.

AS SUPPLIED TO ROYALTY, THE MILITARY AND NAVAL MESSES, MALTA UNION CLUB, &c., &c.

SCHWEITZER'S COCOATINA

ANTI-DYSPEPTIC COCOA OR CHOCOLATE POWDER.
Guaranteed Pure Soluble Cocoa, without Sugar, Spice, or any Admixture.

Specially adapted for Ships, Camps, Sportsmen, &c., being in a concentrated form, made with BOILING Water. Keeps in all climates, and palatable without milk.

Being all Cocoa, it is four times the strength of preparations mixed and therefore *weakened* with arrowroot, &c., and is in reality cheaper, a Tea-spoonful to a Breakfast Cup costing less than a halfpenny.

The Faculty pronounce it "the most nutritious, perfectly digestible Beverage for Breakfast, Luncheon, or Supper," and invaluable for Invalids and young Children. Samples per post.

Highly commended by the entire Medical Press.
Adopted as a Medical Comfort in H.M.'s Royal Navy.
In air-tight canisters at 1s 6d, 3s, 5s 6d, &c., by Chemists and Grocers.

CHINA and GLASS for REGIMENTAL MESSES.

CAUTION.—*The Original and Old-Established Business of*

PELLATT AND WOOD,

is still carried on at their SOLE ADDRESS,

25 BAKER STREET,
PORTMAN SQUARE, LONDON.

The Speciality of their well-known Firm is the SUPPLY of CHINA and GLASS for REGIMENTAL MESSES. And they are honoured with the Custom and Patronage of the PRINCIPAL REGIMENTS in Her Majesty's Service.

PELLATT and WOOD particularly request the Officers and Presidents of Regimental Messes will be careful to address all Orders and Communications to them at their SOLE ADDRESS,

25 BAKER STREET.

BOOKS, Etc., RECEIVED FOR REVIEW.

NOTICES TO CORRESPONDENTS.

A WOULD-BE NAVAL CORRESPONDENT.—We quite appreciate your dilemma, but you need have no fear. We never divulge the name of a correspondent. You can write to us in the fullest confidence. Should you require remuneration, you must state that such is the case when you next write.

M. H.—We entirely concur in your view.

CAMBRIA.—We hope to be able to give you next week the information you ask for.

Friday night's *Gazette* contains a list of Unclaimed Soldiers' Balances.

Several Naval and Military letters are in type, but are forced to stand over through want of space.

The ARMY AND NAVY GAZETTE this week contains four pages extra.

The NAVAL AND MILITARY STATIONS are published by the ARMY AND NAVY GAZETTE on the first Saturday in each month.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenschaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.

LONDON, SATURDAY, JULY 28, 1883.

THE Greenwich-Hospital Bill was read a second time last Monday. In this manner, bit by bit, the recommendations of the Naval Pensions Committee, whose Report was published in these columns, are being carried out by the Admiralty. But, as we have before stated, we deem it a grave mistake to reduce the number of boys being educated at Greenwich Hospital School, and we feel convinced that the Admiralty will not gain the thanks of our seamen, nor will they deserve them, for creating a Seamen's Widows' Pension Fund in this "robbing Peter to pay Paul" manner. Up to now, the children of seamen who died in the service of their country have been educated at Greenwich School, and, whether their mothers remarried or not, that education, and the after advantages in life which it conferred upon them, was assured. The Bill now before the House would alter this in a marked manner. It will, if it becomes law, enable the Admiralty to curtail the number of boys educated at Greenwich. The money thus saved will be devoted to a Widows' Pension Fund. A widow pensioned from this fund will only be entitled to draw her allowance so long as she does not remarry. Should she remarry, she will lose her pension. Hence it is to be feared that, as the majority of seamen's widows are young women with families, what has so often happened before will happen again. The widow will not remarry. She will, on the other hand, not remain single. A younger family will possibly spring up, and the father will devote the woman's pension to his own use and that of his illegitimate children and their mother. To do this, he will turn the legitimate offspring of the man who earned that pension out of doors, and into the street. Even the Board Schools will be unable to remedy the evil thus done, and Sir Massey Lopes was fully justified in expressing a hope that there was no intention on the part of the Admiralty to reduce the number of boys educated in the Greenwich Hospital School, in order to carry out the pension scheme for which the Bill provides. Commander Price also regretted deeply that the Admiralty have ignored the offer made by the Seamen of the Fleet to provide a fund for this purpose by means of savings from their pay, provided they received some assistance from the Government. In the opinion of the honourable and gallant Member for Devonport, the House was entitled to some information as to the charge that was likely to be thrown upon the funds of Greenwich Hospital by the provisions of the Bill, but no information of the kind was forthcoming. The course taken by the Admiralty in this matter constitutes, as stated by Commander Price, "an absolute breach of faith with the men of the Navy," and it is to be hoped that the House will exact a distinct pledge from the Admiralty that the claims of the children of our gallant seamen who fall in their country's cause will in every way be respected, and safeguarded from the evil we fear is only too certain to befall them should the Greenwich Hospital Bill, in its present state, become law.

A Society paper which recently made the announcement that General H.S.H. Prince Edward of Saxe-Weimar is to succeed to the vacant Colonelcy of the Scots Guards may be reminded of the fact that the Commander of the Southern District passed his regimental service in the Grenadier Guards, and never at any time wore the uniform of the old Scots Fusiliers. With such well-known ex-officers of the regiment to choose from as Generals Sir Francis Seymour, J. H. Elphinstone, Dalrymple, the Marquis of Hertford, and Viscount Bridport, there is very little chance of the Colonelcy being filled from outside; and the selection will, there is little doubt, be made from the batch of General Officers we have named.

The testimonial to Captain E. Walter, in recognition of his long and disinterested services as founder and commanding officer of the Corps of Commissionaires, has taken shape. A sum of about £450 has been subscribed, with which the Committee has decided to purchase a piece of plate. The execution of the work has been entrusted to Messrs. Hunt and Roskell, and a design has been selected, consisting of a handsome plateau, carrying a central candelabrum, supported by two figures of commissionaires, and two fruit-stands. It is proposed to present the testimonial at a general meeting of the subscribers when the work is completed. The date of the meeting, of which due notice will be given, will probably be late in the autumn.

Consequent on the death of Sir Thomas Milles Riddell, Bart., of Ardnamurchan, an officer of the Army Pay Department comes in for a baronetcy, the title passing to his cousin, now Captain Sir Rodney Stuart Riddell, Bart., Paymaster of the 70th Regiment.

Some time ago we called attention to the formation of the Auxiliary Forces Uniform and Equipment Company, public announcement of which is now made. The delay that has occurred in its appearance has been of the greatest advantage, as the basis of the company's operations has been greatly extended, and made more important by the acquisition of the well-known army clothing factory of Mr. Richard Stanway, at Newcastle-under-Lyme, which has been for some years at work for the manufacture of uniforms for the War Office, Yeomanry, and Volunteer regiments, railway companies, and other public bodies. The system originated and brought to a state of perfection by Mr. Stanway enables the factory to turn out work in very large quantities, and on most favourable terms, additional capital being only required to increase its productiveness and profit to a great extent. Mr. Stanway will join the Board after allotment, and continue his services as director of the manufacturing establishments of the company, of which Major-General Manley Dixon, C.B., late Superintendent of the Royal Small-arms Factories, is the chairman.

The International Military Match at Wimbledon was resumed and concluded last Saturday, and resulted in favour of the Home Team by 45 points, viz., 1,951, as against 1,906. Up to 800 yards, the odds were greatly in favour of the visitors, who were shooting in good form. At 900 yards, however, their difficulties commenced, a troublesome wind and constant variations of light sending several of their men to grief. From this point the British Team knocked off the majority which stood against them, and though their practice did not realise the expectations formed, went right away. The total of the British was 24 less than that which won it the match at Creedmoor last September, while that of the Americans was 101 points more. Ten sections of Household Cavalry and Cavalry of the Line entered for the Royal Cambridge Challenge Trophy, the contest for which was watched by a large assemblage of spectators. Each section had to ride about three-quarters of a mile, taking three flights of hurdles in the course, and fire, dismounted, not more than five rounds at each of the distances of 500 and 600 yards, the time allowed being ten minutes. The best time was made by the Royal Horse Guards, who did the course in seven and a half minutes, but made indifferent practice compared with the 4th Hussars, who put on the good score of 90 points and rode in half a minute before the time allowed, and took the shield, a cup value £21, given by Messrs. S. Smith and Son, of King Street, Covent Garden, and £25. The second prize, £15, was won by the 5th Dragoon Guards, 81 points, 8 min. 53 secs., and the 3rd prize by the 3rd Hussars, 77 points, 8 min. 36 secs. The next in order of merit were the 11th Hussars, 15th Hussars, Royal Horse Guards, 4th Dragoon Guards, and 7th Dragoon Guards. The 7th Hussars made the next best score to that of the 4th, but in racing for home one of the troopers was thrown and seriously injured, while the 1st Life Guards retired at the close of the meeting. The prizes were distributed by the Duchess of Teck.

The calamity which has overtaken the Zulu King, after being restored to his country by the English Government, will we fear, greatly weaken the prestige of England in the native South-African mind. Usibepu, whose forces have routed those of Cetewayo, killing the Zulu King and all his wives and chiefs, has thus openly defied the power of England. It remains to be seen what course the Government of Mr. Gladstone will take. But a slap in the face more or less matters very little when once one commences to eat "humble pie."

It is, we believe, settled, that in the event of an increased epidemic of cholera among the troops in Egypt, a portion of the force will be removed to Cyprus, in the opinion of more than one of our Cabinet Ministers, "a pestilential useless island."

There appears to be some chance of General Thibaudin losing the post of War Minister. M. Jules Ferry never liked him, and would have gladly thrown him overboard, after he had done the dirty work for which he was introduced into the Cabinet; but lo! the ultra-Liberals took up cudgels for the General, and insisted that he should remain in office, and save the Republic. Alas! a few days ago a discussion arose on the subject of railway conventions, in which the Government took one side, and the Radicals the other. An appeal was made to General Thibaudin, who was asked what he thought about the conventions in a Military point of view. What could the unfortunate War Minister do? To disapprove of the conventions, would be to upset the Government, to approve of them would doom him to lose the support of his Radical friends. He replied in ambiguous terms worthy of the G.O.M., and has lost the confidence of both parties.

On the 18th inst., the Earl of Longford, G.C.B., rose in the House of Lords to ask the Under-Secretary of State for War, Lord Morley, "Whether it was intended to take any steps to redress the injury that Colonels with Purchase rights who held that rank prior to October 1, 1877, had suffered by being compulsorily removed before the time the removal would have taken place by the terms of the Warrants in force when they were promoted to the rank of Colonel." Lord Longford made an excellent speech, which forcibly explained these grievances, and the necessity of redress or independent arbitration. The Earl of Morley replied. We can only hope that Lord Morley was incorrectly reported. The fact is, and it is well known, that the War Office have not a leg to stand on in this matter, as compulsory removal should never have been applied to officers who purchased commissions under the rules and regulations of the Army, or officers who had Purchase rights, without the return of the Regulation money, to put them on a par with their non-Purchase juniors, to make promotion for whom they were removed from the Army. The Army has been reduced to a sad state, when officers are obliged to appeal to Parliament for redress, and the Commander-in-Chief is no longer able to protect them.

We are glad to see that the three vacancies in the grade of Chief Paymaster in the Pay Department (alluded to in our last number) have been filled up at last, and the promotions antedated to April 1. We observe, however, that the authorities have exercised their right of selection, and have passed over four officers, Majors Fereday, Wray, Thorpe, and Currie. These officers have respectively five, three, seven, and eleven years to serve, before they can be compulsorily retired on the score of age; and all hold important financial positions. What can be the meaning of such wholesale supersession? To pronounce men with such service and varied experience unfit for the higher rank seems most incongruous. two of them, at any rate, having performed exactly the same duties as those devolving upon Chief Paymasters. The Pay Department at the present moment is some 35 to 40 under its establishment, and the War Office have recently thrown out the bait to subalterns to join it. When men see their seniors passed over for apparently no reason, is it likely that probationers will come forward to fill up the vacancies?

The state of the Medical Department of the Army was brought before the House of Lords on July 20 by Lord Bury, who, in referring to the Report of the Committee on "Army Hospitals Services," moved a resolution, "That while the individual Medical officers in Egypt behaved admirably well, the system under which they worked did not successfully stand the strain put upon it; that the Military authority exercised by the Medical officers was inconvenient; and that discipline in hospitals ought to be administered by combatant officers, leaving the Medical officers medical duties only; also, that Medical officers ought to be attached to regiments, instead of being detailed for duty day by day from station and other hospitals." His lordship very justly observed that the subject was one independent of party, for the care of our soldiers was a matter which nearly touched us all; and he then argued that the great change which took place in Army Medical administration in 1873 was not put to the test until the Egyptian Campaign, when it did not stand. He referred to the evidence given before the Committee by Lord Wolseley, Colonel Knox, and Colonel Maurice, as to the condition of the field hospitals, and those at Ismailia and Cairo, with regard to their state of cleanliness, to the supplies of food, medical comforts, and necessaries, and to general attendance; and showed that there was not only a great want of organisation, but an insufficiency of men to do the work of the hospitals. In supporting that portion of his motion with regard to discipline, his lordship said that Medical officers no longer had an opportunity of carrying on the regimental life they formerly enjoyed, for they lived out of barracks, apart from the soldiers, and thus had no chance of learning discipline; and that owing to the frequent change of medical men, the present system fostered malingering, because the Medical officer was not attached to a regiment sufficiently long to be able to learn anything about the men with whom he had to deal. All the evidence bore out that no fault was to be found with the Medical officers individually; but the fact that the nursing in the hospitals was indifferent, and the discipline among the subordinates unsatisfactory, was due to the system under which the Medical Department of the Army now laboured. The Duke of Richmond and Gordon thought that the alteration which had been made in the Army Medical system was the worst of the many changes that had been introduced into the Army during recent years, and he advocated a return to the old system, with a remark that the question of expense was the last thing that should be considered. The Duke of Cambridge said that "although we could not go back to everything that had been so thoroughly changed, yet he wished that a medical officer should be attached for two or three years to a regiment, and perform all the medical duties with that regiment." The Earl of Ellenborough and the Marquis of Hertford both spoke in favour of an alteration in the present system; but Lord Morley disagreed, and failed to see how the defects complained of would be remedied by the adoption of the proposal, and, with regard to discipline, the Committee felt the importance of unity of control, and that it should be vested in a medical, and not a military officer. Thus opinions on the subject are still, and they always will be, divided. There can be little doubt that a regiment should have medical officers of its own, to move with and become acquainted with its personnel. It is better for the men, inasmuch as they are known to their surgeons, who, when they come into their hands, have some knowledge not only of their manner of life and character, but of their constitutions, and very possibly of previous medical treatment. Under the station-hospital system strange men get into strange hands, and there is no mutual confidence on either side.

Mr. J. Ball, the head master of Holy Trinity School, Guildford, has set an example in the military training of the boys placed under his charge which might with advantage be copied. There are annually plenty of school-drill competitions, in which the boys show their capacity for forming fours and marching-past; but beyond these, we have upon no occasion witnessed such an exhibition as that at which Colonel Lloyd, commanding the 2nd Regimental District, and other officers, were present, on Wednesday, at Guildford, and in which the band of the Militia assisted. The little corps of about 150, "officers, non-commissioned officers, and men," armed with dummy wooden rifles, went through a long drill, which included changes of front, deployments, skirmishing to the sound of the bugle, flag-signalling, and the bayonet exercise, in a manner which was absolutely faultless, and, it need hardly be said, created a profound impression among those who witnessed it. We understand that Mr. Ball, who served for many years in the Guildford Volunteer Corps, has brought the little fellows to this extraordinary state of perfection by devoting only two hours per week to the work, and beyond the gratification he experiences in carrying out a patriotic object, receives no payment for it. During the last nine years, he has in this manner trained over 1,000 boys.

The appointment of Brigade-Major of Cavalry at Aldershot is about to become vacant, by the promotion of Major P. H. S. Barrow, C.M.G., who obtains the junior lieutenant-colonelcy of his regiment, the 19th Hussars.

It may be interesting to note that at no previous period of our military history have so many officers from the ranks held commissions in the Army as at the present day. In the Cavalry alone there are 11 Captains and 31 subalterns who have commenced at the bottom of the ladder; while in the Infantry of the Line, two Lieutenant-Colonels, two Majors, 11 Captains, and 28 subalterns have gained their first military experiences in the ranks. That the promotions in the Cavalry should have exceeded those in the Infantry, is explained by the fact that the majority of the present-day aspirants to a commission from the ranks select the mounted branch of the service as the commencement of their career. Two regiments—the King's Dragoon Guards and the 14th Hussars—have each four officers from the ranks, exclusive, of course, of the Quartermasters; while the 3rd Dragoon Guards and the 6th Inniskillings each count three. Seven subalterns, it is pleasing to add, have been promoted for services in the field, viz.:—Lieutenants Harry Finn, 21st Hussars; William Greer, 72nd Seaforth Highlanders; Hector M'Donald, 92nd Gordon Highlanders; and Algernon Caulfeild, 5th Fusiliers, for Afghanistan; John Ross, 90th Light Infantry, and Ralph Egerton, 2nd West India Regiment, for South Africa; and Thomas Souter, 1st Battalion Black Watch, for Egypt.

The Navy.

◆

ADMIRALTY, July 20, 1883.

Acting Engineer William Hofsommer Grant has been confirmed as Engineer in her Majesty's Fleet, with seniority of March 23, 1882.

ADMIRALTY, July 23, 1883.

The under-mentioned Engineers have been promoted to the rank of Chief Engineer in her Majesty's Fleet, with seniority as stated against their names:—Charles Francis Hulford (July 13) and Ivie Alexander Couper (July 16).

APPOINTMENTS.

Captains—Francis M. Prattent, to the Urgent, vice Purvis (as Commodore at Jamaica); Loftus S. Jones, to the Belleisle, vice Prattent.

Staff Commanders—James R. Quinn, to the Asia, additional, for service in the Crocodile; John J. Covey, to the Flora, additional, vice Rowe; Benjamin S. Jackson, to the Asia, for the Dreadnought, vice Covey.

Lieutenants—Robert Q. H. Armstrong, to the Iris, additional, vice Wells; John Martin, to the Invincible, additional, vice Pocock; Hugh Coteswortb, to the Monarch, vice Risk; Francis E. J. Tottenham, to the Miranda, vice Hughes.

Navigating Lieutenant—Henry Baynham, to the Pembroke, for the Sphinx.

Midshipmen—Thomas Jackson, to the Achilles; George R. Mansell, to the Invincible; Cecil F. Dampier, to the Boadicea; George S. Hockin and Vivian O. L. C. de Crespigny, to the Agincourt.

Naval Cadets—Henry G. G. Sandeman and Cecil H. A. White, to the Minotaur; William D. Church, Alexander P. Davidson, and Basil H. Fanshawe, to the Northumberland; Alfred C. Sykes and William Winter, to the Achilles; George I. Grove, Robert W. Jackson, and Edward Kelly, to the Agincourt; Harry L. d'E. Skipwith and Hon. Randle A. Bootle Wilbraham, to the Alexandra; Richard D. Shaw and Philip W. Dumas, to the Monarch; Cecil J. R. S. Learmonth, Randle M. Lambert, and George H. Borrett, to the Superb; Maurice Woollcombe, to the Temeraire; Thomas C. Smyth, Edmond H. Parker, and Hastings F. Shakespear, to the Invincible; Lord Gifford, to the Dido; Alexander Gillespie, to the Tenedos; Robert F. Scott, to the Boadicea.

Surgeons—George W. Low, to the Agincourt, vice Brunt; William M. Lory, to the Frolic; Henry G. Jacob, to the Agincourt, vice Lory; John B. B. Triggs, to the Duke of Wellington, vice Jacob; Thomas D. Gimlette, to the London, vice Peyton; Isaac H. Anderson, to the Forester, vice Lucas.

Paymasters—Silas W. Parker, to the Alexandra, vice Dewar; Henry H. P. Shanks, to the Duncan, vice Parker.

Engineers—Thomas S. Stanlake, to the Pembroke, additional, for the Forward; Edward Jackson, to the Helicon.

Assistant-Engineer—William J. Black (acting), to the Inflexible.

Clerks—William B. Whyte, to the Minotaur; George H. D. Sarratt, to the Malabar.

Chief Gunner—William Taylor, to the Duke of Wellington, vice Gundry.

Gunners—Edward Walker, to the Pembroke, for the Forward; Charles May, to the Vernon, vice Bye; Thomas Davidson, to the Cambridge, additional; Thomas Larking, to the Asia, for the Colossus, vice Taylor; Richard A. Cathie, to the Pembroke, for the Sphinx.

Boatswains—James Ede, to the Asia, for the Crocodile; W. E. Burns, to the Shannon, vice Bryant; William T. Taylor, to the Monarch, vice Hallett.

Carpenters—John Hill, to the Asia, for the Crocodile; W. Easton, to the Euryalus, vice Diamond; William Blackmore, to the Bellerophon.

Entries.

Acting Gunners—David H. Williams, Robert Brooking, Stephen Quint, Alfred Weekes, Henry J. Reenor, and Richard S. C. Staddon.

Coastguard.

Surgeon and Agent—Williams Stephens, M.D., to Gweedore, vice Lancaster Joyce.

Chief Boatman—Benjamin Molyer, Ballycotton, to be chief boatman-in-charge, Port Kenigoe, vice Colmer, removed to Cushenden.

Audacious, Capt. Tracey, flagship of Vice-Admiral G. O. Willis, C.B., Commanding-in-Chief on the China station, was in the Yang-tse-Kiang River up to May 30. The Zephyr was at Kobé on May 24, and remains. The Moorhen was at Kobé on May 10, and was to leave Kobé for Hong Kong on the arrival of the Zephyr; was at Hong Kong on June 7. The Daring left Kobé on May 26 for Shanghai, and would afterwards proceed to Chefoo. The Linnet was visiting Chefoo, Tientsin, and Newchwang in turn; she was at Chefoo on May 10. The Audacious, Cleopatra, Pegasus, Albatross, and Vigilant left Woosung on May 30 for Chinkiang, and would afterwards proceed to Chefoo by June 20, when the cruising squadron will assemble. The Kestrel was at Hankow on May 18, and was to leave on June 1 for Shanghai, calling at the treaty ports in the Yangtse River on her way down. The Curaçoa left Hong on May 19 for Yokohama, and thence proceeds to Chefoo. The Swift was at Hong Kong on May 23, and was at Canton on June 7, and remains for general service in the South China Division. The Sheldrake left Hong Kong on May 24 for Singapore, and thence proceeds to England, *viâ* Suez Canal. The Espoir arrived from Singapore on June 1, and would shortly leave for Amoy and Foochow. The Champion left Singapore on May 1 for a cruise to Bangkok, Labuan, Borneo, and Java. The Fly was at Labuan on April 16, and ordered to cruise in Borneo, returning to Singapore by the end of May. The Foxhound was at Singapore on May 14, doing duty in Straits of Malacca, and to be at Hong Kong by July 1. The Flying Fish was at Chefoo on May 10, and ordered to commence surveying on the west coast of Corea.

Boadicea, Capt. Edmund J. Church, flagship of Rear-Admiral Salmon, V.C., Commanding-in-Chief on the Cape of Good Hope and West Coast of Africa station, was at Simon's Bay up to July 3, and would leave on July 9 for Port Elizabeth, East London, Port Alfred, and Durban, returning to Simon's Bay in about a month. The Starling was at Simon's Bay.

Briton, Capt. A. J. Kennedy, arrived at Aden on July 23 with important despatches from Madagascar, and left again for Zanzibar.

Champion, Capt. Pasley, arrived at Labuan from Bangkok and Sarawak on June 2.

Cherub, Lieut. and Com. H. F. Haszard, arrived at Sheerness on Tuesday evening, to await the arrival of the Penelope from her annual cruise.

Cockchafer, Lieut. and Com. H. W. Hill, arrived at Singapore on June 12, and left for Kong Kong on June 16.

Duncan, Capt. J. D'Arcy. On Thursday morning a court-martial assembled on board, for the trial of George Clarke, ordinary seaman, of the Orontes, on two charges of attempting to strike Mr. Peter Bray, boatswain for quarter-deck duties, on July 16; and with falsely charging Mr. Bray with striking him when giving him an order to go on deck. Capt. Andoe prosecuted, and Mr. W. B. Risk, the Admiral's secretary, officiated as judge-advocate. The court was composed of Coms. J. Greenhow, R. H. Paul, J. G. Musters, and A. W. Moore. The prisoner pleaded not guilty. Several witnesses were called for the prosecution, and from their evidence it seems that at half-past three on the afternoon in question the prisoner was skulking on the main troop-deck, and on being ordered to "fall in" on the quarter-deck he ran away, and hid himself in a recess on the port side of the ship. Mr. Bray followed him, and directly prisoner saw him he ran to the mainmast, where a number of men were engaged in pointing some ropes. Prisoner picked up one, and pretended to have done it. He was then taken before Lieut. Groove, who investigated the case, and ordered prisoner to be placed in the report and sent to his duty. Mr. Bray then went to the starboard side, being followed by Clarke, who attempted to strike him with his clenched fist. He would have hit him had not Mr. Bray put up his hands to protect himself. The boatswain then stepped a few paces away, when prisoner walked towards him and aimed a second blow at him, and would have struck him had not a petty officer, named Faithful, rushed up and pulled him away. On the case being investigated on board by Lieut. Barnard, the senior lieutenant, Clarke accused Mr. Bray of having struck him in the face with his fist, when ordering him to his work while on the main troop-deck. This charge was made without the slightest evidence to support it, and in the face of direct evidence to the contrary. The prisoner handed in a written defence, in which he stated that he was putting his cap straight, when it was supposed that he lifted his hand to strike Mr. Bray. The court considered the charges were fully proved, and sentenced the prisoner to two years' hard labour.

Espiègle, Capt. C. Bridge, was at Suva, Fiji, on May 16, having called at Norfolk Island on her way from Sydney. The Espiègle was to leave Fiji on May 18, for a cruise among the many coral islands of the South Pacific, returning through a barrier reef to Cooktown, Brisbane, and Sydney, where she was expected to arrive at the end of S eptember.

Foxhound, Lieut. and Com. J. M. McQuhae, left Singapore on June 16 for Hong Kong.

Frolic, Com. A. W. Moore, was commissioned in one of the docks at Sheerness Dockyard on Thursday, for service on the West Coast of Africa and Cape station. The marines and stokers joined from Chatham, and the seamen from the Royal Naval Barracks. Com. Moore brought home the Beacon, which was paid off at Chatham four weeks ago.

Lord Warden, Capt. Kennedy, flagship of Rear-Admiral Sir Anthony H. Hoskins, K.C.B., with the Reserve Squadron in company, arrived on Thursday at Spithead. The cruise of the Reserve Squadron has now been completed, and the ships composing the squadron are awaiting orders from the Admiralty to disperse to their respective stations.

Magpie, Com. the Hon. Foley C. P. Vereker, was at Labuan on May 31, Com. Vereker having just joined. The Magpie will survey the East Coast of Borneo and re-examine the Mallewalle Passage.

Miranda, Com. Burgess Watson, was at Suva on May 16. The ship's company attended the funeral of King Thakambau. The Miranda had been ashore on a reef, and had lost some 30 sheets of copper, which were made good by divers from the Espiègle. The crews of the two vessels got up a cricket match, which came off on May 15. The play of the Espiègle party proved the best, although it was their first essay at cricket since she went into commission. At their first innings the victors made 53 runs, and on going to the wickets for the second time they scored 75. The Miranda team made 44 and 39.

Pioneer, Lieut. and Com. Henry M. C. Festing, arrived at Sheerness on Tuesday evening, and was put into the steam basin on Thursday afternoon, to be dismantled and paid out of commission.

Sheldrake, Lieut. and Com. Bridger, left Singapore, homeward bound, *viâ* Batavia, Seychelles, &c., on June 23.

Swift, Com. Collins, recently called at Macao with his Excellency the Governor, Sir George Bowen, his Highness the Duke of Mecklenburg, Count Surstorpoff, and Lieut. Vyvyan, A.D.C. to the Governor, on board. Immediately on the arrival of the gunboat the aide-de-camp of Governor Roza, and Mr. Murray, the British vice-consul, went on board in the steam launch Macao, and brought the distinguished visitors ashore. Sir George Bowen and the Duke of Mecklenburg were entertained at Government House, and Count Surstorpoff and Lieut. Vyvyan at Mr. Murray's house. In the evening Senhor Roza entertained all the visitors, Mr. Murray, and a number of other guests at dinner. On Sunday evening Senhor Roza entertained his guests at an official dinner at the palace, when the bands of the police force and of the guard of the Monte Fort were in attendance. On Monday morning, June 11, at 10 o'clock, the visitors re-embarked on board the Swift in the inner harbour. The Macao accompanied the Swift on her return passage as far as the Rada.—*London and China Telegraph.*

Thetis, Capt. Arthur C. Curtis, was paid off last Tuesday at Keyham, and placed in the 4th Division of Reserve.

Tyne, Com. Basil E. Cochrane, with the Pioneer, Lieut. and Com. H. M. C. Festing, in tow, has arrived at Portsmouth from Sierra Leone and Madeira. The Pioneer went into harbour to pay off on the 21st; the Tyne proceeding to Sheerness. The Tyne arrived at Chatham on Tuesday, to have defects made good.

Valorous, Capt. Stewart, left Devonport on Saturday with supernumeraries for Portsmouth. She left there for Cowes on Monday as guard-ship during the Queen's stay at Osborne.

Wye, Staff Com. Andrew W. Miller, after undergoing a thorough refit in Sheerness Dockyard, was put out of dock on Tuesday, after which she had a very successful trial of her engines and machinery. Her compasses were adjusted on Thursday.

THE CHANNEL SQUADRON.

(FROM OUR CORRESPONDENT.)

Berehaven, Bantry Bay, July 25, 1883.

The last week has been entirely devoted to submarine mining operations. On Wednesday, the 18th, each ship placed a line of six electro-contact, and on Thursday, six observation mines, for the protection of the eastern passage. The observation mines were placed in the ship channel, and the electro-contact on either side of it,—three lines to the northward and three to the southward. Firing and observation stations were established on Bear Island. On Friday, steps were taken for the protection of the western passage. Each ship sent a launch with three electro-mechanical mines, in tow of a steam-pinnace, alongside the flagship, and they all proceeded together, under the direction of Capt. Wilson, of the Hecla, to the western entrance, and laid the mines down in a line, along the shore, instead of across the passage, so as not to interfere with the ordinary traffic. The mines were fitted with blowing charges about 20 ft. below the surface. They were left down all night, and the steam-pinnaces went down and bumped them. The results were satisfactory, as about two-thirds went off successfully. The mines were afterwards weighed and taken back to the ships. The rest of Saturday was spent in replacing mines that had drifted, &c., and getting everything in the eastern passage in readiness for Monday. On Monday, at 9 a.m., the 2nd Division—the Agincourt, Northumberland, and Achilles—weighed and proceeded out into the Bay through the eastern passage. The Admiral shifted his flag to the Hecla, and went on shore to the firing-station on Bear Island, to watch the operations. At about 11 they returned, and passed through the mine field in line abreast. Several of the observation mines were fired as the ships passed the bearings, the explosions taking place at the station on shore, where discs of gun-cotton were connected. Some of the contact mines also proved effectual. The ships afterwards formed single column, line ahead, stood up the harbour, and moored in their former positions. The working of the observation mines was considered satisfactory, but the electro-contact ones were not so successful. All the mines have been weighed, and the electro-contact ones are to be relaid on Thursday. Two of the observation mines, containing 500 lb. of gun-cotton each, were to have been actually exploded on Monday, before the ships approached them, but this has been put off till Thursday, so our line of observation, containing them, will be laid at the same time as the others. A line of six extempore mines has also been laid down, one supplied by each ship, as an experiment, to see what effect the explosion will have on them at various distances. All the boatwork connected with laying the mines, &c., has been carried out under the most unfavourable conditions, as the weather has been miserable. There has been almost constant rain, it has been very cold, and there has generally been a strong breeze blowing. Yesterday, two cutters from each ship, with sweeps, and a gig, with creeps, were engaged sweeping and creeping a supposed ship-channel which had been previously marked out between the ships and the mainland. The Hecla had laid down twelve dummy mines with cables; the operations were under the direction of Capt. Wilson, and were successfully carried out. To-day, cables are being tested and mines prepared for laying down early to-morrow morning. In addition to the mining work, each ship in succession is sending a lieutenant, an engineer officer, and a boat's crew to the Hecla for two days' exercise in running Whitehead-torpedo boats. The gunboat Britomart came down from Bantry on Saturday, to take two bad fever cases from the Sultan to Haulbowline Hospital. Yesterday the Redwing arrived. It is announced that we are to leave this on August 2 or 3, for Queenstown, and are to be—the First Division at Portsmouth, and the Second at Plymouth, about the 15th or 16th, when each ship will give seven days' leave to each watch. No defects will be made good until after our second cruise.

CAFFIN MEMORIAL FUND.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Among your readers of a certain age there must still be many who had a personal acquaintance with the late Admiral Sir J. C. Caffin. He combined many good qualities. He was one of the old type of Naval officers of the school of Sir E. Parry, a humble-minded, God-fearing man, a zealous, intelligent officer, beloved and respected by all who knew or served with him. Some of his friends are desirous of perpetuating his memory, and have selected the following as a fitting means of doing so. Sir J. C. Caffin was for many years an active member of the Royal Naval Scripture Readers' Society, and it is proposed to raise and invest a sum sufficient to enable the committee to present a Bible and other books annually to the Scripture Readers, at the discretion of the president and committee.—I am, &c.,

A. P. Ryder, Admiral.

ARTILLERY PRACTICE AT SHOEBURYNESS.

H.R.H. the Duke of Cambridge visited Shoeburyness on Tuesday last, for the purpose of witnessing the practice of the experimental, heavy, muzzle and breech-loading ordnance, as well as of the machine and latest type of quick-firing guns there accumulated for inspection and experiment. Among those who were present this year at this annual display were General Reilly, Director-General of Artillery, Rear-Admiral Sir F. Richards, General Sir Frederick Campbell, late Director-General of Artillery, Mr. Campbell-Bannerman, M.P., Mr. Rendel, Mr. Vivian, M.P., Gen. Sir Andrew Clarke, R.E., Admiral Hood, Admiral Boys, Gen. Sir A. Herbert, Capt. Lord Charles Beresford, R.N., Lord Zetland, Gen. Sir Collingwood Dickson, Gen. Sir Charles Arbuthnot, Col. Bateson, A.D.C., the members of the Ordnance Committee, and others. The practice commenced by the firing of the Gatling 10-barrelled rifle-calibre gun, with the new positive feed, which has been invented by Mr. Accles, of the Gatling Gun Company. Nine hundred and thirty-six rounds were altogether fired from this weapon, without any hitch or jam, each hopper of 104 shots taking from 2½ sec. to 3 sec. to be discharged with the crank-handle worked in the rear. This new drum, though somewhat complicated, is an undoubted improvement, as regards very rapid fire for a short time, when aim is not taken. A few rounds were also fired from the gun turned over, and with the drum placed underneath. The Gardner one-barrelled, rifle-calibre gun was next inspected, and 90 rounds were fired from it. A few of these guns have been purchased for experimental purposes in the Army and Navy. The next weapon to be fired was the Nordenfelt 1-in. four-barrelled gun, which has been adopted for the defence of our ships against torpedo-boats. A few rounds were fired from this gun against a ½-in. wrought-iron plate, at 200 yards' range, which was easily pierced by the 1-in. bullets. The 12·5-in. 38-ton rifled muzzle-loading gun was then fired at 1,000 yards' range, against a 6-ft. by 6-ft. target, with great accuracy. This gun fires a projectile weighing 817 lb., with a powder charge of 160 lb. of pebble powder, and with an initial velocity of only 1,442 f.s. Attention was next directed to the Nordenfelt quick-firing 6-pounder gun, which, in connection with an Armstrong and Hotchkiss similar gun, is now being tried under the direction of the Ordnance Committee. Nine shots were fired from this weapon at a target at the range of 1,000 yards, with very good results, the mechanism of the gun and its system of recoil working very smoothly. The 12-in. 43-ton rifled breech-loading gun was next fired, and made excellent practice against a 6-ft. by 6-ft. target at 1,200 yards' range. This is to be the weapon with which the larger men-of-war are to be armed, and about which so much has been written of late. At present, the Navy has been supplied with a few of these guns, but they yet await their carriages before they can be mounted in the Colossus and the other vessels. The 43-ton gun fires a projectile of 714-lb. weight, with a charge of 260 lb. of prismatic powder, and with an initial velocity of 1,770 f.s. The 64-ton rifled breech-loading gun will fire a 1,250-lb. projectile, with an initial velocity of 2,050 f.s. Practice was then made with an 8-in. breech-loading gun, mounted on an Armstrong hydraulic carriage; and afterwards five rounds of shrapnel shell were fired from a 6-in. breech-loading gun. The practice and bursting of the shells were, on the whole, very good. Then the Woolwich 9-in. breech-loading gun, with the improved French system of breech-closing mechanism, with the asbestos wad, was next examined and fired. The breech mechanism is brought into the position for being drawn out of the breech by means of a ratchet lever, working on the upper part of the face of the breech, and the breech is closed by the same means after the mechanism has been pushed in; this system is said to work very easily after a few rounds have been fired, that is to say, as soon as the asbestos wad has been forced into its proper shape. This gun, which is an experimental one, has so far afforded great satisfaction; its powder charge is 140 lb. of prismatic powder, and it fires a 380 lb. projectile with a velocity of 1,731 f.s., which it is expected will be very considerably increased when a new powder, now being made, is available for its charge. Some excellent practice was then made with the Hotchkiss and Armstrong rapid-firing 6 lb. guns, and 10 shots, deliberate aim being taken between each one, were fired at a small target at 1,000 yards' range in 1 min. 15 secs., the smoke preventing a more rapid fire. These quick-firing guns, which are quite a new feature in armaments, are the result of an invitation to inventors from the authorities to construct a 6-pounder quick-firing gun, which should embody the following, among other conditions:—The gun to have accurate range up to 4,000 yards, the muzzle velocity to be not less than 1,800 f.s., not less than 12 aimed shots to be fired in one minute with a service of three men, the mounting to be suitable for either ship or boat service, the recoil to be reduced to the lowest limits, and the gun to return after recoil to the firing position, the total weight of the gun and ship-mounting not to exceed 10 cwt. Here we have very stringent, though eminently practical conditions laid down, and yet, of the three weapons presented for competition, only one of them, the Nordenfelt 6-pounder, satisfies the requirements of such a weapon. The Hotchkiss gun alone weighs 960 lb., out of the 1,120 lb. allowed for the total weight of gun and ship-mounting, and is not provided with any system of recoil, so that the whole strain on firing is exerted on the forecastle of a boat, or wherever else it may be wanted. But by this excessive weight of gun its accuracy of fire is increased, and the shoulder-piece for aiming, peculiar to the Hotchkiss machine-guns, can be used; further, its length of barrel is enabled to be increased, and correspondingly the muzzle velocity of its projectile. The Hotchkiss 6-pounder is 13 inches longer than the Nordenfelt 6-pounder, and 460 lb. heavier, a weight out of all proportion to the small advantage gained. The Armstrong gun fails to comply with the conditions, in that it is too heavy, and its muzzle velocity is too low. The purposes for which a rapid-firing gun embodying the foregoing conditions is required by our Naval authorities is to provide our ships, especially our cruisers, with a shell gun capable of piercing at very long ranges any unarmoured ship and the unprotected parts of armoured vessels, and also to provide them with a powerful boat armament. A weapon of this kind would seem a most suitable means of efficiently arming the auxiliary merchant vessels, torpedo-vessels, despatch and troop-ships, &c. Exceedingly accurate fire was made from the three 6-pounder guns. A 6-in. breech-loading Armstrong wired gun, on an improved disappearing carriage, was then fired, and afforded very general satisfaction, the carriage working easily and smoothly. The concluding practice was carried out with a 12-pounder breech-loading gun, mounted on an Armstrong field carriage, in which some important features are introduced. The gun has no trunnions, but is held in position by projections on the gun, where the trunnions would ordinarily be, which works in grooves, on the inside of the sides of the trail, the gun being connected to a combined spring-and-oil buffer, which takes up the recoil, and enables the carriage to be made much lighter than an ordinary 12-pounder field carriage, and further reduces the run-back of the carriage considerably, though it causes the carriage to jump heavily. Some 900 rounds have been already fired from this weapon, without in any way damaging the carriage. The weight of this gun is 7 cwt., its charge 4 lb. of powder, its muzzle velocity 1,700 f.s., and the total weight of its equipment 33 cwt. The practice throughout the day was exceptionally good, and was conducted by Major O'Callaghan, R.A., and Capt. Goold Adams, R.A. This is, we believe, the first time for eleven years that H.R.H. the Duke of Cambridge has visited Shoeburyness, and he must have appreciated the vast difference in the nature of the practice carried out on Tuesday and that which he witnessed on the last occasion he honoured the Colonel Commandant of Shoeburyness with his presence, on the great field-day of the year.

THE ADMIRALTY MACHINE-GUNS.

The Lords of the Admiralty gave a practical proof of their interest in the future of the great Navy under their charge, when on Thursday last three of their number, Rear-Admiral Sir Frederick Richards, K.C.B., Sir Thomas Brassey, K.C.B., M.P., and Mr. G. W. Rendel, spent the day at Dartford witnessing the private trials of Nordenfelt machine-guns. The importance ascribed to this burning question by the Naval and Military services both at home and abroad was exemplified by the representative assembly gathered together to witness the trials, which included Gens. Sir A. Herbert, Strachey, Younghusband, Curtis, Sir E. Hamley, Sir Lintorn Simmons, Admirals Boys, Hood, Hamilton, Gore-Jones, Sir L. McClintock, and Selwyn; Cols. Fox-Strangeways, Lyon, Maitland, Macfarlane, Arbuthnot, Noble, Stuart Nicholson, Elles, Brackenbury, Sterling, Woolsey, Alt, Smith, Sir H. Fish, and Lord Holmesdale; Capts., R.N., Stewart, Jackson, Lord Charles Beresford, and Hopkins (Director of Naval Ordnance); Majors Salmond, Deane, and Godfrey; Commander James Brown, Mr. H. Barnaby, Chief Constructor to the Admiralty; Mr. Archer (Queensland). Capts. Bertram, Clarke, Chapman, Leese, and Armit; Lieut. Collins (retired R.N., Victorian Navy); Count Sponneck, Count Wachtmeister, Admiral Bernabe (First Lord, Spanish Navy), Admiral Noce, Admiral Azevedo, Comdre. Ocana, Gens. Lautz and Janowski, Col. Descharmes, Baron Haan, Commander Canellopoulos, Cols. Comerina, Lagumella, and Sola; Capts. da Fonseca Voz, Chadwick, Vanderkolk, Oldekop, Tuxon, Lopez, Carlton, Lieuts. de Moreira, Scheller, and Falsen; Mehemmed Bey, Djemil Bey, Mr. Corvalho, &c. The trials, which were most exhaustive, commenced with the testing for rapidity of fire of the 12-barrel rifle-calibre gun, which fired 590 rounds in 30 seconds, without a hitch. The gun, weighing 2½ cwt., was mounted on a Naval carriage. Then followed the same trial of the single-barrel rifle-calibre gun (13 lb.), with the result of 54 rounds in the half-minute. The 3-barrel gun (weighing 56 lb.), on combined field and tripod carriage, showed a rapidity of 186 rounds in 30 seconds; and the 5-barrel, weighing 128 lb., 300 rounds in the same time, afterwards discharging 50 rounds in 4½ seconds. Experiments then followed with the 10-barrel rifle-calibre gun, weighing 260 lb., and adapted either for ship or field purposes. The results showed a rapidity of 900 rounds in a minute's firing; 100 rounds with automatic spreading gear, in seven seconds; 200 rounds, at 30 degrees elevation, in 13 seconds, and 200 rounds, with 30 degrees depression, in 11 seconds. The effect of the scattering motion was most remarkable, distributing the bullets at a range of 50 yards along a front of some 20 feet at intervals of three or four inches, nearly in the same plane, while the extreme depression and elevation seemed not to interfere in the slightest degree either with the rapidity or regularity of fire. This experiment concluded the firing trials of the small-bore guns, and was followed by tests, for penetration and rapidity, of the 2-barrel 1-in. gun, weighing 185 lb., on mounting for torpedo-boats or tops. At a distance of 50 yards the solid steel shot penetrated a ⅛-in. steel plate and a backing of 1-in. iron. It then fired 20 rounds in six seconds. The 4-barrel 1-in. gun, weight 3¾ cwt., on Naval carriage, showed the following results, viz:—Eight single shots in four seconds, 12 rounds (three volleys) in two seconds, and 100 (25 volleys) in 24 seconds. Experiments with the single barrel 2 and 5-pounder shell-guns then followed. The former, 1½-in. calibre and weighing 3 cwt., penetrated at 50 yards three 1-in. iron plates, and fired six rounds in 25 seconds. For general Naval work this gun will be found most useful; indeed it is the gun so strongly advocated for adoption by Lord Charles Beresford, in his recent lecture at the Royal United Service Institution. Lord Charles then said:—"The reasons for advocating a 2-lb. shell are,—it is the best-sized machine shell-gun, as it does not recoil even when on its landing carriage, and it has better penetration than the 2½-pr., and equally good penetration with the 4-pr. tried at Portsmouth, with lower initial velocity, both of which guns are considerably heavier. It is better than the 1-pr. because the 1-pr. common shell cannot penetrate unarmoured ships at 500 yards, or at any angle, nor can it penetrate a gun-port thicker than ½ inch, even at close range. The French, Danes, and others adopted the 1-pr. from economical reasons, because they thought that it would be a machine-gun that would answer all purposes, *i.e.*, repelling torpedo attack and firing into unarmoured vessels, and unarmoured parts and ports of armoured vessels; and although it is a very useful gun indeed to them (particularly as we have not one of a similar nature to reply to it), still it has the fault of want of penetration at angles and certain distances. And it is not as good as a volley-gun for defence against torpedo-boat attack, as will afterwards be explained. The 2-pounder shell did penetrate at the Portsmouth trials 2½-inch iron at 300 yards' range, and can therefore be relied upon to penetrate unarmoured vessels, gun-ports, &c., at any angle or range for which it is likely to be required. But whatever may be said against the 1-pounder, the French adopted it in large numbers in 1875, as being the best shell machine-gun known at the time, and they are therefore dangerously ahead of us in offensive and defensive power at this very moment. They are experimenting now on a gun throwing a heavier shell, and if satisfactory, will no doubt adopt it." The latter, weighing 6 cwt., with a 2-in. bore, went clean through five 1-in. iron plates, and fired six rounds in 14 seconds. There were during the day two very interesting experiments in the practical working of the small-bore machine-guns in the field. A 5-barrel gun, mounted on a two-wheel infantry limber-carriage, designed by Lieut.-Col. Alt, commanding the Central London Rangers (22nd Middlesex R.V.C.), was manned by a detachment of the Central London Rangers Gun Club. The practice consisted of battery drill, and then advancing at the double, halting, reversing gun, opening limber, mounting cartridge-hoppers, aiming, and firing 50 rounds. The shortest time from the command, "Halt action, front!" was 19 seconds; the longest, 24 seconds. The detachment, which earned the highest praise for its smartness and intelligence, reflected the greatest credit on its instructor and the intelligence of the men. A similar trial then took place with the same gun mounted on a "galloping carriage" designed by Lord Charles Beresford. It is drawn by two horses, and carried a crew of three men, besides the driver. The experiment consisted of firing 50 rounds blank cartridge from each of seven stations during a run of two-thirds of a mile, advancing against troops supposed to occupy a farm, and retiring from the farm. The result was very successful, showing the extreme mobility of the weapon. Seven halts were made, and 100 rounds fired in 5 minutes and 55 seconds. It should be remembered that rifle-calibre machine-guns for field-work are not intended to replace men. Neither are they to be used as field-guns, nor should they be considered as such. Whether in attack or defence, they should be held in reserve in rear of the fighting line, ready to assist it, both in defence or attack, at any moment or particular point. This, at least, is the idea of both Lord Charles Beresford and Lieut.-Col. Alt, and these officers have given expression to their views, the former in the "galloping-carriage," carrying 10,000 rounds of ammunition, the latter in the "limber or magazine carriage," worked as are Naval field-pieces, but carrying its gun and 5,000 rounds of ball-cartridge on two wheels, the whole weighing under 10 cwt. These guns, while conforming to the movements of their battalion, would, nevertheless, work independently, taking advantage of eccentricities of ground to cover an advance or retreat. The company showed the greatest interest in the proceedings throughout, and the trials must be pronounced an unqualified success. The kindness and hospitality of Mr. Nordenfelt contributed not a little to the enjoyment of the day, and the vote of thanks, proposed by Sir T. Brassey and heartily responded to, was thoroughly deserved.

The Admiralty have awarded medals for long service and good-conduct to the following men:—Frederick A. Coleman, captain's steward, of the Urgent; John Coughlin, chief gunner's mate, of the Lord Warden; Edward Cannon, leading stoker, of the Tamar; William Allen, master-at-arms, of the Orion; William H. Evans, engine-room artificer, of the Raven; Edward Parnell, wardroom-steward, of the Impregnable; Joseph Dew, captain of the mast, of the Lion; George D. Russell, armourer, of the Cambridge; John Wm. Randall, chief engine-room artificer, of the Triton; John Boniface, quartermaster, of the Lord Warden; Alfred A. Dawson, A.B., of the Victoria and Albert; Henric Xicluna, shipwright, of the Iris; William Philips, private R.M.L.I., of the Terror; Arthur G. Graham, armourer, of the Encounter; William Cannon, gunner's mate, of the Defence; P. M'Carthy, James Peters, Wm. Lacey, and Richard Frost (commissioned boatmen), Samuel Fisher (chief boatman), and Amos Palmer and George Parsons (boatmen), of the Coastguard.

The last armour-plate to complete the turrets of the Colossus was lifted into its place last Thursday afternoon. Considerable progress has also been made for the reception of her four 43-ton breech-loaders, although three months will elapse before the carriages, slides, and other fittings are ready. The Nordenfelt shields have been erected. The ship will make the usual six hours' trial of her main engines at the end of August. At the present time 500 men are employed on board and in the workshop completing this ship.

HOW TO AVOID THE INJURIOUS EFFECTS OF STIMULANTS—The present system of living—partaking of too rich foods, as pastry saccharine and fatty substances, alcoholic drinks, and an insufficient amount of exercise—frequently deranges the liver. I would advise all bilious people, unless they are careful to keep the liver acting freely, to exercise great care in the use of alcoholic drinks, avoid sugar, and always dilute largely with water. Experience shows that porter, mild ales, port wine, dark sherries, sweet champagne, liqueurs, and brandies, are all very apt to disagree; while light white wines, and gin or old whisky largely diluted with soda water, will be found the least objectionable. ENO'S FRUIT SALT is peculiarly adapted for any constitutional weakness of the liver; it possesses the powers of reparation when digestion has been disturbed or lost, and places the invalid on the right track to health. A world of woes is avoided by those who keep and use ENO'S FRUIT SALT, therefore no family should ever be without it. CAUTION.—Legal Rights are protected in every Civilised Country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed on by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions, in Sixteen Languages, how to Prevent Disease. Prepared only at ENO'S Fruit Salt Works, Hatcham, London, S.E., by J. C. ENO'S Patent.

ELECTRICAL LAUNCHES.

A launch built of galvanised steel by Messrs. Yarrow and Co., of Poplar, and propelled by electricity, has, during the last week or two, been practically proving its capabilities by frequent runs on the Thames, much to the edification of the Admiralty officials and other gentlemen interested in such matters. The boat is some 40 ft. in length and 6 ft. in breadth, and its displacement, without the propelling agents, is about 4 tons. The motive-power of electricity is derived from 80 Faure-Sellon-Volckmar accumulator cells, which are placed in the centre of the boat beneath the flooring. The weight of these accumulator cells is about 2 tons; the time required to charge them is seven hours, and then there is a sufficient supply for a six-hours' run at full speed, or for 10 hours at a medium speed. These cells are supplied by the Electric Power Storage Company. The propelling power is obtained by means of a middle-sized Siemens dynamo machine connected direct with the propeller by its shaft, and thus no gearing is used; the number of revolutions of the dynamo varies from 600 to 800 per minute, according to the number of the accumulator cells employed. To go astern in the boat, it is only necessary to reverse the commutators. This dynamo machine is placed in the stern of the boat, under the flooring, which is thereby only raised a few inches above the ordinary level of the flooring. To stop, start the dynamo, either ahead or astern, is almost instantaneous, and is performed by the steersman, who steers by means of a wheel placed right aft, and who is kept informed as to the strength of the electric current he is using by means of. The weight of the accumulator cells, placed as they are below the flooring, acts as ballast to the boat, and these cells do not take away from the space available for passengers, &c. In this particular boat, 40 passengers can be easily and comfortably carried, and as many as 45 have actually been taken in her at one time. The speed of this boat is about nine knots per hour, with full power; but if a greater number of accumulator cells are used, and a larger-sized dynamo machine, a far greater speed might easily be obtained. For general service in the Navy, for dockyard work, as a ship's boat, and for many other purposes, an electrical launch, pinnace, or cutter might prove of considerable utility, owing to the fact that almost the whole interior space of such a boat is available for carrying passengers or cargo; and on account of the entire absence of dirt, smell, noise, and vibration when employing this form of motor will highly commend it to the favour of Naval officers, and those who require pleasure launches. Even though such high speeds may not be reached with an electrical launch as have been so successfully attained in the torpedo-boats built by Messrs. Yarrow and Thornycroft, yet, as nothing need be shown above the gunwale of an electrical launch, the fact of its being noiseless, and that the accumulator cells being charged, which on board ship can always be arranged for, the boat is ready at a moment's notice, there appears to be many features in connection with an electrical launch which should render it a formidable craft for torpedo and other war purposes. Undoubtedly, the trials that have lately taken place with Messrs. Yarrow and Co.'s electrical launch have been entirely satisfactory, and it is to be hoped our Naval authorities will not lose sight of so valuable and practically useful invention.

NAVAL AND MARINE SCHOOLMASTERS.

The reply given by Mr. Campbell-Bannerman last week to Mr. Puleston, on the question of redressing the grievance under which Naval Schoolmasters are suffering, was so unsatisfactory as to necessitate our calling attention to the real facts of the case, as under:—

MR. PULESTON.—"Another matter he wished to touch upon was that of the Schoolmasters and Warrant officers. What they wanted was a step in rank on retirement, and to be put in the same positions as those of relative place in the Army. That was neither a very serious request to make, nor was it, in his opinion, too much to ask. There was also a difference between a Naval schoolmaster and a Marine schoolmaster, which he would like to see adjusted. The one at present got about £90 a year, while the other received £120, and that difference, he thought, ought to be done away with. Surely there was no body of men in the whole service more worthy than the Naval schoolmasters. Why the difference between them and the Marine schoolmaster existed, he did not know."

MR. CAMPBELL-BANNERMAN.—"There were many facts from which they might conclude that the class of men now being brought into the Navy were certainly not inferior to those who had preceded them. He was very much struck the other day by a page or two of the report on the education of the Navy, for any improvement in that direction must be satisfactory." (Several favourable statistics, showing the very great improvement in the educational state of the petty officers and seamen during the last 14 years, were then quoted, and elicited cheers from the House.) "The whole condition of the petty officers was under revision, and if the Admiralty could do anything to better the position of these men, they would be only glad to do so."

Extract from the report of the Rev. J. B. Harbord, Chaplain of the Fleet, and late Inspector of Naval Schools.—Page 9.—"Upon consideration of the above results (the figures quoted by Mr. Campbell-Bannerman), the conviction is forcibly pressed upon us, that the educational improvement of our petty officers and men is due chiefly to the advantages they enjoy while in the Navy itself, and has been affected but little by any progress in the elementary education of the country." Page 145.—"The Marine and Naval schoolmasters, though both are derived from the same source, and all trained in the same manner, constitute two separate and distinct bodies under different scales of pay and pension, and different codes of regulations." Page 146.—"It is important that Naval schoolmasters should not be placed at any disadvantage with the Marine schoolmasters:"—

[Page 146.] NAVAL SCHOOLMASTERS.	[Page 147.] MARINE SCHOOLMASTERS.
Pay—	Pay—
From 4s. to 6s. a day.	From 4s. 1d. to 7s. a day.
Pension—	Pension—
After 20 yrs., £31 18s. 9d. a year.	After 20 yrs., £63 17s. 6d. a year.

Rating—	Rating—
Chief Petty Officer.	On Entry, 1st-class Staff Serjt.
	After 12 years, Warrant Officer.

From the foregoing, it will be seen that Naval Schoolmasters are being most unfairly treated, and it is to be hoped that, in common justice to a most deserving body of men, the Admiralty will lose no time in placing them on the same footing as Marine Schoolmasters.

MARRIAGES.

DAY—FIREBRACE.—On the 23rd inst., at the Chapel of the British Embassy, Paris, by the Rev. J. Aberigh Mackay, D.D., Chaplain, assisted by the Rev. Maurice Day, M.A., brother of the bridegroom, Edward FitzGerald Day, Esq., Captain, R.N., to Adela Isabel, elder daughter of Robert Tarver Firebrace, Esq., late of Victoria.

UNDERHAY—GLASSE.—On July 26, at St. Andrew's Church, Plymouth, by the Rev. Henry Farwell Roe, M.A., Rector of Revelstoke, Devon, uncle of the bride, assisted by the Rev. A. S. L. Sparling, her brother-in-law, Samuel Sydney Underhay, barrister-at-law, Middle Temple, to Ellen Constance Hadden, second daughter of Admiral Glasse, C.B., of Billacombe, near Plymouth.

DEATHS.

BIRDWOOD.—On the 17th inst., of typhoid fever, at the Royal Naval Hospital, Plymouth, William Ilbert Birdwood, of H.M.S. Agincourt, younger son of Major-General W. I. Birdwood, Royal Engineers, Woodcot, Salcombe, South Devon, aged 17.

WILLIAMS.—On the 26th inst., at 16 Suffolk Street, Pall Mall, General Sir William Fenwick Williams, Bart., of Kars, G.C.B., in the 83rd year of his age.

MARLBOROUGH COLLEGE.

The POST of STEWARD will be VACANT at MICHAELMAS next. WANTED, a MAN thoroughly acquainted with catering for large numbers, capable of engaging and managing servants, &c.—Apply, with testimonials and references, to the Rev. the BURSAR, the College, Marlborough.

BANDMASTER. — WANTED, by a pensioned Military Bandmaster, of great experience and unexceptionable testimonials and references, a similar appointment in a Militia or Volunteer Corps, or to instruct a School or Civil Band.—Address, "B. M.," 22 Clarendon Road, Dover.

BANDS.—A RETIRED MILITARY BANDMASTER, of 23 years' experience, with unexceptionable testimonials and references, is DESIROUS of an APPOINTMENT as BANDMASTER to a Volunteer, Police, School, or private Band, brass or reed.—Address, "G. M.," Meyrick Crescent, Mersea Road, Colchester.

SCHOOL GYMNAST, RESIDENT, Wanted, for TRINITY COLLEGE, Glenalmond, Perthshire. Must be able to combine other services, either as Cricket Professional, Porter, or useful man. Can be married; no children. Rooms; board. Comfortable post for thoroughly responsible and capable man.—Address, F. ADAMS, Trin. Coll., and state fully qualifications and salary.

MASTER-TAILOR. — WANTED, an appointment as above, to a Militia or Volunteer Battalion, by a Serjeant Master-Tailor, just discharged to pension.—Apply, ADJUTANT, Ordnance Store Corps, Red Barracks, Woolwich.

CRIMEAN MEMORIAL CHURCH, CONSTANTINOPLE.

Most Englishmen are probably aware that after the close of the Russian War in 1856, a Church was built at Constantinople by public subscription, in memory both of the great struggle in which our nation had been engaged, and of the many Christians, our countrymen, who had lost their lives in its cause. At a public meeting held in London, April 28, 1856, H.R.H. the Duke of Cambridge in the chair, it was resolved that the most suitable memorial would be an edifice in which Almighty God might, from generation to generation, be worshipped according to the rites and usages of the Church of England, and that such a Memorial Church be erected at Constantinople. The Church was built, and vested in the Society for the Propagation of the Gospel in Foreign Parts, who in 1856 sent to Constantinople the Rev. C. G. Curtis, M.A., who has acted as Chaplain up to the present time. The cost of erecting a handsome church in a place so peculiarly situated as Constantinople was necessarily great, and no endowment could be provided even for needful repairs. An appeal is therefore now made to the English nation, and especially to those two great services, the Army and the Navy, to assist in providing a capital sum of not less than £5,000, to be vested in the Incorporated Society for the Propagation of the Gospel in Foreign Parts, the interest to be applied to the maintenance in suitable repair of the fabric of this great National Memorial. This appeal has received the cordial support of H.R.H. the Commander-in-Chief and the Right Rev. the Chaplain-General.

Donations and Subscriptions will be received by the TREASURERS of the SOCIETY for the PROPAGATION of the GOSPEL in FOREIGN PARTS, 19 Delahay Street, S.W. Cheques should be crossed "Drummond's."

CAFFIN MEMORIAL FUND.

It is proposed to raise a MEMORIAL to the late Admiral Sir J. C. CAFFIN, K.C.B. The Interest of the Sum subscribed will be spent in Bibles and Books, to be given annually to the Royal Naval Scripture Readers, by the Committee of that Society.

Subscriptions will be thankfully received by Rear-Admiral CAMPION, 4 Trafalgar Square.

A. P. RYDER, Admiral.
R. WILMOT BROOKE, Lieut.-Col.
H. CAMPION, Rear-Admiral.

HOLY ORDERS.—To RETIRED OFFICERS, &c.—A COUNTRY VICAR, who has just obtained preferment for his Curate, OFFERS a TITLE. Nominal stipend. Pleasant neighbourhood, south; house at low rent; views moderately High. Bright, hearty services; abundant society. A gentleman with private means would find this a pleasant place. References given and required.—Address, "LATE CURATE," Schrieber's, 147 Clapham Park Road, S.W.

SELF-PROPELLING INVALID CHAIR WANTED, second-hand, suitable for drawing-room. State price and maker's name, if known, and where to be seen.—"A. B.," 25 Moorgate Street, E.C.

ADMIRALTY,
MEDICAL DEPARTMENT OF THE NAVY,
44 Spring Gardens, S.W.
May 22, 1883.

AN EXAMINATION of CANDIDATES for COMMISSIONS, to fill thirteen vacancies in the MEDICAL DEPARTMENT of the Royal Navy, will be held at the UNIVERSITY of LONDON, Burlington Gardens, by permission of the Senate, on MONDAY, August 13, 1883, and following days, at 10 o'clock.

Candidates are to attend at this Department at 11 o'clock on Thursday, August 9, for preliminary examination as their fitness for the Service.

The Forms to be filled up by Candidates will be supplied on application to this Department, and should be returned as early as possible.

JOHN W. REID, M.D.,
Director-General.

DESIRING TO ACQUIRE
"FREEHOLD FARMS" IN NEW ZEALAND,

Upon easy terms of deferred payment, are requested to apply for information, either personally or by letter, to the Secretary of the New Zealand Thames Valley Land Company (Limited), 79½ Gracechurch Street, London, E.C.

N.B.—Special facilities offered to young gentlemen with capital.

SHAVING a PLEASURE.

EDWARD SMITH'S 1s HOLLOW-GROUND RAZOR is pronounced by all the most wonderful razor ever introduced. It has during the past two years stood every test, and thousands have been sold retail only, at No. 3 Cheapside. It never requires grinding or setting, and is complete in case for 1s 1d; post free, 1s 3d. Complete list of razors, &c., on application. N.B.—A liberal allowance to Serjeants and others taking a quantity.—EDWARD SMITH ("The City Toy Shop"), 3 Cheapside, London.

HOLLOWAY'S OINTMENT and PILLS.—NOTABLE FACTS.—Summer heats augment the annoyances of skin disease, and encourage the development of febrile disorders, wherefore they should, as they may, be removed by these detergent and purifying preparations. In stomach complaints, liver affections, pains and spasms of the bowels, Holloway's unguent, well rubbed over the affected part, immediately gives the greatest ease, prevents congestion and inflammation, checks the threatening diarrhœa, and averts incipient cholera. The poorer inhabitants of large cities will find these remedies to be their best friend when any pestilence rages, or when from unknown causes eruptions, boils, abscesses, or ulcerations betoken the presence of taints or impurities within the system, and call for instant and effective curative medicines.

I, JOHN LOCK LUCK of Adelaide Road, Surbiton, in the county of Surrey, a Lieutenant in the Royal Welsh Fusiliers, now stationed at Pembroke Dock, in the county of Pembroke, do hereby give Notice that I intend in pursuance of the condition contained in the Will of my Cousin and Godmother, Mrs. Mary Elizabeth Lock-Beveridge, of Woodlands, in the parish of Gillingham, in the county of Kent, lately deceased, under which I am entitled to her real and residuary personal estate, henceforth to use and adopt, upon all occasions and at all times, the Surname of "LOCK," in lieu of the surname of "Luck," by which I am and have heretofore been known. And I have this day, as evidence of such my intention, caused a Deed in due form to be enrolled in the Chancery Division of Her Majesty's High Court of Justice; so that the Name or Style which I shall henceforth use and be known by shall be "JOHN LOCK LOCK," and none other. Dated this twentieth day of July, one thousand eight hundred and eighty-three. JOHN LOCK LUCK.

Witness—A. A. ARNOLD, Solicitor, the Precinct, Rochester.

ARMY and NAVY CO-OPERATIVE SOCIETY, (Limited).
117 Victoria Street, Westminster, London, S.W.

NOTICE.

The STORES will be CLOSED on MONDAY, August 6th, being a BANK HOLIDAY.—By order,

SANDHURST PRELIMINARY:—Thirteen out of Eighteen this year.

MILITIA MILITARY:— Messrs. JAMES and LYNCH have passed thirty-six under the present regulations. viz.:—March, 1881, *FIRST, *25th, *59th; September, 1881, *8th, 16th, 21st, *23rd, *25th, *33rd; March, 1882, *FIRST, 4th, 12th, 14th, *19th, 28th, *30th, and three Cavalry commissions; September, 1882, *FIRST, 2nd, 8th, 10th, *14th, *19th, *20th, 25th, 27th, 28th, 30th, 33rd, *36th, and one (42nd) Cavalry commission; March, 1883, *4th, 10th, 28th—the 4th passed his first trial after only 16 weeks' reading.

(Those marked * passed first attempt.)

At three out of the five examinations held, Major Lynch passed the First Candidate.

MILITIA LITERARY:—Twelve out of thirteen in 1881, ALL in 1882; March, 1883, ALL, viz., 16th, 20th, 22nd.

STAFF COLLEGE:—1881: FIRST, 4th, 16th. 1882: FIRST, 7th, 10th, 15th, 22nd, 23rd, 26th.

PROMOTION EXAMINATION:— Messrs. JAMES and LYNCH have passed 178 officers for promotion. Only three have failed.

ASHFORD SCHOOL, KENT. HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, assisted by the Rev. W. FULFORD, M.A., and Colonel COATES, late 99th Regiment, PREPARE CANDIDATES for Woolwich and Sandhurst. Also, in separate Classes, LIEUTENANTS of MILITIA for the Military Competitive Examinations, and Officers for admission to the Staff College.

Colonel Coates's private pupil, Lieutenant Hill, Cheshire Regiment, passed Sixth at the March Examination.

References will be given to Officers of very high position in the Service.

For particulars, apply to H. ZOBEL, Poulton House, Hampton.

MILITARY EXAMINATIONS.—Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of PUPILS to Prepare for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to 12. Five pupils out of six were successful at the last Sandhurst Examination (July, 1882). —Terms, references, and other information sent on application.

SANDHURST, WOOLWICH, MILITIA, INDIAN FORESTS, and other COMPETITIVE EXAMINATIONS.—Prospectuses of Tutors in England and Abroad who have been successful in passing Students at all the Recent Examinations forwarded (gratis), on application to Messrs. ASKIN, GABBITAS, and CO., 38 Sackville Street, London, W. References kindly allowed to the Right Rev. the Chaplain-General to the Forces, and others.

WELLINGTON HOUSE SCHOOL, LEYLAND, near PRESTON.

A School for Sons of Gentlemen, conducted by Rev. R. J. HUGHES, late Head Master of Rossall Preparatory School.

Boys whose parents are abroad can be received into the Head Master's family during the Holidays. Boys are prepared for the Public Schools. Prospectuses, &c., on application.

ARMY and MILITIA.

Officers of the Army prepared for promotion. Officers of the Militia for the Military Competitive Examinations at

THE ABBEY, ABINGDON,
BERKSHIRE.

The Abbey is situated on the Thames, about six miles from Oxford, and five minutes' walk from the Abingdon Station, G.W.R.

Work is carried on throughout the year. Students CAN JOIN AT ANY TIME.

A "Special Course" of twelve weeks precedes each Examination. ONE-THIRD of the Competitors prepared at the Abbey obtained Commissions in 1881-82-83. Of these more than ONE-FOURTH HAVE BEEN SPECIALLY MENTIONED BY THE EXAMINERS IN THE OFFICIAL REPORTS FOR EXCELLENCY IN EITHER MILITARY LAW OR TACTICS.

The number of Students is limited. Further particulars on application.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, &c.—Address Rev. E. BARTRUM, Head Master.

A LADY who has the Charge of the Little Daughters of an Indian Officer, is desirous of having TWO or THREE more YOUNG CHILDREN to bring up with them, in her country home, within a few miles of Brighton. She has a superior governess and nurse. References in India and England. Inclusive terms, with clothing, 100 guineas per annum.—Address, "L. E.," care of PAGE, 108 Fleet Street, E.C.

MILITARY EDUCATION, GERMANY. —Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the last Militia Competition, which took place on March 8, for which 31 Commissions in the Line have been awarded, the under-mentioned officers passed from this Establishment, out of 18 sent up:—

Lieutenant	E. G. Wynyard...	8th
,,	H. J. Morphy ...	11th
,,	I. H. W. Southey	13th
,,	N. G. Woodyatt	15th
,,	J. H. Heycock ...	16th
,,	D. S. A. Cosby ...	22nd
,,	F. K. O. Peile ...	26th

This completes a total of 32 commissions secured by Colonel WILKINSON and Lieutenant-Colonel SHAW at the last four Military Competitive Examinations, the total number sent up for these competitions being 76. The names of the successful pupils have already been published.

Also, at the recent Literary Examination for Militia Officers held in April, Lieutenant Lord Skelmersdale took FIRST place on the list.

The results obtained at the last SANDHURST EXAMINATIONS have added to the general score, which amounts altogether to SIXTY-ONE SUCCESSES, achieved by pupils during the past 18 months.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, PRELIMINARY, &c.—CAREFUL PREPARATION for any of the above. Upwards of 130 successes during the past four years. Highest places in lists, Nos. 5, 8, 9, 15, 18, 29, 34, 37, 38, 52, 61, 63, &c. More Preliminary successes in February and March, 1883.

For full particulars, terms, references, &c., address, Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley-on-Thames.

MILITARY COMPETITIVE for MILITIA OFFICERS.—Special Course, in charge of Colonel STORY, late South Lancashire Regiment. 8 years' experience as Garrison Instructor. In 1882-83, with a total of Twenty-four Candidates, Six were successful, an average of one in four.

Address, Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and steady work is insisted on. Since the introduction of the Military Competitive, out of Forty-two Lieutenants of Militia sent up, Twenty-six have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of pupils successful at all Examinations, INCLUDING THE LAST SANDHURST AND RECENT MILITIA COMPETITIVE.

TO ARMY TRAINERS and MILITARY STUDENTS.

The undersigned offers his services in PREPARING LIEUTENANTS of MILITIA for LINE COMMISSIONS, and Officers of Volunteers and Militia for Promotion Examinations, under G.O. No. 20 of 1882.—Apply to Colonel W. J. STEWART, care of Messrs. H. S. King and Co., 45 Pall Mall, S.W.

CHAMBERLAIN LIGHT.

TO BE SEEN IN OPERATION AT
43 NEW BROAD STREET, E.C.

The Best, Cheapest, Safest, and Purest Light in Existence.

Extract from the Report of Professor H. HUTCHINSON, C.E., F.C.S., &c, on the Apparatus and Light:—

"The apparatus is very simple, uses pure material. The gas does not contain sulphur or sulphur compounds, nor naphthaline. Can be made without the least offensiveness in any house or mansion. Will travel any distance without deposit or condensation.

Hygienically the qualities of this light far surpass those of any other.

May be used as ordinary coal-gas for heating and cooking purposes.

It is the cheapest, brightest, and purest gas known."

Estimates given on application.

NOTES FROM ALDERSHOT.

(FROM OUR CORRESPONDENT.)

Minor operations were carried out on Tuesday, the idea being that the rearguard of a force retreating northwards on Hartford Bridge Flats takes up a position in the Long Valley, to cover the passage of the main body across the Basingstoke Canal, and to check a pursuing force advancing from Farnham. The only points of passage over the canal were by Eelmoor and Norris Bridges. The Northern force (under the command of Colonel Nicholl, 3rd Rifle Brigade), consisting of two squadrons cavalry, one battery artillery, and one battalion infantry, had instructions to delay the enemy as long as possible, and when obliged to cross the canal, to take every advantage of the ground on the north side to delay his advance. The Southern force (under the command of Colonel Luck, C.B., 15th Hussars), consisting of three squadrons cavalry, one battery artillery, and two battalions of infantry, were ordered to press on vigorously, and if possible force the enemy to increase the strength of his rear-guard. The operations were commenced at 10.30 a.m., and were brought to a conclusion shortly after mid-day. General Sir Daniel Lysons, K.C.B., was present during the operations, accompanied by his personal Staff, and the Assistant-Adjutant-General and Assistant-Quartermaster-General of the Division. Major-General Willis, C.B., was umpire-in-chief; the decision of umpires has not yet been made known. Sir Daniel Lysons has published his remarks on the manœuvres of the 18th and 19th inst., in which he says that the operations of the commanders of both forces employed were well considered and well thought out, and that much interest was shown by all who worked under them. The farewell ball to Sir Daniel and Lady Lysons was held at the Officers' Club on Tuesday evening. Upwards of eight hundred officers and ladies of the Division attended. Their Royal Highnesses the Duke and Duchess of Connaught were present. This has been the most successful ball ever held at Aldershot. The Divisional Flat Races came off on Wednesday. The grand stand and officers' enclosure were crowded, but it is noticeable that not so much interest is taken in these races as in former years, and there was a marked falling-off in the attendance of the general public. The Fifth Army Rifle Meeting at Cæsar's Camp Ranges during the week has proved to be the most successful one yet held, and bids fair, in time, to rival Wimbledon. The sanitary officer of the camp, Brigade-Surgeon Carter, in concert with officials of the Royal Engineers, made an inspection of the whole of the barracks and quarters in the command during the week, with the view of applying remedial measures, in consequence of the recent outbreak of diphtheria. Under instructions from the Horse Guards, and in order that there may be some uniformity in the matter, it has been decided that when troops are paraded in marching-order for inspection by H.R.H. the Field-Marshal Commanding-in-Chief, they will wear tunics instead of frocks. The following officers have been examined in subjects (*a*) and (*b*), Sec. 4, Para. 28, Queen's Regulations, for promotion, and have been found qualified:—Deputy-Assistant-Commissary-General Price, Commissariat and Transport Staff; Lieutenants Cameron, Leslie, and Leigh-Lye, 84th Regiment. A board of officers assembled in the South Camp on Thursday, to examine Major Hickson, 3rd Buffs, in French, to qualify for the appointment of Aide-de-Camp. The injuries sustained by Captain Davidson, Inspector of Army Signalling, who was recently thrown from his horse, are not so serious as reported. He will be able to resume his duties shortly. H.R.H. the Field-Marshal Commanding-in-Chief will visit Aldershot early next week, and be present at a review, which will probably be the last parade of the kind under the command of Sir Daniel Lysons. The following officers have been examined and are found qualified to instruct their troops or companies in musketry:—Lieutenants Calley and Holford, 1st Life Guards; Polhill-Turner and Kirk, 2nd Dragoon Guards; Captain Peckham and Lieutenants Alexander and Scott, 3rd Hussars; Captain Heathcote, 26th; Lieutenant Napier, 31st; Major Hill, 39th; Lieutenant Sitwell, 85th; Major Peckitt and Lieutenants Lowry, Henderson, Leslie, Leigh-Lye, Le Bailly, Kershaw, and Leslie, 84th; Lieutenants Adams, Conran, Mulock, Sandys, and Wilbraham, 87th; and Lieutenant Luttrell, 3rd Battalion Rifle Brigade. Commanding officers have been authorised to grant leave of absence to officers to attend Goodwood Races next week. The 1st Life Guards will return to Windsor early next week. A party of non-commissioned officers from various corps, under the command of Lieutenant Woodford, 84th Regiment, will leave the Camp on Wednesday next for Chatham, for a course of instruction in field-works at the School of Military Engineering. A company of the 31st Regiment proceed to Marchwood this week, there to be stationed until further orders. A number of officers and men of the Army Medical Department and Army Hospital Corps are under orders for Egypt. The 2nd Coldstream Guards will leave Pirbright Camp to-day (Saturday) for Windsor, on completion of musketry practice. The 1st Scots Guards will arrive at Pirbright Camp to-day (Saturday) from Windsor, for a course of musketry practice. Quartermaster D. Lackey and a strong detachment of the Army Hospital Corps will embark in the Carthage on Tuesday next for Egypt. The under-mentioned officers of Volunteer corps have been ordered to attend the School of Instruction for Officers of the Infantry Auxiliary Forces on Wednesday next, for a course of instruction:—Captains Hirst, 2nd West Riding; Carrell, 3rd Essex; Guise, 3rd Gloucester; Lieutenants Critchley-Salmonson, de Shortt, and Younger, 3rd Royal Scots; Mackinlay, 10th Lanark; Armitage, 4th Middlesex; Bishop, 17th Middlesex; Luce, Rumbold, and Kinneir, 2nd Wiltshire; Sillem, 10th Middlesex; Perceval, 3rd Surrey. Nearly two years have elapsed since a class assembled for instruction at this school. Captain Lye, 2nd Battalion 18th Royal Irish, Lieutenants Daly and Cokayne-Frith, 15th Hussars, and 12 serjeants from various regiments, will proceed on Wednesday next to the School of Musketry, Hythe, for a course of instruction. The artillery competition with the 9-pounder muzzle-loading rifled gun, in connection with the Army Rifle Meeting, has been postponed to August 10. Brigade-Surgeon J. J. Thompson, A.M.D., and Assistant-Commissary-General J. S. Young have been ordered to Aldershot. Lieutenant H. de H. Haig, R.E., has been ordered to Ireland. Major Hutton, 60th Rifles, has been appointed to succeed Major Hare, 22nd Regiment, as Brigade-Major, 1st Brigade.

THE ROYAL MARINES.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—On August 9 and September 3 respectively, the Staff appointments of Assist.-Adjt.-Gen. and Deputy-Adjt.-Gen. of the Royal Marine Forces will become vacant. As regards the latter appointment, it is understood that Major-Gen. J. W. C. Williams, of the Royal Marine Artillery, has already been nominated by the Board of Admiralty as the successor of Major-Gen. Sir C. W. Adair, K.C.B. Taking the last thirteen officers who have been on the Head-quarters Staff of the corps from November, 1846, to the present time, the Artillery branch has represented seven, viz:—Wesley, as Assist.-Adjt.-Gen. and Deputy-Adjt.-Gen., extending over a period of fifteen years; Langley, as Assist.-Adjt.-Gen. and Deputy-Adjt.-Gen., for ten and a half years; Schomberg, as Deputy-Adjt.-Gen., for three years; Williams and Festing, as Assist.-Adjt.-Gen. five and seven years respectively,—or a collective staff service of forty years and six months. Within the same period, six officers of the Infantry branch have held those appointments, viz., Lowder as Deputy-Adjt.-Gen. for five years, Travers as Assist.-Adjt.-Gen. for three years and a half, Rodney as Assist.-Adjt.-Gen. and Deputy.-Adjt.-Gen. for seven years and a half, and Adair as Assist.-Adjt.-Gen. and Deputy-Adjt.-Gen. for nine years, or a collective period of 25 years; that is, within the last 36 years seven Artillery officers have had a combined tenure of the Head-quarters-Staff appointments representing 39 years' service, as compared with six Infantry officers extending over 25 years. Considering that the Artillery number scarcely one-fourth of the corps, viz., 3,000, as against 10,000 Infantry, and that prior to 1862, before that branch became a separate and distinct division, its numbers in proportion were far less, it is evident that a very undue preponderance of those appointments have been awarded to the Artillery officers, and that by the selection of Gen. Williams as the next deputy-adjt.-gen., still further partiality will be shown to the Artillery, at the expense of the Infantry. It surely will not be assumed that the officers of Artillery, in virtue of their extra scientific training, are better qualified than those of the Infantry for the performance of the routine duties connected with the Royal Marine Office, advising the Board of Admiralty on any vital point concerning the corps generally, and for enforcing military discipline and drill in the field and barrack-square. On the contrary, one would fancy that the latter, from their great experience and as representing the parent branch, which constitutes so large a proportion of the entire force, should, if anything, have the preference, especially where their services are equally as good and meritorious. At any rate, they certainly should be entitled to their proportionate share of such appointments. In a few days the appointment of assist.-adjt.-gen. will become vacant, and the names of Col. Tuson, C.B., R.M.A., and Lieut.-Col. Walsh, R.M.L.I., are spoken of as the favourite candidates. Without in any way wishing to detract from the ability and services of the former officer, his nomination to the vacancy would be looked upon as a still further injustice to the Infantry officers; firstly, upon the ground that it will be depriving them of an appointment they are clearly entitled to, on account of the small proportion they have hitherto received; and secondly, that the Head-quarters Staff will then be entirely represented by the Artillery, which, considering the smallness of their numbers, as compared with those of the Infantry, would be manifestly unfair to that branch of the service. "To err is human," and the latter might naturally fear that such a state of things would at times be injurious to their particular interests; it is therefore to be hoped that their Lordships, when the time comes for nominating Sir Francis Festing's successor, will recognise the policy and justice of selecting an officer of the R.M.L.I. Col. Tuson's claims deserve every consideration, and the whole corps are only too willing to render him every credit for his valuable and gallant services during the late Egyptian Campaign, but he would be the first to admit that the recognition of those services, by the conferring upon him a brevet colonelcy, a C.B., and A.D.C. to her Majesty, has left him little to desire. The claims of Lieut.-Col. Walsh do not appear so brilliant, but it should be remembered that for many months he was employed, during the time the Royal Marine battalion was quartered in Ireland, on harassing and often very delicate duties, and for the able manner in which these were performed, he received the thanks and high approval of the General Commanding-in-Chief and the Lord-Lieutenant, thus the conferring upon him the coveted appointment of Assistant-Adjutant-General would be a graceful recognition of services so ably rendered. Referring to the appointment of Deputy-Adjutant-General in the Royal Marines, by Order in Council, the same was to be held by an officer not inferior to the rank of colonel, and as such was conferred upon Cols. Wesley, Langley, Lowder, and Rodney; but on the promotion of those officers to the rank of major-general, they were permitted to retain the same, to complete their period of Staff service. In the cases of Generals Schomberg and Adair, and now of General Williams, it has been bestowed upon a General officer on the Active List, thereby depriving the Colonels of the only Staff appointment they are eligible to obtain. Further, it may be asked upon what ground officers holding this appointment as Generals on the Active List are made supernumeraries of that List, thereby increasing the fixed establishment, and incurring an additional expense to the country of £700 a year? When the selection was made from the Colonels' List, it was apparently a necessity that the officer selected should become a supernumerary on that List, another officer having to be provided to perform his regimental duties; but this necessity does not exist in the case of a General officer on the Active List, he is simply transferred from honourable banishment back to military service. When General officers in the Army are appointed to command, are other officers promoted to supply their places on the Active List? Are Admirals, when selected for employment, made supernumeraries, and consequent promotion given to the Captains' List? It is difficult to conceive how such an arrangement in the Royal Marine Forces obtained sanction. Officers in the Royal Artillery and Royal Engineers holding like appointments are not made supernumeraries in the regimental rank they hold. Nor was it so in the case of the Inspector-General of Marines, when that office existed, and was held by a General officer on the fixed establishment. It so happens that by carrying out this system, on the appointment of Major-Gen. Williams there will be two supernumerary Generals, —that is, two over the established number, at an additional cost to the public of some £1,400 a year; and further, that the officer of Artillery, who was only promoted to the command of that division on the 3rd inst., will, on Sept. 9 next, be translated to the Active List of General Officers, thereby virtually depriving him of taking up his command, and consigning him to enforced idleness, at the very moment when a sphere for ambition and activity was within his grasp.—I am, &c., Justice.

The Canteen Fund of the Thetis gave to the Royal Female Orphan Asylum the sum of £14 11s. 9d., and Tuesday's provisions also went to the same institution. Lieut. Horsley becomes a life governor.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, June 25, 1883.

	1,801	49	2·7

The bad health of the Alexandria Garrison is the more remarkable, seeing that the weather is particularly cool for the time of the year and far more pleasant than that of Cairo.

Leave of absence has been granted to Captain Apthorp, 19th Hussars, from July 10 to October 24; Colonel Maitland, C.B., Commanding R.E., July 17 to September 16; Captain Dorward, ,R.E., July 18 to October 20; Brevet Major E. Wood, R.E., July 23 to November 7. The dates of the following leaves of absence are in correction of those previously stated :— Lieutenant-Colonels Clery, A.A.G., from June 13 to August 13; Gratton, Royal Sussex Regiment, April 25 to August 8; Lieutenants Sharpe, Royal Sussex Regiment, April 23 to August 4; Harvey, Duke of Cornwall's Light Infantry, July 10 to October 24.

Veterinary-Surgeon Beech having entered the Egyptian Army, Veterinary-Surgeon Bennett will take charge of cavalry and mounted infantry, in addition to his other duties, until the arrival from England of Veterinary-Surgeon Evans.

Deputy-Commissary-General' Saunder, invalided by medical board, will be provided with passage to England by first opportunity, and Assistant-Commissary-General FitzStubbs will temporarily perform the duties of Principal Commissariat Officer, Egypt.

There have been two deaths during the week. A private of the 46th committed suicide for no apparent reason, and another died in hospital at the Citadel, Cairo, of enteric fever.

General Grenfell, C.B., A.D.C., having returned, Sir Evelyn Wood has left for England, accompanied by his A.D.C., Major Stuart Wortley. Almost immediately after he had left, cases of cholera occurred at Ghizeh, where the Egyptian Artillery are stationed. The General was at once telegraphed to, and it is believed he will return; meanwhile, Colonel Duncan has moved his troops.

Weekly state of the Army in Egypt :—

Cairo, July 2.

	Total Force.	Sick.	Per cent.
Cairo :—Artillery	467	22	4·7

It is singular that the Artillery and Cavalry who showed so large a percentage of sick during the healthy season, should show such good health during the hot weather. In the present state of things, with cholera eighty miles distant, and the possibility of its spreading, sickly regiments are rather dangerous. The Gordon Highlanders and the Duke of Cornwall's Light Infantry (included in Alexandria garrison) account for nearly 200 (191), out of the total sick of 573. Without them the total percentage would be only 7 per cent.

Leave of absence has been granted to Surgeon F. Treherne, from June 24 to July 8, to Ramleh, for health; Colonel Minto Elliott, R.A., from July 3 to September 1; Lieutenant A. C. H. Bathurst, Royal Sussex, from July 15 to October 31; Lieutenant Young, Royal Sussex, from July 2 to October 17; Superintending Sister Jones, from June 26 to July 4.

On Saturday, July 1, his Highness the Khedive distributed the bronze star to the Alexandria garrison, on the parade-ground at Ramleh. The ceremony commenced precisely at a quarter-past 6, when the Khedive appeared on the ground accompanied by the Ministry, and was saluted by the Egyptian National Anthem. A stage had been erected by the aid of several empty brandy cases covered by a carpet, on which were placed two chairs. General Earle having advanced to this imposing throne was greeted cordially by his Highness, who at once proceeded to drive a pin into him with much apparent energy,—a painful operation which the General sustained with his accustomed heroism, taking up his position by the side of the throne. Officers and a few sample men then followed, and underwent the same process; after which General Earle mounted his horse, and some 1,500 men marched past in quick time, reformed, and gave the royal salute. All that the cholera scare had left in Alexandria were present, and I heard murmurs among some fair visitors that a few chairs would have added to their comfort, and have enhanced the reputation for gallantry of the regiment that "doesn't call."

THE CHOLERA IN EGYPT.

The following telegram has been received by the Secretary of State for War from the General Officer Commanding in Egypt, dated Cairo, July 26 (received July 26) :—"Died of cholera on 22nd, Private J. Mundle, Black Watch; on 23rd, Private E. Shoesmith, Black Watch; on 24th, Privates Michael Carrigan, J. Smith,* T. Dodds, and J. Cameron,* Cameron Highlanders; also Privates J. Fraser and H. Matthews, Black Watch; also Corporal W. Stevens and Private T. Smith, Army Hospital Corps; also Lieutenant Le Quesne, Royal Artillery; on 25th, Corporal Cooper and Private Anderson,* King's Rifles; also Corporal Gardner, I Battery, 2nd Brigade, Royal Artillery; on 26th, Private D. McKay and Private T. Phillips, Black Watch." (*The regimental numbers of these three men have been telegraphed for, as there are more than one of the same name in the regiment.)

From the General Officer Commanding in Egypt to the Secretary of State for War, dated Cairo, July 27 (received July 27) :—"Health of Cornwall Regiment improving. Total admissions for cholera—2 officers and 34 men; deaths—2 officers and 23 men. Deaths since yesterday's telegram—Lieutenant Croft, R.A., and 8 men, whose names and numbers will be given."

It is satisfactory to know that all the British troops are now in their new quarters. The water supply for those camped on the Mokattam Heights is provided for by a camel corps. All the English officers, both in the British and Egyptian Armies, are working with hearty goodwill to check the epidemic and prevent its spreading, Earl Granville has appointed the following medical gentlemen to proceed to Egypt and render assistance to the Egyptian Government in suppressing the cholera epidemic :—Dr. Hy. Crookshank, University Hospital; Dr. McNalty, Indian Medical Service; Dr. A. F. Wilkins, Edinburgh; Dr. Armand Leslie, Middlesex and Paris; Dr. F. E. Taylor, Charing Cross; Dr. A. Honman, Charing Cross; Dr. F. G. Thrapp; Dr. C. F. Parker, Dublin and Manchester; and Dr. J. Cantlie, Aberdeen University. Most of these gentlemen left on Thursday night for Egypt.

Reviews.

Through the Zulu Country; its Battle-fields and its People. By Bertram Mitford. (Kegan Paul, Trench, and Co.)

It is at a rather interesting time that Mr. Mitford has published this volume. Even at this moment the name of Cetewayo is cropping up rather frequently, and we hear evil tidings of the sable monarch who was treated so scurvily by this country. Late telegraphic news tells us of fighting in Zululand on July 23,—how Cetewayo was attacked and completely defeated by Usibepu, how Ulundi was burned by the conqueror, and how Cetewayo was wounded. Further telegrams state that Cetewayo has been killed at Ulundi; that his wives have suffered a like fate, and that the last state of Zululand is worse than the first. This work is not intended to be anything except an account of every-day experiences during a trip through Zululand in 1882, undertaken with the object of making the round of the battle-fields in succession. It would appear that the districts travelled over by the author may be regarded as "virgin" ground, and that, hitherto, no other writer has undertaken a description of the manners and customs of the people of a country so little known as Zululand. The volume is illustrated by five drawings, representing "Isandhlwana," "Where the Prince was Killed," "Ezzalwini," "The Site of Ulundi," and "Hlobane Mountain." Passing by the opening chapters, which are pleasantly written, the reader will be attracted by the seventh, which treats of Isandhlwana, and tells the Zulu's story of the battle. The narrative is that of a warrior of the Umbonambi Regiment, who was present at the fight and took an active part in it; he became occasionally during the narrative terribly excited. His version of this battle has been corroborated by that of a Nokenke warrior, whom the author met with in a far-distant part of the country. After describing the earlier periods of the battle, he points out the mode in which his regiment worked round behind Isandhlwana under cover of the long grass and dongas, intending to sweep in upon camp. At this moment the white men appeared running along the road, many of whom were cut off and killed in the stream which flows through the bottom of the valley. When the others came up, some on foot, some mounted, they saw that the valley was full of our warriors, and, turning to the left, ran off along the side of the hill towards the Buffalo, but were mostly killed among the thorns and dongas. The narrator thus continues :—

> "The white men fought well. A lot of them got up on the steep slope under the cliff behind the camp, and the Zulus could not get at them at all,—they were shot or bayonetted as fast as they came up. At last the soldiers gave a shout, and charged down upon us. There was an '*induna*' in front of them, with a long, flashing sword, which he whirled round his head as he charged down. It must have been made of fire. They killed themselves by running down, for our people got above them and quite surrounded them. These and a group of white men on the 'neck' were the last to fall."

The officer mentioned as the "*induna*" is supposed to have been Captain Younghusband. No reference is made as to the cause which induced our soldiers to abandon their strong position, and charge down as a forlorn-hope. It may be that their ammunition was exhausted, and that it only remained for them to die selling their lives as dearly as possible. One pleasing feature in the Zulu's very graphic description of the battle is that it puts aside the tale of tortures being inflicted on prisoners of war. Such is never the case. Men are killed outright, never taken prisoner, and never tortured. In the following chapter (viii.), the author draws an eloquent picture of "Fugitives' Drift," and the sad tale of Whyte and Melville, in their heroic effort to save the colours of their regiment. In the ninth, the author describes the scene of the Prince Imperial's death, from facts carefully gleaned from Zulus who were present at the disaster. The Zulus who surprised the Prince numbered 60 men, a scouting party, in fact. The presence of white men was reported by one of the number, who from a peak overlooking the valley directly opposite the scene of the catastrophe had seen the Prince's party off-saddle at the kraal. Thereupon the whole body moved stealthily down a deep donga opening into the Ityotyozi; gaining the river, they crept along beneath its high banks, and advanced upon the unsuspecting group under cover of the standing corn. Were it not for that fatal delay of ten minutes, the Prince would have been alive now. The savages were scarcely in position when the word was given to mount, but fearing lest their prey should escape them after all, they made the attack,—a hurried volley, a wild shout, and the rout was complete. One of the troopers was not able to mount his horse, that of the other was shot, but the Prince had still hold of his own—a large grey—which plunged and reared, becoming quite unmanageable. "We fired again and charged forward, shouting 'Usutu!' The big horse broke away and ran after the men who were riding off as fast as they could round the slope. He fought hard when we came up to him. The first man to stab him was Xamanga; he belonged to the Umbonambi Regiment, and was killed at Ulundi. We did not know at the time who the Prince really was, but thought he was an English *induna*. His sword was taken to Cetewayo." In describing the battle of Ulundi, the author transcribes from the columns of the *Port Elizabeth Telegraph* a most graphic description of that important event. In it Cetewayo's strategy is pronounced excellent, but the execution bad. The battle was decided before the enemy came within the range of the small arms; the shrapnel took the dash out of the attacking columns. Both the English and the Colonial cavalry behaved splendidly, and no doubt increased the losses of the enemy by at least 500. The English loss was 16 killed and 40 wounded; the total of the enemy's loss, about 1,500. In concluding this very interesting work, the author gives some useful information as regards Zulus, their superstitions, their customs, the resources of the country, and its prospects for the future. All these should be carefully noted by any readers whose fate it may yet be to have their lot cast in Zululand.

Admiral Ito and Mr. Sasow, of the Imperial Japanese Navy, began, by Admiralty permission, an inspection of Portsmouth Dockyard and the shipping on Thursday week, and Mr. Frederich Gille, an officer belonging to the German Navy, has also been granted permission to visit the yard.

The Edinburgh has been inclined at Portsmouth to ascertain her metacentric period, and advantage was taken of the opportunity to conduct a series of experiments having reference to her rolling powers, a large quantity of movable ballast being brought into requisition for this purpose. Mr. W. E. Smith, draughtsman, attended from Whitehall, and there were also present Mr. Froude, of Torquay, and Mr. Philip Watts, Assistant-Constructor at the Admiralty.

An accident of a serious nature has occurred at Portsmouth to Mr. F. Brockton, a retired engineer, living in Queen's Road, Buckland. He was propelling a tricycle, and owing to the upsetting of the machine his right leg was fractured.

The Conqueror has been supplied with her 43-ton turret guns, and is now being prepared to be commissioned.

OUR CRUISERS.—II.

In our number of April 21, we gave the logs of the three fastest steamers in the last half of 1882; and promised the logs of the vessels that, when the pinch comes, will be employed against us as privateers. In these articles, vessels having a sea speed of 16 knots and upwards are classed as of extreme speed; 13 knots to 16, as of high speed; below 13, as useless for any war purpose. We do not propose to give the logs of any vessels but those of extreme speed. We have purposely chosen the passage to the Westward, as it is much the most onerous; ships that will do this are fit for anything. On the other hand, any fool can build a ship that can go in fine weather. Even the Iris will go 17·55 knots at load draft, for a quarter of an hour, but then she wants new crank-pin brasses. It must be obvious, that if you want to cross the Atlantic at 17·55 knots, you have no chance to change the crank-pin brasses every quarter of an hour. See reports of the trial in *Times*, May 20, 1880.

The history of these remarkable vessels is as follows:—In 1879, attracted by the passages of the Arizona, the North German Lloyds applied to John Elder and Co. for a vessel of similar type, but a little smaller and less power. The result was the Elbe. The success of the Elbe produced the Werra in the autumn of 1882, and the Fulda in the spring of 1883. And the success of the Werra has induced the building of two more, now in frame at Elder's, and which will doubtless be running in the spring of 1884. Of the speed and staunchness of these vessels, there can be no more doubt than there is of death. We give some particulars of their construction:—

Elbe—Built in 1881; 420 ft. long, 45 ft. broad, 36 ft. deep; 4,233 tons register; 16·6 speed on trial; $\frac{1}{50}$ & $\frac{2}{85}$ × 60 engines; boilers, 4 D E 15′5″ diam. × 17′3″ long, 24·4′ fires; 5,835 indicated h.p.

Werra—Built in 1882; 450 ft. long, 46 ft. broad, 36 ft. deep; 5,109 tons register; 17·2 speed on trial; $\frac{1}{62}$ & $\frac{2}{86}$ × 60 engines; boilers, 4 D E 16′ diam. × 17′.7″ long, 24·4′.2″ fires; 6,700 indicated h.p.

Fulda—Built in 1883; 450 ft. long, 46 ft. broad, 36 ft. deep, 5,124 tons register; 17·1 speed on trial; $\frac{1}{62}$ & $\frac{2}{86}$ × 60 engines; boilers, 4 D E 16′ diam. × 17′.9″ long, 24 Fox 4′.2″ fires; 6,386 indicated h.p.

We estimate the value of these vessels at £32 a ton, when new. The displacement of the Elbe at 26 is 8,400 tons; the others 8,800 tons.

The Werra went from the Firth of Clyde to Dover in 39 hours; has accommodation for 170 first-class passengers, 90 second, 1,100 third.

We estimate the daily consumption of the Elbe at 90 tons, and the two larger ones at 120 tons. And further, we are of opinion that the total dead-weight capacity of the Werra and Fulda to be greater than that of the Arizona, for the reason that they have fewer boilers, and that the art of the shipbuilder and engineer is not standing still. Nor is this all. These are the fastest vessels we should have to provide against, but there are others, such as the Rugia and Hammonia, in the second category, whose speed is less, say 14-15 knots, but whose dead-weight capacity is relatively much greater, *i.e.*, their coal endurance much longer. Readers will, perhaps, ask why we speak so didactically of these German vessels. The answer is brief; it is just the case of the Cimbria over again, only with better tools for the privateers, and worse for ourselves. All that we have to show is the asseveration "that the Navy never was in a better position!" (Loud applause.) Just as in the case of the Cimbria, these vessels will be sold to the Russians at a high profit, and then turned loose upon our commerce. We regret to say that the celebrated tea clipper, Stirling Castle, that won the race last year, making the voyage from Shanghai to Gravesend, including detention in Canal and coaling, under thirty days, is also sold to foreigners. We have pointed out four vessels that in the event of war will be turned loose on us. We, in our own Mercantile Marine, have only five vessels that could match these; and as to saying the Iris and Mercury could do it, we have only to say that they (the Iris and Mercury) are nothing but a sham and a mendacity. What our Admiralty ought to have done is to have built on the same lines, but with more speed, similar vessels. What they have done is to stump the country with their hallelujahs, which everyone but themselves knows to be ridiculous. We have heard the present First Lord on the hallelujah tack, not very long ago; and we thought of the sardonic satisfaction Bismarck would have at seeing our commerce cut up, and the bulk of it gone over to the Germans; and our shipowners "left to stew in their own gravy." But let us see a little more in detail what we have in our Navy presently available. We exclude the Imperieuse and Warspite. In no intelligible sense of the word are they cruisers. They are partially protected ironclads, 315 long by 61 beam. What is the use of a sledge hammer to break an egg? They are to be coppered: a plan very expensive, very dangerous, and wholly unnecessary. We have a considerable acquaintance of ships, and have never found a private shipowner sufficiently insane to copper an iron or steel ship. These will probably not be available till 1885. Our Admiralty may rest assured that the future privateers will not be coppered; and if our state ships were rationally built, there would be no more difficulty in docking them, than docking a merchant ship.

[*Table* 2.]

Liverpool Atlantic Mail Steamers.

Passages to the Westward, 1883.

Alaska.—The record of this vessel for the month of January was as follows: Hourly speed, 12·7; distance, 2,785 miles; and apparent time, 9 days, 3 h. 37 min. (very bad passage, the Catalonia, a 12-13 knot steamer, took 13 days, 9 h., 48 min., distance 2,777, speed 8·6 knots). For February the figures were respectively, 17·6, 2,830 m., 6-18-36; March, 14·5, 2,795, 8-0-46; April, 17·9, 2,844, 6-15-24 (this is the fastest on record out; clear days' runs, 405-401-421-428-413; Moody and Sankey were on board; let no one say after this that parsons being on board stop a ship's going!)

Arizona.—The record for January was: 13·3, 2,831, 8-21-28; March, 15·1, 2,855, 7-20-50; April, 15·8, 2,915, 7-16-35 (an average passage for this ship).

Servia.—The record for February was: 12·0, 2,844, 9-21-6 (weather as bad as possible; forward funnel stove in); March, 15·5, 2,858, 7-16-21; April, 16, 2,863, 7-10-42.

The passages of the Liverpool steamers are reckoned between Queenstown and Sandy Hook.

[*Table* 3.]

North German Lloyd's Mail Steamers.

Passages to the Westward.

Elbe.—The record of the two trips this vessel made in August, 1882, were as follows: First trip:—Speed, 16·4; distance, 3,074 miles; and apparent time, 7 days, 20 h. 5 min. For the second trip the figures were respectively, 15·1, 3,060, 8-22-15; September, 15·5, 3,068, 8-7-15; October, 15·4, 3,078, 8-5-50; November, 14·7, 3,089, 8-18-25; January, 1883, 14·1, 3,086, 9-3-0; March, 15·4, 3,107, 8-9-15; April, 15·5, 3,175, 8-12-30 (fog in Solent, went out by Nab).

Werra.—The record for October, 1882, was: 15, 3,065, 8-9-10; November, 16·3, 3,063, 7-20-50; December, 14·7, 3,071, 8-11-15; February, 1883, 12·6, 2,978, 9-19-45 (on the 20th passed one iceberg, weather as bad as possible); March, 15·9, 3,128, 8-4-40.

Fulda.—March, 1883: 16·3, 3,100, 7-22-20; April, 16, 3,130, 8-3-15.

The passages of these steamers are reckoned between the Needles and Sandy Hook, and it will be noticed the passages are longer than those of the Liverpool steamers from Queenstown.

[*Table* 4.]

	Length. ft.	Breadth. ft.	Draft. ft.	Tons. b.m.	Coal carried. tons.	Sea Speed.	Days Coal
1.—Modern Vessels with Compound Engines:—							
(A.) Iris, double screw (cost £244,000)—	300	46	22	3,050	750	16	7
(B.) Arethusa, double screw (cost £165,000)—	300	46	22	3,050	1,000	15	12
Frigates—*i.e.*, attempts, which are failures, to combine steaming and sailing—							
(C.) Bacchante, single screw (cost £264,000)—	280	45½	23	2,679	400	13	6
Corvettes—							
(D.) Comus, single screw (cost £136,000)—	225	44½	19	2,100	270	11	9
Composite corvettes (a bad lot)—							
(E.) Opal, single screw (cost £115,000)—	220	40	18	1,668	260	9½	10
Wooden Corvettes—							
(F.) Amethyst, single screw (cost £85,000)—	220	37	18	1,405	250	10½	9
2.—Vessels with Old-fashioned Engines.							
Frigates—							
(G.) Inconstant, single screw (cost £249,000)—	337	50½	26	4,066	600	13½	5
Corvettes—							
(H.) Active, single screw (cost £145,000)—	270	42	21	2,322	400	12¾	5
Wooden Corvettes—							
(I.) Dido, single screw (cost £67,000)—	212	36	16	1,277	230	10½	8

We also compare a first-class mail steamer, now running, built of steel, with the Arethusa. We have classed them all of the same speed, but this only as long as the weather is good. In bad weather, the mail steamer would soon run the state ship out of sight, the model is so much better.

Arethusa—300 ft. long, 46 ft. broad, 22 draught; 3,748 displacement; 1,000 tons of coal; 15 sea speed, extreme; 80 consumption daily; £165,000 cost; 700 nominal h.p., 5,000 indicated h.p.

Mail Steamer—390 ft. long, 42 ft. broad, 23½ draught; 7,200 displacement; 1,000 tons of coal; 2,000 cargo, tons weight; 15 sea speed, extreme; 80 consumption daily; £126,000 cost; 750 nominal h.p., 4,000 indicated h.p.

This mail steamer has a freeboard of 12 ft., has a refrigerator, accommodation for 120 1st-class passengers in a tropical climate, and 30 servants. To return to Table 4. Of the Iris type we have two vessels. In the report of one of the most competent officers of the Navy, deduced from trial at sea, is the following:—"I should call 16 knots for a week roughly her speed and coal endurance under fairly good conditions." This is duly pigeon-holed away in the Admiralty, no doubt, and we recommend Sir T. Brassey's attention to it. In his late book (Vol. I., p. 557), the Iris' speed is given at 18. The simple fact is that at her load draft she can go 17½ for a quarter of an hour, but the design of the engine—short connecting-rod and stroke—is so utterly and wildly impracticable, that the crank-pin brasses then give out. We have paid considerable attention to this ship, went to see her when building, and have seen her twice since, and have no hesitation in saying that a more extravagant and gratuitous blunder does not float on salt water. When these ships were built, in 1877, steel as applied to ocean ships was a novelty; and we went to Pembroke Dockyard, to the Crewe works, where Mr. Webb was making steel for a Holyhead steamer built by Laird—the Isabella—and to Laird's yard. We have seen many steel vessels, built and building. We were much struck at Pembroke with the beauty of the model and the excellence of the workmanship of the Iris and the Mercury, but as regards the structural strength, we can only repeat that "the chief fault of the Constructive Department of the Admiralty is, that they know nothing about ships." The frames in amidships are four feet apart, 42 in. at the ends, and the shell-plating of top-sides is only $\frac{3}{8}$ in., and single riveted. We told the foreman in charge of the work that we were interested in Atlantic steamers. He replied, "No doubt you think this rather slight;" to which we replied, "that if a mosquito jumped heavily on those topsides they would cave in!" Mr. W. John, the leading scientific authority on the structural strength of ships, and now manager of the Barrow Ship-building Company, pointed out that the Iris would not be eligible for the 100 A-1 class at Lloyd's, on account of the "slimness" of her build; Mr. W. H. White, when still at the Admiralty, "that as to the strength of the ship . . . . . . there could be no question." We have constructed a drawing from Mr. White's description of the Iris, as to what she would have to be by Lloyd's rules for the minimum for 100 A 1, and we find her frames would have to be 2 ft. apart—that is, in amidships, twice the number—and the steel plating 9-16ths and 10-16ths, instead of 6-16ths and 8-16ths. We also know, by the best of all teachers, experience, that steel ships of high power, built down to the minimum of Lloyd's, or of any other rules (we consider Lloyd's the best), will not do their work on account of structural weakness, —*a fortiori*, what a crazy rattletrap the Iris must be! (See "Journal of the Society of Naval Architects," 1879.) But this is not all. "The Constructive Department of the Admiralty" determined to have two screws, though it was well known in the marine engineering world that Maudslay's, the makers of the engines, were dead against it. Men not conversant with engineering matters may perhaps think the constant failure of the crank-pin brasses is a reflection on Maudslay's, but it is nothing of the sort. They have simply made, and made, let us say (for we have seen the drawings, and the indicator diagrams), as well as it was possible to make, a specific article, *i.e.*, they have carried out the Admiralty designs. When we say that each engine is 500 h.p. nominal, the stroke 3 ft., the connecting-rod 5 ft. 9 in., the revolutions intended 95, it is quite enough to show the crass ignorance of the design. We claim to speak with some authority of Maudslay's engines, for we have sailed with them in the Great Western, built in 1837, and in the White Star steamers, built in 1870, and we should like to know what engines have done better? We have no hesitation in saying that a rationally built 500-horse-power engine would have driven the Iris as fast at sea as she can go now, *i.e.*, 16 knots, on 80 tons of coal a day, and that her coal endurance would have been more than doubled. To drive her 16 knots at sea now requires 120 tons a day. And yet it is still insolently repeated that the Iris and Mercury are "the most rapid-going ocean steamers yet built;" and, further, we are called upon to admire them as specimens of the triumphant results of the application of science to shipbuilding. (See *Westminster Review*, January, 1881.) That eminent shipbuilder and patentee, Sir E. J. Reed, K.C.B.,—of whom we shall have something further to say when we come to the Inconstant and Osborne—states in the *Times* of February 14, 1883, that the Iris, in time of war, could render service to the country not in the power of any mail steamer, and that such criticism on the Iris as appeared in the *Times* of February 13, 1883, in a letter written by Captain Henry F. Watt, of Liverpool, is extravagant, and can do nothing but harm. We have only to say, in conclusion, the Iris has cost as much as the Alaska; and that some further information as to her is published by Lee and Nightingale, Liverpool, in the *Mercantile Marine Reporter* of July, 1879.

3. Class Arethusa type—cruisers of the 2nd Class, described in Sir T. Brassey's *magnum opus*, Vol. I., p. 505; and in a stump speech at a political meeting at Birkenhead, December 12, 1882. Speed expected 16 knots, "or with forced blast 18 knots." There is at the time of writing only one 18-knot vessel, the Alaska; but as in the case of the Iris, the 18 knots will probably be found only upon paper. We may remind Sir T. Brassey that it is easier to talk glibly about 18 knots than to get it. It would have been interesting under the head of forced blast, if Sir T. Brassey had told us what the failure and new boilers of the Polyphemus are expected to cost. The net result of forced blast to the taxpayer appears likely to be that, while now our cruisers' boilers last four or five years, with forced blast they will last two. A mail steamer's boilers last 10 years. We gladly recognise in this type the improvement made in the giving-up sail, the greater coal endurance, and the superior design of the engines as to length of stroke (4 ft.) and connecting-rod (7 ft. 6 in.), over the Iris; but we regret to say—and we have examined them—we can see no improvement in their structural strength; and that as regards this most

important point, their sea-speed and coal endurance, they have not a ghost of a chance against the vessels such as the Elbe, Werra, or Fulda, which will be employed against our commerce. We have four vessels of this type building, two of the Glasgow ones are launched. None of them are at present available, so that, of our whole unarmoured ships, there is not one that could go at the moderate speed opposite her name in Table 4, from Liverpool to New York, simply on the question of coal power, and without entering on the question of structural strength at all. One seaman must at all events be excluded from joining in the official hallelujahs "that our Navy never was in a better position."

(*To be continued.*)

Obituary.

Major-Gen. P. Robertson-Ross, C.B., of Glenmoidart, Invernesshire, died on Monday, at Boulogne-sur-Mer, aged 55. He was the second son of the late Hon. Lord Robertson, a distinguished Scottish judge. He was nephew of the late Lieut.-Gen. Hugh Ross, of Glenmoidart, whose property he inherited in 1865, when he assumed the name of Ross. Major-Gen. Robertson-Ross was educated in Edinburgh, and entered the Army in 1848. He served in the Cape Mounted Rifles during the Kaffir War of 1850-51, and was given the local rank of captain when in command of a corps of Irregular Cavalry, called "Armstrong's Horse." He was six times thanked in general orders, and three times specially mentioned in the despatches of the Commander-in-Chief, and was then promoted to a lieutenancy in the 4th Regt. He served throughout the Eastern Campaign of 1854-55 with the 4th Regt., being present at the battles of Alma and Inkerman, and the siege and fall of Sebastopol. For these services he was thanked in Lord Raglan's despatches, and obtained the brevet rank of major, the medal and clasps, the Knighthood of the Legion of Honour, and the fifth class of the Medjidie. He was promoted lieut.-col. in 1863, became col. in 1870, and major-gen. in 1880. He was nominated a C.B. in 1875.

Col. J. Clements, Bombay S.C., and late Comdt. of the 3rd Bombay Native Infantry, died on Friday, at Belsize Park, aged 53. He entered the Army in 1847, and served with the Bombay column in the Punjab campaign of 1848-9, and was present at the siege and surrender of Mooltan, the battle of Goojerat, and the pursuit and surrender of the Sikh army. He subsequently served with the field force which penetrated into the Eusofzaie country, north of Peshawur, for the purpose of chastising the hill tribes on the Swat border; and was likewise present at the capture and destruction of the villages of Sugao, Pulai, Shurkbanee, and Zoormunda, in the Bazdurrah Valley. The gallant officer obtained a lieutenancy in 1853, and was promoted to the rank of capt. in 1861, major in 1867, lieut.-col. in 1873, and col. in 1878.

The *Irish Times* says:—"The Southern Colonies of Australia are making energetic efforts to complete their systems of defence. The Victorian Government propose to expend £300,000 during the next three years in the completion of the batteries required for the defence of Port Phillip Heads, Swan Islands, and the South Channel. A number of heavy guns have already been mounted, and several more shore batteries are ready to receive their armaments, which have been ordered in England. The permanent Artillery force is being reorganised, so that a force is to be remodelled and its efficiency increased. The Government are negotiating through the War Office for the appointment of a lieutenant-colonel of Artillery to take the command of the Victorian forces for the period of five years, and for the engagement of a captain of Artillery and a captain of Infantry, the latter to act as adjutants of the Artillery and Infantry forces respectively. In the ironclad Cerberus and the frigate Nelson, the Victorians already possess the nucleus of a Navy, but considerable additions are now being made to it. Sir William Armstrong and Co. are commissioned to construct, at their Elswick Works, a gunboat of the Alpha-Beta pattern, capable of steaming 10 knots an hour, for the defence of the shallow waters of Port Phillip. A larger gunboat, of the Epsilon type, is being built by the same firm for defence purposes along the Victorian coast outside the Heads. At Chiswick, Messrs. J. J. Thornycroft and Co. are building a steam torpedo-boat for the Victorian Government, capable of steaming 18 knots per hour. The South Australian Government are having a war-cruiser of a different design built by Sir William Armstrong and Co., and have ordered a large supply of torpedoes from England, and also propose to increase the efficiency of their permanent and Volunteer Forces. The War Office have been applied to, to permit Lieut. Jervois to return to this colony as Adjutant of the Forces, and they have thrown no obstacle in the way of his acceptance of the appointment. The New South Wales Government have ordered large supplies of small-arm ammunition, and some Nordenfelt guns; but in other respects their defences are in a more advanced state than those of the other colonies, excepting that they have no Navy. The Wolverine, which the British Government have recently presented to the Colony, is used as a training-ship, but does not materially increase the defensive strength of Port Jackson. As the head-quarters of the Australian squadron are at Sydney, there is less necessity for a Colonial Navy."

Mr. Blake, chief boatswain of the Britannia, who succeeds Mr. John Sullivan, V.C., as boatswain of Portsmouth Dockyard, has been informed that the appointment is only of a tentative character, and that he cannot be allowed to retain it beyond the date at which he would otherwise retire from the service on pension.

LETTS'S POPULAR ATLAS is just now complete. The *Saturday Review*, May 12, 1883, says:—"We can honestly add that the unmounted edition (£2 2s) of Messrs. Letts's Atlas is beyond all question the cheapest full compendium of geographical information to be obtained, and the mounted form (£5) one of the most handsome."—Detailed Prospectus of LETTS, Limited, London Bridge, E.C.

The Gazette.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 24, 1883.

2nd Dragoon Guards—Lieut. W. Howard resigns his commission; Lieut. W. Flood, from the Bedfordshire Regt., to be Lieut., vice F. S. Barton, transferred to the Scots Guards.

6th Dragoon Guards—Major H. B. Hamilton is placed on temporary half-pay, on account of ill-health.

1st Dragoons—Troop Serjt.-Major W. R. Banting, from the 21st Hussars, to be Rdgmr., vice J. Collins, retired.

5th Lancers—Qrmr., with the hon. and relative rank of Capt., J. Berryman, V.C., to be placed on retired pay, with the hon. rank of Major (July 28).

7th Hussars—Lieut. H. M. Ridley to be Adjt., vice Capt. R. Roper, who has vacated the appointment.

11th Hussars—Major E. H. Green retires from the service, receiving the value of his commission.

19th Hussars—Lieut.-Col. K. J. W. Coghill, C.B., retires on a pension, with the hon. rank of Col.

20th Hussars—Regtl. Serjt.-Major Thomas Dewhurst, from the 2nd Dragoons, to be Lieut., vice R. J. E. Oliver-Bellasis, promoted.

Royal Engineers—Lieut.-Col. and Col. J. P. Maquay has retired upon retired pay, with an annuity, and the hon. rank of Major-Gen. (July 10); Lieut.-Col. and Col. E. H. Steward has retired upon retired pay, with an annuity, and the hon. rank of Major-Gen. (July 14).

Scots Guards—Lieut. the Hon. A. F. H. Campbell resigns his commission.

REGIMENTAL DISTRICT.

Lieut.-Col. and Col. J. Miller, commanding the 9th Regtl. District (the Norfolk Regt.), is placed on retired pay, with the hon. rank of Major-Gen.

LINE BATTALIONS.

The Royal Scots (Lothian Regiment)—Lieut. T. R. Scarlett retires on temporary half-pay; Lieut. H. H. Francis, from the 5th Batn. the Rifle Brigade (the Prince Consort's Own), to be Lieut., vice G. C. Peard, promoted.

The Northumberland Fusiliers—Supernumerary Major W. A. Eardley-Wilmot to be Major, vice C. de J. Græme, retired (July 14).

The Royal Warwickshire Regiment—Lieut. D. Granville, from the Royal Scots (Lothian Regt.), to be Lieut., vice J. F. Greenwood, appointed a probationer for the Indian S.C.

The Prince of Wales's Own (West Yorkshire Regiment)—Capt. W. S. Purkis retires from the service, receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

The Royal Irish Regiment—Capt. J. C. Oughterson has been seconded for service as a Deputy Assist.-Comy.-Gen. (Nov. 11, 1882).

The Lancashire Fusiliers—Lieut. G. E. C. Cure to be Capt., vice E. S. N. Dickenson, promoted (May 11).

The Cameronians (Scottish Rifles)—Lieut. C. F. Campbell, from the Buffs (East Kent Regt.), to be Lieut., vice P. E. C. Sheehan, promoted.

The Royal Inniskilling Fusiliers—Lieut. G. F. Clayton-East resigns his commission.

The Border Regiment—The Christian names of Lieut. Welsh are "David James," and not as stated in the *Gazette* of May 9, 1882.

The Royal Sussex Regiment—Major F. W. Robertson has been seconded for service as an Adjt. of Auxiliary Forces (July 1).

The South Staffordshire Regiment—Lieut. F. Broadwood to be Capt., in succession to Major W. S. Darley, appointed Adjt. of 3rd and 4th Batns. (May 29).

The Prince of Wales's Volunteers (South Lancashire Regiment)—Major J. Brougham retires from the service, receiving a gratuity.

The Welsh Regiment—Lieuts. J. Jones and C. H. U. Price have been appointed probationers for the Indian S.C. (both dated June 16).

The Black Watch (Royal Highlanders)—Major J. S. Walker retires on retired pay, with the hon. rank of Lieut.-Col.

The Oxfordshire Light Infantry—Lieut. B. Holloway has been appointed a probationer for the Indian S.C. (May 11).

The Duke of Cambridge's Own (Middlesex Regiment)—Lieut. E. de S. Smart has been appointed a probationer for the Indian S.C. (May 3).

The Queen's Own (Cameron Highlanders)—Lieut. R. F. L. Napier to be Capt., vice G. A. C. Reid, resigned (July 14).

The Royal Munster Fusiliers—Capt. J. Coulton has been seconded for service as a Deputy-Assist.-Comy.-Gen. (June 13).

Staff—Lieut.-Col. F. Eteson, half-pay, to be an Assist.-Adjt. and Qrmr.-Gen., vice Col. W. H. Knight, half-pay, whose period of service in that appointment is about to expire (Aug. 7); Major A. W. Morris, the Northamptonshire Regt., to be a Brigade Major, vice Major and Brevet Lieut.-Col. H. J. T. Hildyard, the Highland Light Infantry, whose period of service in that appointment is about to expire (Aug. 6).

Medical Department—Surg. R. H. Robinson to be Surg.-Major (July 2).

Army Pay Department—The under-mentioned Staff Pymrs. and Hon. Majors to be Chief Pymrs., with the hon. rank of Lieut.-Col. (dated April 1):—W. Dring, G. M. Davidson, and A. S. Murray. The under-mentioned Pymrs. and Hon. Majors to be Staff Pymrs.:—H. W. Bateman, vice W. Dring; R. O. Richmond, vice G. M. Davidson; F. W. V. Packman, vice A. S. Murray (all three dated April 1); and A. J. Roberts, vice W. Marvin, retired (June 8).

MEMORANDA.

Hon. Lieut.-Col. C. S. Bailey, late Major, the Devonshire Regt., has been permitted to commute his retired pay (July 9); Hon. Lieut.-Col. H. Burton, late Capt., the Duke of Wellington's (West Riding Regt.), has been permitted to commute his retired pay (July 4); Major W. M. Money, half-pay, has been placed on retired pay, on account of ill-health (July 19); Surg.-Major J. E. Purdon, M.B., late Medical Department, has been permitted to commute his retired pay (July 4).

The under-mentioned Lieutenant-Colonels to be Colonels:—A. W. Adcock, the Bedfordshire Regt. (July 2); C. Tucker, C.B., the South Staffordshire Regt. (July 9); C. P. Stokes, the King's Own (Royal Lancaster Regt.) (July 11); and F. J. Castle, the Duke of Wellington's (West Riding Regt.) (July 23).

RESERVE OF OFFICERS.

Capt. A. E. L. Lowe, Major, 4th Batn., the Sherwood Foresters (Derbyshire Regt.), resigns his commission; Capt. A. M. P. Kemeys-Tynte resigns his commission.

MILITIA.

WAR OFFICE, PALL MALL, July 24, 1883.

ROYAL ARTILLERY.

3rd Brigade, Northern Division—Lieut. A. H. Synge resigns his commission.

3rd Brigade, Western Division—Frederick William Morton, gent., to be Lieut.

2nd Brigade, North Irish Division—Capt. W. P. Thring, R.A., to be Adjt., in succession to Capt. J. Le C. Robilliard, R.M.A., removed from that appointment (dated July 6).

5th Brigade, North Irish Division—Lieut. A. M. Browne resigns his commission.

INFANTRY.

3rd Battalion, the Queen's (Royal West Surrey Regiment)—Albert Reginald Foord, gent., to be Lieut.

3rd Battalion, the Northumberland Fusiliers—Capt. A. Marshall to be Major; Lieut. D. L. Dixon-Brown to be Capt. (both dated July 2).

3rd Battalion, the Royal Warwickshire Regiment—Charlie Beatson McMullin, gent., to be Lieut.

3rd Battalion, the Norfolk Regiment—Capt. and Hon. Major R. F. Bros resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

3rd Battalion, the Lancashire Fusiliers—Hon. Major C. E. G. Burr, retired pay, to be Capt. (July 9).

3rd Battalion, the Duke of Cambridge's Own (Middlesex Regiment)—T. H. Howe, late Lieut., the Royal Sussex Regt., to be Capt. (July 4); Lieut. A. J. Gant to be Capt. (July 5).

7th Battalion, the King's Royal Rifle Corps—Lieut. the Hon. C. S. Irby, to be Capt. (June 25).

2nd Battalion, the Queen's Own Cameron Highlanders—Harold Edwin Boulton, gent., to be Lieut.

4th Battalion, the Connaught Rangers—John Smyth, gent., to be Lieut.

9th Battalion, the Rifle Brigade (the Prince Consort's Own)—Lieut. A. M. J. O'Conor resigns his commission.

3rd Battalion, the Royal Dublin Fusiliers—Lieut.-Col. and Hon. Col. E. Mansfield resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, July 24, 1883.

West Kent—Francis Bingham Mildmay, gent., to be Lieut. (supernumerary).

North Somerset—Robert Edmund Dickinson, gent., to be Lieut. (supernumerary).

Suffolk (the Loyal Suffolk Hussars)—Alfred George Lucas, gent., to be Lieut. (supernumerary).

VOLUNTEERS.

WAR OFFICE, PALL MALL, July 24, 1883

ARTILLERY.

1st Aberdeenshire—Capt. G. W. R. Howard-Vyse, R.A., to be Adjt., vice A. Burton, transferred (June 30).

1st Argyll and Bute—The under-mentioned gentlemen to be Lieuts.:—John Gardner and Peter Carmichael, jun.

2nd Kent—Capt. and Adjt. E. M. Baker, R.A., from the Tynemouth A.V.C., to be Adjt. (June 30).

7th Lancashire (the Manchester)—Lieut. G. K. Smith, from 1st Forfar A.V.C., to be Lieut.

1st Newcastle-on-Tyne—George Angus, jun., gent., to be Lieut.

The Tynemouth—Capt. and Adjt. A. Burton, R.A., from the 1st Aberdeenshire A.V.C., to be Adjt. (Jun e30).

1st Sussex—Capt. W. A. Cardwell to be Major; Lieut. H. J. Broad to be Capt.

RIFLE.

4th Cheshire—Lieut. G. Leah to be Capt.

1st Clackmannan and Kinross—Capt. and Hon. Major G. Bogie to be Major.

2nd Cornwall (Duke of Cornwall's)—Acting-Surg. W. H. Rean resigns his appointment.

2nd Durham—Lieut. J. W. Badcock resigns his commission.

4th Durham—Major W. J. Joicey resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

2nd Edinburgh (City)—The under-mentioned Lieuts. to be Capts.:—J. Hepburn and W. Stewart.

1st Flintshire and Carnarvonshire—Major T. Casson resigns his commission; Henry Hurlbutt, gent., to be Lieut.; Major C. Norman, 1st Batn., the Royal Welsh Fusiliers, to be Adjt., in succession to Hon. Major and Adjt. J. O. J. Priestley, resigned and placed on retired pay (July 2).

2nd Volunteer Battalion, the Queen's Own (Royal West Kent Regiment)—Capt. and Hon. Major T. W. Marchant resigns his commission; also is permitted to retain his rank and to continue to wear the uniform of the batn. on his retirement.

5th Lanarkshire (Glasgow 2nd Northern)—Lieut.-Gen. Sir A. Alison, Bart., K.C.B., to be Hon. Col. of the corps.

7th Lanarkshire—Lieut. B. Neilson to be Capt.

4th Lancashire—Capt. H. Hilton is granted the hon. rank of Major.

1st Linlithgowshire—Lieut. J. J. Cadell to be Capt. (July 25); Charles Chalmers, gent., to be Lieut.

1st Nottinghamshire (Robin Hood)—Lieut. A. T. C. Dobson resigns his commission.

1st Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—Bernard James Huddleston English, gent., to be Lieut.

2nd Volunteer Battalion, the Prince Albert's (Somersetshire Light Infantry)—Edward Theodore Alms, gent., to be Lieut. (supernumerary).

5th Surrey—Lieut. F. W. H. Edwards to be Capt.

4th Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—Edward MacDonald, gent., to be Lieut.

1st Sutherland (Highland)—George Sutherland, gent., to be Lieut.

1st Volunteer Battalion, the Duke of Wellington's (West Riding Regiment)—Major C. Conor, 2nd Batn., to be Adjt., in succession to Major F. J. Tidmarsh, 1st Batn., whose period of service in that appointment is about to expire (Aug. 1).

3rd Volunteer Battalion, the Duke of Wellington's (West Riding Regiment)—Lieut.-Col. G. Garnett-Orme is granted the hon. rank of Col.

(Where not otherwise specified, the foregoing commissions and announcements bear date July 25, and the current year must be understood.)

Amusements.

With this week terminates a memorable season at the LYCEUM. On Monday, Tuesday, and Wednesday, "Louis XI." was revived, with Mr. Henry Irving in one of the best of his impersonations. Mr. W. Terriss was a spirited Nemours, and Mr. T. Wenman made his first appearance at this theatre as Philip de Commines. On Thursday and Friday, "Charles I." was repeated, with Mr. Irving as the King, and Miss Ellen Terry as the Queen Henrietta Maria. This (Saturday) evening, Mr. Henry Irving associates the last night of the season with his annual benefit, appearing in "Eugène Aram," condensed into one act, and the comedy of "The Belle's Stratagem," while the programme is further strengthened by the assistance of Mr. Sims Reeves, Mr. Herbert Reeves, and Mr. J. L. Toole.

The ADELPHI, with considerable improvements in the front of the house, has been reopened with "The Streets of London," reproduced with every attention to picturesque effects. Mr. Charles Warner now plays Badger, and the other parts are satisfactorily embodied by Miss A. Rayner, Miss Ada Murray, Miss Clara Jecks, and Messrs. J. A. Rosier, J. Beauchamp, H. Proctor, M. Quinton, and J. G. Shore. In September will be produced the new drama called "The Soldier's Wife," written by Mr. Henry Pettitt and Mr. G. R. Sims.

At TOOLE'S THEATRE, the late T. W. Robertson's comedy of "M.P." was reproduced in London after an interval of nearly thirteen years. Miss Cora Stuart, a clever member of the Robertson family, is now Cecilia Dunscombe, Miss Gerard, Ruth Deybrooke; Mr. F. H. Macklin, Talbot Piers; Mr. J. F. Young, Isaak Skoone; and Mr. A. Beaumont and Mr. E. D. Ward, Dunscombe and Chudleigh.

At the IMPERIAL THEATRE a summer season has been commenced under the management of Mr. Matthews Monck, "Still Waters Run Deep," presenting Captain Disney Roebuck in the principal character.

Mr. A. J. R. Trendall's attractive entertainment at the FISHERIES EXHIBITION was attended by a large assemblage of literary, artistic, political, and fashionable celebrities. The "At-Home" took place by special permission in the Prince of Wales's pavilion, and among the distinguished vocalists contributing to the gratification of the guests, Madame Carlotta Patti and Mdlle. Etty were particularly prominent.

Mr. J. L. Toole commences his provincial tour next week at Eastbourne, where he opens the new Theatre Royal and Opera House, constructed by the experienced architect, Mr. Phipps, at a cost of £9,000.

The new lessees of the COURT THEATRE are Mr. John Clayton and Mr. Arthur Cecil, who will signalise their joint management by producing an original comedy in October.

Printed and Published for the Proprietors, at the Office, No. 1 Wellington Street, Strand, London.—SATURDAY, July 28, 1883. Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD.

WITH the purely political or commercial questions connected with the action of our Government towards Egypt, we have not much to do, except in so far as conditions arising from our policy may affect the Navy and the Army. But it becomes a matter of great moment for the Military establishments of this country to have a decision on our relations to Egypt which shall be a guide to the future. There is a strong party in the country in favour of what, for want of a better term, we may call annexation Neither protection nor occupation for an indefinite term would please the influential classes who wish the Government to say that they intend to hoist the flag in Egypt, and to keep it there. Now, the present state of our relations is this. There is a British garrison of some 6,500 officers and men, which has been broken up in small bodies, owing to the outbreak of cholera, with their head-quarters—rather peripatetic, of late—at Cairo. The garrison is under the orders of the War Office in London, conveyed through the proper channels to the Lieutenant-General in command, and the Egyptian authorities have nothing to do with them, beyond finding money to pay the quota for their maintenance, some £320,000 a year. There is a Lieutenant-General in command, a Brigadier-General as Chief of the Staff, a Major-General commanding a Brigade at Cairo; a Brigadier-General for an imaginary Brigade at the Abbaseyah, and a Major-General in command of the garrison of Alexandria which is in Alexandria no longer. This force has, perhaps, the largest Staff in proportion to its strength that ever was set in the field. The British Flag is not shown or flown in any part of Egypt, and the troops, for all practical purposes connected with administration, might as well be in the moon, or, as far as Egypt is concerned, much better. There are, or were, a few unimportant posts in the very small portion of the Delta under occupation in charge of British soldiers, but so far as military duties go, there is little or no work for the garrison. It cannot be said the troops support the Administration or give any assistance to the Government. We believe that if they were withdrawn to-morrow, there would not be the least of what is called anarchy or disturbance in Egypt. There are now an Egyptian Army and an Egyptian gendarmerie and police quite capable of dealing with any elements of disorder. "Oh, but if you withdrew," it is said, "you would have the French in Egypt in twenty-four hours!" In what form, or on what pretext? The "French," in one sense, are in Egypt already. It is an insult to common-sense to suppose that if we withdrew our troops, after a formal declaration to all concerned that we would not allow any Power to interfere with the *status quo*, the French would at once organise a military expedition to take the place of England in Egypt, or that if she did try to do so, she could succeed, in the present state of her finances, her Navy, and even her Army. Such an act would mean war. And for war, neither England nor France is anxious or ready on the Egyptian question. It is quite forgotten by the annexationists that there would be a great deal to be done, before they could carry out their project. There are the Khedive and his Government; there are the great and the small Powers; there is the Sultan, who may have backers and friends in assisting the absorption of his great Pashalik, to be dealt with. It seems to be supposed that Sir E. Malet is the sole Minister Plenipotentiary and Consul-General in Egypt, and that it would be easy to brush all the Ministers and Consuls away like flies, or accredit them to Major Baring, or to our own Administrator. Perhaps the annexationists do not think about such points at all. But, when all their difficulties had been overcome, there would be the enormous work of taking over the administration of Egypt, which is a very different country from India, and of doing it suddenly. We grew up and out, and spread along, above, and below, year after year, in India, and had extraordinary allies in the jealousies of the various races and religions of the vast continent; but even in India, we are obliged to rely greatly on a vast body of trained native officials, and these do not exist in Egypt. The complications which would arise with the capitulations, and the claims under their rights, and the questions to be settled, with various interests and different nationalities, and the hornet's nest of troubles which would come upon us, even out of an unopposed annexation, would be so great, that we would soon discover our Cape perplexities in the South were as nothing to the imbroglio in the North of Africa. An occupation for an indefinite period would be attended with many of the inconveniences of annexation, and with none of its possible benefits. When Sir Evelyn Wood and Baker Pasha declare they are ready to protect the Government of the Khedive in the administration of the country, and give reason for the faith that is in them, there can be no valid cause for keeping a costly foreign garrison in Egypt, in defiance of solemn pledges to Europe. Shall we give up Egypt, then? No! let us declare that we will protect the ruler we have placed firmly on his throne, and the Government we have set up, against any aggression, and then clear bag and baggage out of the country. But let us protect Egypt all the same. There will still be a British Resident and Financial Adviser at Cairo. There will be a British Chancellor of the Exchequer, a British Chief of the Railways, a British Controller of the Navy and of the Ports, a British Procureur-Général, a British Head of the Customs, a British Head of the Post Office. And if these be threatened, there is a British General in command of the Egyptian Army, a British Pasha in command of the Police and Gendarmerie. And if any foreign Power menaces them, there is a British force at Cyprus and Malta and Gibraltar. There is a British Army at home and in India, and there is all the force of the Empire at their back to make good our protectorate against unjust aggression.

WE have already dealt at length with the question of Naval Reform, but as yet the signs of the times do not point to any move being made in the right direction. True, the reorganisation of the Constructor's Department has been taken in hand. This we announced to be the case some months ago. But we never dreamt that the Admiralty would so materially increase the salaries of the Civil employés of the Constructor's Department, and of a few Engineer officers, without in any way bettering the position of all concerned, for the Lieutenant is just as much a professional officer, now-a-days, as is the Engineer, the Surgeon, or the Naval Architect; and yet, while these have their salaries increased, other professional branches stand still, and, in the case of the Executive line, remain in receipt of pay totally inadequate to the requirements of the age. We are well aware that the "Treasury policy" is the excuse put forward by the Admiralty for not increasing the pay of certain grades in the Navy; but were the Admiralty to insist on funds being placed at their disposal for a certain purpose, as necessary to the efficiency and well-being of the Navy, the Treasury could no longer oppose the reform. It is just because the Admiralty are only too ready to do anything to please the Ministry, that no pressure is brought to bear upon the Treasury, as it is well known at the Board that "economy" and "retrenchment" are the words emblazoned on the Ministerial banner, ever since the embroglio in Egypt landed this country in such an unforeseen outlay. But that is no reason why the Admiralty should be for ever increasing the pay and bettering the position of its civil servants and non-executive officers, while the Executive line is left to starve on a pittance considered adequate a century ago, but now not of the slightest use to a man who has no private means of his own. Skilled mechanics do not consider ten shillings a day to be high wages, yet the Admiralty regard that sum as more than sufficient remuneration for a Lieutenant in the Navy. At the same time, second-class draughtsmen are not considered by the Admiralty to be over-paid at from £300 to £400 per annum; while third-class draughtsmen, who commence at £180 a year, the nett pay of a Lieutenant, rise by increments to £300 a year, a salary never attained by the latter rank. And yet this is the main reform prayed for by the Lieutenants of the Navy. After eight years' service in their rank, they are given the relative rank of Major in the Army; but no corresponding increase of pay. If the Admiralty would but do for the Executive line that which they have just ordered to be done for the benefit of the Constructors' and Engineering Staff, there would be less discontent in the Navy. The changes which the *matériel* of the Navy has undergone are admitted to necessitate corresponding changes of almost equal magnitude in its *personnel.* But the Admiralty have no intention of in any way ameliorating the condition under which the Executive now serve. In an article in the *Times* this week, the decision arrived at by the Admiralty to adopt the recommendations of Sir Thomas Brassey's Committee regarding the reconstruction of the Constructing and Engineering staff, and the formation of a Royal Corps of Naval Constructors, is approved on the grounds, that "In days long gone by, the navigating service of a man-of-war was subordinate, both in authority and position, to the fighting crew. The sailor was gradually admitted to a position first of equality, and then of supremacy, but now the turn has come for the man of science and the engineer. A man-of-war is no longer merely a ship, but a vast storehouse of mechanical energy and contrivance; and the change thus effected implies a corresponding elevation in the *status* of the men who are responsible, whether in construction or in active service, for the efficiency of the contrivances and the perfection of the mechanism." This appears to mean that the Naval Engineer is to have equal command with the Captain of a warship, and should our interpretation of the official foreshadowing of "what we may expect" prove to be correct, we warn the Admiralty that the efficiency of the Navy will be seriously imperilled. We desire to see the Engineers of the Navy placed upon a proper footing, but we fail to see what good can accrue to the service by encouraging hopes of command. A ship, whether she be constructed of wood or of iron, will always have to be commanded by a seaman, though she may be fought by soldiers trained to the sea.

THE case of seaman Price, which has lately been brought so prominently before the Legislature, is one which should be considered by the public from a point of discipline, and though many people advance opinions on the score of youth and its consequent indiscretion, still the graveness of the offence, committed as it was while in the execution of duty, must weigh greatly against further mitigation. It is impossible to overcome the unpleasant fact that such flagrant acts are largely on the increase in the Imperial Navy, and that they must be severely dealt with. Price was tried by court-martial, after a court of inquiry had previously investigated the charge. Such procedure is the fairest way of arriving at a conclusion as to the necessity for bringing an offender before a higher Naval tribunal. The evidence adduced at a preliminary investigation is not available to any member of a court-martial, but always entrusted confidentially to the Deputy-Judge-Advocate, who is bound not to communicate it to any one else. The fact of Commander Acland forming one of the court of inquiry would not necessarily invalidate him sitting as a member of a court-martial for the trial of the same offence; as the prisoner is always asked in open court if he objects to be tried by any particular member. Though, as a general rule, it is not desirable that an officer should sit at a court-martial under such circumstances, still it is not illegal. The proceedings of the court-martial in this instance appear to have been legally conducted, and the sentence which was passed, being one of penal servitude, would, after confirmation by the Admiralty, require the order of one of her Majesty's Judges for the reception of the prisoner in any civil gaol appointed for the purpose, as the Admiralty have no control over prisons other than those erected by, or maintained under, their authority. Such judicial action would have nothing whatever to do with the validity, or otherwise, of the court-martial, as all matters in connection therewith are disposed of by the legal advisers of the Admiralty. We have no sympathy with Price, who committed an offence which must be visited at all times with the most severe punishment it is possible to inflict, so as to deter others from repeating the offence. To bring forward the plea, in extenuation of the crime, that Price was drunk at the time, as do our "ignorant humanitarians," is absurd, for the law of England holds drunkenness to be an aggravation of the offence. Were the Admiralty to admit the plea of drunkenness, every man having a grudge against a superior could strike him with impunity, plead drunkenness, and cite as a precedent "the case of the seaman Price." It would be impossible, under such circumstances, to maintain discipline in the Navy. Superiors would be at the complete mercy of drunken inferiors, no longer subordinate, but insubordinate with impunity. And it is to this pass that we very much fear the Navy is drifting. A policy of surrender to popular clamour seems to animate the Government in all its acts and in all its departments, and we fear very much that the seaman Price will be let off his well-merited punishment for having struck his superior, solely to silence those agitators whose united cry, if not at once stifled, may cause the Government to lose a few votes. Should the seaman Price regain his liberty, it will strike deeply at the discipline of the Navy, and the authority of the Admiralty will be sacrificed to the ignorance and false policy of those who are incapable of legislating for the well-being of our Fleet and its *personnel*. Authority is vested in the Admiralty for reducing or cancelling punishments inflicted by sentence of court-martial; they have in Price's case already lessened the term of penal servitude; therefore, by further reduction a precedent would be created which would prove of incalculable disadvantage to those who are responsible for the good order and comfort of her Majesty's ships.

IT was with mingled feelings of regret and indignation that we have had to chronicle the result of the examination recently held at Greenwich for the Lieutenants of the Royal Marines on probation for appointments to the Artillery Division. Over and over again, with disgraceful regularity, a similar result is obtained from this examination, but this year the acme of failure was reached by the whole batch, with a single exception, being plucked. Of the six Lieutenants who passed into Greenwich in 1879, only three succeeded in getting into the Marine Artillery; of the 1880 Lieutenants, five in number, only one finally passed; and now of the ten Lieutenants who passed their first examination in 1881, all but one have failed,—that is, in other words, that of the 1880 lieutenants 80 per cent., and of the 1881 lieutenants 90 per cent., failed; that during the last three years twenty-one young officers have been placed at the College in order to be prepared for entry into the Marine Artillery, and that only five have been passed in. The question now arises who is to blame for this discreditable state of facts. For our own part we steadily refuse to believe that the young officers who enter the Marines with a view to passing on into the Marine Artillery, are in any particular inferior to the ordinary standard of subalterns of either Army, Navy, or Marines. On the contrary, they are above rather than below the average, and it is within our own knowledge that amongst those whose career is thus cut short at its very commencement are some of the most intelligent and most soldierly of the Marine subalterns. It may, perhaps, be argued that the probationary Lieutenants are idle when at college, that they are thoughtless, and in too many instances give themselves up to pleasure, and to the enjoyment of the new sense of swaggering in uniform as officers. Perhaps there may be a modicum of truth in this charge against them, but we have no hesitation in saying that it is far from true of them all, and even if it were true of them without exception, we should be disposed to regard their culpability in the matter as far more venial than that of their superior officers, whose business it is to see that they discharge the duties allotted to them. A boy of seventeen or eighteen may be forgiven for a little display of vanity or idleness just emerging from the restraints of home and school life, finding himself the member of a mess and the associate of officers twice his own age, free to come and go as he pleases, to accept invitations to balls and parties, to run up to the theatre when he likes, provided he observes the preliminary formality of asking for leave of absence if his engagements should detain him beyond the College closing time,—a request, by the way, which is rarely refused,—what wonder is it that he should avail himself of his opportunities, and see as much life as he can, without enquiring too closely into the effect these diversions and distractions will have upon his more serious employment? But who is to blame for this? The lad is placed at college, at the expense of the Crown, to be prepared for his commission as an artillery officer,—thus, the Admiralty assigns him certain duties to perform, just as much as if they appointed him to a ship, or direct to a division of Marines; if he neglects those duties, or if he allows private engagements to interfere with the faithful discharge of them, obviously his superior officers,—that is, in this case, the staff of the College,—are answerable for it. In the case of the naval sub-lieutenants this responsibility is clearly recognised, and the young officers are kept closely to their work. In every regiment, and in every ship, if the commanding officer is worth his salt, he knows, and acts upon the knowledge, that one of his most important functions is to maintain proper discipline amongst the junior officers, to keep them up to their duties, firmly, but without harshness, and to see that nothing shall be allowed to interfere to prevent them from becoming thoroughly competent and efficient officers. No plea, then, of idleness or inattention to their studies on the part of the probationers, will suffice to screen the College authorities from their full share of responsibility for these failures. But what is to be said about the plucking of those who have throughout their whole course shown intelligence and assiduity in the pursuit of their studies? And here it is, we are disposed to think, that the real secret of these failures lies. Some of these young officers have been men of exceptional ability, great perseverance, and, when they went to the College, a reputation for high attainments; a combination of advantages, one would think, in short, which would ensure success. But yet they have also failed. This can clearly point only to one conclusion, namely, that the standard of examination is too high, and we have heard on undoubtedly good authority that this is actually the case. Of course, the Admiralty has a perfect right to fix whatever standard it chooses, but it is obviously absurd if they want to admit any Lieutenants into the Marine Artillery at all, to fix a standard which only one or two officers in a year can be found capable of passing. The examination which these probationary Lieutenants are expected to pass is stiffer than that required for the Royal Artillery at Woolwich, and no easier than that passed by the Royal Engineers. Again, why should the result of the examination be taken as final, whereas in almost every case that is at all parallel, the candidate is allowed a second or even a third chance of passing? It is to be hoped that the Admiralty will very gravely consider these points, and arrive at some determination to alter the system at present in vogue, or at any rate to correct the abuse of it. It is unfair in the extreme that the candidates for admission into the Royal Marine Artillery should be so heavily handicapped, and that so large a number of gallant young officers should be disappointed at the outset of their career, and start upon it under the discouraging sense of failure and injustice. Matters will never be better in this respect until the standard of examination is lowered, at least to that for admission into the Royal Artillery, and the Staff are held responsible for the passing of their pupils at the examination. It might also, perhaps, be well to allow a second chance, as in the case of the Naval Sub-Lieutenants, unless the candidate is certified as having failed through his own misconduct, and in such rare instances as these, it would be better not to allow him to go up for examination at all. In the interests of the youngsters themselves, in the corps, and in the interests of the public who called upon thus lavishly to throw money away, we protest that it is time to do away with this useless system, which has proved itself productive of nothing but disappointment and failure.

A report was circulated this week that Sir Charles Dilke, M.P., is about to succeed the Earl of Northbrook as First Lord of the Admiralty.

We regret to hear that desertion from her Majesty's ships on the Australian Station has so largely increased of late, as to demand the serious attention of the Admiralty. We are certain that such undesirable losses to the strength of the squadron have not been brought about by injudicious administration on the part of the distinguished Commodore in command, whose zeal and ability are well known to their Lordships, and in whom they have every confidence. Desertion on an extensive scale on this station has generally been periodic in its occurrence, attributable to local influences, or special inducements, when the runaways are afforded protection from apprehension. Undoubted advantages are held out to mechanics and artificers, in all parts of Australia, by high wages and constant employment, thereby materially operating against men of the various trades remaining in their ships, as well as industrious and able-bodied men who can adapt themselves to the working requirements of civil employ. With the great interest displayed by Commodore Erskine in his profession, and his indefatigable efforts to improve all and everything connected therewith, we are sure that he will succeed in suppressing this serious inconvenience to his Squadron.

Intelligence from the River Congo gives a healthy account of the advance of Mr. Stanley and his colleagues, who represent the International African Association. Bolobo, 100 miles beyond the junction of the river Ibara with the Congo, is a largely populated district; the expedition have established themselves there, and commenced cultivation. A white man may now travel unmolested for more than 250 miles above Stanley's Pool. All this has been effected without the exercise of force or firearms; and by endless patience and persuasion, the scruples of the natives have been overcome, and their fear of aggression dispelled by fair-dealing. Major-General Sir Frederick Goldsmid, we are informed by one of the London papers, is about to proceed to the Congo to call Stanley's attention to the original objects of the expedition, which, if true, would show the King of the Belgians was not quite satisfied with the recent proceedings of the great explorer.

Admiral Sir A. C. Key, G.C.B., Senior Naval Lord of the Admiralty, will leave town on Monday for Scotland, where he remains a month.

Mr. Rylands never loses an opportunity of condemning the policy of the Admiralty in the expenditure for manufactures and labour in our Dockyards. He is astounded at the enormity of the increase, in the past 11 years, of more than one million sterling for that purpose, when an immense saving would have been effected by dealing in the open market, where we could get better value for our money. The "political stock-pot" of the Member for Burnley appears admirably suited to the taste of his friends who would, perhaps, gladly see the Navy entirely provided for by private firms, and our dockyards "brought to the hammer." None of them believe that the sweet episode of the gun-boats built during the Crimean War could be produced in these more enlightened days.

The Channel Squadron left Berehaven for Queenstown on August 2. The *Sultan*, by order of the Admiralty, will, we are glad to learn, part company with the flag off Queenstown, and proceed to Portsmouth, to grant to both her officers and crew that spell of leave they have all so deservedly earned.

The Committee of the Royal National Lifeboat Institution have appointed Captain the Hon. Henry W. Chetwynd, R.N. (Retired List), to the post of Chief Inspector of Lifeboats, in succession to Vice-Admiral Ward (Retired List), who retires, after 32 years' service to the Institution.

We regret having to announce the death of Lieutenant H. Leeke, R.N., of the *Stork*, by drowning, above Mayumba, on the West Coast of Africa.

The appointment of Mr. George Rendel to a seat at the Board of Admiralty has been stigmatised as a "political job," perpetrated to perpetuate "Armstrong influence" at the Admiralty. We are in a position to state that nothing further from the truth was ever published. It was Mr. W. H. Smith who first made overtures to Mr. Rendel to join the Admiralty, but the proposal was declined. The present Administration made a similar proposal last year. A reference to the statement made in the House of Lords by Lord Northbrook, when announcing the appointment of Mr. G. Rendel as Professional Lord of the Admiralty, and also to what was said in the Lower House by Mr. W. H. Smith on the same subject, would convince anyone that the idea of a political job is unfounded. We at the time congratulated the Admiralty on having secured the services of so talented an engineer as Mr. Rendel to direct their constructive and mechanical works and policy. Immediately on the appointment being accepted, Mr. G. Rendel took steps to relieve himself from all interest in the Elswick firm, in which he does not hold a single share. So far from Mr. Rendel's presence at the Admiralty having been of use to Elswick, orders were given to the Vavasseur firm with liberality. By leaving Armstrong to join the Admiralty, Mr. Rendel sacrificed a large yearly income, of which the £2,000 he receives as salary from the Government does not represent one-third part. Mr. White's leaving the Admiralty to join the Elswick firm had nothing to do with Mr. Rendel. The company made Mr. White an offer which tempted him to leave the public service.

Last week we published a long letter from "Justice" on the appointments of Deputy-Adjutant-General and Assistant-Adjutant-General to the Royal Marines, in which he shows that during a run of thirty-six years the Royal Marine Artillery have been represented in those appointments by seven officers for a collective period of thirty-nine years, against twenty-five years enjoyed by six officers of the Light Infantry; and taking it as a foregone conclusion that General Williams, R.M.A., has been selected to succeed the present Deputy-Adjutant-General in September next, he mentions the names of Colonel Tuson, C.B., of the Artillery, and Lieutenant-Colonel Walsh, of the Light Infantry, as favourites in selection for the appointment of Assistant-Adjutant-General on the 9th inst., remarking upon the injustice of appointing a second Artillery officer. Coincident, however, with the publication of "Justice's" letter, the appointment of Lieutenant-Colonel Walsh was made, and the question was, therefore, set at rest; but we are of opinion that very little apprehension need have been felt upon this point, as an understanding has existed of late years that both branches of the services should be represented at the Marine Office, and therefore, if the senior appointment be given to an Artilleryman, the junior is awarded to the Reds, and *vice versâ.* In 1851, Sir John Owen, D.A.G., and Colonel Wesley, A.A.G., were both Blues, followed by Wesley, D.A.G., and Langley, A.A.G., again both Blues; but this was at a time when the Artillery were only companies of the corps, and not distinct,—officers in the Blue being on one list with, and often reverting to, the Red; and, therefore, there was not so much distinction or divided interests as at present. Since the separation from the mother corps, in 1862, and the erection of the Artillery into a Division at Eastney, an officer of each branch of the service has represented the corps in London, and the appointment now made shows that there is no reason to fear that this course will be departed from.

We understand that an application has been made by the Instructors of Naval Gunnery at the Headquarters of the Royal Marines at Gosport and Plymouth to be supplied with Nordenfelt machine-guns. The battery at Chatham has had one of these guns in use for some months.

We understand a committee is sitting at Greenwich to consider an improved mode of making first appointments to the Royal Marine Corps, and the course of study to be pursued by probationary Lieutenants for the Royal Marine Artillery, as well as the mode of examining these officers on completing their probationary term. We are of opinion that the time has arrived when special competitive examinations should be held for the Marine Corps generally, the successful candidates being all appointed as probationers to the Royal Naval College at Greenwich. The same method could then be adopted in selecting officers for the Marine Artillery as is in force at Woolwich for officers joining the Royal Engineers and Artillery. The highest numbers should select the corps they prefer.

A correspondent writes:—"With reference to the letter headed 'Royal Marines,' and signed 'Justice,' in last week's *Army and Navy Gazette*, might I ask you to put in a statement with regard to Colonel Tuson, R.M.A.? He certainly has been made Aide-de-Camp to the Queen, but the writer quite forgets to put in the extra. The honour, every officer must admit, is great, but the expense of buying the aide-de-camp uniform is also very great, and Colonel Tuson is on the unpaid list, with very small prospects of ever getting on the paid list. Colonel Sir Francis Festing is just above Colonel Tuson on the List of Colonels; he has been Aide-de-Camp for the last seven years, and retains it till he is promoted Major-General, which will be in 1888. In 1886 Colonel Tuson must either go on the Reserved List of Colonels on 11s. 8d. per diem, or take his retirement of £450; by doing the last, he gives up all hope of ever getting on the paid list of Aide-de-Camps to the Queen. This being the case, I cannot see how 'Justice' can say that Colonel Tuson has had everything he can expect for his services in Egypt. Two of the Colonels of the Royal Marine Light Infantry who served in Egypt have been promoted Second Commandants, passing over three officers' heads; one Colonel, now Second Commandant at Forton, was junior to Colonel Tuson in Egypt. I say nothing about Colonel Tuson not being made Assistant-Adjutant-General, because I am sure he is the last officer in the Marine Corps to wish any injustice to be done to his brother officers in the Royal Marine Light Infantry."

The Admiralty have decided that the opening of the last of the new basins in Chatham Dockyard shall not be attended by any ceremony. In the outcry against public expenditure in our naval arsenals, even the small cost of such an affair would be questioned by Radical Members. The acclamation displayed by her subjects when our gracious Sovereign and the Prince Consort opened the new steam basin at Portsmouth in 1847, by steaming into it in the royal yacht, was an event which we cannot expect will be reproduced in a similar form in the present day. Under a purely Radical administration such as we shall certainly see before many years elapse, the extensive and costly works which have taken nearly twenty years to complete at Portsmouth and Chatham will probably become the property of private firms, under terms most advantageous to themselves, and at a great loss to the country, eclipsing the economical scare of 1870-1, when timber merchants and shipbuilders "made a haul" the like of which will never come to them again. It will soon be the turn of the metal-dealers and shipowners.

Captain Price, in asking the Prime Minister if he was aware that since the suspension of the Contagious Diseases Acts the health and efficiency of both the Army and Navy had suffered, and that the morality of the towns previously protected by those Acts had become affected to an alarming extent, gave, in plain language, the pith of the disadvantages which have occurred therefrom; while Mr. Gladstone, in reply, was evasive, and, like all other official utterances on the subject, shirked the question. Twice this week the Government have informed hon. Members that the time which had elapsed since the Resolution of the House of Commons was insufficient for them to acquire enough facts to warrant a positive conclusion. Whatever promises may now be made that the efficiency of both services will not suffer by departmental neglect during the Recess, we feel sure that pandering to the sentimentality of supporters will be the leading feature of Ministerial legislation, when it is unhampered by the judicious questioning of such able advocates of the efficiency and well-being of the personnel of both services as the gallant Member for Devonport, who has the advantage of practical knowledge of the beneficial working of these Acts in our large seaports, and the good results derived therefrom. We know that Captain Price will be unceasing in his efforts in this most important matter, and we are sure that he will have the able support of the authorities at the home ports, who keenly feel the disadvantages imposed on them by the action of the Government, and can testify that immorality has become rampant since the removal of legislative restraint. The Government and its supporters have sacrificed the health of both present and future generations to ignorance and false morality; and professional opinions, both executive and medical, are over-ruled by hysterical legislation. The great misfortune to both services is, that their respective representatives are willing, but powerless, to act in their behalf; while deputations from the different seaports can hardly expect a hearing, or, if listened to, may be received as uncourteously, by the Home Secretary, as the gentlemen who were introduced to him by the Right Honourable Member for Westminster, on Tuesday last, in reference to the London water supply.

The Indian reliefs will be sent out round the Cape this season. This we announced some weeks ago, but the statement was then officially contradicted, while now it is announced. So much for "official contradictions!"

Colonel Mackenzie, whose miraculous escape from the ruins of La Piccola Sentinella, at Casamicciola, in the earthquake of July 28, is reported in the papers, is well known in the Indian Army. He served on the staff of Sir N. Chamberlain in the Umbeyla Expedition, and was Assistant-Adjutant-General in the North-West Provinces. His delivery from a dreadful death will be heard of by many old comrades at home and abroad with great satisfaction. There were several Italian officers at the same hotel, who, most probably, were buried in the ruins. Mrs. Roberton, who perished, with her daughter, a young lady of 16, was the widow of the late Colonel Roberton.

Sir Walter Barttelot will, on Monday, move for a return showing the total amounts paid to officers since the abolition of Purchase up to March 31, 1883; the estimated amount to be paid to officers till the whole scheme of abolition of Purchase has been completed; the cost of pensions on retirement since the abolition of Purchase up to March 31, 1883; and the actuarial estimated cost of pensions on retirement from March 31, 1883, to March 31, 1903.

It is estimated that the number of men who will be required to fill up the ranks of the Army in India this coming season will amount to 10,000. The system of volunteering, to prevent which the system of linked battalions and Territorial regiments was invented, will therefore doubtless be resorted to.

The Line Battalions which are now officially placed on the increased establishment, supposing the men to be obtained, are 12 battalions of 950 rank and file, viz., the 47th and 106th, at Gibraltar; the 104th, at Malta; the 84th, 87th, 31st, 2nd Battalion 18th, 74th, 52nd, and 82nd, at home; four battalions of 850 rank and file, viz., the 105th, 103rd, 37th, and 39th, at home; four battalions of 750 rank and file, viz., the 64th, 1st Battalion 7th, 1st Battalion 3rd, and 1st Battalion 22nd, at home; four battalions of 650 rank and file, viz., the 1st Battalion 9th, 2nd Battalion 15th, 32nd, and 3rd Battalion Rifle Brigade, at home. The remaining battalions at home have an establishment of but 250 rank and file.

That the new "Territorial Scheme" is a failure is no secret, but that under this system recruits for the Army should have to be obtained by false pretences proves conclusively that the old regimental system, with all its ties and associations, attracted recruits much more readily. At present there are recruiting-serjeants of nearly every Cavalry regiment in the service perambulating the pavement at Westminster, but not a single recruiting-serjeant of the Line is to be seen there. The reason is simple. The smart dress, the spurs, the whip, all infuse a belief into the mind of the waverer that if he enlists he will join a Cavalry regiment. Having taken the shilling tendered by the Cavalry serjeant, the recruit is marched off to St. George's Barracks, where he is examined, and informed "that he is not up to the Cavalry standard and must join the Line," This the man never intended to do, but, having taken the Queen's shilling, he is at the mercy of the authorities. He is given the names of several Line regiments to choose from, and is drafted off as soon as he has selected the one, in most instances, the furthest removed from his own proper district. Thus an Irishman, with a brogue one could cut with a knife, is sent to a Cornish regiment, while a man hailing from Hounslow chooses the Royal Irish Rifles, when found "not up to the Cavalry standard."

Lieutenant-Colonel Upton Prior, 100th Regiment, for some years Garrison Instructor at Aldershot Camp, who devoted much time to the compilation of new rules for playing the war-game, and made improvements in the system of minor tactics on the modelled ground in the Garrison Instructor's offices at Aldershot, is not a member of the War-Game Committee.

The following is an outline of the arrangements for the Autumn Manœuvres of the 11th German Army Corps (Cassel), which will be attended by the Emperor of Germany in person:—On September 17, 18, and 19, the 21st Division (Frankfort-on-Main) will manœuvre between Ober-Ursel and Hopheim, and the 22nd Division (Cassel) north of Hanau. The 25th (Hesse, Darmstadt) Division will manœuvre between Seligenstadt and Offenbach, near Frankfort-on-Main. The grand parade to be held in the presence of the Emperor, and the corps manœuvres will take place at Homburg and Frankfort-on-Main between September 21 and 26. Besides the King of Spain and the Prince of Wales, several foreign Princes and over one hundred foreign officers are expected as guests of the venerable soldier-monarch.

Our readers are probably aware that the district system is in force in the French Army as far as the Reserves are concerned, Lyons and Paris excepted. It would be too dangerous to have too many Lyonese or too many Parisians forming regiments. We see that the present War Minister has just decided that the same rule shall be carried out as regards Volunteers in Paris, who are not to serve their time in the capital.

"You in England," observed a Belgian critic at the Royal Academy, "do not generally believe in the supernatural. You laugh to scorn the miracles of Lourdes, and made merry over the apparition of the Virgin somewhere in Ireland; but whenever I go to your Royal Academy, I see crowds of people looking at the representation of the most astounding miracle that ever was heard of, and no one among them seems to think it in the least improbable. It is a picture of a troop of artillery, guns and all, clearing a ditch six or seven feet deep, and the bank or parapet at the other side!"

The autumn exercises of the 1st Bavarian Army Corps are to take place for the first time in the Bavarian Highlands, and will be attended by the Crown Prince in the course of his tour of inspection. The 1st Division will be commanded by Prince Leopold of Bavaria.

One of our Parisian contemporaries publishes an article from the pen of Comte d'Hérisson on the subject of the Black or Yellow Flags of Tonquin, which, he says, are in reality Chinese troops. The conclusion of the article is worth quoting. It runs thus:—"If the affair could be terminated by the capture of Hué, it would not be long; but it is certain that it is not from Hué that the Black or Yellow Flags receive their arms, their European officers, and reinforcements, which have raised their strength from 2,000 to 40,000. With this force opposed to us, it is all we can do to keep the delta of the Red River. Should 40,000 men not be sufficient, it will be easy for China to double that number. So long as war is not proclaimed, China must be considered as impregnable in Tonquin, or at least in that portion which lies beyond the range of the guns of our squadron, for to get the better of her, she must be attacked at some more vulnerable point." The success obtained the other day by the force under Colonel Badens was due in a great measure to the gunboats, which seem to have played sad havoc with the enemy. Nam-Dink, which was captured, is situated to the south-west of Hanoï, a few miles from the sea, and on one of the arms of the Red River. It is divided into two distinct parts, the town and the citadel; the latter forms an immense bastioned square on the system of Vauban. Nam-Dink was captured once before, in 1873, by François Garnier, which officer fell a few days afterwards, like Commandant Rivière. It appears that Garnier, when he attacked the place had with him but a handful of men; on arriving at the citadel, he was somewhat puzzled how to gain an entrance, having, no doubt, forgotten his scaling ladders. Fortunately, he perceived two huge logs of wood lying on the ground, bristling with spikes of *bois de fer*, and intended for *chevaux de frise*; these were placed against the ramparts, the French soldiers clambered up them, and the place was captured. In the affair of the 19th ult., the French are said to have slaughtered a thousand of the enemy at a loss to themselves of eleven men *hors de combat.*

Now that the Autumn Manœuvres are approaching, some of the French military critics are crying out for a mobilisation on a larger or smaller scale, just to see how that the vast machine which it has taken so much money and time to elaborate will work if suddenly called upon. On paper, everything seems to be in the most admirable order, but sometimes the best-regulated machines break down. It is asked,—Why not mobilise one army corps, with all its reserves, by way of an experiment?

The *Times* says:—"A new warrant has been issued, under which a money compensation for loss of office can be awarded by the Army Purchase Commissioners to those officers who, in consequence of the regulations making retirement compulsory on account of age, have been obliged to give up their Staff appointments before the expiration of the five years for which they were appointed. Sir Daniel Lysons, under this rule, vacates the chief command at Aldershot to-day. Reference was lately made in Parliament to the dearth of subalterns in the 21st Hussars. There are altogether 28 vacancies in the Cavalry, of which five are in the Household Regiments, three of the latter being in the 1st Life Guards. The difficulty has been to obtain young gentlemen who have the pecuniary means necessary in these corps, and who at the same time can succeed in the competitive examinations for Sandhurst or through the Militia. Many of them pass the qualifying examination, but cannot succeed in coming out among the prescribed number to fill the general vacancies in the Cavalry, Guards, and Line. Thus, many who are anxious to serve, and who can stand the educational test of competence, are turned away, while the regiments remain unfilled. The subject is under the consideration of the War Office, and it is believed that the solution of the difficulty will be the institution of special examinations for the Cavalry alone. It will, at least, have the result of procuring the educationally fittest men, who have at the same time pecuniary means to meet the social expenses of the position. There remains, of course, the alternative of reducing these social expenses by rigid rules on the part of the authorities. Any rules made for this purpose, however, could not extend beyond the mess and other purely military vehicles of outlay, and there would be great difficulty in making them so effective as really to protect the young officer of small means from traditional influences upon expenditure. Intrinsically, there is no reason why a cavalry subaltern should not be able to provide for his ordinary wants on the same allowance that suffices for one in the Infantry of the Line. But the tone and custom of these regiments have become so much part of the institution, that it is almost beyond the power of legislation to counteract their influence."

"F. W." writes:—"Will you advocate the claims to consideration of those Purchase officers the lieutenants, Reserve of Officers (1)? Their contemporaries are being made majors; their juniors, non-Purchase officers, will shortly be able to retire as captains, Reserve of Officers (1), with £1,200, having had quick promotion, and getting at least £450 more than the Purchase officers who, on account of the slow rate of promotion, left as subalterns after 12 years' service. Would it be much to ask, as these officers are sure to be called on to serve in case of a war with a first-rate Power, that they should be given the rank of captain, and promoted to that of major after 20 years' service? At present, in the eyes of the general public, they occupy an inferior position to the officers of Militia and Volunteers who are captains Reserve of Officers (2)."

GREENWICH NAVAL HOSPITAL SCHOOL.

On Thursday, Sir Thomas and Lady Brassey were present at the distribution of prizes to the students of Greenwich Hospital School. The inspection was first made by Sir Thomas Brassey, on behalf of the Admiralty. Among the company were the Right Hon. W. E. Forster and Mrs. Forster, the Right Hon. J. G. Dodson, Admiral Sir A. Milne, Admiral Luard, Admiral Sir John Hay, Admiral Gore-Jones, Capt. Sir A. Balliston, Sir George Elliot, Mr. Sydney Buxton, and the Rev. Brooke Lambert. The boys, 1,000 strong, formed a complete battalion, told off in ten companies, with officers, supernumeraries, band, colour, and ambulance parties. There was a march-past, and the parade movements were closed with the advance in line in open order. A musical drill with dumb-bells was then given by a body of the boys, after which the visitors inspected the improved buildings. The boys were then marched into the gymnasium, and the visitors occupied the stage, Sir Thomas Brassey presiding. Capt. Burney, R.N., C.B., the superintendent of the school, and the rest of the staff were also present. An address having been presented to Sir Thomas on behalf of the pupil-teachers and boys, acknowledging the benefits the 1,000 boys received at the school, and expressing the hope that future sons of seamen and marines would benefit by the foundation of King William III. and Queen Mary, the prizes were distributed by Lady Brassey, some of them having been given by herself. The chief prize-takers were H. Layton, C. H. Oakley, A. M. Worthington, W. Shaw, H. Wood, A. Drayson, and T. W. Seaward. Sir Thomas Brassey, M.P., who was warmly received, then addressed the boys. He alluded to the changes lately introduced into the organisation and administration of the school, consequent upon a report of a committee of inquiry, presided over by Admiral Hickley. In pursuance of the recommendations of the Committee, the former staff of four seamanship instructors has been doubled, and a swimming instructor has been appointed. To give more time for seamanship, much of the industrial work formerly carried on by the boys is now performed by contract and by additional tradesmen. Next year the Admiralty propose providing a sailing tender on the Thames, similar to the vessels attached to the training ships on the river. The dietary has been materially improved, and more warm clothing has been supplied in winter. Steps, too, have also been taken for the improvement of the buildings. The class-rooms have also been remodelled in accordance with the latest regulations of the Education Department, the infirmary has been considerably enlarged, and "fives courts" are about to be constructed for the boys' recreation. The results of the school are best tested by its success in providing for the introduction of the boys to a useful career. To this school the Admiralty look, in the first instance, for boys for the Royal Navy. During the past year, 303 boys were discharged, and of these more than one-third entered the Naval service. It is to be hoped this proportion will be largely increased in future years. The Admiralty propose to insist on an adequate physical test, and to provide for boys who have claims on the benevolence of the nation, but who are not adapted to the requirements of the Navy, by sending them, at the expense of Greenwich funds, to carefully selected institutions. The experience of the Admiralty shows that the ratings held in the Navy by the Greenwich boys compare most favourably with those attained by boys entered from other sources, and this fact is most satisfactory. Capt. Burney's report for the last year to the Admiralty draws attention to the marked success of the drawing class in the examinations at South Kensington. He refers to the creditable manner in which the boys, working under the direction of the sailmaker attached to the school, have made a complete suit of sails for their model drill ship. The swimming has greatly improved, and the general conduct has been excellent. In former days, Greenwich was famous as a school of navigation. The Admiralty wish to maintain its reputation, and to utilize this means of instruction, not only for the Navy, but also for the benefit of the mercantile marine. In conclusion, Sir Thomas Brassey, on behalf of the Admiralty, expressed their Lordships' appreciation of the admirable manner in which Capt. Burney and the staff of the school discharge their responsible duties, and assured the boys that the Admiralty feel the same warm interest as their predecessors in the welfare of the school, and in the future career of the boys who are educated within its walls. Mr. W. E. Forster, M.P., who was called upon to address the lads, spoke of the glorious service of the Navy, in which their fathers had served in defending the country against her enemies; and reminding them of the physical courage which was regarded by English lads as an inheritance, he pressed them to have the moral courage of men, and to be true to the traditions of the Greenwich Royal Naval Hospital School, by avoiding and resisting temptations to evils of all kinds. Sir John Hay, M.P., and Admiral Luard also addressed the company, and the proceedings closed with hearty cheers for Lady Brassey.

"Light Horseman" thinks it is time something was done to lessen the travelling expenses of soldiers proceeding on and returning off leave. "Sailors," he says, "have the privilege of travelling by rail from any one station to another for half the ordinary fare. Why the same boon is not granted to soldiers, I cannot understand. Many a man, from the day he joins the Army until the expiration of his time (a period of eight or twelve years), does not visit his friends more than twice or three times, and then only when he happens to be quartered at a convenient distance from them; and a great number, owing to the amount of the railway fare, cannot afford to visit them at all, so that when he does return to his native village, it is to find everything changed, and a number of his relatives in the grave; whereas, if the fares were reduced, they might probably avail themselves of a furlough once a year; and as they have to be a certain time clear from an entry in the 'defaulters' book' to entitle them to leave, it would encourage the soldier to keep out of trouble for the purpose of obtaining that privilege."

THE STATE OF THE ARMY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—The very unsatisfactory state of the Army is naturally and very properly attracting a good deal of public attention, and as an officer with 28 years' service, passed entirely in command of men, in peace and war, I may, perhaps, make a few remarks on the subject. The two matters with regard to the Army that are undoubtedly of the most serious consequence are,—Firstly, scarcity and inferior quality of the recruits; secondly, the bad conduct of the men and the lax state of discipline. The causes for this state of affairs are not far to seek; the changes that have taken place of late years, and the so-called improvements being among the chief. It is a very unfortunate part of our system that the consideration and settlement of important questions, with regard to our soldiers, are aften entrusted to those officers who can be least able to judge of their requirements; that is to say, they are generally left to men who have passed the greater portion of their time in office and on the Staff, and who consequently have had too little opportunity of knowing the real nature of a soldier; what he likes or dislikes, and the best way of dealing with him. These matters are left to men with fancies and imaginary ideas of their own, tempered by an inclination to imitate the Army that has been more recently successful in some European war, without considering the various services required of our Army, the perfectly different way in which this Army is supplied with recruits, or the national characteristics of our officers and men. For these reasons, amongst others, we find that, when it was supposed, from the care that was taken of our soldiers, from the relaxing, to some extent, of discipline, and the abolition of corporal punishment, that the Army had been rendered more popular to a better class of men; just the contrary has turned out to be the case. We have endeavoured lately to take the German Army as our model; now no two armies could be more completely differently constituted than that Army and ours. The great principle of the German Army is compulsory and almost universal service, while ours is voluntary, and none of the advocates of the German system have as yet ventured to express the opinion that, to enable that system to succeed in England, conscription of some sort must be resorted to. The effect on recruiting of the Egyptian War, with all the laudations, feasts, and decorations, doubtless disappointed those who thought it would make the Army popular and induce men to enlist; but they did not take into consideration that if there is one thing more than another that the ordinary Briton hates, it is "humbug," and the soldier is no exception. Now there seems to be too much of humbug and sentiment in the way the soldier is treated now-a-days, both in peace and in war. The exultation after Egypt could not make up to the Army for the disastrous and inglorious end of the war in South Africa, and it must have an injurious effect on discipline, tending as it does to make the soldier think too much of his exploits, and to prevent him enduring with fortitude real hard work and danger. With regard to the subject of discipline, the slackening of this most important element in our Army also seems to be tried as an inducement to men of a good stamp to enlist and remain in the service, the abolition of corporal punishment being one of the supposed inducements. But these ideas can only be held by those who do not understand the soldier, his nature, nor the causes that have led to the successes of the British Army. This general success has been chiefly due to a sense of discipline, respect for authority, and for the officers, which formerly excelled that in any other Army, and the slackening of which has already led and is certain to lead to great disasters. The Crimean War has been compared to the recent affair in Egypt, but the comparison is ridiculous. If the Crimean War had ended after Alma, nothing would have been heard of the breakdown of the Commissariat and other Departments, nor would the winter troubles have had to be endured. On the other hand, fortunate indeed it appears to have been, from what we now know, that the Egyptian War did not last for a few months longer, for in that case the disasters of the Crimea would have been equalled, if not surpassed, notwithstanding the feebleness of the enemy. It appears that the way to get good recruits is not to weaken discipline nor the authority of the officers, which can only attract the worthless; but to treat men fairly and as rational beings, to keep up a respect and admiration for the service, with its traditions and histories, to inculcate obedience and respect for authority, and not to make too much of trifling successes, which must, in the end, lower self-respect. Lastly, I come to the very important question of pay, and this is doubtless a most difficult subject to treat. It is, I think, evident that the pay of all the combatants in the Army must be increased; this, in the case of the men, is at the present day absolutely necessary, in order to obtain good recruits,—men of the stamp required to keep our Army and nation in a good position in the world. I will not go into the question of some reductions that might be made; but these reductions, while not interfering with the efficiency of the Army, would prevent this increase of pay from causing a much greater demand on the country. It is often said that raising the pay of the men would only enable them to drink more, and would consequently increase crime. But the preventative of this is strict discipline; and the idea ought to be inculcated that the greater the advantages given to the soldier, the better his conduct is expected to be, and the more severely any breach of discipline will be punished. This might deter worthless men from entering the service (so much the better); this would attract the class that the service requires. The system of deferred pay is one that does not appear suitable; it tends to make a man think that the Army is merely a phase he has to pass through in order to prepare himself for a civilian's life. This is surely a totally wrong feeling to encourage, and can never do when voluntary enlistment is the mode of recruiting. This system might suit compulsory service, when all classes must serve, whether they like it or not; but one thing is evident, that if the present ideas are persisted in, compulsory service must be resorted to, if we are to (as, in fact, we must) have an efficient Army.—I am, &c.,

C ——

WITHDRAWAL OF THE ROYAL MARINES FROM DUBLIN.

The withdrawal of the Royal Marines from Dublin was completed on July 25, when the last detachment of the special force of Marines introduced into the Irish capital nearly eight months ago, for the purpose of aiding the civil authority in the emergency then existing, crossed St. George's Channel. The departure of the Marines has given occasion to the *Irish Times* to refer to the excellent work accomplished by that body, and their exemplary conduct during their stay in Dublin, in most eulogistic terms, well worthy of reproduction. The *Irish Times* says :—

"It is at all times difficult for men who have undergone a purely Military training to suddenly undertake civilian duties; but the nature of the task imposed upon the Marines was of exceptional difficulty, requiring considerable tact, keen observation, constant attention, and the careful avoidance of public notice. They came to Dublin at a period when the mind of the citizens was disturbed by painful apprehensions, consequent upon the perpetration of frightful murders and daring attempts at assassinations in the busiest thoroughfares of the metropolis. Their advent gave the citizens confidence, while their 'unseen presence' proved a terror to the evil-doer, whether he was the implacable Invincible or the ruffianly corner-boy, who invariably chose the time for his attack when the helmet of the uniformed constable was not within view. In no instance could the assassin or the law-breaker be certain of escape, for the attempted outrage would in all probability be nipped in the bud by a couple of constables-in-aid. It is but mere justice to the Royal Marines to say that the onerous duties they had to perform were discharged with marked moderation and great judgment during a term of unprecedented excitement. When it is remembered that they were strangers to the country, that they had not been accustomed to police duties, and that their assistance was procured very much in the nature of an experiment, the highest praise must be given, not only to the privates, but to the officers, for the great common-sense they displayed, and the unobstrusive but disciplined and effective manner in which they acquitted themselves of the responsible task entrusted to them. The Metropolitan Police were overweighted and unable to meet all the demands suddenly cast upon their shoulders. A certain amount of justifiable panic prevailed. As a matter of fact, the city was in a state of alarm, owing to the presence of an undetected murderous organisation in our midst, that seemed to confidently laugh at the efforts of justice to overtake them, or the law to hinder them in their designs; and there was a feeling abroad that no one was safe in the streets of the Irish capital who had the courage to perform his duties to the State or the public. The arrival of the Marines in their new capacity as auxiliaries to the police at once restored confidence, and by no persons was their coming more welcomed than by the Metropolitan constables. Any little apprehension that existed for the first week or so that their duties would clash, or that the two bodies would be a hindrance to each other, was rapidly dispelled. The Marines fell into their new duties with alacrity. The great value of their support and assistance was speedily recognised by the police, who were always sure of aid when they required it, and it is a pleasing fact that during the lengthened stay of the Marines in the city, the utmost harmony and good-feeling existed between them and the Metropolitan Force. It became evident by the tranquillised conditions of things brought about by the presence of the Marines that their coming to Dublin was in the highest sense a boon to the citizens. The safety of life was secured, and the property of the public was protected. While the Marines patrolled the principal highways of the metropolis, the strain was taken off the police, and due attention was permitted to be paid to the suburbs. The ubiquity of the Marines was so well understood that conspirators dared not try to accomplish any of their murderous intents, and the class of loungers who had been in the habit of congregating after nightfall at corners to the great danger of pedestrians found it necessary to quit their accustomed haunts and avoid their brutal assaults on passers-by. To their credit it must be said no section of the body of Marines committed any excess in the way of interfering with the just liberties of any class of the people. As a detached patrolling force, they were invaluable. They seemed to suddenly spring into existence when required, and the moment their work was finished they seemed to mysteriously disappear. The first detachment of Marines for this special service landed in Dublin on Dec. 3 last, and the men arrived daily from that date in small numbers, till 300 were stationed in the city. They were in charge of three officers, viz., Major Noble and Capts. Morgan and Hamilton, and no three gentlemen ever better deserved the thanks of the inhabitants for their unvarying zeal in the performance of new and difficult duties, and the constant attention they bestowed upon securing that the men under them gave the most effective aid. Hard work they had, no doubt, in completing their arrangements and establishing a system of organisation that enabled them to give the best possible assistance to the authorities, without attracting the slightest public attention. The men were located in five houses in different parts of the city. One hundred and sixty were lodged in the Bilton Hotel, Sackville Street; 40 were located in Hood's Hotel, Great Brunswick Street; 35 had their abode in Holles Street; 37 occupied premises in Merchant's Quay; and in La Touche's Bank, adjacent to the Castle, there were 28. Each of these places was connected by telephone with the Castle, so that orders could be rapidly carried out. It must be acknowledged that the officers had to engage in a duty naturally irksome to them, because it was foreign to their constitution and habits; but being a duty, they willingly accepted it, and in every way seconded the wish of the Lord-Lieutenant. So successfully did they do this that his Excellency, in his speech at the recent banquet to Lord Wolseley, felt himself justified in making special mention of the help which had been given and the confidence afforded by their efforts. The officers had no easy task at the outset. It was found necessary to divide the city into districts, beats had to be devised, patrols established, the reliefs provided for, and certain points fixed upon where some of their men could be found upon any emergency. The work was harassing because it was irregular. A good portion of the labour fell upon the men at night, and sudden calls were made for assistance without previous warning. Yet all the arrangements proved satisfactory, and no demand was ever made upon the officers that they were not able to immediately comply with. Great ability was displayed in this new organisation, and where the officers showed much self-abnegation the men were not slow to evidence their alacrity for the fulfilment of their new duties. The Detective Department, in their up-hill and dangerous investigations of the Invincible conspiracy, the ramifications of the 'Vigilance Committee,' and other frequent raids for arms, never interfered with the duties of the ordinary Metropolitan Police by seeking their aid and escort. They invariably relied for assistance on the Marines, who accompanied them on all their expeditions with warrants, whether for apprehension or search, and in the most approved manner occupied the posts allotted to them. The memorable arrests in January of 23 Invincibles, including the Phœnix Park assassins, were made by members of the G Division, with the sole assistance of the Marines; all the arrangements to secure the prisoners and provide against any attempt at rescue being made under the responsibility of the officers named. How admirably they performed this work is now a matter of history. During the many investigations at Kilmainham, the police-courts, and the Castle, the Marines were constantly brought into requisition. They were specially detailed to guard the courthouse in Green Street during the trials of the Park assassins, and a variety of other duties kept them constantly employed. Often singular ingenuity was displayed by members of the body in their 'get up' to hide their identity and calling, and an amusing instance is recorded where this was so successfully carried out that a brother Marine was deceived. The Marines began to return to England on June 1, and the last detachment of two officers and 11 men left on Wednesday. During their stay in Dublin both officers and men made hosts of friends. It is to be hoped that a long interval will elapse before any necessity will again arise for such a departure from the ordinary principles and plan for keeping the peace of the city and its environs by the introduction of such aid. Dublin, in its modern history, shows no parallel for such a supplement to the civil force, the Metropolitan Police having been, since its establishment 40 years ago, perfectly sufficient to overtake all the duties thrown upon them in periods of considerable excitement. The entirely exceptional character, however, of the recent crisis is marked by nothing more strongly than the employment of the Marines. In noticing the circumstance that they have now been withdrawn from the city, we naturally rejoice in the fact that it indicates a return to the original state of society, and express the confident wish that such an occasion will never again arise, involving, as it did, in a certain degree, the admission that the condition of affairs was exceedingly grave and without precedent, and that it was owing to want of public security the step had to be taken."

ROYAL MILITARY ACADEMY.

The public presentation of commissions in the Scientific Corps, which took place on the 27th ult. at the Royal Military Academy, was honoured by the presence of the Duke of Cambridge and many other distinguished visitors, including the Earl of Lucan, Lord Bingham, Prince Saxe-Meiningen, Gen. De Lantz, Russian Attaché, and most of the Staff of the Army. Gen. Beauchamp Walker, Director-General of Military Education, reported that the first class of cadets which had been up for examination consisted of 41 young gentlemen, of whom 38 had passed and were recommended for her Majesty's commissions in the Royal Artillery and Royal Engineers. By direction of the Duke, the successful cadets were called from the ranks by Col. Marsh, R.E., the secretary of the Academy, and her Majesty's commissions in the Royal Engineers and Royal Artillery were presented in the following order :—

ROYAL ENGINEERS.—W. G. Lawrie, 40,991 marks; A. C. Painter, 39,746; A. L. Swainson, 34,769; H. Broke, 34,196; J. S. Purvis, 34,035; H. Bonham-Carter, 33,966; E. F. Taylor, 33,517; R. U. H. Buckland, 33,070; R. S. Curtis, 32,859; W. P. Brett, 32,474; B. C. Johnston, 34,825.

ROYAL ARTILLERY.—J. E. W. Headlam, 35,054 marks; C. J. Perceval, 29,627; F. C. Johnston, 29,573; C. E. Rolt, 29,142; J. A. Law, 28,802; W. J. Napier, 28,594; S. J. Chamier, 28,157; F. G. Maunsell, 28,081; C. P. Smith, 27,969; H. Mallock, 26,930; W. H. Onslow, 26,175; J. H. Mansell, 26,289; N. S. Bertie-Clay, 26,228; F. H. F. R. McMeekan, 25,682; J. G. Geddes, 25,596; A. L. Walker, 25,092; H. C. W. Wynn, 25,051; P. J. G. Wakefield, 24,724; A. W. Caldecott, 24,599; Hon. F. R. Bingham, 24,161; L. A. C. Gordon, 23,759; J. R. Ritchie, 23,410; H. St. G. Ross, 22,323; H. Corbyn, 22,314; M. S. Eyre, 22,513; L. G. F. Gordon, 20,124; W. E. Bradish, 18,965.

Gentleman Cadet Headlam, who had qualified for the Royal Engineers, elected to serve in the Royal Artillery. The Duke of Cambridge presented the following prizes :—To Mr. Walter G. Lawrie, the Pollock gold medal for distinguished proficiency, the regulation sword for exemplary conduct, a rifle and instrument box for mathematics and mechanics, a despatch box and writing-case for military history, and a carriage clock for chemistry and physics; to Mr. Armand C. Painter, a dressing bag, for artillery; to Mr. J. E. W. Headlam, the Tombs Memorial Scholarship, as the highest cadet for the Royal Artillery; to Mr. J. A. Law, a carriage clock, for classics; to Mr. S. J. Chamier, saddle harness, for riding; Mr. J. G. Geddes, colours, &c., for landscape drawing; Mr. A. W. Caldecott, revolver, for gymnastics; Mr. H. Corbyn, clock, for drill; Mr. W. Speranza, revolver, for Italian; Mr. O. H. Stoehr, field-glass, for German; and Mr. H. A. Livingstone, field-glass, for French. In conclusion, the Duke expressed his satisfaction at all that he had seen and heard, and especially commended the gentlemen cadets on their good conduct, as the chief point of excellence in such an institution. The gentlemen who were now leaving the Academy had set a good example for the younger ones to follow, and he would trust them to maintain the status, efficiency, and reputation of the Academy. In the Ordnance Corps which they were destined to enter, the duties which awaited them were heavy, and there was no prospect of their diminishing. New inventions and new fancies were brought forward every week, all of which had to be entertained and investigated, and many of them, unfortunately, adopted. He said this was unfortunate because of the hindrance which these changes effected in the instruction of the Army and the difficulties which they entailed in the cultivation of efficiency. What they had learned one day they had to unlearn the next in favour of something else more in accordance with modern requirements, but it was of no use to complain, for the march of intellect went on continually, and the Army must keep up with its advances. He earnestly impressed upon them the value of continuing their studies, and strongly enforced the importance of promoting discipline both in themselves and those under their authority. He then announced that her Majesty's commission would be given to the 38 successful cadets, and that 21 would be gazetted at once. The others would follow by degrees, but he hoped that a place would be found for every one by the end of August. He then dismissed the remaining cadets for the vacation, which will come to a close on September 25.

THE IRISH COAST POPULATION AND THE NAVY.

In Ireland, the people residing on the coast, and gaining a livelihood chiefly by fishing, are the most peaceably disposed and loyal portion of the population. Convincing testimony in confirmation of this fact was recently given by several witnesses, examined relative to Irish piers and harbours by a committee of the House of Lords. Among the witnesses examined were the Chief Inspector of Fisheries and the Chief Marine Engineer of the Board of Public Works. These gentlemen, whose avocations afford them ample opportunities for learning the character of the coast population, were unanimous in their praise of the peaceable and loyal character of the people. During the recent disturbed period in Ireland the people round the coast held themselves aloof from the agitations and illegal societies which distracted that unhappy country, and not in a single instance was a fisherman arrested under the Crimes Act. Few are aware that these commendable qualities in the inhabitants of the Irish coast are due in no small degree to the influence exerted by the Coastguard in their intercourse with the people. Yet such is none the less a fact, as those who reside on the coast must know. From conversation with really loyal men they have come to learn a great deal about the English Government, with the result that much of their prejudice against it has been allayed. They do not regard the Coastguards with the aversion and distrust with which they do the Constabulary, and hence the principles expounded by the former are received in a different spirit. Very frequently, when the flagstaffs at the Coastguard stations are dressed in honour of her Majesty's birthday, and a spare rocket fired in the evening, the people take a lively interest in the proceedings, and not unfrequently give a cheer for her Majesty. In the inland districts, the people have the crudest ideas imaginable about the Queen and English Government, and from one year to another never see or hear anything calculated to awaken anything like love for their Sovereign. The Constabulary, the only representatives of the Government with which they come in contact, are recruited from among themselves. These men may coerce their quondam friends into obedience to the law, but they will never be the means of imbuing them with loyalty as the Coastguards do those with whom they come in contact. The Government might judiciously recruit a fine squad of seamen from the seafaring class in Ireland. They are superior both in physique and intelligence to the agricultural class, and make apt seamen. Since the last Fenian episode very few Irish boys have been shipped, none being eligible, except those whose fathers held Government situations. Some time ago this rule was relaxed, but no real exertions to obtain Irish boys were made. In one instance a batch of boys raised in Connaught were put on board a cruiser, and after the lapse of fifteen days were presented for medical examination on board the district ship. Some of them were much reduced from seasickness, and others from sleeping on the deck without a change of clothing, had contracted a skin-disease, and the result was the rejection of the whole of them by the doctor. They were landed by a cutter at the expiration of a month at some distance from their homes, and it may be imagined the story of their experiences was not calculated to inspire their companions with a desire to join the Navy. The enrolment of Irish boys would, for many reasons, be a wise step on the part of the Government. In loyalty they would not be found wanting, as no better men than Irishmen, away from the Emerald Isle, are to be found, according to the account of authorities who could not for a moment be suspected of partiality. Moreover, it would have the effect of generating loyalty in numbers of the Irish people, through the medium of the ties which would exist between those serving in the Navy and their friends on shore; and the distrust which the Irish complain that they are regarded with by the Government would no longer seem to exist.

Mr. Blake, chief boatswain, late of the Britannia, has taken over the duties of boatswain at Devonport Dockyard, in succession to Mr. John Sullivan, V.C., whose term of appointment has expired. Mr. Sullivan remains on the Active List, not having reached the age for superannuation.

The Army.

1st Life Guards. The regiment has returned to Windsor from Aldershot.

7th Dragoon Guards. The regiment proceeds to India during the ensuing relief season, and will be stationed at Mhow.

5th Lancers. Capt. Tufton has been noted at the Horse Guards for employment as a Yeomanry Adjutant.

6th Dragoons. The regiment remains in South Africa for another year.

10th Hussars. The regiment returns home from India with the 1883-84 relief.

21st Hussars. Capt. and Pymr. Kitson has been placed under orders to proceed on foreign service during the next relief season. The following brigade order was published at the Garrison Office, Curragh Camp, dated June 6, 1883:—" Major-Gen. C. C. Fraser, commanding Curragh Brigade, cannot permit Major the Hon. H. Crichton, 21st Hussars, Brigade-Major of Cavalry in Ireland, and Staff Officer of Curragh Camp, to vacate these appointments without recording his high appreciation of that officer's valuable services during the period that he has held them. For a long time the Curragh Brigade consisted of close on 6,000 troops, entailing innumerable reports and correspondence, causing office work from 8 a.m. to midnight. Numerous detachments were requisitioned from all directions by the magistrates at all hours of the day and night, during winter months, in aid of the civil power. The arrangements for the despatch of these troops were worked by Major Crichton without one miscarriage. In a time of exceptional difficulty Major Crichton had the opportunity of proving himself to be an excellent staff officer, active, reliable, with tact, good judgment, precision, and untiring devotion to his duties (with which he was thoroughly conversant). The Major-General Commanding is sure that all ranks of the 71 batteries, regiments, and battalions that have in the last five years been stationed in this Camp and at Newbridge have fully recognised that arrangements for any amusement and recreation have been mainly owing to the exertions and kind forethought of Major Crichton.—By order, C. F. Thomson, Captain, Brigade-Major."

ROYAL ARTILLERY.

Lieut. J. S. C. Le Quesne died at the Citadel, Cairo, of cholera, on the 24th ult., aged 22 years. The deceased was the only son of the late Mr. J. Le Quesne, of Brighton.

Lieut. H. J. Croft, R.H.A., died at Cairo of cholera on the 27th ult. The deceased, who was eldest son of the late Mr. R. Manners Croft, Royal Dragoons, entered the Army Aug. 19, 1875.

The funeral of Gen. Sir W. Fenwick Williams, of Kars, G.C.B., took place on Monday morning at Brompton Cemetery. The procession, consisting of an open hearse, two mourning coaches, and three private carriages, left Garlant's Hotel, Suffolk Street, at half-past 11 o'clock, and reached the cemetery soon after noon. In the first coach were the Rev. Henry and Mrs. Dening, nephew and niece of deceased, together with their two sons, Henry Fenwick and Douglas, the former of whom is godson to the late general; the second carriage was occupied by Mr. Francis Edward Paynter (nephew), and the Misses Karsalie and Agnes O'Halloran (nieces). Next followed the carriages of the Turkish Ambassador (Musurus Pasha), Gen. Sir Charles Trollope, and Dr. Scott, who was accompanied by Mr. Parkin, representing the executors, Col. De Winton and Mr. Roswell Arnold, of New Brunswick, both of whom are at present in Canada. At the cemetery there was a considerable gathering both of officers and of the general public. Gen. Du Plat, who was at one time aide-de-camp to Sir Fenwick Williams, represented her Majesty, while Col. Ellis attended on behalf of the Prince of Wales. Amongst those present were very many general officers, former comrades of the late Sir Fenwick. After the service in the chapel, which was conducted by the Rev. H. Dening, a procession was formed to the catacombs, where a place had been prepared for the reception of the coffin. This was of polished oak, with brass mounts, and an inscription, " Gen. Sir William Fenwick Williams, First Baronet of Kars, G.C.B., D.C.L. Born 1800. Died July 26, 1883," and was almost hidden beneath the mass of floral crosses and laurel wreaths laid upon it.

ROYAL ENGINEERS.

The first annual match between the Bristol and New Cross Rifle Clubs of the Postal Telegraph Companies took place at Reading on Saturday. The conditions were 16 a side; distances, 200, 500, and 600 yards; seven shots at each, Wimbledon National Rifle Association rules. The New Cross team led at each range, and won by 61 points, the totals for the three distances being—New Cross, 947; Bristol, 886. Lance-Corpl. Sheldon, with an aggregate score of 89, won the first prize of the New Cross Club (£1), and Lance-Corpl. J. J. Gahagan took the corresponding prize of the Bristol team with a score of 80. Sixteen other prizes were also presented by Capt. Whitmore, at the conclusion of the match.

Coldstream Guards. The 2nd Batn., under the command of Col. Wigram, C.B., left Pirbright on Saturday afternoon by march route for Windsor. The Rev. William Bassett, Rector of Frimley, Surrey, has received £150 from the officers, non-commissioned officers, and men of the Guards, as a contribution towards the fund for the relief of the widow of the late William Brown, who was set upon and killed by three soldiers from the camp at Pirbright, on June 29. Three men were tried at the recent Surrey Assizes on a charge of murder. Two were acquitted; the other, named Gatling, was sentenced to penal servitude for fifteen years. The money will be sufficient to provide for the widow for five or six years.

Scots Guards. The 1st Batn., consisting of about 24 officers and 365 non-commissioned officers and men, under the command of Col. Knox, C.B., arrived at Pirbright Camp by march route from Windsor on Saturday afternoon, for the purpose of going through a course of musketry practice.

19th Yorkshire Regiment. The 2nd Batn. will shortly be moved from Belfast to the Curragh.

37th Hampshire Regiment. The regiment is up to its full strength, and there are recruits now at the depôt that would, if needs be, bring it up to the highest establishment. We find the following in the *Hampshire Chronicle*:—" It is now generally known that the 'territorial scheme' has proved more successful in some counties than in others. In this county it has been very favourably received, and the Hampshire Regiment (formed of the old 37th and 67th) may now be fairly termed a county regiment, being composed almost exclusively of Hampshire men, and whether regarded from the stand-point of appearance, smartness, or good conduct, is second to none in the service. It is true that neither battalion is quartered in Winchester (one, the 37th, being in Ireland—though it will shortly leave there for England, and the other is in India), but the behaviour of the numerous recruits who pass through the depôt gives ample opportunity to bear testimony in the matter. To prove that the regiment is popular, it may be stated that upwards of 500 recruits have joined since Jan. 1 in this year; and to show that it is well-behaved, it may be remarked that it has not been necessary to hold a single court-martial since the beginning of the year, nor has a single complaint been made by the police of the city against any man of the regiment, whilst the conduct of all in the streets is noteworthy. The life, pay, and treatment of our soldiers are very different from what they formerly were, and, doubtless, many more young men would offer themselves, if they were better acquainted with the terms, the attractions, and the rewards of good service. An intelligent lad who is determined to be obedient, sober, attentive, and smart, has a fair chance of making his way to a commission and ensuring a competency at a comparatively early period in life; whilst, if not quite so successful, numbers of lucrative posts are open to him. A book has been for some time published giving all details of a soldier's life and duty, and an intending recruit may obtain all particulars of service by applying at a post-office."

41st (The Welsh) Regiment. From Natal a correspondent sends us a very reasonable complaint as to the treatment meted out to the married men. He says:—" I was astounded on reading the announcement 'that the Government intended to send the married families out to Egypt, as soon as the hot season has passed.' They have not been separated one year, yet we in Natal have been two years and a half separated from our families, and not a word is said on our behalf. The hot season is now approaching, and the cold season is passing rapidly away, and they will not send the families out here during the hot season. We wonder if the person who controls these matters is a married man, and how would he like to be separated from his wife and children, if he has any, such a long period? We have given up all hopes of a speedy reunion with our wives and little ones, and are looking forward to the time when we shall have done our term of service, and so have done with the injustice of 'red-tape,' and leaving the service with the uttermost disgust, we shall never praise that service where we have had nothing but ill-treatment so liberally issued to us. There was a rumour that suitable quarters were to be built for the accommodation of the married; none have yet been commenced. The summer is coming with its enteric fevers, dysentery, &c., and our families still away, which is a great disappointment to us all. I sincerely hope some kind person will take our cause up, and let our rulers know we exist in the land of the living."

44th Essex Regiment. Gen. Sir Thomas Reed, G.C.B., colonel of the regiment, died on the 24th ult. at his residence, Baddesley Manor, Romsey, aged 86. He was a son of the late Mr. T. Reed, of Dublin, and was born in Dublin in 1796. He was educated at Sandhurst, and entered the Army in 1813. He served in the campaign of 1815, and was present at the battle of Waterloo. In 1846 he commanded a brigade of the Army of the Sutlej, and was wounded and had a horse killed under him at the battle of Ferozeshah. In 1857 he commanded and made the military disposition of the troops in the Punjab at the breaking-out of the Mutiny, which resulted in the tranquillity of that province and constituting it the base of operations against Delhi. For these services he received the "entire approbation" of the Commander-in-Chief in India, and subsequently the acknowledgments of the Governor-General. He was an aide-de-camp to the Queen from 1841 till 1854, and in 1858 he was appointed Col. of the 44th. He became a Lieut.-Gen. in 1860 and Gen. in 1868, and retired in 1877. Capt. Stephenson has been appointed on the staff of the Northern District, as garrison instructor, in succession to Major Buxton, 27th Fusiliers, whose five years' tenure has just expired.

ROYAL MARINES.

The appointment of Lieut.-Col. Walsh, R.M.L.I., to be Assistant-Adjutant-General at the Royal Marine Office will make him a supernumerary on the List of Lieutenant-Colonels, and a step will accrue to the majors and captains. On the other hand, the colonels and lieutenant-colonels will lose a step by the return of Sir Charles Adair to the Generals' List, on which he has been borne as a supernumerary while holding the appointment of Deputy-Adjutant-General, and no promotion will therefore be made in the next vacancy which may occur on that List.

The promotions consequent upon the appointment of Lieut.-Col. Walsh to A.A.G. will bring Major Bourchier on to the 16s. List, and cause a vacancy for instructor of musketry at the Depôt, Walmer.

The following changes in the command of recruiting parties of the Royal Marines will take place on the 1st prox.:—Capt. A. St. L. Burrowes, R.M.L.I., to relieve Major E. L. Rose, R.M.L.I., at Exeter; Capt. F. M. Eden, R.M.L.I., to relieve Major St. A. St. John, R.M.L.I., at Taunton.

Lieut.-Col. A. H. H. Walsh, R.M.L.I., has been selected for the appointment of Assist.-Adjt.-Gen. to the Royal Marine Forces, in succession to Col. Sir F. W. Festing, K.C.M.G., C.B., A.D.C., R.M.A., whose period of service will expire on the 9th inst.

Leave of absence has been granted as under:—Lieut.-Col. and Pymr. J. C. Travers, R.M.L.I., two months; Capt. B. C. P. Hamilton, R.M.L.I., two months, with permission to visit the Continent.

Capt. Burrowes, R.M.L.I., will relieve Major Rose, R.M.L.I., on recruiting service at Exeter on Aug. 31; and Capt. Eden, R.M.L.I., will relieve Major St. John at Taunton on the same date.

60th King's Royal Rifles. The injury from which Capt. Davidson is suffering, as the result of an accident lately at Aldershot, is a fractured thigh bone, caused by his overbalancing himself and falling backwards from a window.

69th, the Welsh Regiment. H.R.H. the Field-Marshal Commanding-in-Chief has approved of Lieut. Humphreys being appointed to reorganise and command the corps of mounted infantry in Egypt, with the local rank of captain, but no further allowance in regard to pay.

72nd Seaforth Highlanders. On Friday, July 27, H.S.H. Prince Edward of Saxe-Weimar, G.C.B., made his annual inspection of this regiment, stationed at Parkhurst, Isle of Wight. The regiment, under command of Lieut.-Col. Stockwell, C.B., was drawn up in line, and received the inspecting officer with a general salute. It was then wheeled into column, and the general inspected each company minutely, after which the companies were equalised and the ceremony of trooping the colours gone through, which, combining as it does marching-past with various other intricate movements, is well calculated to exhibit the steadiness of a battalion on parade. The battalion was then formed into three sides of a square, and his Serene Highness presented Lieut. W. Greer with the medal for distinguished conduct in the field. This officer, when a serjeant, had been granted this decoration for an act of gallantry performed at the battle of Peiwar Kotal, Afghanistan, on December 2, 1878, but as he was promoted to a commission in the regiment for another shortly subsequent act of gallantry, the decoration was withheld. Since the return of the regiment home, however, his case has been re-represented, and this time with a favourable result. His Serene Highness also presented Private W. Daniels with the medal for long-service and good-conduct. After expressing his pleasure at being the medium of presenting these decorations, his Serene Highness complimented the battalion on its appearance and movements on parade, alluding particularly to the large number of old soldiers and men wearing medals in the ranks, and, in addition, informed the men that he was well satisfied with their behaviour since they had come under his command. The parade was then dismissed, and his Serene Highness visited the hospital, canteen, &c., and inspected the barrack-rooms and kits. After a short interval for luncheon, books were inspected, and the day's proceedings closed with a parade in drill order, at which various officers were called out for drill, &c. On his way back to Portsmouth his Serene Highness inspected the detachment of the battalion on the Queen's Guard at East Cowes.

91st Argyll and Sutherland Highlanders. Major Prevost has passed the necessary examination to retain his promotion, to which he was provisionally promoted in February last.

95th Sherwood Foresters (Derbyshire Regiment). Major E. T. M. Dickin died at Norwood, Torquay, on the 21st ult. The deceased entered the Army Aug. 21, 1869; became lieut., Oct. 7, 1871; capt., July 13, 1878; and major only a few weeks ago.

102nd Royal Dublin Fusiliers. No exchange has been sanctioned between Capts. Oates and Povah, as lately announced.

2nd West India Regiment. Lieut.-Col. Sheppard arrived in England in H.M.S. Tyne on 12 months' leave of absence. Numerous changes have taken place in this regiment.. Between Feb. 1879 and Oct. 1882, about 32 officers left the regiment by exchange, retirement, or transfer. A few died, four officers have also been passed over for promotion. The changes in the above period were equal to those that took place during the previous 14 years, not counting casuals by the Ashantee War.

Medical Department. Surg.-Major H. Bradford died at San Francisco, while on leave from Hong Kong, on the 28th ult., aged 33 years. The deceased was son of the late Rev. J. Bradford, Vicar of Pinhoe, Exeter.

The Auxiliary Forces.

MILITIA.

Royal Scots. The annual inspection of the 3rd Batn. took place at Glencorse on the 26th ult. The battalion was drawn up in line, in review order, on the parade-ground depôt, Royal Scots, under the command of the Marquis of Lothian, K.T., and presented an exceedingly smart, soldier-like appearance. Col. E. A. Stuart, commanding the 1st Regimental District, the inspecting officer, arrived on the parade-ground about 11 a.m., and, after being received with a general salute, commenced his inspection. The ranks having been closed, Major Dudgeon put the battalion through the manual and firing exercise, which was performed with great precision and steadiness. The battalion was then marched off to the park adjoining the barracks, and formed into two battalions of four companies, each battalion working independently, under the command of Lieut.-Col. Gordon and Major Dudgeon respectively. Several battalion movements having been executed, under the direction of Lord Lothian, the battalion was re-formed, and each man served out with eight rounds of blank ammunition. Two companies were then detached to take up a position to defend the barracks, and the remainder of the battalion formed for "attack." The operations concluded with a "charge" by the invading party carrying the position amid great cheering, after which the battalion marched back to camp. The Duke of Buccleuch, K.G., hon. colonel of the battalion, who was present during the inspection, then addressed the bat-lion. His Grace said that he was glad to find that his old regiment, which he had commanded for so many years, still maintained its high character for efficiency in drill and discipline. The battalion, he remarked, should be proud to think that it now formed a part of the oldest regiment in the service, if not the oldest in Europe, and one that was so well known for its deeds of valour. His Grace concluded by stating that it gave him the greatest pleasure to hear from Lord Lothian that the conduct of the men had been particularly good throughout the training, and hoped it would always be maintained. Col. Stuart continued the inspection in the afternoon. The battalion paraded at 2.30, in complete marching order, afterwards the kits were laid out. The following day the books were taken, which concluded the inspection. The inspecting officer at the conclusion expressed himself highly satisfied with the result of the inspection. The following officers were present:—Lieut.-Col. the Marquis of Lothian, K.T., in command; Majors Gordon (Lieut.-Col.) and Dudgeon; Capts. Inglis, Christie-Miller, Scobie, Wilkie, Barclay, and Lang; Lieuts. Daniel, Smythe, Brack-Boyd, Menzies, Scott, Fletcher, Stewart, and Patten; Capt. and Adjt. Moore, Qrmr. Lonsdale, and Surg.-Major Lucas, M.D. The battalion was paid off and dismissed on the 27th ult.

Rifle Brigade. The 6th Batn. (Royal Longford Rifles) was inspected on Friday last by Col. Penton, commanding the 100th Regtl. District, Birr. The regiment was under command of Capt. Dopping. Col. Penton, addressing the regiment, said:—"Capt. Dopping, I have had very great satisfaction in inspecting your regiment. The cleanliness of the appointments, the steadiness of the men under arms, the total absence of crime, and their good behaviour during the training meet my commendation, and it will give me great pleasure to make a most favourable report to his Royal Highness of everything which I have seen. Few Line regiments could do better than you have done."

North Lancashire Regiment. The officers of the 3rd and 4th Batns. held their annual regimental dinner on the 25th ult., at the Café Royal, Regent Street.

York and Lancaster Regiment. The athletic sports of the 3rd Batn. took place at the New Barracks, York, on Saturday last. The committee consisted of Lieut.-Col. Bottomley, Capts. Raikes and Groom, Colour-Serjts. Bayes, Glover, and Tracey, Serjts. Mountain and Stringer; judges, Serjt.-Major Lawson, Serjt.-Instructor of Musketry Herne, and Colour-Serjt. Lush. There were 18 events, all of which were well contested.

The under-mentioned regiments, on completion of training, will be dismissed to-day:—4th Batn. Argyll and Sutherland Highlanders, at Paisley; 3rd Batn. Border, at Carlisle; 3rd and 4th Batns. North Lancashire, at Preston; 3rd and 4th Batns. Manchester, at Ashton; 3rd Batn. Royal Highlanders, at Perth; 4th Batn. Royal Scotch Fusiliers, at Ayr; 3rd and 4th Batns. Scottish Rifles, at Lanark Muir; 3rd Batn. Somersetshire L.I., at Wellington; 4th Batn. East Surrey, at Kingston; 3rd Batn. Royal Welsh Fusiliers, at Wrexham; 4th Batn. Worcestershire, at Worcester; and 3rd Batn. York and Lancaster, at Pontefract. Of the 161 regiments called out for training in the United Kingdom this year, 149 have completed. Those yet to assemble, according to the War-Office programme, are the 7th Brig. North Irish Division, R.A., at Wicklow, on Aug. 20; and the 3rd Batn. Duke of Cornwall's L.I., on Sept 10, at Bodmin.

YEOMANRY CAVALRY.

East Lothian. Col. Lord R. D. Kerr, C.B., Inspecting Officer for Auxiliary Cavalry, 1st District, made an inspection of this regiment at the close of the week's training, on the 27th ult. The inspection was held at Belhaven Sands, and at its close Col. Lord Kerr complimented Col. the Earl of Haddington on the smart turn-out and with the drill of the men, commenting specially on the physique of the troopers and the breed and style of the horses. His lordship also remarked that it was extremely creditable to the regiment that only six men were absent without leave, and he hoped the example of those present would stimulate the absentees to greater exertion in the future. The regimental ball was held the same evening at the Assembly Rooms, Dunbar.

THE VOLUNTEERS.

1st Essex Artillery. Lieut.-Col. Howard's command was inspected last Saturday, in West Ham Park, by Col. Hale-Wortham, R.A., commanding Auxiliary Artillery, Eastern District, who said he was highly pleased with the turn-out and with the evident attention the brigade paid to their drill.

20th Middlesex (Artists) Rifles. The following battalion order by Lieut.-Col. R. W. Edis has just been issued:—"In accepting the honour and responsibility of the command of the Artists Corps, in which he has served with Sir Frederick Leighton for the last 24 years. Lieut.-Col. Edis desires to express, on behalf of the regiment, and to record in the orders of the day, the extreme regret with which officers, non-commissioned officers, and men have received the resignation of their late colonel, to whose devotion and untiring energy in promoting its well-being the corps owes in a large degree its present high state of efficiency and position among the Volunteer regiments of the country, and whose unfailing courtesy and kindness have won for him the respect and affection of all ranks serving under his command. While expressing deep regret in losing his most able and valuable services as lieut.-col. commanding the regiment, the new commanding officer is sincerely glad to announce that H.R.H. the Field-Marshal Commanding-in-Chief has been pleased to grant to Sir Frederick Leighton the rank of hon. col. of the regiment; so that, although withdrawing from all active service, he still remains, as honorary chief, in intimate association with the corps." The Field-Marshal Commanding-in-Chief has approved of two companies of the corps proceeding to Aldershot for drill with the Regular Forces, from Aug. 11 to Aug. 18, and forming part of the 3rd Provisional Battalion, at Cove Common, under the command of Lieut.-Col. Blake, 1st Herts.

22nd Middlesex (The Central London Rangers). Lieut.-Col. Alt, commanding this corps, has invented a new method for working machine-guns in the field. The invention consists of a limber or magazine carriage, mounted on two wheels, worked by a pole or trail, and drag-ropes on the axles. Two yokes are slipped through the trail, thus enabling four men, two on each side, to manœuvre the gun, assisted by two on each drag-rope, or more if necessary. The carriage carries 5,000 rounds of ammunition, as well as the rifles of the detachment working it, entrenching tools and provisions, if necessary, for one or more days. The machine-gun is mounted above the limber, between the wheels, and the whole is protected by a breastplate or bullet-proof steel shield. A detachment of this corps, under the command of Capt. Armit, exhibited this carriage, on which was mounted a five-barrel Nordenfelt machine-gun, to the Lords of the Admiralty last week at Dartford. The detachment numbered two non-commissioned officers and eight men, and worked the gun in a very creditable manner. Since then, a General officer of long service and varied experience, bearing a high reputation for his scientific attainments and general military knowledge, has written as follows to Col. Alt regarding the impression he formed from what he witnessed of the performance of this detachment of the Central London Rangers:—"If all your corps are as smart as your little detachment, you and the country have, indeed, to be congratulated on a most valuable item in its defence." A grand concert, in connection with this regiment, took place on Saturday last at the Holborn Town Hall, Gray's Inn Road. Madame Marie Roze, Miss Hope Glen, Mdlles. Gayrard, Pacini, and de Bono; Messrs. Frank Boyle, Palmieri, Cattermole, Henry Pyatt, and Griffin, together with Mr. John Thomas, harpist to the Queen, were assisted by the magnificent band of the regiment, under the direction of Mr. F. Blake. The concert was a thorough artistic success, and a numerous and fashionable audience testified their appreciation of its merits by enthusiastic applause and frequent encores, so frequent that the kindness of the artistes must have been sorely taxed. Madame Marie Roze sang no less than six songs, and had a difficulty in escaping further demands. Among so many talented performers, it seems invidious to particularise, but next to Madame Roze's charming rendering of her several songs, concluding with "Home, Sweet Home," Mr. Thomas's two harp solos, both encored, and Mdlle. de Bono's violin solos, "Adagio" (Gordini), and "Gavotte" (Czibulker), were received with, perhaps, the keenest appreciation; while the loud and prolonged applause which greeted the performance of the overture to "The Barber of Seville," and a grand selection from "Faust," was only a fair tribute to the excellence of the music, and the talent and energy of the bandmaster, Mr. Blake, who may be congratulated on having a band second to none in the Volunteer service, and excelled by very few in any other.

1st Volunteer Battalion, Berkshire. The battalion went into quarters in Forts Nelson and Southwick, Portsdown Hill, last Saturday, under the command of Lieut.-Col. Sir P. Hunter.

1st Volunteer Battalion, Hampshire Regiment. This fine battalion, under Lieut.-Col. Sir W. H. Humphrey, went into camp at Barrosa Hill, Sandhurst, on Monday last. The inspection will be made on Monday, and on Tuesday tents will be struck.

2nd Bucks (Eton College) Rifles. This smart little battalion was officially inspected by Col. R. Whigham, commanding the 43rd (Oxford) Regimental District, on Saturday last. Major the Rev. E. Warre was in command, assisted by Major Clements and Capt. Godsal, (acting adjt.)

2nd Volunteer Battalion, West Kent Regiment. Major-Gen. Newdigate, C.B., officially inspected this battalion last Saturday, at the close of a week's camping-out at Lee. Under Col. Lenon, V.C., the regiment, with the fine muster of over 875 officers and men, drilled steadily, and gained the well-deserved praise of the inspecting officer, who was accompanied by Col. Chads, commanding the 50th (Maidstone) Regimental District.

The under-mentioned regiments go under canvas to-day for a week's training and exercise:—4th Staffordshire R.V., 1,000 of all ranks, at Oxley Manor, Wolverhampton; 1st Northampton R.V., 1,087; 1st V.B. North Staffordshire Regt., 986, at Whittington Heath; 1st V.B. Leicestershire Regt., 950, at Beaumanor, near Loughborough; 1st Shropshire and Staffordshire A.V., 450, at Church Stretton; 7th West York R.V., 600, at Beverley; 2nd Cheshire R.V., 350, at Conway; 1st Denbigh R.V., 600, at Wynnstay; 1st V.B. South Yorkshire Regt., 600, at Southport; 2nd Shropshire R.V., 568, at Whitchurch; 2nd V.B. North Staffordshire Regt., 650, at Oakedge Park; and 1st West York A.V., 425, at Morecambe.

"Marksman" writes:—"A Volunteer, by the Regulations of 1881, must retire at 50 years of age, and a Volunteer officer at 60, unless specially recommended by the inspecting officer as still fit, and such recommendation is to remain in force for five years; therefore a man at 70 is as good as one at 65, which is a palpable absurdity. Surely there ought to be some limit even to a recommendation. I serve as a humble private in a Volunteer regiment the colonel of which is past 71, and the adjutant was appointed in 1860. The inspection is over, and the colonel has been once only on parade, and that not at the inspection. Is it not time we were afforded some one more modern, to command and teach us?"

"A Major of Eight Years" writes:—"Will you kindly call attention to the fact that there are now serving several Purchase Captains of 1863 who obtained their brevet majorities in 1877, and who are still only majors, successional brevets having been done away with, and with little or no prospect of further promotion? This comes especially hard on officers serving in India, many of whom are 27 and 28 years' service, and who are being daily superseded by their juniors in the Staff Corps, who, on completing 26 years' service, are promoted lieutenant-colonels. Can nothing be done for these unfortunates? Why should not they get a brevet after 26 years, the same as the officers of the Staff Corps?"

A PRACTICAL AND FIRST-CLASS RESERVE OF OFFICERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I must begin with an apology for taking up so much valuable space in your paper; I trust, however, that you will consider the grave importance of the subject some excuse and justification. I was brought up for the service, and have been thrown much with officers of the Regular and Auxiliary Forces for many years, and I have had some experience of Regulars, Militia, and Volunteers. I am not prejudiced in any way, and believe I may claim to speak without bias and from practical experience. I am not going to waste the time of your readers by touching upon the scarcity of officers, or the necessity for forming a really first-class Reserve, available in any case of emergency. The former is well known, and the latter felt, I believe, by every officer in the service. I shall confine myself, therefore, to the proposal of a scheme which would, I fancy, meet the requirements of the case. "But," some one will exclaim, "there is a reserve of officers, and this must be an ignorant fool, not to know it!" I think I know, almost by heart, every General Order, Circular, and Royal Warrant which has been promulgated during the last ten years; but I maintain that the "Reserve of Officers," under existing Regulations, is more or less a failure, and that this failure is, to a certain extent, felt and tacitly admitted by the authorities, by whom the Reserve has been snubbed on more than one occasion since its formation. My remarks do not, of course, in any way refer to the old soldiers serving in its ranks, but only to officers admitted from the Militia and Volunteers. I believe this Reserve has failed, as every Reserve will fail, if organised under similar conditions, because the standard of qualification is too low. As an instance, take the case of an officer of Volunteers. To obtain a commission as lieutenant in the Reserve, he must have served three years (as efficient), and have passed his examination for "p." It is not even necessary for him to have attended a school of instruction, he may be utterly devoid of every one soldierlike qualification, such as nerve, resource, appreciation of the value of discipline, tact with men, &c., and be, in fact, totally ignorant from a military point of view. Again, as regards the Militia, one of the most useless Artillery Militia officers I know is a lieutenant in the Reserve; while another, whose swagger, "bad form," and ignorance as a practical soldier are well known in his own brigade, is about to receive his captaincy in it. I have been for some months instructor of fortification, topography, military law and tactics, at a military college for Militia officers going up for the military competitive examination for Line commissions, and have thought much lately of the following plan. I am especially fond, personally, of scientific and practical artillery work (I hold a special first-class certificate of qualification as instructor of gunnery), and shall speak of the Reserve I propose to form from an artillery point of view; but my remarks are equally applicable to the other branches of the service. There are in the Militia very many officers, gentlemen by birth, whose fathers have nobly served their country for generations, and fought on many a battlefield, who are public-school men, with plenty of dash, high courage, muscle, and every soldierly attribute, who are shut out from the service because (in these days of competition), although they have qualified well in their examination, John Smith or Thomas Brown has made a few more marks. Now, I would form a Reserve for the Royal Artillery as follows:—Class A.—Officers who have served in the Royal Artillery, officers who have served in other branches of the Regular Forces, holding certificates from Shoeburyness, as qualified instructors of gunnery Class B.—Officers who have qualified at the military competitive examination for Line commissions (I would make standard of qualification ·5 for "pass," and ·75 for "special mention"), and who have passed through the three-months course at Shoeburyness for Militia officers qualifying as instructors, and obtained a 1st-class certificate. I would allow lieutenants under 30 and captains under 35 years of age, to attend the examinations mentioned for qualification to serve in Class B. I believe that in this way a valuable reserve would be formed, available in case of emergency, or temporarily at any time; while it would induce many keen soldiers and most valuable men to remain in the Militia, whereas Artillery regiments now often suffer from constant changes of officers. There is no reserve for the Royal Artillery except the Artillery Militia, and surely it is most important that as many officers as will come forwardshould be permitted to qualify to assist their brethren of the grand old Royal Regiment, without assumption or swagger; and I am certain there are lots of officers who are heart and soul fond of soldiering, who would willingly and eagerly serve her Majesty in any quarter of the globe, who would thankfully avail themselves of the permission to qualify. At any rate, the experiment would cost the Government nothing, and would surely be worth a trial.—I am, &c., Artillery Militia.

A court-martial assembled on Monday on board the Victory for the trial of George Penderleith, a private in the Royal Marine Light Infantry, serving on board the Repulse, on charges of striking Serjt. Cross, R.M.L.I., striking Acting Bombardier Killshaw, R.M.A., and threatening Serjt. Cross. The prisoner pleaded guilty to the offences, which were all committed on July 21 at Leith, while the Repulse was getting under weigh. His previous character was bad, and the Court sentenced him to five years' penal servitude. Dumar Gautier, able seaman, of the Repulse, was charged with having been absent from his ship without leave for 24 hours, with striking Corpl. Sinnims, R.M.L.I., and striking Mr. Creagh, master-at-arms, on July 15, while the vessel was at Invergordon. The prisoner pleaded guilty, but urged that the insubordination was not premeditated, and resulted from drink. His previous character was shown to have been exemplary. The Court sentenced him to one year's hard labour.

Col. Davis, commanding the troops at Shorncliffe, is about to be gazetted to the rank of Major-General, and consequently relinquishes his appointment about Oct. 1.

ROYAL CAMBRIDGE ASYLUM for SOLDIERS' WIDOWS, KINGSTON-ON-THAMES.
Supported by Voluntary Contributions.
LADY-PRESIDENT.
H.R.H. the DUCHESS of CAMBRIDGE.
PRESIDENT.
H.R.H. the DUKE of CAMBRIDGE, K.G.
CHAIRMAN OF COMMITTEE.
General H.S.H. Prince EDWARD of SAXE-WEIMAR, K.C.B.
OFFICE—40 CHARING CROSS, S.W.

This Asylum was opened in February, 1854, to provide a home for the widows of non-commissioned officers and privates of the Army of not less than 50 years of age.

There are 65 widows in the Asylum.

Each widow has a furnished room, and receives seven shillings weekly, besides a monthly allowance of two shillings and sixpence for coals.

The House is capable of containing 70 widows, and the Committee appeal to the public for funds to enable them to admit the additional number, the present subscriptions being insufficient.

The funded income of the charity yields only £930, with an additional £50 from the Princess Mary's Fund for Nurses, to meet an estimated expenditure of £3,000 per annum.

An annual subscription of half-a-guinea, or a donation of five guineas, entitles to one vote at each election, with the right of nominating a candidate.

J. A. STEWART, Colonel, Secretary.

HOTCHKISS AND CO.,
21 RUE ROYALE, PARIS;
AND
49 PARLIAMENT STREET, LONDON.
MANUFACTURERS of HOTCHKISS' PATENT
REVOLVING CANNON,

NOTICES TO CORRESPONDENTS.

FORTY POUNDER.—The expense falls on the Colonial authorities.

The ARMY AND NAVY GAZETTE this week contains eight pages extra.

Several Naval and Military letters are in type, but are forced to stand over through want of space.

The ARMY AND NAVY GAZETTE exchanges with or receives the following Service papers abroad:—*L'Avenir Militaire*; *Bulletin de la Réunion des Officiers*; *L'Armée Française*; *L'Italia Militare*; *Rivista Europea*; *Rivista Militare*; *Memorial de Ingenieros*; *La France Militaire*; *Moniteur de la Flotte*; *Le Progrès Militaire*; *Der Veteran*; *Streffleur's Oesterreichische Militärische Zeitschrift*; *Jahrbücher für die Deutsche Armee und Marine*; *Militär Wochenblatt*; *Giornale d'Artiglieria e Genio*; *Organ der Militär-Wissenschaftlichen Vereine*; *Vedette*; *Deutsche Heeres Zeitung*; *Militärische Zeitschrift*; *Armeeblatt, Wien*; *Army and Navy Journal of New York*; *The American, Philadelphia*; *Revista Maritima Brazileira*; in addition to all the home and colonial professional periodicals and journals.

Army & Navy Gazette.
LONDON, SATURDAY, AUGUST 4, 1883.

FROM an expression that often occurs in articles and speeches on military matters, it might be supposed that the British Army, as a body, belonged to a higher order in the animal world than that which comprises all the individuals who compose that Army. The order of Vertebrates, including, roughly, men, quadrupeds, birds, reptiles, and fishes, is distinguished from all the animals which naturalists have agreed to consider as belonging to lower orders, by the possession, in every case, of a back-bone. Among human beings, the exceptions to this rule of beings with two back-bones, such as Siamese twins and "two-headed nightingales," are so rare that they may be disregarded; and we shall be fairly correct in stating that every man has a back-bone. It may be rigid like a drill-serjeant's, or abnormally flexible like an acrobat's; it may be obstinately straight, gracefully curved, or inconveniently twisted; but each man has only one. With the Army collectively, the case seems to be widely different. Lord Wolseley has told us that the company officers are the back-bone of the army; Sir F. Roberts says the old soldiers are that important part; we have often been assured that the non-commissioned officers form that element of stability in our military system; we were told lately that the county gentlemen were the back-bone of the Militia; General Sir P. MacDougall says each "line battalion" in Egypt had a strong back-bone of "reserve" men; a contemporary has informed us that a thorough knowledge of company drill was the back-bone of battalion movements; and we have seen it stated that Surgeons-Major are the back-bone of the medical department. And, lest all these spinal columns in different parts of the military structure should not suffice, they are supplemented by an external one, for the Corps of Commissionaires have been also called the back-bone of the army. We cannot refuse to accept these varying, if not conflicting, statements, with their consequent back-bones, commended to us as they are by high authority and long experience. We will not, therefore, discuss the claims of the classes and qualifications we have mentioned, or of any other classes, to the osteological distinction of being back-bones; nor will we consider the effects, as to strength or mobility, that might be expected to result, in an army or an individual, from the possession of a plurality of spinal columns. But, seriously "the back-bone of the army" was not a happy expression originally; and lately it has been so hackneyed that it has lost all force, and has been applied to so many different objects that it has become ridiculous. Military speeches are seldom interesting or instructive. In the Regular Army (if we may still call it so), English officers are often abrupt, and say too little; Scotch officers often prosy, and say too much; and Irish officers often ramble, and say just what had best be left unsaid. In the Militia, there is less variety in the speeches, and more dullness. Among the Volunteers, diffidence is thrown to the winds, and any number of men are ready to jump up and make tedious speeches in which unmeasured laudation of somebody, or some body, is padded with hackneyed expressions and threadbare proverbs. Volunteers are seldom asked to subscribe a little money, or to attend a few drills, or to fire a few rounds, without being told to "put their shoulders to the wheel," or to "pull well together," or to act "on the spur of the moment," or something else equally new and appropriate; and the speakers seldom praise any class without calling them the back-bone of the army, or the volunteers, or the regiment, or at least the company. The army prizes, or used to prize, clearness and brevity in speeches; and trite expressions and musty old proverbs are especially objectionable when used by, or addressed to, soldiers, whether regulars, militia, or volunteers. They not only prolong speeches which, but for them, would be listened to with interest; but—and this is far worse—they enable people to talk who have absolutely nothing to tell us! If the suggestions we have offered were generally accepted, and if "the back-bone of the army" and many other high-sounding but almost unmeaning expressions were allowed to follow our old friends "the chain of responsibility" and "the channels of communication" into oblivion, speakers on military matters would be fewer, and their speeches would be better—because shorter.

H.R.H. the Field-Marshal Commanding-in-Chief will hold a Levée at 1 o'clock on Wednesday next, at the Horse Guards, Whitehall, the number being limited to 150. Applications to attend should be addressed to the Military Secretary.

The Military Secretary will not hold a Levée on Tuesday next.

Much needless anxiety and suspense must have been caused to the relatives of many soldiers who have been serving in Egypt, in consequence of lists of men who have died of cholera lately having been sent home without the regimental numbers being prefixed to the names.

When her Majesty is in England, the Royal command to table, which is rightly esteemed such a high honour by officers of her land and sea forces, is more freely issued than at the period of the Queen's Highland *villeggiatura*; and it may be added, that obedience is not attended with such inconvenience as must be involved in an excursion to Aberdeenshire. Sir G. Graham and Colonel Stockwell, who are on their way back to Egypt from leave, are to be congratulated on the distinction recently conferred on them by her Majesty, who is never more pleased than when she can show her favour towards her soldiers and sailors.

"In taking leave of the Division, General Sir Daniel Lysons wishes to thank the officers, non-commissioned officers, and soldiers for the cordial support he has invariably received from them during the time he has held the command at Aldershot." Such were the brief and soldier-like words of the veteran commander at Aldershot, in his farewell order of the day, on Tuesday; and many regrets were expressed that the Army should be prematurely deprived, at the present juncture, of the services of a General officer of such great and varied experience. In the Crimea, in September, 1854, when Colonel of the 23rd Fusiliers, Sir Daniel had the honour of first opening fire on the enemy, immediately after landing, and succeeded, with two companies of his regiment, in capturing a valuable convoy, which was just that kind of prize which the Army most needed. Sir Daniel is one of the "old school" of officers, whose retirement from active service is not regretted by the "advanced school" of red-hot reformers; and weeks ago the fiat, "You must go," was known to have gone forth. If to hold that the historic red should continue to be the colour of the British soldier's uniform, that the system is a ruinous one which periodically sweeps from our home regiments their best men to feed the linked battalions abroad, and that the feverish agitators who clamour for change are not entitled to credit, be among its doctrines, then Sir Daniel may be rated as one of the "old school;" but similar opinions are held by many much younger soldiers, and a pretty general belief exists that if the Army vivisectionists would for a time cease from their labours, great good to the service generally would shortly accrue.

General Conolly, whose recent personal inspection of the cemeteries in the Crimea, where he served, as our Military readers know, on the staff of the Heavy Cavalry Brigade at Balaclava, &c., enabled him to speak with authority to the War Office respecting their actual condition, and the best measures to adopt for the decent preservation of the graves of so many brave officers and men, is about to leave England again on another excursion to Sebastopol.

In our last number, in reply to an inquiry from "Under Orders," we stated that the pay of financial officers serving in India was, on appointment, 476 rupees a month, and after five years' service, 506 rupees a month. "Under Orders" has again asked, "What is the pay of a Paymaster after five years' service, with the rank of Major?" As before stated, it is 506 rupees a month—at present. The expression "at present" we use advisedly, the fact being that the question of giving increased allowances to Paymasters with the honorary rank of Major serving in India is under the consideration of the authorities. It is only during the last few months that this rank has been accorded to Paymasters serving on English pay and allowances. And we cannot doubt that when it is remembered that all officers on Indian pay and allowances, whether junior Majors in regiments, or officers in departments, with the relative rank of Major, draw the allowances of that rank, the authorities will grant the same to officers of the Pay Department of similar rank.

Further experimental trials, under the supervision of Major G. W. Hawkins, R.A., have been made during the week at Aldershot by the division of the mountain mule battery of 7-pounders, attached to H Battery, 4th Brigade, Royal Artillery. The experiments have hitherto been mainly directed to test the durability of the carriages and equipment, and the rapidity of putting the gun together and opening fire. Excellent results have been attained so far.

Interesting experimental exercises have been carried out by C Troop, R.E. Train, at Aldershot, during the week. This is a telegraph troop, and under the command of Lieutenant-Colonel Sir Arthur Mackworth, Bart., it left the camp on Monday last at 8.45 a.m., followed by an imaginary division on the march to Elvetham, and laid ten miles of cable in two hours and fifty minutes, communications being kept up with the base throughout. Afterwards this cable was speedily made an overhead line, and the troop was exercised in visual and electric telegraphy. On Tuesday similar operations were carried out, but in the direction of Farnham. On both days rations were taken out and cooked in the open. This telegraph and signalling troop is in a high state of efficiency, and ready to take the field at the shortest notice.

The "Dress Committee" have made a preliminary report on the subject of the active-service dress for the British soldier of all branches. The question of colour has been carefully avoided in this report, and the Committee have evidently taken great pains to produce something original; but this subject has been so well threshed out by other Committees, that really little scope is left for originality. We believe that, notwithstanding the suggestions contained in this valuable report, the British soldier will continue to wear his present dress and equipment. Several members of the Committee do not concur in the opinion of the majority in a few unimportant matters; but, notwithstanding this, the Committee are practically unanimous. Should their labours have no result, it will not be the fault of Colonel R. Harrison, the President.

Mr. John Morley will, on Monday, ask the First Lord of the Treasury, having regard to his declaration on August 10, 1882, in respect of an imputed design of occupying Egypt for an indefinite time, that "undoubtedly, of all things in the world, that is a thing we are not going to do," and, considering the expectation of the Secretary of State for War, expressed this spring, that six months "represented with probable accuracy the length of time that it may be necessary to keep our troops in Egypt, whether the intentions thus expressed have been communicated to the other Powers of Europe. And, whether any circumstances have occurred to lead her Majesty's Government to change these intentions; and, if not, whether he will now, or before the Recess, inform the House of the steps that the Government purpose to take, in order to give effect to their various pledges to Parliament and foreign Powers in this matter.

Lieutenant R. Cutlar-Fergusson (at present in Egypt) will be second Aide-de-Camp, and Major A. C. F. FitzGeorge, 11th Hussars, extra Aide-de-Camp, to Lieutenant-General Sir Archibald Alison, Bart., K.C.B., commanding the Aldershot Division.

Colonel R. Hay, R.A., at present a member of the Ordnance Select Committee, will succeed Major-General Sir Charles Arbuthnot, K.C.B., R.A., as Deputy-Adjutant-General of Artillery at the Horse Guards, on that officer succeeding Major-General Radcliffe as Inspector-General of Artillery on September 1 next.

We believe the War Office have decided on giving an extra annuity of £300 a year to General Sir Daniel Lysons, K.C.B., as compensation to that officer on being deprived of his command at Aldershot.

The continued decrease in the numbers of the Royal Regiment of Artillery seems to excite neither comment in Parliament nor uneasiness in the War Office. A deficiency of close on 1,900 men in a regiment of 30,000, however, is alarming, to all who have the interest of the service at heart.

Glanders, of a most virulent type, we regret to hear, has broken out among the horses of the 3rd Hussars at Aldershot, and this corps, with P Battery, 2nd Brigade, R.A., which occupied the same barracks, were placed under canvas on Sunday morning last. The vacated barracks have been thoroughly disinfected, and the most strenuous endeavours are being made to suppress the outbreak. It has been found necessary to shoot a number of horses, among them several officers' chargers. This corps and battery were, on this account, ordered not to attend the Divisional parade on Monday last.

The utmost precautions are being taken at Aldershot just now because of the outbreak of various diseases, and Divisional Orders have been published on the subject. It seems strange that within 300 yards of the Cambridge Hospital, several horses suffering from glanders should have been slaughtered during the present week, and their carcases buried where they fell. The Sanitary Officer of the Camp apparently knew nothing whatever about it

An early gazette will, we believe, promote Colonel Sir Andrew Clarke, K.C.M.G., R.E., to a Major-General on the Active List. The Treasury, as it may be supposed, have offered no objection to an alteration in the Royal Warrant to facilitate this step.

It is believed that the vacancy on the Ordnance Select Committee to be caused by Colonel R. Hay will be filled by Colonel H. Fraser, R.A., whose experience in the manufacturing establishments is, perhaps, unequalled. The appointment has always been held by a Colonel.

To-morrow will be the first anniversary of Sir A. Alison's reconnaissance of Kafr Dawar from Ramleh. A correspondent, who has good means of knowing the facts, states that the opinion of the Egyptian officers in command of Arabi's forces is unanimous that if the advance of our men had been pushed home, the works would have been carried, and the whole Egyptian Army would have been put to headlong rout. He says the Chief of Arabi's Staff and several of the Generals and Colonels declare the men were retreating at the moment the reconnaissance was ordered to fall back, and that they then took heart, and returned to harass the retiring columns. But Sir A. Alison had no object beyond feeling the enemy, and he would not have been justified in advancing, nor could he have gone far in pursuit. If Arabi's force had broken up at Kafr Dawar, the consequences might have been serious to those who were so well rewarded for subsequent operations.

When we compare the rank, experience, and special fitness of the officers appointed to represent the different States at the forthcoming Manœuvres abroad, we are not struck with the wisdom or "appropriateness" of the selections made in all cases by our own authorities. The Cavalry Manœuvres in France, for example, are to be attended by Colonel Villiers, the Military Attaché at Paris, to whom General Gallifet will probably explain the operations, as his gallant friend "never set a squadron in the field, nor the division of a battle knows." He is a Guardsman, acquainted, indeed, with Courts and with quarters in capitals, but without any fitness to report on cavalry tactical movements. His most remarkable service, out of Indian Staff service in peace time, was civil work in Zululand after the war was over; but he has seen a great deal of the world, is a good linguist, and has fair capacity, and with the help of those around him he may prepare a French report on the Cavalry Manœuvres.

The Navy.

ADMIRALTY, July 28, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 1, 1881, Surgeon Maurice Murray Ritchie Mackenzie has been placed on the Retired List of his rank from the 6th inst.

ADMIRALTY, July 31, 1883.

In accordance with the provisions of her Majesty's Order in Council of April 30, 1877, Engineer Soper Thomas Sugden has this day been placed on the Retired List of his rank.

ADMIRALTY, August 2, 1883.

In accordance with the provisions of her Majesty's Order in Council of February 22, 1870, Chaplain and Naval Instructor the Reverend John Harvey Knapp, M.A., has this day been placed on the Retired List.

APPOINTMENTS.

Commander—H. F. Crohan, to the Hector, for the Coastguard at Bognor, vice Pilkington.

Lieutenants—Frederick V. Isaac, to the Penelope, vice Giffard; Herbert M. Wyatt, to the Alexandra, additional; Arthur Y. Moggridge, to the Malabar, complement incomplete; William J. Auton, to the Malabar, vice Henriques; Harry C. Martin, to the Pembroke, vice Paget; Horace J. M. Pugh, to the Belleisle, additional, for service in the Coastguard; John L. Lory, to the Stork, vice Leeke, deceased; Richard A. Gwynne, to the Serapis, complement incomplete; E. Rae, to the Asia, vice Garde.

Sub-Lieutenants—Gerald C. A. Marescaux, to the Sparrowhawk, vice Smyth; E. P. Leresche, to the Decoy, vice Maud; Vernon Maud, to the Carysfort.

Naval Cadets—Edward Kelly, to the Boadicea, additional; Sidney B. Hinshelwood, to the Sultan, complement incomplete.

Chaplains—Rev. A. H. Crick, M.A., to the Defence; Rev. W. R. Gilbert, M.A., to the Valiant.

Chaplains and Naval Instructors—Rev. F. C. Autridge, M.A., to Devonport Yard, vice J. H. Knapp, retired; Rev. J. C. Cox-Edwards, M.A., to the Impregnable, yice F. C. Autridge; Rev. A. Nicolls, B.A., to the Ganges.

Fleet Surgeons—Simon A. Willis, M.D., to the Castor, vice Baird; Godfrey Goodman, to Sheerness Dockyard, vice Willis.

Staff Surgeon—William B. Fletcher, to the Euphrates, vice Goodman.

Surgeons—Robert W. Anderson, to the Stork, vice Anderson, deceased; Everard H. Saunders, to Devonport Yard, vice Fletcher; James W. H. Hawton, to the Minotaur, vice Saunders; Charles W. Hamilton, to Plymouth Hospital, vice Hawton; B. S. Mends and T. J. Crowley, to the Duke of Wellington, additional, for disposal; A. Kees, to the Pembroke, additional, for disposal; D. Lennox, to the Lord Warden; B. C. E. F. Gunn, to the Asia, additional, for disposal; J. E. Penn and R. H. Nicholson, to the Royal Adelaide, additional, for service at Plymouth Hospital; P. B. Bury, to the Hector; J. N. Seymour, to the Impregnable, additional, for disposal; J. L. Barrington and J. Sugrue, to the Cambridge, additional, for disposal; Standish T. O'Grady, to Bermuda Hospital, vice Rae; John O'Callaghan, to Plymouth Hospital, vice O'Grady; Henry T. Cox, to the Cambridge, vice O'Callaghan.

Paymasters—J. J. Hayward, to the Asia, additional, for the Crocodile; J. H. Wallis, to the Malabar.

Assistant-Paymasters — William S. Andrews, to the Stork, vice Gordon; George V. Rashleigh, to the Impregnable, vice Andrews.

Engineers—William Cook, to the Victoria and Albert, vice Allen; Edward L. Carte, to the Dwarf, vice Cook; Samuel J. Follett, to the Waterwitch, vice Couper; G. H. Cooke, to the Asia, additional, for the Handy; C. M. B. Dyer, to the Asia, additional, for the Cyclops.

Assistant-Engineer—George A. Haggarty, to the Northampton, vice Bolland.

Carpenters—W. A. B. Wright, to the Indus, additional, for the Iron Duke; George Read, to the Defence, vice Maben.

Gunner—James Hills, to the Invincible, vice Higgins.

Boatswains—Frederick H. Davis, to the Repulse, vice Bride; Michael Kennelly, to the Penelope, vice Owens.

COASTGUARD.

Chief Boatman—William J. Brady, Lerwick, to be chief boatman-in-charge, Burghead.

ALEXANDRA, Capt. H. H. Rawson, C.B., flagship of Vice-Admiral the Lord John Hay, K.C.B., was at Corfu on July 29, and would leave on July 30 for further cruise with the quadron.

BOADICEA, Capt. Church, flagship of Rear-Admiral Noel Salmon, V.C., has left Cape Town on a cruise up the East Coast. The Opal arrived at Cape Coast Castle on July 2, and found the Flirt, Algerine, and Alecto at the anchorage. The Algerine would leave at once to relieve the Stork at St. Paul de Loanda. The Flirt would remain as senior officer's ship; the Opal proceeding to visit the ports along the coast southward, and returning the end of September. The Alecto was ordered to visit ports between Cape Coast Castle and Lagos. The Bullfrog, on return from St. Helena, will remain on Bights Division.

BULLFROG, Lieut. and Com. Papillon, left Ascension for the West Coast of Africa on June 27.

CANADA, Capt. Durrant, will leave Halifax on Aug. 15 for St. John's, Newfoundland, and after remaining there a few days will proceed to Quebec. The Canada arrived at Halifax on Aug. 1.

CONSTANCE, Capt. F. P. Doughty, was at Guayaquil on June 28, all well. A correspondent writes:—"We are still at this out-of-the-way place. No signs of peace yet. The captains of the English, French, and Italian men-of-war have been trying to induce them to come to peaceable terms (having been over to the enemy's camp three or four times), but have so far been unsuccessful. The self-elected President here thinks the town sufficiently fortified to keep the rebels out, and will fight to the last. The rebels, to the number of 5,000, are within rifle-shot distance of the town. We threw our ship open as neutral ground, and the heads of both parties came on board, to see if they could arrange terms of peace. But it was no good; they broke up, went ashore, and on the same night had a terrific engagement. We watched its progress from our ship in the early hours of the morning, and it was a grand sight, save the thought of the desolation and loss of life it was creating. No one is allowed ashore after dark, and in order to give the crew a run ashore, we leave here to-morrow for Payta, about 200 miles further south. It contains about five houses and 30 residents, but the houses are all grog-shops. The compositions sold out here as brandy and whiskey are simply maddening, as many of our crew, as well as the foreigners, have found, to their cost. As a consequence of the war, everything here is terribly dear. The bread is quite sour, and we cannot eat it a day after it is baked. A good, hot, English loaf would be a treat; it would deserve to be decorated before being placed on the table. We have received orders to be at Honolulu in September, to meet the Swiftsure, proceeding from thence to Esquimalt, a trip which will take about two months."

DEFENCE, Capt. Pollard, is ordered to leave Plymouth for Rock Ferry as soon as her defects have been made good.

DIAMOND, Capt. Dale, was at Sydney, N.S.W., on July 30. The Commodore was expected early in August.

FIREFLY, Lieut. and Com. E. G. F. Law, paying off at Devonport, has been surveyed by order of the Admiralty, and a full report made of the damage she sustained when in collision with the Brazilian Steam Navigation Company's mail steamer Rio Negro, on the night of April 27, when the Firefly was lying at anchor in Monte Video harbour. As darkness set in, the usual riding lights were put in position. The Rio Negro, while working out of harbour, struck the Firefly on the starboard bow, starting the fittings of the fore compartment, carrying away jibboom and head-gear. Lieut. F. H. Eagles, who was in charge at the time, at once piped "Clear lower deck," and every man was at his station in a minute. After the ship had been examined to see the injury she had sustained, and when it was found she was not making water, search was made for the steamer which struck her. The Rio Negro was steaming out to sea, having made no inquiry as to whether the Firefly was injured or not. Lieut. Eagles at once ordered a gig to be manned, and in her pulled after the vessel. After a chase of over two miles he overhauled her, ascertained her name, and was referred to the company's agents at Monte Video. The company subsequently agreed to make good the damages, which were temporarily repaired at Monte Video by the carpenter's crew of the ship. It is to estimate the amount due from the Brazilian company that the survey is now ordered to be held. Capt. Carter, of the Royal Adelaide, who inspected the Firefly on Thursday, expressed to Lieut.-Com. Law his high appreciation of the efficiency of the ship's company, and the excellent appearance of the vessel.

HERCULES, Capt. Heneage, left Portsmouth on Saturday for Portland.

HEROINE, Capt. Blackburne, has put into Astoria for coal and supplies.

HUMBER, Com. Cæsar H. Hawkins, arrived at Sheerness on Thursday morning for repairs, and to await orders from the Director of Transports.

LORD WARDEN, Capt. Kennedy, left Spithead for Queensferry on Saturday.

MERLIN, Lieut. and Com. Brenton, arrived at St. Vincent, Cape de Verdes, on July 28, and would leave at once for the Cape of Good Hope.

MIRANDA. Com. W. G. Acland, with the new crew for this vessel, arrived at Capetown in the sailing transport Windsor Castle on Aug. 1, and would leave on Aug. 4 for Sydney, New South Wales.

NORTHAMPTON, Capt. Digby, flagship of Vice-Admiral Sir John Commerell, V.C., Commanding-in-Chief on the North America and West Indies station, was at Halifax on July 28. The Mallard arrived at Carleton on June 22, and remains. The Tenedos, Flamingo, and Foam were on the coast of Newfoundland for fishery duties on July 20. The Dido was at Bermuda on June 19, and would join the flag on completion of refit. The Garnet was at Antigua on June 10.

PENELOPE, Capt. D'Arcy Irvine, C.B., left Sheerness for Harwich on the 28th ult.

REPULSE, Capt. G. L. Sulivan, anchored at the Nore on Tuesday night, and an interesting course of signalling operations between Sheerness Garrison Point Fort with the electric light were kept up for several hours with remarkable success. The Repulse went into Sheerness Harbour on Wednesday morning, to await orders. It is not known whether her defects will be made good by the mechanics of Sheerness Dockyard or Chatham.

SHANNON, Capt. Adeane, C.M.G., left Plymouth on Wednesday for Greenock.

SWIFTSURE, Capt. Aitcheson, flagship of Rear-Admiral McL. Lyons, Commanding-in-Chief on the Pacific station, was at Esquimault on July 5. The Comus was at Payta up to June 26; the Commander-in-Chief left in the Mutine to visit Port Moody on June 18, and returned on June 27; the Comus arrived at Payta on June 17; would shortly visit Guayaquil, and on relief by the Satellite would leave for England; the Heroine and Sappho are on passage to Esquimault; the Mutine would leave Esquimalt for Coquimbo about the middle of July; the Kingfisher was at Tahiti on May 18; would proceed to Coquimbo, calling at Pitcairn Island *en route*; the Constance was at Guayaquil on June 25; would proceed to Payta on arrival of the Comus.

VALIANT, Capt. Poland, was to leave Plymouth on Wednesday for the River Shannon.

WOODLARK, Com. Nesham, was at Bushire on June 21, and was about to proceed to Bahrein. The Arab was at Karachi on June 8, and was expected at Jask on June 26, and would remain between Jask and Muscat. The Philomel was at Muscat on June 10, and has since left for Jask, where she will remain till relieved by the Arab. She will then relieve the Woodlark, on the Northern Division.

THE CHANNEL SQUADRON.

(FROM OUR CORRESPONDENT.)

Berehaven, Bantry Bay, August 1, 1883.

The torpedo operations have been continued throughout the last week, and are now drawing to a close. Last Wednesday, the 25th, was spent in getting the electro-contact mines ready, each ship preparing a line of six. On Thursday they were laid down; a line of six observation mines was also laid by the flagship, which included two of 500 lb. of gun-cotton, each, which were actually to be exploded. These were laid near the line of extempore mines which were still down, having been left since the previous Monday. All the mines, except these two, were fitted with blowing charges, as before. On Friday forenoon the Sultan weighed and stood out through the eastern passage. As she approached the mine-field, the two 500-lb. mines were exploded. They sent up an immense volume of water. It was a very fine sight, and one was able to realise the effect they would have had on a ship passing over them. The Sultan then passed on through the lines of contact mines, turned, repassed them, and returned and anchored in her former position. In passing, she bumped several mines, which exploded successfully, the explosions taking place, as before, on shore, where discs of gun-cotton were connected. The other mines were afterwards bumped by steam pinnaces; the whole proceedings were quite successful. In the afternoon the mines were all weighed. On Saturday all the extempore and other mines which had been damaged by the explosion of the 500-lb. mines were taken alongside the flagship for inspection, and were afterwards sunk and exploded. On Monday each ship prepared a launch for countermining with twelve 500-lb. mines, and yesterday the countermining operations were carried out. The Neptune got under weigh at 9 o'clock, and steamed down to the eastern entrance, where the launches were assembled, each in tow of a steam pinnace. The boats were organised in three divisions, those of the Minotaur and Agincourt forming the first, Achilles and Neptune the second, and Sultan and Northumberland the third. The Neptune turned and stood towards the anchorage, representing the leading ship of an attacking squadron; when she reached the limit of the supposed mines, she made a signal to the 1st division to proceed and clear the passage. The 1st division went ahead, dropped their mines and fired them, and the Neptune stood on along the passage thus cleared. She then made the same signal to the 2nd and 3rd divisions in succession, and proceeded towards the anchorage, as they cleared the passage. It was all very successfully carried out, the mines were all fitted with blowing charges, and the effect of the explosions of the double lines, with the Neptune steaming up the centre of the passage, was very fine. The afternoon was devoted to weighing the mines and returning stores to the Hecla. Last evening there was a night attack on the Squadron by torpedo boats, six boats belonging to the Hecla, manned by the officers and men from the different ships who had been exercising in them, and under the orders of Capt. Fellowes, went away in the afternoon and proceeded up to Glengariff. At 10 o'clock the ships went to general quarters and manned and armed ship, keeping a look-out for the torpedo boats, with small-arm men all round the hammock nettings, and electric lights searching the surrounding water. The attack took place between 10.30 and 11, and as the boats came in sight of the different ships they were received with a rattling fire of blank charges. It must have been meant as practice more for those in the boats than those on board, as had a regular attack been expected, more effectual means would have been employed to repel it than mere small-arm fire. The Redwing went round to Queenstown for money to pay the men, and returned on Monday. The Seahorse came in on Sunday with supernumeraries, and left the next day for Plymouth and Portsmouth, taking a few hospital cases. On Monday evening, a very entertaining dramatic performance was given on board the Minotaur. It opened with the very amusing farce, "In Possession." Mr. Kappey was "Kappetal" as Simon Blobber, and Mr. Mure was so charming a lady's-maid, that one's regret was that the part was so short. The musical version of "Cox and Box," by Sullivan and Burnand, was afterwards performed by Messrs. Hopkins, Johnstone, and Parker, in a manner which reflected the greatest credit not only on their musical and dramatic talent, but also on the great amount of trouble they must have taken to ensure its going as smoothly as it did. It is needless to say that both pieces were loudly applauded.

The Admiralty, by Fleet Circular No. 22 G, direct that Art. 51, p. 25, of Addenda to the Queen's Regulations and Admiralty Instructions, 1880, is to be considered as cancelled, as well as the other articles referred to in Fleet Circular No. 11 G, of March 28, 1883. 2. In future, blank returns on Army Forms G 872 and G 925 are not to be rendered by vessels having no guns on board. The following paragraph is therefore to be substituted for paragraph 2, Article 812, of Queen's Regulations, as amended by the above circular, viz.:—"2. The returns are to be forwarded, even though there may have been no practice; but W.O. Form 1,475 is not required from ships that have no smooth-bore guns on board, and blank returns need not be rendered by vessels which have no guns on board."

H.M.S. Canada is, we are told, not the bed of roses she was supposed to be prior to her leaving England. The men complain most bitterly about her, not only as regards her sea-going capabilities, but likewise of the internal arrangements. This is much to be deplored; but it may be that "Jack" was under the impression that because he was to be the shipmate of Prince George of Wales he would find himself clear of avoidable annoyance. It would be far better if his Royal Highness had been allowed to go to sea under the same circumstances as did his great-uncle, his late Majesty King William IV., who knew what it was to swing in a hammock, and not to be tied to the apron-strings of a parson, and have a swinging-bed in a private cabin to repose in; then, perhaps, the ship's company might not growl at their inconveniences.—*Kentish Fire.*

REORGANISATION OF THE CONSTRUCTOR'S DEPARTMENT AT THE ADMIRALTY.

The scheme for reorganising the Constructor's Department of the Admiralty, already foreshadowed in these columns, has now been made public, and its leading features are as follows:—The vacancy in the Constructor's Department, caused by the retirement of Mr. W. H. White to accept an appointment in the firm of Sir W. Armstrong, Mitchell, and Co., will not be filled up. The work formerly performed by Mr. White will be distributed among the staff. Mr. Barnes, the present Surveyor of Dockyards and Chief Constructor at the Admiralty, will be relieved of the former part of his duties, which will be undertaken by Mr. Barnaby, the Director of Naval Construction. The whole of the Admiralty professional officers, including Mr. James Wright, the Engineer-in-Chief, will receive extra remuneration. Mr. Dunn, the assistant-constructor and chief draughtsman, Mr. Robinson, 2nd-class draughtsman at the Admiralty, and at present acting as Constructor at Bombay, and Mr. C. T. Glenn, one of the examiners of dockyard work, will be made constructors. The existing Admiralty draughtsmen are to be raised to the dignity of 1st-class assistant-constructors at the Admiralty, with salaries ranging from £300 to £450 a year. The 2nd and 3rd-class Admiralty draughtsmen will remain on their present footing, but their salaries will be raised, the former rising from £300 to £400, and the latter from £180 to £300. The maximum salaries of chief constructors and constructors employed at the Royal Dockyards are also to be increased in the case of the latter by £50 a year. The engineering department is also pecuniarily benefited by the scheme, and the officers belonging to the Admiralty and the dockyards will be made interchangeable. But the fundamental feature in the new regulations is the formation of an entirely new class of officials, to be designated assistant-constructors, who will gradually supersede the existing responsible foremen of the yard. With a few exceptions, the new grade will consist of the students who took high mathematical and professional honours at Kensington and Greenwich, without further qualification. Those obtaining a 1st-class certificate will become 2nd-class assistant-constructors; those obtaining a 2nd-class certificate will become 3rd-class assistant-constructors; while those who obtained a 3rd-class certificate, or who failed in taking honours, will become draughtsmen at the yards. The total number of assistant-constructors who will be distributed in the various dockyards is 37, viz., 10 1st-class, with salaries ranging from £250 to £300; 18 2nd-class, with salaries from £160 to £240; and 9 3rd-class, with salaries from £100 to £150. As the result of these changes, the foremen of the yard, who number at the present time about 53, will be reduced by 13. The reduction will be probably carried out by age retirement, by absorption into the ranks of the new grade, and by the abolition of the acting foremen. Some of the present foremen, although they passed the various high standards for draughtsmen and foremen at the dockyards, and though having practical charge of the ships under construction, yet not having graduated at either of the Colleges of Naval Architecture, will only be eligible for assistant-constructors by passing an additional qualification for the duties which they now perform.

ROYAL MARINE ARTILLERY.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Adverting to the remarks in your impression of the 21st ult. upon the result of the final examination of the probationary lieutenants for the Royal Marine Artillery being most unsatisfactory, I beg to make a few remarks showing the difference between the education imparted at the Royal Marine Academy, Woolwich, and that at the Royal Naval College, Greenwich. First,—At Woolwich the cadets are taught a subject and then finally examined in it, carrying the marks gained forward to their credit on passing out. At the Royal Naval College, the officers on probation for the Royal Marine Artillery are instructed in many subjects during two years, and at the end of that time they are required to pass a final examination in all they have learnt. They are tested periodically in all these subjects, but the marks gained at these periodical tests are not taken into account at the final examination. Again, when it is considered that there are final examinations in 18 subjects (nine of which are mathematical), the required per-centage, 63, in the total is very high. Without in the least altering the standard of knowledge required, the examination might be given in such a form as to render the probability of passing greater. The mathematical papers are sent into the examiners indiscriminately with those of the gunnery lieutenants, who are known to be some of the cleverest men in the Navy; the papers are, therefore, probably judged comparatively and from a very high standard. Finally, these with other causes, such as the theoretical character of the course, the large proportion of marks given to mathematical subjects, and the small number of marks given to attainments in modern languages, have undoubtedly been the causes of the large per-centage of failures to pass for the Royal Marine Artillery. This per-centage is so high that it points to the fact that there is some radical fault in the system of training for the corps.—I am, &c., S.

NAVAL EXAMINATIONS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I have just compared the marks obtained at the last examination for Naval cadetships with those of the previous June and November, and there is no doubt that arithmetic has proved fatal to very many. In June, 1882, 87 per cent. of the marks for arithmetic were obtained by the 24 successful candidates, and the first candidate who failed in that subject was number 48. In November last, 71 per cent. of the marks were obtained by the first 33, or 75 per cent. by the first 24. In the last examination, 61 per cent. were obtained by the first 31, or 64 per cent. by the first 24. Eight of the 31 successful candidates obtained the exact minimum required (125 marks), and five not more than 10 marks in excess of that number, so that the paper was very nearly fatal to 13 of the successful candidates. Amongst the unsuccessful candidates only eight qualified in the arithmetic papers, two just obtaining the necessary minimum. It is evident, I think, that the paper was too difficult as a qualifying subject for boys between the ages of 12½ and 13½. I do not write as an aggrieved parent or pedagogue to complain of any failure of a son or pupil at this last examination, but simply to call the attention of those interested to what is required of our future Nelsons. With regard to the other subjects, there is little to call for comment, the papers set being very fair tests. In Scripture barely 60 per cent. were obtained by the successful candidates, but very few failed in reaching the minimum (40 out of 100). In algebra, two obtained full marks.—I am, &c., A. W.

NAVAL INTERPRETERS.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—I was amused to read the following article in your paper of the 21st ult.:—"It is strange that Asiatic languages should have the preference among those officers who have qualified as interpreters in the Royal Navy, there being 72 Asiatic, comprising Hindostanee, Persian, Swahili, and Arabic, against only 26 European." The cause of this is very apparent. For European languages the extra pay for interpreter is only one shilling per diem, whereas the pay for interpreter in Asiatic languages is as follows:—

	Allowance moonshee.	Allowance per mensem.
Hindostanee......	180 Rupees	...... 50 Rupees
Persian............	180 "	...... 50 "
Arabic	180 "	...... 100 "
Swahili	180 "	...... 100 "

Now, the cost for making an officer proficient in a European language is so much—as it involves his going on the Continent—that very few officers can afford it, and until a larger allowance is given to the interpreters in European languages, Naval officers will always prefer studying these Asiatic languages which are practically useless to them and to the service, except while they are actually employed on the East Indies station. It is, indeed, very humiliating to know that only about five per cent. of the officers of the British Navy can make themselves understood in any other language than their own, whereas in other navies, more especially the French and German, most of the officers can talk English, to say nothing of other languages many of them have learnt besides. The Admiralty would do well, therefore, to encourage their officers to go in for that which would not only benefit the service considerably, but would be a valuable assistance to the officers themselves for the remainder of their lives.—I am, &c., R.N.

SPECTACLES *v.* BLINDNESS.—"One fourth of those suffering from dimness of sight or blindness can trace their calamity to the use of Spectacles indiscriminately purchased and unsuited to the sight. Mr. H. Laurance, F.S.S., Oculist Optician, 39 Old Bond Street, having made the adaptation of spectacles his especial and sole study for upwards of thirty years, personally adapts his improved lenses. Testimonials as to the success of Mr. Laurance's treatment have been received from Earl Lindsay, Sir George Henry Scott Douglas, Bart., Sir Graham Briggs, Bart., Sir Julius Benedict, F. D. Dixon Hartland, Esq., M.P., Lieutenant-General Macmullen, Brentwood, General Torrens, commanding Cork Division, Thomas Cook, Esq., the well-known Tourist Agent, &c. Pamphlet, "Spectacles: their Use and Abuse," post free. City Branches, 6 Poultry, Cheapside, and 22 enchurch Street, E.C.

BIRTH.

Scobie.—On the 28th ult., at The Coppice, Earley, Reading, the wife of Captain Mackay Scobie, of a son.

MARRIAGES.

Hannay—Dod.—On August 2, at St. Mary's Church, Great Western Road, by the Rev. James McKean, M.A., Hugh H. Hannay, Staff Commander, Royal Navy, H.M.S. Hector, to Kathleen, only child of Frederick T. Dod, 14 Belmont Crescent, Hillhead, Glasgow.

Holmes—Nixey.—On the 25th ult., at Upton Old Church, Slough, Lieutenant-Colonel P. R. Holmes, Royal Marine Light Infantry, to Clara Bernell, youngest daughter of the late W. G. Nixey, of Springfield, Slough, Bucks.

DEATHS.

Pepys.—On the 24th ult., Robert Edward Pepys, of Woodford, Essex, aged 64, second son of the late William Hasledine Pepys, F.R.S., of Earl's Terrace, Kensington.

Ross.—On June 29, at Alexandria, Egypt, Alexandrina, the dearly-beloved wife of Mr. John Ross, of Alexandria, aged 36.

This Club is for the use of Officers of the Army, Navy, Royal Marines, Militia, Yeomanry Cavalry, and Volunteers; also Lords-Lieutenant and Deputy-Lieutenants of the United Kingdom, and other Gentlemen who hold, or have held, her Majesty's Commission.

The Club House is most conveniently situated, and has excellent bed-room accommodation.

ANNUAL SUBSCRIPTION.

London Members	£7 7
Country Members	5 5
Colonial Members	2 2

At PRESENT, there is No ENTRANCE FEE.

W. O'B. ADAMS, Secretary.

YEOMANRY and UNITED SERVICES CLUB,

43 Albemarle Street, Piccadilly, London, W.

VICE-PRESIDENTS.

Field-Marshal the Right Hon. Lord Strathnairn, G.C.B., G.C.S.I., R.H.G.
General J. G., Lord Wolseley, G.C.B., G.C.M.G., Adjutant-General of the Forces.
General Sir Daniel Lysons, K.C.B., Commanding Aldershot Division.
Vice-Admiral Sir E. Commerell, K.C.B., V.C., R.N.
Major-Gen. J. H. F. Elkington, C.B., Deputy-Adjutant-General of the Auxiliary Forces.
Colonel W. Mussenden, Inspector Auxiliary Cavalry.
Sir T. Brassey.
Major Bowdler Bell, 8th Hussars, late Commandant of School of Auxiliary Cavalry.
Captain Hegan, 5th Dragoon Guards, Commanding School of Auxiliary Cavalry, Aldershot.
Colonel the Duke of Westminster, K.G., A.D.C., Commanding Cheshire Yeomanry Cavalry.
Colonel Viscount C. Eversley, A.D.C., Hants Yeomanry Cavalry.
Lieutenant-Colonel the Right Hon. the Earl of Clarendon, Commanding Herts Yeomanry Cavalry.
Major the Right Hon. the Earl of Kilmorey, Shropshire Yeomanry Cavalry.

This Club having been successfully established, under distinguished patronage, since the beginning of the present year, is now, for the first time, brought publicly to the notice of the Services in general.

The Club has been started with a view to its being useful to Officers of ALL branches of H.M.'s Forces; with this intent:—Lectures on Military subjects will periodically be given in the Club Drill Hall; also, arrangements have been made with competent Instructors, who give lessons in Cavalry and Infantry Drill, Fencing, Ambulance Duty, &c. This cannot fail to be of great advantage to Officers joining the Service.

Smoking Concerts are frequently held.

The Club premises include Dining, Reading, Smoking and Billiard Rooms; also several Bedrooms.

The Subscription is (for the present) only Three Guineas; when, however, the number of Members exceeds 500, an Entrance Fee of £5 will be added for those subsequently joining.

The Club being proprietary, no liability attaches to Members beyond payment of Annual Subscription.

Members joining during last quarter of any year are exempt from further subscription to end of year following.

There is also at Brighton a Club similarly established, and all Members of this Club are Honorary Members of the Brighton Club without further Subscription.

Officers serving or who have served in any branch of the Naval or Military Forces are eligible as Candidates.

For any further details, apply to the Secretary.

ASK FOR

LIEBIG COMPANY'S EXTRACT OF MEAT.

CAUTION.—Numerous inferior and low-priced substitutes being in the market, with misleading titles, labels, and portraits of the late Baron Liebig, purchasers must insist on having the Liebig **Company's** Extract of Meat.

N.B.—Genuine ONLY with fac-simile of Baron Liebig's Signature in Blue Ink across Label.

The only brand warranted genuine by Baron Liebig.

*** In use in most Households throughout the Kingdom.

Ask for the Liebig **COMPANY'S** Extract, and see that no other is substituted for it.

HOP BITTERS.

If you are a man of business or labourer, weakened by the strain of your duties, avoid stimulants, and take HOP BITTERS.

If you are a man of letters, toiling over your midnight work, to restore brain and nerve waste, take HOP BITTERS.

If you are suffering from over-eating or drinking, any indiscretion or dissipation, take HOP BITTERS.

If you are married or single, old or young, rich or poor, suffering from poor health, or languishing on a bed of sickness, take HOP BITTERS.

Whenever you feel that your system needs cleansing, toning, or stimulating, without intoxicating, one bottle of HOP BITTERS will do more good than £5 in all other medicines or doctor's visits.

Have you dyspepsia, kidney complaint, disease of the stomach, blood, liver, or nerves? You will be cured if you take HOP BITTERS.

If you have flatulency, rheumatism, or gout, or are simply ailing, are weak and low-spirited, try it! Ask your chemist or druggist for HOP BITTERS.

IT MAY SAVE YOUR LIFE. IT HAS SAVED HUNDRED

FOR SALE BY ALL CHEMISTS AND DRUGGISTS.

DR. J. COLLIS BROWNE'S CHLORODYNE.

ORIGINAL AND ONLY GENUINE.

From SYMES and Co., Pharmaceutical Chemists, Medical Hall, Simla, January 5, 1881.
To J. T. DAVENPORT, Esq.,
33 Great Russell Street, Bloomsbury, London.

Dear Sir,—We embrace this opportunity of congratulating you upon the wide-spread reputation this justly esteemed medicine, Dr. J. Collis Browne's Chlorodyne, has earned for itself, not only in Hindostan, but all over the East. As a remedy of general utility, we much question whether a better is imported into the country, and we shall be glad to hear of its finding a place in every Anglo-Indian home. The other brands, we are happy to say, are now relegated to the native bazaars, and, judging from their sale, we fancy their sojourn there will be but evanescent. We could multiply instances *ad infinitum* of the extraordinary efficacy of Dr. Collis Browne's Chlorodyne in Diarrhœa and Dysentery, Spasms, Cramps, Neuralgia, the Vomiting of Pregnancy, and as a general sedative, that have occurred under our personal observation during many years. In Choleraic Diarrhœa, and even in the more terrible forms of Cholera itself, we have witnessed its surprisingly controlling power. We have never used any other form of this medicine than Collis Browne's, from a firm conviction that it is decidedly the best, and also from a sense of duty we owe to the profession and the public, as we are of opinion that the substitution of any other than Collis Browne's is a deliberate breach of faith on the part of the chemist to prescriber and patient alike. We are, Sir, faithfully yours, SYMES and Co., Members of the Pharm. Society of Great Britain, His Excellency the Viceroy's Chemists.

DR. J. COLLIS BROWNE'S CHLORODYNE is a Liquid Medicine which assuages Pain of every kind, affords a calm, refreshing sleep without Headache, and invigorates the Nervous System when exhausted.

DR. J. COLLIS BROWNE'S CHLORODYNE.
Dr. J. C. BROWNE (late Army Medical Staff), discovered a remedy to denote which he coined the word CHLORODYNE.

The General Board of Health, London, report that it acts as a charm, one dose generally sufficient.

Dr. Gibbon, Army Medical Staff, Calcutta, states:—"Two doses completely cured me of Diarrhœa."

DR. J. COLLIS BROWNE'S CHLORODYNE rapidly cuts short all attacks of

COUGHS, ASTHMA, COLDS,
BRONCHITIS,
EPILEPSY, SPASMS, COLIC,
PALPITATION, HYSTERIA, and is the true Palliative in
NEURALGIA, GOUT, CANCER,
TOOTHACHE, RHEUMATISM.
GREAT SPECIFIC for
DIARRHŒA,
CHOLERA, DYSENTERY.

IMPORTANT CAUTION.
The immense sale of this remedy has given rise to many unscrupulous imitations.

N.B.—Every bottle of genuine Chlorodyne bears on the Government stamp the name of the inventor,

DR. J. COLLIS BROWNE.

Sold in Bottles, 1s 1½d, 2s 9d, 4s 6d, by all Chemists.

Sole Manufacturer,
J. T. DAVENPORT,
33 Great Russell Street, W.C.

IN CONSEQUENCE OF IMITATIONS OF

LEA AND PERRINS' SAUCE,

Which are calculated to deceive the Public,

LEA and PERRINS beg to draw attention to the fact that each Bottle of the Original and Genuine

WORCESTERSHIRE SAUCE

Bears their Autograph Signature,

LEA and PERRINS'.

*** Sold Wholesale by the Proprietors, Worcester; CROSSE and BLACKWELL, London; and Export Oilmen generally. Retail by dealers in Sauces throughout the world.

6d, 1/0, 2/6, KEATING'S POWDER

Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.
Nothing to Equal It.

This Powder, so celebrated, is perfectly unrivalled in destroying BUGS, FLEAS, MOTHS, BEETLES, and all Insects (whilst perfectly harmless to all animal life). All Woollens and Furs should be well sprinkled with the Powder before placing away. It is invaluable to take to the Seaside. To avoid disappointment, insist upon having

"KEATING'S POWDER."

No other Powder is effectual. Sold only in tins, 6d, 1s, and 2s 6d. Beware of Imitations. Don't be deceived.

CRIMEAN MEMORIAL CHURCH, CONSTANTINOPLE.

Most Englishmen are probably aware that after the close of the Russian War in 1856, a Church was built at Constantinople by public subscription, in memory both of the great struggle in which our nation had been engaged, and of the many Christians, our countrymen, who had lost their lives in its cause. At a public meeting held in London, April 28, 1856, H.R.H. the Duke of Cambridge in the chair, it was resolved "That the most suitable memorial would be an edifice in which Almighty God might, from generation to generation, be worshipped according to the rites and usages of the Church of England, and that such a Memorial Church be erected at Constantinople." The Church was built, and vested in the SOCIETY for the PROPAGATION of the GOSPEL in FOREIGN PARTS, who in 1856 sent to Constantinople the Rev. C. G. Curtis, M.A., who has acted as Chaplain up to the present time. The cost of erecting a handsome church in a place so peculiarly situated as Constantinople was necessarily great, and no endowment could be provided even for needful repairs.

An APPEAL is therefore now made to the English nation, and especially to those two great services, the Army and the Navy, to assist in providing a capital sum of not less than £5,000, to be vested in the Incorporated Society for the Propagation of the Gospel in Foreign Parts, the interest to be applied to the maintenance in suitable repair of the fabric of this great National Memorial. This appeal has received the cordial support of H.R.H. the Commander-in-Chief and the Right Rev. the Chaplain-General.

Donations and Subscriptions will be received by the TREASURERS of the SOCIETY for the PROPAGATION of the GOSPEL in FOREIGN PARTS, 19 Delahay Street, S.W. Cheques should be crossed "Drummond's."

August, 1883. H. W. TUCKER, Secretary.

FARMS IN NEW ZEALAND.

FARMERS AND OTHERS
DESIRING TO ACQUIRE
"FREEHOLD FARMS" IN NEW ZEALAND,

Upon easy terms of deferred payment, are requested to apply for information, either personally or by letter, to the Secretary of the New Zealand Thames Valley Land Company (Limited), 79½ Gracechurch Street, London, E.C.

THE
CHAMBERLAIN LIGHT.

TO BE SEEN IN OPERATION AT
43 NEW BROAD STREET, E.C.

The Best, Cheapest, Safest, and Purest Light in Existence.

Extract from the Report of Professor H. HUTCHINSON, C.E., F.C.S., &c., on the Apparatus and Light:—

"The apparatus is very simple, uses pure material. The gas does not contain sulphur or sulphur compounds, nor naphthaline. Can be made without the least offensiveness in any house or mansion. Will travel any distance without deposit or condensation.

Hygienically the qualities of this light far surpass those of any other.

May be used as ordinary coal-gas for heating and cooking purposes.

It is the cheapest, brightest, and purest gas known."

Estimates given on application.

Swords, cloaks, belts, sashes, saddles, &c., for nearly every regiment in her Majesty's Service. Uniforms and apparel purchased.

HOLLOWAY'S PILLS.—This purifying and regulating Medicine should occasionally be had recourse to. These Pills are the best preventive of hoarseness, sore-throat, quinsey, pleurisy, and asthma, and are sure remedies for congestion, bronchitis, and inflammation. A moderate attention to the directions folded round each box will enable every invalid to take the Pills in the most advantageous manner; they will there be taught the proper doses, and the circumstances under which they must be increased or diminished. Holloway's Pills act as alteratives, aperients, and tonics. Even when these Pills have been taken as the last resource, the result has always been gratifying. Even when they fail to cure, they assuage the severity of the symptoms, and diminish the danger.

REDUCTION in TERMS. — Two or Three PUPILS of good ability and good social standing could probably be received at a REDUCTION of TERMS, to fill unexpected vacancies in a good School.—Apply in the first instance, by letter only, to "M. SANDHURST PRELIMINARY:—Fifteen out of Twenty-three this year.

MILITIA MILITARY:— Messrs. JAMES and LYNCH have passed thirty-six under the present regulations, viz.:—March, 1881, *FIRST, *25th, *59th; September, 1881, *8th, 16th, 21st, *23rd, *25th, *33rd; March, 1882, *FIRST, 4th, 12th, 14th, *19th, 28th, *30th, and three Cavalry commissions; September, 1882, *FIRST, 2nd, 8th, 10th, *14th, *19th, *20th, 25th, 27th, 28th, 30th, 33rd, *36th, and one (42nd) Cavalry commission; March, 1883, *4th, 10th, 28th—the 4th passed his first trial after only 16 weeks' reading.

(Those marked * passed first attempt.)

MILITIA LITERARY:—Twelve out of thirteen in 1881, ALL in 1882; March, 1883, ALL, viz., 16th, 20th, 22nd.

STAFF COLLEGE:—1881: FIRST, 4th, 16th. 1882: FIRST, 7th, 10th, 15th, 22nd, 23rd, 26th.

PROMOTION EXAMINATION:— Messrs. JAMES and LYNCH have passed 178 officers for promotion. Only three have failed.

ASHFORD SCHOOL, KENT. HEAD MASTER—E. C. MUSSON, M.A., F.G.S., formerly Scholar and Prizeman of Queen's College, Cambridge.

Pupils can receive thorough Preparation for Woolwich, Sandhurst, &c., with Public-School training. Terms very moderate, and strictly inclusive. References permitted to Colonel Sir T. D. Baker, K.C.B., Colonel R. B. H. Blundell, Assist.-Adjt.-Gen., &c.

ARMY EXAMINATIONS.—Dr. KAIM and H. ZOBEL, assisted by the Rev. W. FULFORD, M.A., and Colonel COATES, late 99th Regiment, PREPARE CANDIDATES for Woolwich and Sandhurst. Also, in separate Classes, LIEUTENANTS of MILITIA for the Military Competitive Examinations, and Officers for admission to the Staff College.

Colonel Coates's private pupil, Lieutenant Hill, Cheshire Regiment, passed Sixth at the March Examination.

References will be given to Officers of very high position in the Service.

For particulars, apply to H. ZOBEL, Poulton House, Hampton.

MILITARY EXAMINATIONS.— Lieutenant-Colonel G. M. CARDEW (passed 2nd from the Staff College), PREPARES SIX LIEUTENANTS of MILITIA for MILITARY COMPETITIVE, also Officers for Promotion and other Military Examinations.—14 Observatory Avenue, Kensington, three minutes from the High-Street Station.

MR. ST. JOHN BOULTBEE, the Priory, Croydon (late Captain Massie and Boultbee), assisted by a Staff of Graduates of the Universities of Oxford and Cambridge, RECEIVES a Limited Number of PUPILS to Prepare for the Competitive Examinations for Sandhurst, Woolwich, and for the Militia. The number of Pupils is limited to 12. Five pupils out of six were successful at the last Sandhurst Examination (July, 1882). One candidate sent up for Woolwich Final Examination, and successful (June, 1883). Three successful Candidates for Sandhurst recent Examination, (July, 1883).—Terms, references, and other information sent on application.

ARMY and MILITIA.

Officers of the Army prepared for promotion. Officers of the Militia for the Military Competitive Examinations at

THE ABBEY, ABINGDON, BERKSHIRE.

The Abbey is situated on the Thames, about six miles from Oxford, and five minutes' walk from the Abingdon Station, G.W.R.

Work is carried on throughout the year. Students CAN JOIN AT ANY TIME.

A "Special Course" of twelve weeks precedes each Examination. ONE-THIRD of the Competitors prepared at the Abbey obtained Commissions in 1881-82-83. Of these more than ONE-FOURTH HAVE BEEN SPECIALLY MENTIONED BY THE EXAMINERS IN THE OFFICIAL REPORTS FOR EXCELLENCY IN EITHER MILITARY LAW OR TACTICS.

The number of Students is limited. Further particulars on application.

KING EDWARD VI.'s SCHOOL, BERKHAMSTED, HERTS., 28 miles from Euston.—Twenty-seven School Scholarships. Four Exhibitions from the School. Laboratory, heated Swimming Bath, &c.—Address Rev. E. BARTRUM, Head Master.

NAVAL CADETS, ASSISTANT CLERKS

HOPE HOUSE SCHOOL, SOUTHSEA.

Principals { Mr. T. H. VICKERY.
Mr. EDWARD M. BEWLAY, B.A., Univ. Coll., Lond.

In addition to the general course of study pursued at this long-established School, Pupils are specially prepared for the Examination required for the above.

At the late Competitive Examination in June for Assistant-Clerkships in the Royal Navy, TWO of the Five successful Competitors were Pupils of this Establishment, taking First and Third places. In June, 1882, of the five who passed, the First, Third, and Fourth were from this School, and Three qualified.

MILITARY EDUCATION, GERMANY. —Colonel BERDOE WILKINSON, late R.E., formerly in charge of the Ordnance Survey in Ireland, and Lieutenant-Colonel WILKINSON SHAW, M.A. (Staff College), late Garrison-Instructor at Aldershot, prepare Candidates for Sandhurst and Woolwich, and for Line Commissions through the Militia.

At the last Militia Competition, which took place on March 8, for which 31 Commissions in the Line have been awarded, the under-mentioned officers passed from this Establishment, out of 18 sent up:—

Lieutenant	E. G. Wynyard...	8th
"	H. J. Morphy ...	11th
"	I. H. W. Southey	13th
"	N. G. Woodyatt	15th
"	J. H. Heycock ...	16th
"	D. S. A. Cosby ...	22nd
"	F. K. O. Peile ...	26th

This completes a total of 32 commissions secured by Colonel WILKINSON and Lieutenant-Colonel SHAW at the last four Military Competitive Examinations, the total number sent up for these competitions being 76. The names of the successful pupils have already been published.

Also, at the recent Literary Examination for Militia Officers held in April, Lieutenant Lord Skelmersdale took FIRST place on the list.

The results obtained at the last SANDHURST EXAMINATIONS have added to the general score, which amounts altogether to SIXTY-ONE SUCCESSES, achieved by pupils during the past 18 months.—Address, DARMSTADT, GERMANY.

SANDHURST, WOOLWICH, C. S., MILITIA, PRELIMINARY, &c.—CAREFUL PREPARATION for any of the above. Upwards of 130 successes during the past four years. Highest places in lists, Nos. 5, 8, 9, 15, 18, 29, 34, 37, 38, 52, 61, 63, &c. More Preliminary successes in February and March, 1883.

For full particulars, terms, references, &c., address, Rev. A. PRITCHARD, Hill Lands, Wargrave, Henley-on-Thames.

MILITARY COMPETITIVE for MILITIA OFFICERS.—Special Course, in charge of Colonel STORY, late South Lancashire Regiment. 8 years' experience as Garrison Instructor. In 1882-83, with a total of Twenty-four Candidates, Six were successful, an average of one in four.

Address, Rev. A. PRITCHARD, Wargrave, Henley-on-Thames.

LIEUTENANTS of MILITIA desirous of competing for Line Commissions can be received by the Rev. WALTER BAKER, M.A., at Batcombe Rectory, Evercreech, Bath. They will be thoroughly prepared in all Military Subjects by Major Dickens (late 11th Foot), Staff-College Graduate, formerly Assistant Royal Engineer, S.E. District, and Colonel Palmer, late R.A., formerly Instructor at the R.M.A., Woolwich, and two of whose pupils obtained special mention from the Examiners at the last September Examination.

Great individual attention is given, as few pupils are taken, and steady work is insisted on. Since the introduction of the Military Competitive, out of Forty-two Lieutenants of Militia sent up, Twenty-six have been successful, several taking high places in the list. There are opportunities for healthy country amusements and games, a cricket and football ground, lawn-tennis courts (grass and asphalte), a private billiard-room, &c., and in all other respects a liberal and gentleman's establishment is kept.

A Large Staff of Experienced Tutors, all resident, assist in preparing for the Qualifying Examinations, and for the Sandhurst and Woolwich Competitions.

References to parents of pupils successful at all Examinations, INCLUDING THE LAST SANDHURST AND RECENT MILITIA COMPETITIVE.

A Pamphlet, with full particulars, on application.

FRANCIS RAVENSCROFT, Manager.

March 31, 1880.

THE PARCELS POST.—THE PARCELS POST AND TEA.

THE PARCELS POST and the DELIVERY of TEA.

THE PARCELS POST and the DISTRIBUTION of TEA to every place where there is a Post-Office in the United Kingdom.

THE PARCELS POST.—TEA of the highest excellence (as supplied to Dukes, Earls, Barons, and the County Families of England), sent free by Parcels Post in quantities of 4 lb., 5 lb., and 6 lb., to any postal address in the United Kingdom, on receipt of a remittance for the price of the Tea and 3d.

THUS 4 lb. of TWO-SHILLING TEA can be sent to any address free, by post, on receipt of 8s 3d. Thus 6 lb. of Half-Crown Tea can be sent free of post on receipt of 15s 3d. Thus 5 lb. of Three-Shilling Tea can be sent free of post on receipt of 15s 3d.

THE POSTAL LIMIT of 7 lb. will only really cover 6 lb. of Tea, as the weight of paper and twine has to be deducted, so that COOPER COOPER and CO. will send 6 lb. of Three-Shilling Tea free of post for 18s 3d, or 6 lb. of Two-and-Sixpenny Tea free of post for 15s 3d, or 6 lb. of Two-Shilling Tea free of post for 12s 3d.

PACKAGES containing 20 lb., 60 lb., or 100 lb. of TEA will be sent to any railway station in England absolutely free of carriage on receipt of remittance for the value of the tea.

THE PARCELS POST.—4 lb., 5 lb., or 6 lb. of TEA will be delivered free of charge at your own houses by the postman, for 3d in addition to the cost of the tea.

THUS 4 lb. of TWO-SHILLING TEA will be delivered free at your own house for a remittance of 8s 3d. Thus 5 lb. of Two-Shilling Tea will be delivered free at your own door for a Post-Office Order for 10s 3d. Thus 6 lb. of Two-Shilling Tea will be sent free to your own homes for a cheque for 12s 3d.

THE PARCELS POST.—4 lb., 5 lb., or 6 lb. of THREE-SHILLING TEA despatched to any part of England, Wales, Scotland, or Ireland, by post for 3d in addition to the price of the Tea.

THUS 4 lb. of THREE-SHILLING TEA can be sent to the remotest address on receipt of remittance for 12s 3d. Thus 5 lb. of Three-Shilling Tea will be forwarded to any place where letters are delivered, postage paid, for 15s 3d. Thus 6 lb. of Three-Shilling Tea will be sent to any address in any postal district in these islands for 18s 3d.

TEAS of all descriptions on COOPER COOPER and CO.'S LIST, posted in parcels containing 4 lb., 5 lb., and 6 lb. each by parcels post to any part of England, Wales, Ireland, or Scotland, in exchange for cash (in registered envelope). Post-Office Orders, cheques, postal orders, or stamps for the value of the tea, and 3d extra.

FOR example, a Package containing 4 lb. of TWO-SHILLING TEA can be sent to any place in the United Kingdom in exchange for 8s 3d in cash, enclosed in a registered envelope, and addressed to any of COOPER COOPER and CO.'S establishments in London.

OR, a Parcel containing 6 lb. of TWO-SHILLING TEA can be delivered by parcels post, carriage free, by remitting a Post-Office Order for 12s 3d.

OR, 5 lb. of TWO-SHILLING TEA will be despatched, free of post, for a postal order for 10s, and three penny postage stamps.

THUS, in the same manner, THREE-SHILLING TEA in parcels to the value of 12s 3d, 15s 3d, and 18s 3d each, containing respectively 4 lb., 5 lb., and 6 lb. of tea, will be sent on receipt of postal orders, cheques, or cash for the several amounts.

CO-OPERATION.—COOPER COOPER and CO. also invite attention to the new System of Co-operation in the purchase of Tea by persons living in the country through the medium of the Parcels Post.

CO-OPERATION.—Thus, as COOPER COOPER and CO. are enabled to send packages containing 6 lb. of any of the Choice TEAS on their List to any place in the United Kingdom for 3d, it follows that if six families in a village are willing to club together, each can have a pound of tea sent for one halfpenny.

CO-OPERATION.—Or, as two parcels containing 6 lb. each can be sent for 6d, six families would be enabled, by joining together in one remittance, to order 2 lb. of TWO-SHILLING TEA each, at a cost of one penny only, in addition to the price of the tea.

CO-OPERATION.—This system will apply to every kind of TEA offered for Sale by COOPER COOPER and CO., and if followed out will practically enable them to place before customers in every county town and village in England, Scotland, Ireland, and Wales, in the Channel Islands, and the Isle of Man, in the Hebrides, and the Orkneys, Tea of the same choice kinds as sold in their various Establishments in London, at the same prices, with the addition of the nominal sum of one halfpenny a pound.

THE MOUNTED SERVICE BOOT.—PATENT.

As adopted by the Volunteer Mounted Infantry.

A COMPLETELY NEW and USEFUL INVENTION. By a CAVALRY OFFICER.

It is equally suitable for riding or walking, and consists of an upper and lower part, which, when adjusted by the peculiar arrangement of the spur, forms a complete riding boot, and at the same time the comfort of a boot and gaiter for walking is ensured. The lower part can be worn also as an ordinary walking boot.

ECONOMY, COMFORT, and PORTABILITY.

Specially recommended to all Officers and Sportsmen going Abroad.

EGYPTIAN NOTES.

(FROM AN OCCASIONAL CORRESPONDENT.)

Cairo, June 20, 1883.

Weekly state of the Army in Egypt:—

	Total Force.	Sick.	Per cent.
Cairo:—Artillery	469	32	6·8
Cavalry & M'nt'd Inf.	562	41	7·3
Engineers	184	11	6·0
1st Royal Sussex Regt.	804	56	7·0
1st Royal Highlanders	716	65	9·1
1st Gordon Highl'ders	739	83	11·2
1st Cameron Hghl'rs	661	40	6·1
3rd King's Royal Rifles	639	44	6·9
Sundry Service Corps	336	14	4·1
	5,110	386	7·5
Alexandria:—2nd Duke of Cornwall's L. Inf.	799	123	15·4
Detacht. 1st W. Kent	362	35	9·7
Cavalry and Sundries	414	43	10·4
Port Said:—Detachment R'y'l Hghl'rs	95	6	6·3
	6,780	593	8·7
Officers	175	6	3·5
Men	6,605	587	8·9
	6,780	593	8·7
Horses	1,028	44	4·2
Mules	786	7	·9
	1,814	51	2·8

Why the Alexandria garrison should show 12·8 per cent. of men in hospital, while those in Cairo and Ismailia, much less healthy towns, show respectively 7·5 and 6·3, is very difficult to understand.

Since the above return was made out, 12 officers and 524 non-commissioned officers and men of the Royal Highlanders, with four officers and 147 non-commissioned officers and men of the 60th Rifles, have gone to Suez.

Although the cholera is raging in Cairo, there has, up to the present, been no instance among our troops.* Every precaution seems to be taken, except one, to which I do not myself attach much importance, and that is preventing natives from entering the barracks, provided they are carefully watched and not allowed to adopt their own filthy habits therein, I do not think there is any danger to Tommy Atkins from mere contact. A magazine has been erected in Abdin Square fitted as a field hospital, where all men who are taken ill in town will be treated, stretchers are to be obtained at the main guard, and a medical officer is always obtainable at the Hotel d'Angleterre. The part of the town most frequented by soldiers has been placed out of bounds, and patrols are watching every entrance. Every arrangement has been made to send the troops to Helouan on the first appearance of the disease. There is a party from each regiment at that station, with camp equipment complete, and in four hours every soldier could be comfortably settled away from Cairo. Should the disease show itself at Helouan amongst the troops, they will break up into half-battalions, and scatter themselves along the banks of the Sweetwater Canal. At Port Said, all is well; the men were confined to barracks, but as no case have recently declared themselves there, they are now allowed to walk in the European Quarter. In Alexandria, the epidemic has not as yet put in an appearance, though three isolated cases were reported; arrangements have been made for placing the troops under canvas upon Gun Hill. The remainder of the Rifles left for Suez last night. While writing, I hear that a man of the 42nd has died at Suez from cholera, but I have not yet been able to verify the fact. During the last week two deaths occurred among the troops in Egypt from other causes, one in Cairo and one in Alexandria.

Leave of absence is granted to Lieutenant D. F. Davidson, Cameron Highlanders, from July 21 to November 5; Lieutenant G. L. B. Killich, King's Royal Rifle Corps, from July 21 to November 5. No further leave will be granted. Captain Pain, 1st Gordon Highlanders, having been ordered to the Depôt, is permitted to proceed to England at his own expense; and passages to England will be provided by first opportunity for the following invalided officers:—Lieutenants Hawkins, R.A., and Lieutenant G. Pirie, Gordon Highlanders. Principal Veterinary-Surgeon Meyrick having been ordered home for duty, will proceed to England without delay on payment of his own passage. First-class Veterinary-Surgeon Clayton will act as principal Veterinary-Surgeon, and Veterinary-Surgeon Mitchell will be in charge of the 19th Hussars and Mounted Infantry. The Rev. W. C. McGill will proceed to Suez in charge of Roman Catholic troops stationed at that place, and the Rev. Father Patrick, O.S.F., is appointed temporary Roman Catholic acting Chaplain to the garrison of Cairo.* Surgeon Lane will have medical charge of the King's Royal Rifles at Suez, and Surgeon Johnston will proceed from Alexandria to Cairo.

THE CHOLERA IN EGYPT.

The following telegrams have been received at the War Office from the General Officer Commanding, Cairo, July 30:—"Continuation of names already notified:—188 Corpl. A. Duff, Royal Highlanders; 1343 Pte. T. Atkins, Royal Sussex; 578 Pte. G. Fraser, Royal Sussex; 905 Pte. E. Stichell, Gordon Highlanders; 2535 Pte. S. Parker, Royal Highlanders; 1740 Corpl. E. Bull, Gordon Highlanders; 2127 Pte. A. Brookes, Royal Rifles; 846 Corpl. W. Maybury, Gordon Highlanders; 189 Pte. G. Loutett, Gordon Highlanders; 4823 Pte. H. White, Army Hospital Corps; 109 Pte. H. McKay, Cameron Highlanders; 2382 Pte. G. Bolingbroke, Royal Sussex; 2065 (? 2063) Pte. W. Johnston, Royal Sussex; 4615 Pte. J. McMillan, Royal Rifles; 1709 Pte. M. Hartley, Royal Sussex; 101 Pte. C. Clarke, Royal Sussex."

"From the General Officer Commanding in Egypt to the Secretary of State for War, dated Cairo, July 31.—The following have died of cholera since last telegram:—3566 Pte. Michael Sulivan, King's Royal Rifles; 834 Pte. Charles Kingswell, Royal Sussex Regt.; 295 Pte. Samuel (? Stephen) Elliott, Royal Sussex Regt.; 1475 Serjt. Richard Dunn (? Bunn), Royal Sussex Regt.; 1408 Pte. Harry Jones, Royal Sussex Regt.; 3041 Pte. Michael Conwell (? Cornwell), Army Hospital Corps. In addition to the deaths already reported, about 13 have occurred from cholera at El Wardan since its occupation; regimental numbers and names not satisfactorily ascertained; will be given subsequently. Surg. C. B. Lewis died yesterday."

Cairo, August 2.

The following since dead of cholera:—2165 Pte. Elijas Blackhard (? Blackall), Royal Sussex Regt.; 1762 Pte. Richard Pettit, Royal Sussex Regt.; 1483 Pte. William Plumridge, Royal Sussex Regt.; 1818 Drummer William Davis, Royal Sussex Regt.; 1893 Pte. Alfred Baker, Royal Sussex Regt.; 790 Pte. James Dilly, Royal Highlanders; 883 Serjt.-Piper John Grant, Cameron Highlanders; 1491 Serjt. John Grant, Cameron Highlanders; 3223 Serjt. William Hicks, Commissariat and Transport Corps; 1744 Pte. James Meredith, Gordon Highlanders; 1765 Serjt. Henry Lovelock, King's Rifles; 2946 Corpl. Robert Jackson, Army Hospital Corps; 4763 Pte. Andrew (? J.) Readon, Army Hospital Corps. In addition, the following men have died of cholera at El-Wahdan Camp since occupation: — 1238 Lance-Corpl. George M'Kie, Royal Highlanders; 138 Pte. John Johnston, Royal Highlanders; 2149 Pte. Alfred Lighton (? Leighton), 19th Hussars; 1867 Corpl. Edward P. Williams, 19th Hussars; 1295 Pte. James Cook, 19th Hussars; 2214 Pte. Walter Hollis, 19th Hussars; 12290 Driver George Stammers, I Baty. 2nd Brig. R.A.; 13340 Driver William Pitt, I Baty. 2nd Brig. R.A.; 10129 Driver John Barry, I Baty. 2nd Brig. R.A.; 27198 Driver Adam Borthwick, I Baty. 2nd Brig. R.A.; 2730 Serjt. John Smithers, G Baty. B Brig. R.H.A.; 3689 (? 3688) Driver Frederick Jennings, G Baty. B Brig. R.H.A.; 3649 Driver Edward John Cross, G Baty. B Brig. R.H.A.; 4396 Driver Thomas Roche, G Baty. B Brig. R.H.A.; 3545 Driver Denis Deary (? Leary), G Baty. B. Brig. R.H.A.; 4047 Corpl. William Stewart, King's Rifles; 1655 Pte. George Hodges, Royal Sussex Regiment.

Cairo, August 2.

The following have died of cholera:—4596 Corpl. George Marshall, King's Rifles; 3846 Pte. James (? William) Raymond, King's Rifles; 1811 Pte. John Adams, Royal Sussex Regt.; 2041 Pte. John Wilson, Royal Sussex Regt.; 12191 Gunner Thomas Chalmers, I Baty., 2nd Brig., Royal Artillery; 1223 Colour-Serjt. Jeffrey Costello, Gordon Highlanders; 2759 Corpl. Thomas Curtis, Army Hospital Corps.

The following telegram was received yesterday by the Secretary of State for War from the General Officer Commanding, Egypt:—"August 3. General health good. Continued improvement telegraphed from El Wardan. Cholera becoming less virulent. At first, every case proved fatal; now, many become convalescent."

THE CHOLERA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—Much has lately been written on those causes which have of late years tended to the deterioration of the Army, but too little on those diseases which at times spread dismay in its ranks, cause numerous deaths, and impair its efficiency in every respect; and at the present moment, when there is every prospect of this occurring to our troops serving in Egypt, the following remarks may, perhaps, appear acceptable, and worthy of insertion in your *Gazette*. When stationed at the Piræus, in Greece, with the 97th Regt., in the summer of 1854, and during the winter of the same year in the Crimea, I had very painful experience of the effects of cholera, and from that experience have deduced the following facts. Cholera may be considered as an infectious disease, which, once imparted into any locality, is propagated by the effluvia from its own special discharges, and probably received into the human system by inhalation through the medium of the lungs. A locality in which large numbers of men are assembled, and in which due regard has not been paid to cleanliness, drainage, and other sanitary precautions, is that peculiarly adapted for its reception and dissemination. The poor, ill-fed, and intemperate are those first attacked, while, as a necessary result, the rich, who have all the necessaries and comforts of life, and the temperate may pass through an epidemic of cholera without contracting it. Diarrhœa, as a general rule, is a premonitory symptom, gradually depriving the blood of its watery portion, and materially reducing the sufferer's strength. If this diarrhœa can be arrested, the disease goes no further, but if it continues the other symptoms of cholera rapidly supervene. In many of the most severe cases of cholera, however, there is no premonitory diarrhœa, but the disease at once assumes a malignant aspect, proving fatal in a few hours. There is no specific remedy for cholera, although it has been repeatedly asserted by the ignorant that such has been discovered, and all that can be done in its treatment is to place the sufferer in as favourable a position as possible, and to trust in a great measure to the powers of nature to carry him through the attack, as is done in fevers and other diseases, which run a certain course. The treatment by small doses of calomel or castor-oil frequently repeated has been found to be totally useless, and many cases, in which too active treatment by opium has been adopted in the earlier stages of the disease, have subsequented terminated fatally, owing to the induction of a congestive state of the brain. In an epidemic of cholera, the cases which first occur are of the most serious and malignant nature, while as time goes on they gradually become less and less severe, and the disease finally dies out spontaneously. If again called upon to treat cases of cholera, I should depend upon the assiduous applications of flannels wrung out of hot water and sprinkled with turpentine to the abdomen, with friction to the extremities to relieve the violent cramps which occur, lumps of ice and iced water being given to allay the urgent thirst and frequent vomiting, and a mixture containing chloric ether and tincture of opium in small but frequently-repeated doses. When any locality is threatened with cholera, there are always plain indications of its approach, and those who neglect such warnings must be held responsible for the results which follow. The frequent occurrence of diarrhœa is the most significant of such warnings; and although there may be no specific remedy for the disease, there is one which, if adopted at once, and without hesitation, will be the means of saving numerous valuable lives. This remedy I most strongly urged the officer commanding the troops at the Piræus, in Greece, in the summer of 1854, to adopt, but without success; and it was not until we had lost 118 of our finest soldiers, that the regiment was removed to an encampment on Mount Pentelicus, near Athens, when it at once ceased. The precautions to be adopted in a locality threatened with cholera are, therefore, the utmost attention to cleanliness, drainage, and other sanitary measures; the strictest temperance as far as it can be enforced; the treatment of cases of diarrhœa as soon as they occur; the immediate separation and isolation of the sick from the healthy; and above all, the removal, as soon as possible, from the infected district, of as many troops as the exigencies of the service will permit.—I am, &c., Henry Downes, M.D.,

Deputy-Inspector-General of Hospitals, h.p.

Tiverton, Devon, July 28, 1883.

Admiral Sir A. C. Key proceeded to Chatham on Thursday for the purpose of making an inspection of the Leander, armoured ship, now preparing for sea.

---

* Our Correspondent's letter comes by post. The casualties are reported by telegraph. It is rather surprising that the General at Cairo, with the figures before him, should persist in his stereotyped telegram, "General health good." What is "General health?" For example, in the Duke of Cornwall's, with 15·4 per cent. sick, or the Gordon Highlanders, with 11·2 sick.—Ed. *A. & N. G.*

* Since reported dead.

NOTES FROM ALDERSHOT.

(FROM OUR CORRESPONDENT.)

On Monday last, his Royal Highness the Field-Marshal Commanding-in-Chief visited the Camp, accompanied by Lord Wolseley, Lieutenant-General Sir A. J. Herbert, K.C.B., and Major-General Harman, C.B. The Division, with every available man in the ranks, was exercised as opposing forces for the last time under the command of General Sir Daniel Lysons, K.C.B. The Northern force was under the command of Major-General H.R.H. the Duke of Connaught, K.G., C.B., and the Southern force was commanded by Lieutenant-General Sir Frederick FitzWygram, Bart. The idea of the combat was that a Southern army, advancing on Staines, *viâ* Farnham and Farnborough Station, had arrived at Farnham on the evening of the 29th ult. On the same day, a Northern army concentrates at Cobham. The operations were confined to the action of the advance-guard of the Southern army, and that of a detachment from the Northern army. The operations commenced at 10 a.m., by signal from the General commanding, and immediately Sir Frederick pushed a vigorous reconnaissance over the Fox Hills, in the direction of Colony with a view to ascertain the enemy's strength. The Duke of Connaught, whose instructions were to delay the advance of the enemy as long as possible, in order to prevent his getting across the canal, eventually took up a very strong position across the Foxhills, upon which his opponent made but little impression up to the time of "cease fire" being sounded. It will be interesting to read the decisions of the umpires in this engagement. Several extraordinary incidents occurred during the action. In one instance, an Infantry battalion of the Southern force, after having been shelled for a considerable time while in close order, by a well-posted field battery (H-4), advanced a distance of 1,600 yards in the open, under a terrific shrapnel fire, to the muzzles of the guns, and coolly asserted that they had captured the battery. A few umpires were hurriedly brought together, and a consultation held. I cannot say how the decision was given, as I left that portion of the field while the matter was being warmly discussed. Major-General Walker, V.C., C.B., was umpire for the Northern force, and Major-General Willis, C.B., for the Southern force, each being assisted by a numerous staff. There were present on parade 6,500 men, 1,350 horses, and 46 guns. The 3rd Hussars and P Battery, 2nd Brigade, Royal Artillery, were not on parade owing to an outbreak of glanders.

The following officers have joined the class at the Army Veterinary School, which commenced on the 1st inst.:—Lieutenant-Colonel French, 2nd Dragoon Guards; Majors Ashburner, 2nd Dragoon Guards; Hunt, 7th Hussars; Freeman, 31st; Dickenson, 1st Battalion 20th; Winter, 1st Battalion 26th; La Coste, R.M.L.I.; Captains Mackenzie, 2nd Dragoon Guards; Hegan, 5th Dragoon Guards; Hare, 1st Battalion 9th; Barrow, 1st Battalion 26th; Beauclerk, 15th Hussars; Lieutenants Preston and Douglas, 2nd Dragoon Guards; Pelly, R.A.; the Hon. B. Petre, 1st Battalion 10th; Allen, 80th; Tyler, 52nd; Hotham and Fetherstonhaugh, 1st Battalion 26th; Minchin, 1st Battalion 16th; Parsons and Western, Bengal S.C.; Westlake, Prichard, and Wilmot, Madras S.C.; Assistant-Commissary-General Reeves; Deputy - Assistant - Commissary - Generals Stokes, Bridge, Baker, and Creagh; Lieutenants Gibbens, Pinkney, Pollock, Boucicault, and Telfor, and Quartermaster Lawford, Commissariat and Transport Staff; Lieutenant Sitwell, 85th; Ridingmaster Cooper, Commissariat and Transport Corps; and Major Gray, 34th. Lectures will be delivered at the School by the Instructor, Veterinary-Surgeon to the Staff W. B. Walters, five days a week, at 2.30 p.m. each day.

A paymaster-serjeant and a colour-serjeant of a regiment quartered in hut barracks have absconded simultaneously, and the regimental accounts are found to be in an unsatisfactory state. The District Paymaster has been ordered to make an investigation and report on the state of the accounts.

A draft, consisting of Captain T. C. Jameson, 26th Regiment, Lieutenants A. E. Couper and C. P. L. Bell, and four serjeants, four corporals, two drummers, and 250 rank and file of the 31st Regiment, is held in readiness to embark for India, *viâ* the Cape, to join the 70th Regiment. The 87th Royal Irish Fusiliers and A Battery, 1st Brigade, Royal Artillery, are hold in readiness to proceed to India. The 1st Life Guards returned to Windsor immediately after the sham-fight on Monday last. The 3rd Surrey Militia will leave the Camp to-day (Saturday), for Kingston-on-Thames, on completion of training. This completes the list of Militia regiments for training at the Camp this season. Considering the time of year, the number of men "drawing rations" at the Camp at the present time is much smaller than usual, being less than 12,000 men. Twenty surgeons A.M.D. will shortly arrive at Aldershot for a course of A.H.C. drill. Lieutenant F. G. Bond, R.E., has been appointed adjutant of the corps, vice Captain H. V. Hart-Davis. Lieutenant-Colonel F. Wilson, 84th Regiment, is about to be retired on retired pay. Captain H. D. P. Parry-Okeden, 60th Rifles, has been appointed aide-de-camp to Lieutenant-General Sir Archibald Alison, Bart., K.C.B., commanding the Aldershot Division. The following Divisional Order was published on Thursday:—"Lieutenant-General Sir A. Alison, Bart., K.C.B., having assumed command of the Division on the 1st inst., all reports, &c., will be made to him accordingly. General Sir D. Lysons, K.C.B., is struck off the strength of the Division from the 31st ult." Under instructions received from the Horse Guards, Major M'Gill, Staff Adjutant of the Royal Military College of Canada, has been attached to the 2nd Infantry Brigade, for instruction, from the 1st inst. Several Commandants of Canadian Military Schools are under orders for Aldershot, to be attached to regiments for a course of instruction. Forty officers of Militia, candidates for Line commissions, will be examined at Aldershot in September next. Owing to continued misconduct of men of the Foot Guards encamped at Pirbright, the authorities have decided to encamp a small force of Military Mounted Police in that vicinity, and a detachment of this corps marched thither on Monday last. One man of the Brigade of Guards has recently been sentenced to 15 years' penal servitude for manslaughter, and another to six months' imprisonment for indecent assault, both crimes having been committed near Pirbright. It is asserted that the Foot Guards are far from popular in the towns and villages near their encampment. "A" (Pontoon) Troop, Royal Engineers, will proceed to Egham, on the Thames, for a course of military pontooning, early next week. Army signalling experiments on an extensive scale will be carried out during the ensuing week, under the direction of Major Morton Thrupp, Inspector of Army Signalling. Signal stations will be formed at Aldershot, Merrow Down (near Guildford), and Epsom, and communication opened with London, and maintained during the day by flag and heliograph, and by night by means of the signal-flashing apparatus, and rockets of various colours. The permanent Instructor, Serjeant-Major Hitchcock, who is himself the inventor of a night-signalling lamp of wonderful power, will proceed with the party of non-commissioned officers from the Signalling School, and place them in position at the various signalling stations. Major W. Mallins, R.A., has been ordered to Ireland, and Major W. F. de H. Curtis, R.A., to Aldershot. Surgeon Prendergast, A.M.D., has been struck off the strength of the Division from the 2nd inst.

THE ARMY RIFLE MEETING AT ALDERSHOT.

(FROM OUR CORRESPONDENT.)

A most successful meeting was brought to a close last Saturday, in the presence of Gen. and Lady Lysons, Major-Gen. H.R.H. the Duke of Connaught, and many other officers. A close analysis of the scores compared with previous years shows a marked advance in the character of the shooting, while the large number of entries is evidence, if any were needed, of the desire of the Regular services to fully avail themselves of the too limited opportunities they possess of facing the targets in competitive practice. The thanks of all those who were present during the three days' competitions are due to the executive, and especially to Major Burton, 1st Scottish Rifles, D.A.A.G., who, we understand, left no stone unturned to promote the success of an event which is gradually increasing in public importance and interest, and promises, at no distant date, to rival the gathering on the Surrey Heath. A word of praise is also due to Qrmr. Underhill, 1st Scottish Rifles, who carried out the range duties. The prize list on this occasion was only about £500; but we believe that with a little extra exertion it could easily be doubled, and thus allow more of the rank and file to participate. There are plenty of large-hearted people in the City of London, for instance, who, if the claims of our Regular troops for consideration were brought before them, would gladly respond to an appeal for funds for such an object. In our last impression, we gave brief results of the contests decided up to Thursday night. Those disposed of in the other days were as follows:—

6. The Mappin Brothers. — 500 yards, 7 shots; 1st prize, a dressing-case.—Colour-Serjt. Tuthill, 33rd Regimental District, 35 points, (h.p.s.) Five other prizes in kind were won by Lieut. Colville, 3rd Rifle Brigade, 34; Serjt. Dicken, 33rd Regimental District, 33; Capt. Robinson, 2nd Shropshire, 33; Lieut. Woodford, 2nd York and Lancaster, 33; and Serjt.-Major Quirk, 2nd Highland Light Infantry, 32.

7. The Railway.—Seven shots in two minutes, at 250 yards, at disappearing targets, representing the figures of soldiers, for prizes presented by the South-Eastern and London and South-Western Railway Companies.—Lieut. Fowler, 2nd Shropshire, 33 points; Lieut. Lascelles, 3rd Rifle Brigade, 33; Qrmr. Underhill, 1st Scottish Rifles, 32; Corpl. M'Leod, R.E., 32; Pte. Gallagher, 1st Scottish Rifles, 31; Serjt. Dicken, 33rd Regimental District, 31; and Capt. Robinson, 2nd Shropshire, 30.

8. The Cæsar's Camp.—Seven shots at 800 yards; eight prizes.—Qrmr. Dimmer, 3rd Rifle Brigade, 34 points; Serjt. O'Brien, Regimental Depôt; Lieut. Ward, 1st Scottish Rifles; Serjt.-Major Johnson, R.E., and Colour-Serjt. Smith, 15th Regimental District, 30 each; and Capt. Robinson, 2nd Shropshire, Colour-Serjt. Lindsay, Highland Light Infantry, and Lieut. Lascelles, 3rd Rifle Brigade, 29 each.

9. Curtis and Harvey. — Seven shots at 600 yards; 10 guineas by Messrs. Curtis and Harvey, Hounslow Powder Mills, and added money from the funds of the meeting:—Colour-Serjt. Lindsay, Highland L.I., 33 points; Serjt.-Major Johnson, R.E., 32; Colour-Serjt. Tuthill, 33rd Regimental District, 31; Corpl. Kenny, R.E., Qrmr.-Serjt. Foster, 33rd Regimental District, and Pte. Bradbury, 1st Dorset, 30 each.

10. Artillery Prizes.—The competition for these was postponed.

11. Young Soldiers' Match. — Seven shots at 500 yards; open to rank and file of the Regular Army who have enlisted since July 26, 1881; 34 prizes, ranging in value from £3 to 5s.:—Serjt. Allen, R.E., 29 points; Pte. Bray, 1st Dorset, Serjt. Canty, R.E., and Pte. Adcock, 2nd Coldstreams, 28 each; Serjt. Morris, R.E., and Corpl. M'Coombe, 15th Hussars, 26 each.

12. The Army.—Seven shots at 500 yards; open to rank and file of the Army and Royal Marines; 45 prizes, ranging in value from £4 to 5s.:—Serjt. M'Combie, 2nd Shropshire, 31 points; Serjt. McCormick, 1st Scottish Rifles, 30; Corpl. Neve, 1st Scottish Rifles, and Pte. Shaw, 1st Manchester, 29 each.

13. The Serjeants. — Seven shots at 500 yards; open to serjeants of the Army and Royal Marines, and petty officers of the Navy; 29 prizes, ranging in value from £5 to 10s.—Colour-Serjt. Collinter, Regimental Depôt, 33 points; Serjt. James, R.E., 32; Colour-Serjt. Lindsay, 2nd Highland L.I., 31; Colour-Serjt. Mills, 3rd Rifle Brigade, 31. With 30 each:—Qrmr.-Serjt. Kenny, R.E.; Qrmr.-Serjt. Coomber, Royal Irish Fusiliers; Qrmr.-Serjt. Merritt, 15th Regimental District; Serjt. Cown, 2nd Shropshire; Serjt.-Major Johnson, R.E.; Serjt. Rightman, 1st Scottish Rifles; Qrmr.-Serjt. Marshall, R.E.; and Serjt. Johnson, 2nd Shropshire.

14. The Mappin and Webb. — Seven shots at 500 yards; open to officers of the Army, Navy, and Royal Marines; the first two prizes presented by Messrs. Mappin and Webb, of London.—The Challenge Vase, value 13 guineas, Qrmr. Dimmer, 3rd Rifle Brigade, 33 points; Tankard, with pair of Beakers, Lieut. Fowler, 2nd Shropshire, 32, 3rd prize; Lieut. Fenwick, 1st Dorset, 31, 4th prize; Major Boulger, V.C., 2nd York and Lancaster, 31, 5th prize; Lieut. Woodford, 2nd York and Lancaster, 30.

15. The Carbine.—Seven shots at 500 yards; open to all corps of the Regular Army armed with the Martini-Henry carbine; six prizes, ranging in value from £5 to 12s. 6d.—Pte. Collinson, 15th Hussars, 32 points; Corpl. Broster, 15th Hussars, 32; Troop Serjt.-Major Tomblings, 15th Hussars, 29; Pte. Smith, 4th Hussars, 28; Pte. Collins, 4th Hussars, 28; Conductor Chapman, Commissariat and Transport Corps, 28.

16. The Regimental Trophy. — 200, 500, and 600 yards; teams of six from battalions; aggregate value, 50 guineas; a silver trophy, to become the property of the winning corps, and to be kept in the officers' mess; £6 in money divided amongst the winning team, and a silver cup, presented by Sir Daniel Lysons to the competitor making the highest aggregate score.—Winners of the trophy—33rd Regimental District (Halifax), 491 points. Next in order of merit—2nd York and Lancaster, 482; 3rd Rifle Brigade, 480.

17. The Championship.—Two stages: 1st stage, 800 yards, restricted to the 40 qualified competitors making the highest aggregate scores at 200 and 500 yards, in matches 1, 2, 3, 4, 11, 12, 13, and 14; 2nd stage, restricted to the ten competitors making the highest aggregate scores in the first stage and matches specified above. 1st prize, the Champion Badge and £10, Lieut. Fowler, 2nd Shropshire, 108 points. The following received £1 each:—Lieut. Hardinge, Rifle Brigade, 104; Serjt. Johnson, 2nd Shropshire, 104; Pte. Bradbury, 1st Dorset, 104; Serjt.-Major Carruthers, 33rd Regimental District, 101; Qrmr. Dimmer, 3rd Rifle Brigade, 101; Serjt.-Major Johnson, R.E., 100; Instructor of Musketry Kenny, R.E., 98; Serjt.-Major Kilby, R.E., 91; and Colour-Serjt. Collinter, Regimental Depôt, 90.

18. The Mounted Competition. — Open to sections of four from all mounted corps of the Regular Army. The conditions were as follows:—Dress, drill order. Rifle, Martini-Henry carbine, carried on the saddle or on the back, or in any other manner adapted to service. Firing points, 400 and 600 yards. Position, any. Three out of four men will dismount and fire four rounds at each distance. The fourth man will hold the horses, either mounted or dismounted; he will not fire. Each section will be under the command of one of its members, who will give all necessary words of command. Course—The section will ride from a starting-point, acting as follows:—On the word "march," gallop about 300 yards over two fences, to the 600-yards firing-point. Dismount, fire four rounds, and mount. Gallop about 300 yards over two fences to a third point. Dismount, double on foot 50 yards to the firing-point (distance 400 yards), fire four rounds, double back to the horses, mount, gallop about 200 yards to the winning-post, and halt. Time—Seven minutes allowed to complete the course. Two points to be added for every ten seconds within time; two points deducted for every ten seconds beyond time. The time to count when the last man of the section reaches the post. Winners—First team, 15th Hussars, 84 points; 2nd team, 15th Hussars, 62; 3rd Hussars, 48.

19. The Infantry Running Match.—Open to teams of four, from battalions of the Army and Royal Marines. A challenge cup, presented by Major-Gen. H.R.H. the Duke of Connaught, to be kept in the serjeants' mess, and £6 to the winning team. Three other prizes, of £4, £3, and £2, were also given. The teams, each under the order of one of its members, who gave all necessary words of command, were required to go about a quarter of a mile in field-day order, with rolled great-coats worn over the left shoulder, two pouches, haversack, and water-bottle. In the course there were three obstacles (one a ditch), and seven rounds per man had to be fired at 400 and 500 yards, any position, five minutes being allowed, the result being as follows:—The cup and £6, 1st Scottish Rifles, 173 points; £4, 1st Scottish Rifles, 171; £3, 2nd Highland L.I., 166; £2, 2nd Shropshire, 150. The next in order of merit were another team of the 2nd Shropshire, 147 points; 1st Dorset, 136 Royal Engineers, 133; 3rd Rifle Brigade, 127.

20. The Bowyers' Competition. — 15 guineas, presented annually by the Worshipful Company of Bowyers; open to teams of 10 (under command of an officer or non-commissioned officer, who will not be allowed to fire), from battalions serving in Great Britain. Each team to contain at least eight privates. No officer can compete. Drill order. Any position. Distance unknown, but under 600 yards. A moving target, which will be a screen represent-

ing a section of men. Ten rounds per man. Each squad required to march a quarter of a mile in extended order. Ten minutes allowed to each squad from the time of starting, and within that time any number of volleys may be fired, not exceeding ten.—Winners—1st prize, 10 guineas, first team, 1st Scottish Rifles, 102 points; 2nd prize, 5 guineas, second team, 1st Scottish Rifles, 96. The next in order of merit, 1st Dorset, 91 points; 2nd Shropshire, 81; 3rd Rifle Brigade, 70; 7th Compy. R.E., 39.

21. The Consolation. — Seven shots at 200 yards.—Winners—Pte. Davies, Welsh Regt., 29 points. With 28 each, Corpl. Auld, R.E.; Colour-Serjt. Simpson, 1st Scottish Rifles, Pte. Bell, 2nd Shropshire; and Serjt. McMahon, 1st Scottish Rifles. With 27 each, Capt. Dickson, Royal Irish Fusiliers, and Lieut. Stopford, Royal Irish Fusiliers.

At the close of the shooting, the prizes were distributed by Lady Lysons.

MOUNTED INFANTRY, OR PIONEERS?

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

Sir,—In answer to your correspondent, "Bonté," may I be allowed to state that a detailed scheme, very similar to what he has suggested, was last year forwarded to the office of the Adjutant-General? There appears to be a prevailing opinion among Military authorities that some force (whether you call them Carted Pioneers or Mounted Infantry, matters not) should accompany the Cavalry Brigade in the field, capable of seizing and hastily fortifying positions, and destroying or repairing roads, telegraphs, &c. Now, all these duties, although they may appertain to the Infantry, are closely allied to those of the Engineer; consequently, every man in this force, besides being a good shot, must be well practised in field engineering. Select, then, if needs be, from the Infantry picked men for their intelligence and good shooting, and put them through a regular course of destroying and repairing bridges and throwing up hasty fortifications; add some telegraphists, either from the Royal Artillery or perhaps from the Royal Engineers Telegraph Troop. One or more troops of such a force might always be stationed at Aldershot, to take part in the field days, and show that Mounted Infantry can work alongside of Cavalry without attempting to ape the Dragoon.—I am, &c., Carted Pioneer.

The deputation from the subscription committee, for the sword of honour to Lieut.-Gen. Sir Archibald Alison, consisting of Bailie Wilson and Mr. W. Auld, waited upon Sir Archibald at his residence, Woodville, Colinton, near Edinburgh, on the 25th ult., for the purpose of obtaining his assistance in selecting the most appropriate of the designs for the sword in the public competition, the committee being unable to decide upon the best amongst so many meritorious drawings. The designs, 15 in number, and all claymores had been previously forwarded to Woodville. After a careful study of the collection, the design marked "E943," submitted by Messrs. George Edward and Sons, of London and Glasgow, was chosen.

The *Times* writes:—"The action of the military authorities as regards the exercise of the power of selection for the rank of Major-General, and for regimental command as contemplated by the new Warrants, has been watched with interest. There has been no selection for regimental command for some years, but many captains who have failed to pass their qualifying examination for their majorities have been passed over. In one distinguished regiment (the King's Royal Rifles), fifteen captains were lately thus passed over by a qualified junior. But with regard to the rank of Major-General, some observance at last appears to be shown to the provision of the Warrant which prescribes that this promotion shall be given only to the senior, provided he be stated by the Commander-in-Chief to be competent to command in the field. The individual merits of the officers seem to have been taken into account as regards the order in which they are advanced. Since November last, the colonels at the top of the list have been thus dealt with. Six, standing, respectively, 1, 3, 4, 6, 8, and 13, were made Major-Generals, leaving seven passed over. Of these seven, five have since got their promotion; but the officer who stood 11 on the list of colonels has been put over the heads of those who stood 7, 9, and 10. Those standing 2 and 5 were passed over altogether, and still remain colonels. In addition to these promotions, which were made to fill ordinary vacancies, Col. the Hon. James Dormer, who stood 43rd on the list, was, for service in Egypt, made a major-general, but supernumerary to the establishment. According to the Royal Warrant as it then stood, Major-Gen. Dormer, as well as Lord Wolseley and Sir Archibald Alison, who also got promotion, should have been absorbed, upon the occurrence of the next vacancy in their respective ranks. But this would have interfered with the seniority claims of the officers who stood before them in each rank from which they were promoted. For instance, Lord Wolseley's promotion would have apparently obliged Sir Edmund Whitmore, the Military Secretary, to retire in 1886 on the pension of a lieutenant-general (£850), instead of that of a general (£1,000). The Warrant was, therefore, altered, so that those officers who are promoted for distinguished service in excess of the establishment shall be absorbed not upon the next vacancy, but upon the vacancy which would give them their step in the ordinary course of seniority. This alteration was sanctioned by the Treasury after great hesitation, doubtless arising from the reflection that it was a somewhat reactionary step as regards the principle of selection, and in a sense a return to the theory that establishments were to be maintained for the good of the officers, and not for the public advantage. There can be no doubt, however, that these promotions, made out of the ordinary course, interfere with what are still recognised as the claims of seniority; and the exercise of selection must always be a matter of difficulty, until the selection is made for the command instead of for the grade. On the whole, selection appears thus far to have been exercised to the extent of showing that thorough and well-proved incompetence is not at once and as a matter of course overlooked, when its possessor comes to his turn for promotion. A beginning has been made."

Reviews.

◆

SOME MAGAZINES.

The Nineteenth Century for August contains an article which is intended to form a comparison between the German and British armies. The subject is one calculated to create considerable interest, and no writer can be better fitted to do justice to it than Capt. Hozier. Having briefly referred to the leading military events which occupied Europe previous to England entering on the Crimean War, he asks why was it that the British Army failed so dismally in the Crimean campaign, while the Prussian succeeded so splendidly in "the Seven Weeks War"? Why was it that the British troops were butchered wholesale by a barbarian force in South Africa, when German troops, without a check, carried the tale of war through France, and wrapped Paris, the centre of civilisation, in an embrace of iron and fire? Why is it that at the present time, while all is confused, doubtful, and vacillating in the British service, where nothing appears to be constant except change itself, that in the German Army advancement and military progress are regulated with the skill of the mathematician and the precision of the astronomer? No want of investigation or want of inquiry can account for this, inasmuch as, since the close of the Crimean War, innumerable and interminable committees and commissions have sat on every detail of the British service. Before answering these questions, some attention must be drawn to the constitution of the German Army, "the finest military machine in existence;" and then it becomes desirable to trace how it is that with a very small cost per man, and a very simple organisation, a very large and very effectual fighting power can, by the German War Office, be rapidly placed in the field in case of need. To do justice to these important propositions, Capt. Hozier explains at considerable length the peculiar constitution of the German Army, and shows how, during the campaign of 1866, the elasticity of its organisation was made clearly manifest. So much for the general system on which the German Army is normally organised. How it is to be worked in the field depends upon the General commanding. The question which next arises is, why do not we in England adopt the Prussian system in its entirety? The simple answers are that our circumstances are different and our requirements dissimilar, and that the essential difference is that we have no compulsory military service. It may also be urged that the conditions of our country are so different from Germany and from France, and the nature of our society so dissimilar, that it would be most undesirable for a British military administrator to plagiarise the German system. In reference to recruiting, Capt. Hozier holds that common-sense alone dictates that experience has proved that it must be impossible to obtain by voluntary enlistment men who for five or six years will consent to give up their civil occupations, to serve for that time in the Army. and then return to civil life, without pension, without provision, having lost all knowledge of trade and means of livelihood. "Short service under a system of voluntary enlistment must be very short, and the shorter the service in the ranks of the men who are passed to the Reserve, the larger must be the number of old soldiers kept with the colours, to give stability and mobility to the battalions when the Reservists rejoin." It is equally necessary that, in the English Army especially, the non-commissioned officers should be trustworthy and experienced. This becomes perfectly clear when it is remembered that universal Military service will never be adopted in this country, and that, consequently, with non-commissioned officers must be left more than in any other country the details of minor control and regimental discipline. Capt. Hozier's idea as to the period at which recruits should be taken is the age of 17, for a period of three years, and that during those three years the recruits should be retained at the depôts or with home battalions, but should not be sent on foreign service. In concluding this instructive article, he says, and with truth, that it would be very desirable if, before any further attempts are made to consider the details of our Military system, some broad principles were arrived at on which the forces required for the purposes of the country should be fixed on, and, if possible, some finality be given to this decision:—"Careless and indifferent, we Englishmen have dallied long enough with the mighty problem of our national security. We alone of European nations appear blind to the fact that railways and telegraphs have entirely revolutionised the progress of military events. Wars tend to be more sudden in their outbreak, more and more rapid in their incidents, and those who are not forearmed become every day more liable to be ignominiously surprised and abjectedly laid low."

The sixth number of *The National Review* contains an article on "The Volunteers as a Military Force," which will probably attract some attention. The subject is one which is steadily increasing in interest, and the writer in the *National* seems rather disposed to treat it fairly. He starts with the assertion that, with all deference to the knowledge and judgment of the professional soldier and the value of his opinion with reference to a Regular army, he is not, as a rule, a good critic of Volunteers,—and why? Because, in the first place, there are very few Regular officers who know much about Volunteers, and they have but few opportunities of judging of their merits and demerits. The only officers who really know anything about Volunteers are those few who have served as adjutants to Volunteer regiments, or on the staff of a Volunteer school of instruction. "Still more, Regular officers are bad critics of Volunteers as a rule, because they measure them by a standard to which such a force neither can nor ought to attain." As regards shooting, certainly, the prevailing idea has been that Volunteers, as a body, are good shots, and that Wimbledon in every way represents the life and soul of the movement; but the writer in the *National* scouts those ideas as entirely fallacious, admitting, however, that some few members of the force are wonderfully expert in the use of the rifle, and have most certainly rendered match-shooting popular, fashionable, and profitable. Our critic goes even further than this when stating as a bold fact that the average Volunteer is at present a very bad shot, and far worse than the average Regular, and that the Volunteer force, as a whole, would be scarcely conscious of the change if the National Rifle Association and the Wimbledon meeting were altogether abolished. One would suppose that the marked success and brilliant execution which were so conspicuous in the ranks of the Scottish Volunteers at the recent meeting would be sufficient to establish the absurdity of assertions such as these. This remarkable success may fairly be attributed to the steady and constant attention which is paid by the Volunteer to practise at the target, and which may with confidence be contrasted with that of the Regulars, many of whom regard the whole proceedings as a spree. So much for shooting. Our attention is next to be drawn to drill and discipline. We have not space to follow the writer in the *National* on these points, or to consider the numerous suggestions he offers so freely, and not, indeed, always very clearly. His "summing up" is as follows:—"It is not, however, my object so much to propose a remedy, as to suggest what I hope I have succeeded in doing, that in the matter of the Volunteer Force as a whole the public opinion errs; that they are not, as a body, good marksmen; but that, granted my ideal of excellence in drill and discipline, their proficiency in these respects is very remarkable." We cannot suppose that this judgment will be a final one, but hope that some time hence, when the writer has become more experienced and has steadily followed the progress of events, we shall hear from him the expression of more qualified opinions as to the respective merits of the Regulars and the Volunteers.

Colonel Knollys continues in *Colburn*, for August, his very interesting and useful article on the worth of money in our Army. The present instalment is devoted to such practical matters as "supply," "manufacture," "repair of warlike and other stores" for land and sea service which will be required for 1883-4, and the first question that arises is whether £1 269,500 is an extravagant total for those purposes, taking into consideration the yearly increasing cost of what may be styled the machinery of war. The author does not think it excessive, but he points to the really practical query, "Is the money voted laid out in a judicious and economical manner, or is it not?" In this number Colonel Knollys introduces us to some curious particulars conversant of "The Royal Carriage Department," "The Royal Gun Factory," "The Royal Laboratory," "The Chemical and Photographic Establishment," "The Medical Department," and several others too numerous to refer to in detail. All that we can say is that some curious facts are made apparent, some startling figures marshalled, some suspicions of extravagance suggested, and that Colonel Knollys deserves not a few thanks for calling public attentions to such serious inquiries. The August number of this old-established magazine is good all round.

Under the title of "The French Newspaper Press," a writer in *Cornhill* for August contributes a cleverly-written article, which will prove full of interest to most readers. The second instalment of "The Giant's Robe" introduces us to a new set of characters, and affords the author a further opportunity of proving the keen sense of the ridiculous which he so abundantly possesses. The wise man in ancient history who never laughed would certainly have yielded if he were reading or hearing read the adventures of the intoxicated gander, and the passage of arms which took place between the Rev. Mr. Humbage and his neighbour, Mr. Lightowler. We ought to look forward hopefully to meeting pretty often during the winter months the same characters, and as many others like them as the author may have in his study, or, if not, in his brain.

Cassell's Publications.—Messrs. Cassell and Co. have published a very attractive list of works for August. There are two which deserve particular attention, the *Quiver* and *Cassell's Magazine*. Both of them contain tales and other matters decidedly above the average, although that average be a high one. In each there is a great deal of variety, but we cannot say that there is a line too much, certainly not; it is all not only attractive, but wholesomely attractive. One of the chief merits of Cassell and Co.'s monthly publications is the entire absence of what is called "gush," which is so often mistaken for the genuine thing.

The Cream of Leicestershire: Eleven Seasons' Skimmings. By Capt. Pennell Elmhirst. (Routledge and Sons.)—There are some works which require little recommendation; they recommend themselves. This is one of them. It is simply a series of exciting incidents of the hunting-field, put together by a master-hand. Capt. Elmhirst is pretty well known as a dashing cross-country rider. In the pages of the volume before us he shows himself to be something else besides a keen sportsman; he has established a claim to be considered a descriptive writer of no mean order. Most British officers are sportsmen at heart. All do not enjoy, perhaps, the same advantages that Capt. Elmhirst has done, but next to participating in the pleasures of hunting oneself, comes the enjoyment of hearing other people's accounts of their experiences. Capt. Elmhirst has been induced to formulate his for the benefit of lovers of the chase; and he has done it in a way which will be most acceptable. He has not gone in for writing a long, connected narrative, but he has adopted the more commendable course of stringing together a number of scraps, all complete in themselves. The volume can be taken up at any time, and opened anywhere. We strongly recommend the work to the notice of those lovers of the horse who are found in such large numbers in the Army. It is written by a soldier and keen sportsman, and it is just the sort of book which a soldier will be able to read and thoroughly appreciate.

Cholera.—Appalling as are the reports from Egypt, how few think of our enormous annual sacrifice of valuable lives from scarlet fever, measles, and small-pox. All heads of families should insist upon the daily use, in bed-room, bath-room, and nursery, of **Wright's Coal Tar Soap**, the only true and simple preventive of infectious disease, and a certain cure of all disorders of the skin.

The Gazette.

TUESDAY EVENING.

ARMY.

WAR OFFICE, PALL MALL, July 31, 1883.

Scots Guards—Major-Gen. H.R.H. A. W. P. Albert, Duke of Connaught and Strathearn, K.G., K.T., K.P., G.C.S.I., G.C.M.G., C.B., Col.-in-Chief the Rifle Brigade (the Prince Consort's Own), to be Col., vice Gen. the Right Hon. Sir W. T. Knollys, K.C.B., deceased (June 24).

6th Dragoon Guards—Capt. A. G. Fife to be Major, vice H. B. Hamilton, placed on temporary half-pay (July 25).

11th Hussars—Capt. H. J. Watson to be Major, vice E. H. Green, retired; Lieut. the Hon. H. A. O. Gore to be Capt., vice H. J. Watson (both dated July 25).

12th Lancers—Lieut. R. C. Newton is placed temporarily on the Half-pay List, on account of ill-health, without drawing half-pay.

18th Hussars—Lieut.-Col. U. E. P. P. Okeden retires on retired pay.

Royal Engineers—Major B. H. Melville to be Lieut.-Col., vice R. Bullen, deceased; Major and Brevet Lieut.-Col. C. J. Moysey to be Lieut.-Col., vice Col. J. P. Maquay, retired (July 10); Major J. R. Hogg to be Lieut.-Col., vice Col. E. H. Steward, retired (July 14); Capts. H. C. Fox to be Major, under the provisions of Article 10 (*b*) of the Royal Warrant of March 11, 1882 (Aug. 3); J. S. Nicholson is placed upon half-pay. The under-mentioned Lieuts. to be Capts., under the provisions of Article 10 (*b*) of the Royal Warrant of March 11, 1882 (Aug. 2):—H. G. Kunhardt, A. W. Cockburn, N. M. Lake, H. L. Wells, E. Raban, B. Scott, G. F. Wilson, S. Grant, R. M. Ruck, S. H. Exham, E. Glennie, H. H. Muirhead, H. P. Leach, W. H. Chippindall, A. C. Bruce, E. W. Cotter, and E. J. Bor.

Grenadier Guards—Majors and Lieut.-Cols. J. A. T. Garratt retires on half-pay; C. J. Cotes retires from the service, receiving the value of his commission.

LINE BATTALIONS.

The Royal Warwickshire Regiment—Supernumerary Capt. A. W. Whitworth to be Capt., vice E. A. Ball, promoted (April 10).

The Royal Fusiliers (City of London Regiment)—The transfer of Lieut. J. G. King from the Queen's (Royal West Surrey Regt.), which appeared in the *Gazette* of July 17, is cancelled.

The Suffolk Regiment—Major W. Keough to be Lieut.-Col., vice Col. W. T. Baker, retired; Capt. J. J. F. Irwin to be Major, vice W. Keough (both dated July 14).

The Prince of Wales's Own (West Yorkshire Regiment)—Lieut. W. R. C. Baird to be Capt., vice W. S. Parkis, retired (July 25).

The South Wales Borderers—Lieut. A. B. Phipps to be Capt., in succession to Major A. A. Morshead, appointed Adjt., 4th Batn. (July 20).

The Royal Sussex Regiment—Major E. B. St. John retires on retired pay, with the hon. rank of Lieut.-Col.; Capts. F. Dorling to be Major, vice F. W. Robertson, seconded (July 1); H. L. Sapte has been seconded for service on the Staff (March 9).

The Prince of Wales's Volunteers (South Lancashire Regiment)—Capt. C. Linton to be Major, vice J. Brougham, retired; Lieuts. R. H. Hall, Adjt., to be Capt.; F. R. M. Synge to be Capt., vice C. Linton (all three dated July 25).

The Black Watch (Royal Highlanders)—Capt. G. M. Fox to be Major, vice J. S. Walker, retired (July 25).

The Sherwood Foresters (Derbyshire Regiment)—Capt. G. H. Fort retires from the service receiving a gratuity, with permission to retain his rank and wear the prescribed uniform.

Princess Charlotte of Wales's (Berkshire Regiment)—Lieut. F. A. Deare to be Adjt., vice Lieut. F. S. Marsham, promoted into the King's Royal Rifle Corps.

The King's Royal Rifle Corps—Lieut. A. Blewitt, from the Duke of Wellington's (West Riding Regt.), to be Lieut., vice H. R. Lovett, promoted.

The Manchester Regiment—Major W. Newbigging retires on half-pay; Capt. J. G. C. Robotham has been seconded for service as a probationer for the Army Pay Department (July 20).

The Durham Light Infantry—Qrmr. W. Weldon is placed on retired pay.

The Royal Munster Fusiliers—Supernumerary Capt. E. S. Evans to be Capt., vice J. Coulton, seconded (June 13).

1st West India Regiment—Major S. Fletcher retires on retired pay.

Staff—Major-Gen. G. S. Young to be Brigdr.-Gen. on the Staff, to command the troops in the Belfast District, vice Major-Gen. H. G. Wood, who resigns that appointment (Aug. 7); Lieut.-Col. and Col. S. Hackett, from half-pay, to be an Assist.-Adjt. and Qrmr.-Gen., vice Col. F. R. S. Flood, C.B., whose period of service in that appointment is about to expire (Sept. 27); Capt. T. E. Stephenson, the Essex Regt., to be a Garrison Instructor, vice Major J. W. F. Buxton, the Royal Inniskilling Fusiliers, whose period of service in that appointment is about to expire.

Veterinary Department—Vet.-Surg. First Class G. A. Oliphant to be Inspecting Vet.-Surg., vice G. Fleming, promoted Principal Vet.-Surg. (June 28).

MEMORANDA.

Gen. Sir D. Lysons, K.C.B., Col. 1st Batn. the Sherwood Foresters (Derbyshire Regt.), commanding the troops at Aldershot, is placed on retired pay.

Qrmrs. G. Collins, the Royal Inniskilling Fusiliers, to have the hon. and relative rank of Capt. (July 26); J. Toal, 3rd Batn. the Queen's (Royal West Surrey Regt.), to have the hon. and relative rank of Capt.; Qrmr., with the hon. and relative rank of Capt., J. Toal, 3rd Batn. the Queen's (Royal West Surrey Regt.), to retire on retired pay, with the hon. rank of Major (both dated Aug. 9).

MILITIA.

WAR OFFICE, PALL MALL, July 31, 1883.

ARTILLERY.

7th Brigade, South Irish Division—Capt. G. P. H. Crowe resigns his commission (July 17).

INFANTRY.

3rd Battalion, the Royal Scots Fusiliers—Lieut. C. N. L. Scott resigns his commission.

3rd Battalion, the Royal Welsh Fusiliers—The Hon. Charles Edward Hill-Trevor to be Lieut.

3rd Battalion, the Duke of Wellington's (West Riding Regiment)—George Valentine Whitla, gent., to be Lieut. (July 20).

4th Battalion, the Duke of Wellington's (West Riding Regiment)—Arthur James Mitchell, gent., to be Lieut. (July 21).

3rd Battalion, the Essex Regiment—Capt. T. S. W. Bernard resigns his commission.

3rd Battalion, Princess Charlotte of Wales's (Berkshire Regiment)—Capt. W. M. C. Pechell resigns his commission.

4th Battalion, the Duke of Cambridge's Own (Middlesex Regiment)—Major A. D. Boyd resigns his commission; also is permitted to retain his rank, and to wear the prescribed uniform on his retirement.

9th Battalion, the King's Royal Rifle Corps—Benjamin Robert Roche, gent., to be Lieut.

4th Battalion, the Royal Irish Rifles—Lieut. K. J. C. Hamilton-Jones to be Capt.

5th Battalion, the Royal Irish Rifles—George Howard Brush, gent., to be Lieut.

6th Battalion, the Royal Irish Rifles—Lieut. W. H. Henry resigns his commission.

5th Battalion, Princess Victoria's (Royal Irish Fusiliers)—Lieut. the Hon. P. Westenra to be Capt.

4th Battalion, the Royal Munster Fusiliers—John Murray, gent., to be Lieut.

YEOMANRY CAVALRY.

WAR OFFICE, PALL MALL, July 31, 1883.

Royal North Devon—Major W. A. Deane is granted the hon. rank of Lieut.-Col.

Gloucestershire—Lieut.-Col. and Hon. Col. C. W. Miles resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the regiment on his retirement.

Herts—Capt. J. H., Lord Lawrence, resigns his commission.

Montgomeryshire—Charles Anderson-Timms, gent., to be Lieut.; Surg. R. M. P. Low, M.D., resigns his commission.

VOLUNTEERS.

WAR OFFICE, PALL MALL, July 31, 1883.

LIGHT HORSE.

1st Forfarshire—Charles William Gray, gent., to be Lieut.

ARTILLERY.

1st Argyll and Bute—Capt. A. Campbell resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Caithness—The transfer of Capt. D. Sutherland, from 1st Sutherland (Highland) R.V.C., notified in the *London Gazette* of June 15, 1883, is cancelled.

1st Cheshire and Carnarvonshire—Charles Edwin Nield, gent., to be Lieut.

1st Cinque Ports—The Rev. Walker Flower, M.A., to be Acting Chaplain.

2nd Devonshire—Hon. Qrmr. T. Lidstone resigns his commissions; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Lancashire—Hon. Assist.-Qrmr. T. R. Walkington resigns his commission.

1st Lincolnshire—Lieut. J. K. Marshall resigns his commission.

1st Midlothian (Coast)—Lieut. H. F. Christian resigns his commission; Robert Scott-Moncrieff, gent., to be Lieut. (supernumerary).

1st Sussex—Lieut. H. Lowe resigns his commission; James Brigden, gent., to be Lieut.

1st Worcester—Major C. R. Lyne to be Lieut.-Col. (June 16).

4th West Riding of Yorkshire (Sheffield)—Acting Surg. W. J. Cleaver, M.B., to be Surg.

ENGINEER.

1st Lancashire—Lieut. W. P. Molineux resigns his commission.

RIFLE.

1st Argyll (Argyllshire Highland)—Lieut. R. Kinloch, from 1st Midlothian (Coast) Artillery Volunteer Corps, to be Lieut. (supernumerary).

1st Bedfordshire—Major H. McL. Pryor resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Cambridgeshire—George Moore Sayle, gent., to be Lieut.

2nd Cambridgeshire (University)—Lieut. J. A. P. Feltham resigns his commission.

4th Volunteer Battalion, the Essex Regiment—Capt. H. D. Broughton resigns his commission.

1st Glamorgan—Lieut. L. G. Fitzmaurice resigns his commission.

2nd Hampshire—John Roberts Thomson, Esq., M.D., to be Capt.

13th Lancashire—Lieut. A. L. Macfie to be Capt.

17th Lancashire—Major G. W. Hall resigns his commission; also is permitted to retain his rank, and to continue to wear the uniform of the corps on his retirement.

1st Linlithgowshire—Lieut. W. Stuart resigns his commission.

2nd Volunteer Battalion, the Royal Fusiliers (City of London Regiment)—Lieut. J. W. Hollway resigns his commission.

3rd Monmouthshire—Lieut. G. A. Bevan resigns his commission. The under-mentioned gentlemen to be Lieuts.:—Charles Davis and Alfred Henry Collingwood.

1st Pembrokeshire—Frederick Samuel David Evans Richardson, gent., to be Lieut.

7th Surrey—Capt. J. H. Dunn resigns his commission.

4th Volunteer Battalion, the Queen's (Royal West Surrey Regiment)—Lieut. B. Shepherd resigns his commission.

2nd Tower Hamlets—Hon. Chaplain the Rev. J. Bardsley, M.A., resigns his commission.

1st Wiltshire—The Very Rev. George David Boyle, M.A., Dean of Salisbury, to be Acting Chaplain.

(Where not otherwise specified, the foregoing commissions and announcements bear date Aug. 1, and the current year must be understood.)

FRIDAY EVENING.

ARMY.

INDIA OFFICE, August 3, 1883.

The Queen has approved of the retirement of the under-mentioned officers of her Majesty's Indian Forces:—Lieut.-Col. and Brevet Col. R. H. Cunliffe, of the Madras S.C. (June 14); Lieut.-Col. L. Wavell, of the Bengal S.C. (July 18); Major H. S. Anderson, of the Bengal Army (Jan. 3).

NOTE.—The transfer of Major H. S. Anderson to the Half-pay List, which was notified in the *London Gazette* of Jan. 12, 1883, is cancelled.

BREVET.

The under-mentioned officers have been granted a step of hon. rank on retirement:—

To be Major-General:—Lieut.-Col. and Brevet Col. R. H. Cunliffe, of the Madras S.C. (June 14).

To be Colonel:—Lieut.-Col. L. Wavell, of the Bengal S.C. (July 18).

To be Lieutenant-Colonel:—Major H. S. Anderson, of the Bengal Army (Jan. 3).

To be Surgeon-General:—Deputy-Surg.-Gen. J. Lumsdaine, of the Bombay Army (May 1).

The *Times* says:—"The arrangements for the reliefs of the season 1883-84 are now in substance completed. Owing to the prevalence of cholera in Egypt, the troops going to India will, in the first instance at least, be sent round by the Cape, and, as a consequence, the first batch of troopships will go out some three or four weeks earlier than usual. Four will sail between Sept. 4 and 16. With regard to the Cavalry, it was at first arranged that the Inniskilling Dragoons in Natal were to take the place of the 10th Hussars on the Indian establishment. It is, however, not considered advisable to withdraw the regiment from South Africa, and they will remain there for the present. The 7th Dragoon Guards, who have been quartered at Shorncliffe since their arrival home from Egypt in March, will proceed to India, being quartered at Mhow, in the room of the 17th Lancers, who go to Lucknow, in place of the 10th Hussars. The last-named regiment on arrival home will probably be stationed at Shorncliffe. The four Infantry battalions to take their place regularly on foreign service are the 1st North Lancashire, the 2nd York and Lancaster, the 1st Royal Irish Fusiliers, and the 2nd Royal Munster Fusiliers, the first and last named of which are already in the Mediterranean, temporarily replacing two battalions in Egypt. Three of them will proceed to India, and will be quartered at Rawul Pindee, Ahmednuggur, and Kamptee respectively. The three battalions to return from India are the 1st York and Lancaster, from Aden, the 2nd North Lancashire from Allahabad, and the 2nd Royal Irish Fusiliers from Belgaum. After these changes, the next Cavalry regiment in India for home will be the 13th Hussars, and the three next infantry battalions the 1st Essex, 2nd East Surrey, and the 1st Royal Irish; while those to go out would be the 1st East Surrey, 2nd Royal Irish, and probably the 2nd Highland Light Infantry. These battalions, together with the 2nd Royal Sussex at Malta, the 2nd Durham at Gibraltar, the 2nd Oxford, and the 2nd South Lancashire, have been placed on the highest strength of 950 rank and file each; the four standing next, viz., the 2nd South Yorkshire, 2nd Dublin Fusiliers, 1st Hampshire, and 1st Dorset, at 850 each; the four next, 1st North Stafford, 1st Royal London Fusiliers, 1st East Kent, and 1st Cheshire, at 750; and the 3rd Batn. Rifle Brigade, 1st Norfolk, 2nd East Yorkshire, and the 1st Duke of Cornwall's, at 650 each. The 2nd Essex, at Gibraltar, is not likely to be brought home, but the 2nd Durham and 2nd Sussex will come from the Mediterranean as soon as two battalions from Egypt become available for their relief; while the Cameron Highlanders will return home from Egypt, when political events permit their withdrawal."

Amusements.

In the valedictory speech delivered on Saturday evening last, the closing night of the LYCEUM, Mr. Henry Irving announced that he would make his reappearance at that theatre on June 2, 1884. In the meantime, he will, after a few provincial performances, visit the chief cities of the United States, accompanied by all the principal members of his company. During his absence in America, English playgoers will have the opportunity of witnessing some of the greatest favourites of the Transatlantic stage. The Lyceum will thus reopen on Saturday, September 1, with "Ingomar," when Miss Mary Anderson, as Parthenia, will make her first appearance in this country.

In anticipation of the Bank Holiday, DRURY LANE will commence its autumnal season this evening, with the new realistic drama of "Freedom," by Messrs. Augustus Harris and George Rowe. The scene of the action is Egypt.

The Promenade Concert season at COVENT GARDEN will also be commenced this evening (Saturday), with Mr. Gwyllym Crowe as conductor. The numerous orchestra, led by Mr. J. T. Carrodus, will include, as hitherto, the services of Mr. John Radcliffe and Mr. Howard Reynolds, as soloists on the flute and the cornet. Among the vocalists are Madame Rose Hersee, Madame Enriquer, Madame Patey, Mr. Maybrick, and Mr. Maas. The large space at the back of the stage is now occupied by a Chinese pavilion, painted by Mr. Albert Callcott, and the electric light is extensively employed both in the theatre and the Floral Hall.

The English version of "Fédora" will continue to be played at the HAYMARKET for a short time longer. Miss Calhoun has taken the place of Mrs. Bancroft as the Countess Olga, but in other respects the cast remains unchanged.

At the COMEDY THEATRE, the opera of "Rip Van Winkle has been consecutively represented for 250 times, without any perceptible abatement of popularity. Mr. J. A. Arnold has succeeded Mr. Leslie as Rip, and Miss Camille D'Arville is now the substitute for Miss Camille Dubois as Katrina.

The GRAND THEATRE, Islington, occupying something more than the site of the Philharmonic Theatre, burned down last year, will be opened this evening (Saturday) with a new drama by Mr. Sefton Parry, called, "The Bright Future." The theatre has been erected on fireproof principles, from the architectural designs of Mr. Frank Matcham, and there is said to be accommodation for an audience of 3,000 persons. Messrs. Holt and Wilmot, who have taken a lease of the establishment from the proprietor, Mr. Charles Head, intend to produce novelties in rapid succession.

The CRITERION THEATRE, Piccadilly, is to be reopened in October with a fresh adaptation of Offenbach's "La Vie Parisienne," of which a version was unsuccessfully produced at the Holborn some years ago.

Mr. Frank Lincoln, the popular American humourist, had the honour of giving on Saturday last his ingenious mimetic entertainment, in the presence of the Prince of Wales and a distinguished company. Mr. Lincoln, who now returns to the United States, was warmly congratulated on the successful result of his imitative sketches, which have afforded fashionable parties so much novelty and amusement during the London season.

CHAPLAINS' UNIFORM.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—At a time when so many improvements are being made in the matter of Military uniform, could not something be done for chaplains? Why should we have any uniform at all? There is, I believe, no such thing known in the Navy; but if we must be put into livery, why should we be condemned to be "got up" like police inspectors? Of course, if it were always everywhere altogether optional with us "to be or not to be" in uniform, there would be no cause of complaint. *Volenti non fit injuria.* It is not so, however; we are in this matter at the mercy of the officer commanding for the time being in this or that garrison. I say, then, improve the chaplain's uniform; let there be some head-gear less unclerical than a forage cap! Or, again, let us merely add to the usual clerical costume some little badge (as is done in France) indicative of our military calling, or (best of all) let this wretched uniform business, a mistake *ab initio*, be improved out of existence.—I am, &c.,

CAPELLANUS.

The officer of the Asia who was alleged to have taken part in the recent disturbances at the Portsmouth Amphitheatre, and who has been under arrest for improperly leaving his ship, is not to be tried by court-martial, but will be superseded. The whole of the circumstances in connection with the disturbance have been investigated by the Commander-in-Chief and reported to the Admiralty. The officers mixed up in the affair assert that on the second night, when the more serious fracas occurred, they had done nothing to justify the treatment they received at the hands of the mob, and that a gang of roughs had been specially organised to interfere with them.

HEADACHES AND DISORDERED STOMACH.—"After suffering for nearly two-and-a-half years from severe headache and disordered stomach, and after trying almost everything, and spending much money without finding any benefit, I was recommended to try your Fruit Salt. Before I had finished one bottle, I found it doing me a great deal of good, and now I am restored to my usual health. Others I know that have tried it have not enjoyed such good health for years.—Yours truly, ROBERT HUMPHREYS, Post Office, Barrasford." CAUTION.—Legal rights are protected in every civilised country. Examine each bottle, and see the Capsule is marked "ENO'S FRUIT SALT." Without it, you have been imposed upon by worthless imitations. Sold by all Chemists, price 2s 9d and 4s 6d. Directions in Sixteen Languages,—How to Prevent Disease. Prepared only at ENO'S FRUIT SALT WORKS, Hatcham, London, S.E., by J. C. ENO'S Patent.

Printed and Published for the Proprietors, at the Office, No. 1 Wellington Street, Strand, London.—SATURDAY, Aug. 4, 1883. Letters on Business and Remittances should be made to Mr. RICHARD JAMES WOOD.

ONE hears many reports as to what the British Company Officer will have to do in the future, now that he is personally to superintend the drill of the recruit. It is difficult to imagine what advantage can accrue to the service from the adoption of this course. It has been, and always will be, recognised as essential that the officer shall be able to correct, explain, and personally superintend the instruction of the recruit; but to set him down to a squad, to put in his mouth the constant refrain of the drill-serjeants and corporals, as heard on any parade-ground, of "One, taw," "One, taw," "As you were," &c., is certainly more calculated to stultify than encourage the growth of intellect in a professional sense. The barrack-square officer, with his rectangular rules, is not a desirable leader in the field. Hence it is hardly in this direction that an improvement can be made, unless, indeed, it can be urged that it will give the Company Officers more to do with the drill and instruction of their men than they at present enjoy. We purposely use the word "enjoy," for we are certain that there are any number of officers in our Army who regret that the drill and instruction of the regiment are so completely placed in the hands of others. As matters stand at present, officers have but few opportunities of drilling the battalion, or even their own companies. They may be called upon to put the battalion through a few manœuvres shortly before the General's inspection, but otherwise their practice in this most essential part of a military training is absolutely *nil*. Yet, on active service, any one of the senior Captains may suddenly find himself in command, and under circumstances which would perhaps render it desirable that he should be able to handle the battalion efficiently, and that the regiment should on previous occasions have acted under his orders. The fact of their having in turn to "take the parade," and an active, responsible part in the drill and instruction generally of the regiment, would oblige, encourage, and enable the officers to become proficient. How, we ask, can it be wondered at that, under the present system, that absurd enormity and injustice, "the Adjutant's regiment," should be founded, considering that the officer commanding, previous to taking command, may have had little, if anything, to do with drill and instruction? The system of Adjutants as at present constituted is an injustice both to the officers and to the non-commissioned officers and men, for however well the latter may stand in the estimation of their own company officers, the opinion of the Adjutant will outweigh that of the Captain or Subalterns of a company. It also puts the former in a false position with the latter, inasmuch as the non-commissioned ranks soon find out that the Adjutant has as much to do with them as their own Company Officers, and shirkers will take advantage accordingly. And, be it remembered, Adjutants are not always selected because they are smart drills or good officers. Many influences go towards the selection of an Adjutant, for some commanding officers will much prefer a man with whom they can work, duffer though he may be, to a conscientious, hard-working, and zealous soldier, who knows his work, what his own functions are, and will not be interfered with, even by his "chief." If instead of trying to cramp the intellect of officers by making them drill-serjeants, our theoretical Army reformers would endeavour, for once in a way, to be practical, and give the regimental company officer the opportunity, which he has been begging for for years past, of really preparing himself for the higher walks of his profession, the change would, we are sure, be hailed with satisfaction. It is not by relegating Captains and Subalterns to the merest routine work, that we can make Von Moltkes of them. If we wish them to think for themselves on an emergency, and use to advantage the knowledge they acquire whilst grinding for the periodical examinations they are expected to undergo, we must give them duties to perform which will develope their ideas. No change for the better can be looked for until the position and duties of the Battalion Adjutant are more clearly defined. So long as the Adjutant remains what he is now, the responsible representative of the Commanding Officer on the parade-ground, the Company Officer can never be expected to take any true interest in his profession; and he will never be made to do so, if his time is to be taken up in performing duties which can be equally well carried out by the junior non-commissioned officers.

"OUR Navy, we feel, should always be of such strength as to be able not only to cope with the Navy of any other nation, but to meet in combination all foreign Navies; and, at the same time, it should have sufficient reserve to protect that huge commerce which forms the greatness of our country." Thus, in a brief sentence, did the Lord Mayor of London express on Wednesday last, at the Ministerial Dinner, the feeling which at the present time is uppermost in the minds of Englishmen. Unfortunately, our Navy is not in the desired condition. To increase its strength, many millions of money would be required, and the Admiralty have been afraid to ask the Treasury for more funds or larger estimates. We hope, however, that their Lordships will take heart, and courageously strive to overthrow the "Treasury policy" which has for so many years been starving the Navy. They have now received a definite promise of support from the country, tendered through the Chief Magistrate of the Metropolis, the commercial centre of the world. Evidently the fears of the commercial classes of the country have been aroused respecting the reality of our Naval supremacy, owing to the rapid strides made by the Navies of France and Italy; and, we may add, it is time they commenced to consider the question. For years past we have striven to prove that France was slowly but surely gaining upon us in Naval construction; that Italy was building ships more powerful than any we possessed; that Russia was turning her attention to the reorganisation of her Fleet, now that she has discovered that the German ironclad squadrons are more than a match for all the armoured ships she possesses in the Baltic. Nevertheless, our facts have constantly been met by the assertion that "our Navy is stronger than ever it was, and fully competent to safeguard the great interests confided to its care." Ministers joined freely in the hallelujah chorus, started last year in Liverpool by Lord Northbrook, when the bombardment of Alexandria had blinded people to the weakness of our Naval force. At that time, men intimately acquainted with the state of our Navy stood aghast, and wondered what would become of our Naval supremacy, did but one great European Power side with Arabi. Where were the ships to come from to keep open our ocean highways, and allow goods to reach our markets in safety? Merely to seize and hold the Suez Canal it was found necessary to employ all our modern ironclads, the whole Mediterranean Fleet, the Channel, Reserve, and East Indian Squadrons. What had we left at home in reserve? Next to nothing. The Lord Mayor of London has done good service to the country, in thus publicly reminding the Government and the Admiralty of their duty to maintain a Navy "able not only to cope with the Navy of any other nation, but to meet a combination of all foreign Navies; and at the same time have a sufficient reserve to protect that huge commerce which forms the greatness of our country." Lord Northbrook was evidently not prepared for such a home-thrust, and never attempted to reply to it. The First Lord of the Admiralty had prepared quite a different kind of speech,—a regular after-dinner ovation,—showing how that delicately-constructed machine which he has the honour to represent had done wonders in the past, and was prepared to work miracles in the future. For has not Prince George of Wales "fairly entered upon his profession, apart from any protection of tutors and professors"? Mr. Lawless being evidently forgotten, while the fact of Captain Durrant being appointed "Governor" of Prince George was overlooked. The presence, too, of the Rev. William Dickson on board the *Canada*, as well as of several old friends, was not mentioned. But, *n'importe*. Will any one deny that "the zeal and efficiency of officers and men are worthy of the approbation of this company and of their fellow-citizens?" a fact, we may remark, that no one has ever doubted—the "zeal and efficiency" of Naval officers at all times eliciting marks of the highest admiration from their fellow-subjects. If the Board is "fully sensible of the duty of maintaining unimpaired the Naval supremacy of the country," as stated by Lord Northbrook, we can only say that he and his colleagues at the Admiralty have, up to the present time, followed a curious method of demonstrating the fact, and succeeded, apparently, in even misleading the Lord Mayor. We are well aware that the "Treasury policy" is mainly to blame, but the Lords of the Admiralty have not been undeservedly censured for the part they have acted while the Navy has been starved and our supremacy upon the high seas endangered. We cordially agree with Lord Northbrook in one thing, and feel convinced that he did not say one word too much, when he assured the Lord Mayor that the officers and men of her Majesty's Navy, in whatever part of the world they may be, will be deeply grateful to him, when they hear of the noble manner in which he has championed their cause,—the cause of England.

OUR attention has been directed by some of our correspondents to the New Rules, which have lately been issued, regulating Exchanges between Officers of the Royal Artillery. Until quite recently, the right of Artillery Officers to exchange appears to have been unrestricted; officers were at liberty to exchange when and where they pleased. There can be no doubt that this system led to abuses. It frequently occurred that an officer, who expected shortly to be promoted, finding himself in a good quarter at home, arranged an exchange for purely financial reasons with another officer, who had possibly been just promoted to a bad, foreign station, and who was prepared to give a considerable sum to get away from it. Again, it used to happen that when a battery of Artillery was ordered abroad, some, if not all, of its officers exchanged at the last moment before departure, in order to remain in England, and the battery proceeded on foreign service with a new set of officers, who had joined just when the change must cause inconvenience to the public service. These abuses, however, could have been met, and were met to a certain extent, by framing special rules preventing officers from exchanging when they were within a certain number from the top of the list for promotion, and also by allowing no exchange of officers to take place six months before a battery proceeded on foreign service, and six months after its arrival abroad. A recent order has gone far beyond these proposals. Artillery officers are now only allowed to exchange once in each rank. It seems to us that this order may occasion much hardship. There are obvious reasons why great latitude should be extended to Artillery officers in regard to exchanges. If it were otherwise, it would often happen that they would have to pass all their service abroad, without possibly ever having the opportunity of serving at home. Owing to the extraordinary organisation of the Artillery, a subaltern may serve all his time as Lieutenant in India, and find himself promoted to a battery, which has just arrived in that country, and which has a long period of foreign service in prospect. He may exchange once as a Captain; but it not unfrequently happens that an Artillery officer exchanges from India to England, only to find his new battery placed under orders to proceed abroad again. By the new regulations, he is tied hand and foot to his battery; he must accompany it abroad, and remain with it till he is promoted. On promotion to the rank of Major, he may find himself placed in exactly similar circumstances. It seems to us that the new rules, though well meant, go too far in the direction of limitation, and unless they are modified they cannot fail to cause hardship in the future. A correspondent has asked our opinion respecting the legality of these Rules. He points out that the unrestricted right of Military officers to exchange was sanctioned by Parliament in 1874, when Mr. Hardy brought in a Bill restoring to officers the privilege, which had been removed during Mr. Cardwell's *régime.* It is an interesting point of Constitutional law, which we are not now prepared to argue, whether the Secretary of State for War (who has acknowledged his responsibility for all the acts of his subordinates) has the legal right to frame regulations which virtually override an Act of Parliament, and which curtail, if they do not actually abrogate, privileges specially secured to Officers by the Legislature.

THE late cruise of the Reserve Squadron under their able and energetic Rear-Admiral, Sir Anthony Hoskins, K.C.B., may be pronounced to have been a decided success. The vessels composing that Squadron, although of an obsolete and somewhat antiquated pattern, are admirably adapted for the purpose. Being fully masted, and to a great extent resembling one another, they present an imposing appearance not often seen now-a-days. The route selected was also well chosen, and is preferable in every respect to the old beaten track, to Vigo and Gibraltar. It is certainly better that the men should have an opportunity of seeing something of their own shores, and of spending their money amongst their own countryfolk. A short visit to Heligoland and Bergen was much appreciated, both by the inhabitants of those places and by the officers and men of the Squadron. Such a sight as eight ironclads moored in the confined harbour of Bergen has never before been witnessed, and will not easily be forgotten by the simple Norwegians. The cruise was continued from thence to Lerwick, in the Shetlands, and Kirkwall, in the Orkneys, where an enthusiastic reception was accorded the Squadron. But little is known of the Navy in those remote waters, and it would be very advantageous if a training-ship for boys could be stationed in either or both of those splendid harbours. There is little doubt that numbers of fine, healthy lads could be secured for the service, who now find their way into the merchant service. Cromarty, the next port of call, is one of the few fine harbours on the East Coast of Scotland, and here a stay of four days was made, to the great delight of the inhabitants. The officers were handsomely entertained by Captain Macleod, the hospitable proprietor of Invergordon Castle, and a very pleasant time was passed while the ships were coaled. From Cromarty there is no harbour suitable for big ships till the Forth is reached, and Aberdeen was passed by the Squadron, to the great disappointment of the Aberdonians. A Commission is now sitting to decide as to the relative merits of the different places along the coast, suitable for harbours of refuge. From our knowledge of the coast, we incline to Peterhead, as being the most favoured by nature for the purpose. A breakwater could be easily built enclosing a spacious harbour suitable for men-of-war, and also for coasters. There is little doubt that such a harbour is much needed, and would be largely used by sealers, whalers, and the Scotch fishery fleet. There is no other place on the coast to our knowledge suitable for the purpose, unless it be Lernan Bay, to the northward of Red Head. After a short stay in Leith Roads, the Squadron returned to Spithead, from whence the ships have since dispersed to their several stations. There can be no doubt that the cruise has been of immense benefit to officers and men, especially the former, and that very great experience has been gained by the Captains in handling ironclads. Every opportunity was taken to exercise the Squadron at steam tactics, which were performed in a very creditable manner. Other drills were not neglected, but the Admiral wisely considered that gun-drill should have the preference of all others. The Coastguard men embarked on these occasions are an exceedingly fine body, and their conduct is most exemplary. In time of war, their services would be invaluable. The Royal Naval Reserve men now constitute a body of 16,000 men, to be shortly increased to 20,000. This Corps is exceedingly popular amongst seafaring men, and the numbers could be easily doubled. It has been questioned whether their services could be secured in time of war, and by some it is doubted if they would be forthcoming. We incline to the opinion that they would be, and that these men, who in point of physique are second to none, are well suited for the purpose for which they are trained and paid,—that of manning our mastless ironclads, gunboats, and other craft intended for harbour defence. Whether they would be reconciled to the discipline of a man-of-war admits of a doubt, but we hold to the belief that the pressure of public opinion, if not their own *esprit de corps*, would induce them to fight for their country as well as any seamen of the Fleet.

IT is certainly very disappointing to the friends of the Militia, to find how small a number of representatives of that service presented themselves at the recent examinations in tactics instituted for officers of the Auxiliary Forces. If we take the result of the first examination, we find that the number of officers who went up was about 400, of whom all but 40 passed the ordeal. Of the 360 successful candidates, only about 20 were Militiamen. The Volunteers, on the other hand, passed 330 of their men. Colonel G. G. Walker, the indefatigable commanding officer of the 3rd Battalion, Royal Scots Fusiliers (late Scottish Borderers), as usual, set an example, by going up for the examination, and passing. Colonel Walker deserves the highest credit for the zeal he displays. He and his officers are a pattern to the whole Militia service. If all officers of Militia were to strive as those of the old Scottish Borderers have done to fit themselves for the rank they hold, the country would have reason to congratulate itself on the condition of its Militia force. As it is, the regiments are quite the exception in which a rule is laid down by which all officers are compelled to pass through a school of instruction. In many, in fact in most cases, the Field Officers do not even feel that it is incumbent on them to obtain the School Certificate. The Militia as a service has been greatly elevated lately. The officers wear the same uniform as their Line battalions, and whilst training enjoy all the privileges of professional soldiers. They ought, therefore, to take advantage of every means in their power for perfecting themselves in the details of soldiering. Until they do this, they cannot very well complain if ungenerous remarks are made with regard to them, and comparisons should occasionally be drawn. We have always been great admirers of the Militia as a service. We know and appreciate the valuable work it has done in the past. But Militia officers, if they wish to hold their own, must really show, as a body, more determination than they have hitherto done to keep pace with the times. There are many devoted soldiers in the ranks of the Militia, who leave no stone unturned in order to increase their professional knowledge. The object of these men would seem to be to raise the character of the service with which they are associated. They will make any sacrifices in order to prove that they have accepted commissions with some higher aim than that of wearing a uniform and bearing a military rank. The majority, however, we grieve to say, evince a disposition to take things as easily as possible, forgetting that by doing so they bring discredit not on themselves only, but on their regiments and the service. This state of things should not be allowed to continue. The Schools of Instruction opened twelve years ago are admirable institutions. Those who have attended them are able to bear testimony to the thoroughness of the instruction imparted by the Commandants and their Staffs. No pains are spared by the officers in charge to render the course thoroughly practical, and the state of Colonel Walker's splendid regiment is evidence of the advantages to be derived from a recognised system which compels all officers to qualify for certificates. It is, of course, a wise thing on the part of the responsible authorities to allow attendance at school to be optional. But if it is found that officers will not go to school of their own free-will, a hard-and-fast line should be drawn, by which every officer should be required to qualify for a certificate. We would begin at the top of the tree, and first oblige all Field Officers to atten~~d at~~ one of the Military Schools. Until this is done, the service will never be in that high state of efficiency in which it ought to be. It is all very well for some officers to complain that we are "down upon them" as a body, and that we do not do justice to their service. We have no desire to underrate the value of the services rendered by the officers of the Constitutional Force. What we do want is to see the Militia improved in soldierly qualities, as it has been advanced in the social military scale. It is for the officers to come forward, and prove to the country that they appreciate the favours which have been showered upon them. Until they do this, they must expect to be criticised; and if that criticism is not at all times as favourable as they might wish it to be, they must blame themselves, and not those who judge by facts. At the present time, the service is in an eminently unsatisfactory condition. The few zealous soldiers, as we have said, are doing their utmost to raise its tone; but however hard they work they will not attain their object, unless they meet with support. They are not supported now. What they desire is to see the whole of the classes which are open to Linesmen opened to them also. They ought to be opened to them, and we have all along contended that they should be. It is not to be expected, though, that the War Office will show a conciliatory spirit, whilst the majority of those holding Militia rank are satisfied to do their month's soldiering, and nothing more. What we want is Field Officers like Colonel Walker,—men who take a proper pride in their regiments, and are not afraid to put the screw on, in cases where their subordinates are lacking in zeal. In the Volunteers, officers are for ever knocking at the door of the War Office, asking for further opportunities of acquiring knowledge. The schools of instruction, the examinations in tactics, appointments to the Order of the Bath, everything that has been got of recent years tending to raise the Auxiliary Forces in the estimation of the public, has been obtained by the persistent demands of the Volunteers. The Militia has been content to look on, and let others play the game. There is evidently a feeling among Militia Officers that they do quite enough, if they submit to undertake the drudgery of twenty-eight days' training annually. They forget that the country looks to them to play a very important part in its defence. They must do in the future more than they have done in the past, or depend upon it they will have to pay the penalty. The country will not be satisfied to allow the Militia, occupying the position it does now, to remain at a standstill, whilst the Volunteers are taking rapid strides to the front. When, some time ago, we struck a note of warning, we were accused of unfriendliness. Some even went to the extent of saying that we desired to snuff out the present race of Militia officers altogether. No charges were ever more unfounded, and more unjustifiable. What we argued was that, taken as a whole, the Field Officers of the Militia were its weak point. And so we think them still. We consider it very discreditable, indeed, to the Militia, as a service, that so small a proportion of its Field officers should have obtained certificates at the schools of instruction. It is even more discreditable that out of the whole force, six only among the Field-officers should have passed the examination in tactics, when Volunteer Field-officers throughout the country have gladly taken advantage of the opportunity of adding to their store of knowledge, and giving evidence of their fitness for the duties they are called upon to perform. We have an important duty imposed upon us. We have to watch the interests of all branches of Her Majesty's service. We should not be carrying out that duty, unless we pointed out in what direction improvement is necessary. That matters are not as they should be in the Militia, all true friends of that service must admit. We know full well that there are some estimable officers to be found in most regiments. Colonel Walker has shown what can be done, and we hope that other commanding officers will profit by the excellent example which he has set them, and by demanding of their officers that they shall do something more than the bare routine of duty during one month's training a year, give proof to the country that Militia officers only want to be encouraged.

We understand that, in consequence of the strongly expressed views in regard to the failure of the probationary Lieutenants of the Royal Marines, a committee consisting of Admiral Luard, Dr. Hirst, Sir Francis Festing, and Major Needham was appointed to consider the position of the rejected candidates, and to report on the cause of their failure. The result has been that of the candidates who were plucked at the examination last year, Lieutenants Herbert Slessor and Aubrey Cox, of the Forton Division, and Lieutenants Gordon, Barton, Couchman, and Marchant, who were unsuccessful at the last examination, are to receive commissions in the Marine Artillery. This is a most serious reflection on the examiners and educational Staff of the College, and clearly proves that reform is necessary in the educational course and system of examination in force at Greenwich.

Vice-Admiral H.R.H. the Duke of Edinburgh attained his thirty-ninth year on Monday last. The anniversary was celebrated in the customary manner in all the Naval ports. His Royal Highness is shortly expected home from Germany.

Captain John D'Arcy, R.N., Flag Captain to the Commander-in-Chief at the Nore, is, we regret to hear, seriously ill, and has been removed from Sheerness to Melville Hospital.

Lord Alcester has been the guest of the Marquis of Heitford during the past week. On arriving at Alcester on Friday last, Lord Alcester met with a most enthusiastic reception from the inhabitants. The town was gaily decorated, and an address of welcome was presented. The gallant Admiral was afterwards entertained at a banquet by the Apollo Lodge of Freemasons.

The French Navy has just received a valuable addition by the launch, at Cherbourg, of the ironclad *Furieux*. The vessel is a twin-screw turret-ship, without masts, and is constructed, from designs by M. Bussy, entirely of iron and steel. Her length on the water-line is 70·05 metres (230 ft.); breadth, extreme, 17·60 metres (58 ft.); greatest draught of water, 6·60 metres (21 ft. 8 in.). The *Furieux* has a displacement of 6,265 tons, and her engines, three-cylinder compound, indicate 3,400 horse-power. The hull is protected on the water-line by an armour belt of Creusot steel, 7 ft. 6 in. wide, tapering in thickness from 19½ in. in the centre to 17½ in. at the stern and 11·7 in. at the bows. The turrets are to receive armour-plates 17½ in. thick, and the bridge is to be protected by plates 3½ in. thick. The *Furieux* is constructed on the cellular principle, and has a double bottom extending almost her whole length. She is divided into nine compartments, of various sizes. The new ironclad is to be armed with two 32-centimètre steel guns, mounted *à barbette* in the turrets, and throwing a projectile weighing 420 kilogrammes, with a charge of powder of 117 kilogrammes. The *Furieux* will receive also several Hotchkiss revolving guns, as a protection against torpedo attacks. The vessel has bunkers holding 290 tons of coal, so that she will be able to steam 1,500 miles at a speed of 10 knots, her maximum speed being 13 knots. The *Furieux* is intended for coast defence. Her total cost, including armament, is a little over £280,000.

The Admiralty have issued instructions to the effect that in all ships fitted for a Flag, special cabins will be appropriated for the Flag Lieutenant and Secretary.

In accordance with the Order in Council of May 23 last, the Admiralty have issued the following regulations, defining the alterations in the designation of coxswains of certain boats:—(1.) Coxswain of the launch is to be designated coxswain 1st-class, with the rank of 1st-class petty officer. Coxswains of barge, pinnace, and cutter are to be designated coxswains 2nd-class, with the rank of 2nd-class petty officers. (2.) Captains of her Majesty's ships will be at liberty to employ coxswains in any boats they think desirable, no change being made in the number or proportion of 1st and 2nd-class petty officers allowed in the complement. (3.) No alteration is to be made in the present rates of pay and allowances of the above-named coxswains.

We are sorry to have to announce the death of Mr. James Gabriel Gordon, Assistant-Paymaster-in-Charge of the *Stork*, which occurred at St. Paul de Loanda on the 2nd ult., from fever.

Captain Bowden Smith, who succeeds Captain Wells in command of the *Britannia*, is not expected home till the middle of September. It seems strange the Admiralty could not have informed this officer of his appointment in time for him to have taken up his duties at the beginning of the term,—the end of August.

The Admiralty announced last week that the mails for all ships under the command of Rear-Admiral Sir William Hewett, V.C., Commanding-in-Chief on the East Indies station, were to be sent in care of the postmaster at Aden, to be forwarded. Their Lordships even went to the trouble of naming every ship forming part of the East Indies Squadron, as if desirous of calling special attention to the fact that extraordinary and sudden orders had been sent to that station. The fact has not escaped notice in France, and has been held to mean that the English ships are at once to join the flag of Sir William Hewett at Zanzibar. This concentration of English men-of-war so near Madagascar is looked upon as a menace to France, at which the French authorities laugh immoderately, the French Fleet being three times as strong as ours thus concentrated. But since then the Admiralty have received important despatches from Madagascar, giving a detailed account of the doings of the French Admiral, who, by a strange coincidence, is reported to have resigned. Admiral Pierre is said to be suffering from ophthalmia, and to have requested the French Minister of Marine to supersede him in the command of the Malagasy expedition. The statements made by Mr. Gladstone at the Mansion House and in Parliament now leave it beyond doubt that the whole affair, whatever it may be, will be amicably arranged between the Governments of France and England. The despatches received from Com. Johnson are being printed for issue to the departments concerned.

The following officers have commenced a course of torpedo instruction at Portsmouth:—Acting Assistant-Engineers R. Collingwood, E. H. Crowley, C. W. Cudlip, and A. Webb. They are accommodated at the College.

The French ironclads of the first class that are now complete for sea are three, the *Amiral Duperre*, the *Tonnant*, and *Devastation*, each carrying 48-ton guns, the first with armour of 22 inches, the others with 18 and 16½ inches, respectively. The English ironclads in the same category are the *Inflexible*, with 80-ton guns and 24 inches armour, and the *Conqueror*, with 43-ton guns and 12 inches armour.

The *Great Harry*, the first two-decker of the English Navy, built in 1488, did not carry machine-guns. She, nevertheless, had "murdering pieces" mounted on her high forecastle and poop, wherewith to "pump lead" on to the decks of her enemies, or on to her own, for that matter, were she boarded. The *Henri Grace à Dieu*, our first three-decker, built at Erith, in 1515, also carried these "murdering pieces," as did also all smaller ships. There is nothing new under the sun. Even the *barbette* system of mounting guns dates back to the reigns of Richard III. and Henry VII., when the heavier guns were mounted *en barbette*, so as to have an all-round fire over the bulwarks. Our present system of arming men-of-war is thus seen to be merely a reproduction of the old ones.

At a time when the Admiralty are so hard up for ships that they are obliged to employ a partially armoured ship specially built for cruising purposes—we mean the *Shannon*—in place of the *Warrior*, and when cruisers may at any moment be wanted, it seems strange that the *Shah* and *Inconstant* should be allowed to remain up Portsmouth Harbour deteriorating, instead of being repaired and placed in a serviceable condition.

The British Medical Association, before bringing their yearly meeting to a close last week, entered on the subject of the Contagious Diseases Act. An animated discussion took place on a resolution moved by Dr. Fitzpatrick (Liverpool) "That the Parliamentary Bills Committee be instructed to watch all proposals to legislate on the subject of contagious diseases, that it should oppose any attempt to repeal the Contagious Diseases Act, and that it should endeavour to induce the Government to restore a more perfect observance of the Act." Surgeon-Major M'Cormick (London) seconded the resolution. Two amendments were proposed and lost, having only the support of two or three gentlemen, and Dr. Fitzpatrick's motion was put and carried by an overwhelming majority. We trust that such an important representative body will exert all their influence in preventing a repeal of these most necessary enactments, knowing as they do the value of them, both to the Army and the Navy and the general community. If the Act requires revision, let it be submitted without delay to a Committee or Royal Commission for the purpose. The late resolution of the House of Commons has, unfortunately for the men of both services, paralysed the beneficial results of the past sixteen years; it is, therefore, to be hoped that gentlemen who devote their lives to science and the amelioration of the ills to which man subjects himself, will be loud in their protests against even the suspension of the Act. Undeniable advantages have been sacrificed to the ignorance of legislators, who have gained their point merely for the gratification of their own political importance, without considering the injury which will accrue therefrom to their fellow-creatures. The Government attempt legislation for the Army after the manner of our Continental neighbours, but have not the wisdom to meet a necessary social evil, in one way or the other, after their fashion, and would sooner see our soldiers and sailors rot like sheep, than allow the cravings of hypocritical morality to remain unsatisfied. We are sure that the action of the British Medical Association will be as vigorous as their ability is to meet the necessities of mankind and aid the general welfare, and we are certain that the Executive as well as the Medical officers of both services will gladly assist them in such an important undertaking.

There are at present but four regiments of Marine Infantry in France, forming in all about 20,000 men. Seeing the zeal with which our neighbours are now going in for planting colonies, this force is considered inadequate. Consequently, the Minister of Marine proposes to double the number of regiments, and to change the mode of recruiting. At present, the lads who draw the lowest numbers in the annual conscription are drafted into the Marine Infantry; but M. Brun proposes that the force in question shall be recruited by means of volunteering and re-enlistments. A bounty of £24 will be offered to all soldiers re-enlisting in the Army for five years, and who will consent to serve in the Marine Infantry for the last two years of that period. The Minister further proposes to give the Colonial troops 5d. a day extra pay, which sum is not to be handed direct to the soldier, but to any one he may name in France, so as to form a reserve fund. It is calculated that the above arrangement will cost £100,000. The Minister of Marine also proposes to create a regiment of Tonquinese, which is like disposing of the skin of the bear before he is brought to doom. The Tonquinese regiment is to be composed of natives, and officered by Europeans. The *Progrès Militaire* gives the following list of the force in question:—

Two regiments of Artillery of 29 batteries	6,100	men.
Reservists	6,000	"
Eight regiments of Marine Infantry	20,000	"
Reservists	25,000	"
Four battalions of Senegal Rifles	2,000	"
" " Annamite Rifles	3,200	"
" " Tonquinese Rifles	3,200	"
Sepoys, &c.	1,640	"
Total	64,130	men.

Seventeen large guns and a mortar have been landed by a Swedish vessel at the Danish gun factory at Fredricksvaerk, on the Island of Seeland. These cannon were lately raised in the harbour of Stroemstadt, in Sweden, and belonged to vessels-of-war which were sunk in the time of Charles XII., to prevent the entrance of a Danish Fleet, under the command of Admiral Tordenskjold.

In the recruiting law of the French Army, it is set forth that men who have undergone certain judicial condemnations shall be deemed unworthy of serving in the ranks of the Army, but there is no law of this sort for the Reserve Forces, and consequently an honest Reservist may find himself cheek by jowl with a ticket-of-leave man. The War Minister, in connection with the Minister of Justice, is taking steps to remedy this state of affairs.

H.M.S. MIRANDA.

TO THE EDITOR OF THE "ARMY AND NAVY GAZETTE."

SIR,—It gives surprise and regret to find the Admiralty have, as you say in your number of July 28, "visited their displeasure on Lieut. Hughes, the navigating lieutenant of the Miranda, for allowing that ship to ground on a coral reef in the South Seas, a locality but slightly surveyed, by superseding him in his appointment," as it is pretty well known he is one of the most anxious and careful officers of that department in the service, and possessing considerable experience, especially amongst the islands on that station, and great steadiness; and I am of opinion he can produce the best of testimonials in every respect from the different officers in command under whom he has sailed. In the absence of particulars, it is hard to speak fully, but it appears very harsh treatment, particularly if the reef was not laid down in the charts, and the ship was passing at night. We all know how rapidly the coral reefs crop up. Surely Lieut. Hughes is not the only officer on board who is to experience the displeasure of the Admiralty for this mishap?—I am, &c., OBSERVER.

The Admiralty have given special permission for the members of the Gun Factory Board of the United States Navy, who are now in this country, to visit the dockyard and other Naval establishments at Sheerness, Chatham, and Portsmouth.

Lieut. Fritz H. Crowe and Lieut. Charles H. Cross have this week left England by mail, the former to take over the command of the Coquette, the latter to take up the appointment of first lieutenant on board the Nelson, under Comdre. James E. Erskine, A.D.C.

An order has been received by the Commander-in-Chief at Portsmouth directing that those of the crew of the Royal yacht Victoria and Albert who have served the necessary time to entitle them to pension are to have their papers forwarded to the Admiralty forthwith, and vacancies caused by the pensioning of these men are not to be filled until further instructions are received. During the past week about forty shipwrights and a few labourers have been entered in the dockyard for work upon the yacht. She is being rapidly opened up, and being diagonally built, a deal of sound timber has to be removed before the bad can be got at. The principal defects in the hull are at the stern under the water-line. According to the dockyard programme of work, the repairs will not be completed until this time next year. The yacht is not to be supplied with new engines, as stated, those now on board being perfectly serviceable after repairs, but she is to be provided with a complete set of new boilers.

THE NATIONAL ARTILLERY MEETING.

(FROM OUR CORRESPONDENT.)

The National Artillery Association is to be congratulated on the success which has already attended its twentieth annual meeting. It opened at Shoeburyness last Monday, the entries all round being, as we believe, larger than on any previous occasion—some 2,200 officers and men from all parts of Great Britain—while the prize list shows substantial additions. These are strong evidences of the vitality of an institution which has done good work for the nation, and if any further evidence were wanting, it would assuredly be found in the proficiency displayed this week by the Volunteer gunners in the science of artillery and those soldierly qualities which stamp real progress. As we have repeatedly pointed out, the Shoeburyness Volunteer Artillery Meeting is not at all to be compared with the great rifle gathering at Wimbledon. It is a camp of instruction, in which prize-winning is only a secondary consideration, compared with the valuable knowledge gained in the brief period the auxiliaries of the first arm are able to give to the world. When the first detachments marched in last Saturday, in strict military formation, and reported themselves, the most exacting officer could have found little fault either with the appearance or equipment of officers and men; and so on till Sunday night, as from Scotland, Durham, Northumberland, Yorkshire, Lancashire, and other distant parts, the well set-up representative detachments entered the Government ground, and took over the tents pitched, as usual, on the meadow land adjoining the barracks. By 9 o'clock on Sunday night, the force of 1,100 officers and men, Col. Fox-Strangways, School of Gunnery, had in his command was complete, the composition of this, the 1st, Division being as follows:—

FIRST DIVISION.

1st Brigade.—Major R. K. Birley, 7th Lancashire Artillery, commanding; Capt. E. N. Edwards, 1st Sussex Artillery, adjt. 1st Baty.—7th Lancashire (Manchester), 6 detachments; 1st Cheshire and Carnarvon (Bangor), 1. 2nd Baty.—1st Lincolnshire (Grimsby, &c.), 4; 1st Kent (Blackheath), 2; 1st Kent (Sandgate), 1. 3rd Baty.—1st Forfarshire (Dundee), 2; 1st Forfarshire (Broughty), 1; 1st Forfarshire (Arbroath), 1; 1st Northumberland and Sunderland, Newcastle-on-Tyne, 2. 4th Baty.—1st Northumberland and Sunderland (Sunderland), 3; 2nd Northumberland (Alnwick), 3. Major W. W. Urquhart, 1st Forfarshire Artillery, major.

2nd Brigade.—Major C. Grayson, 1st Lancashire Artillery, commanding; Capt. R. H. Clay, 8th Lancashire Artillery, adjt. 1st Baty.—1st Lancashire (Liverpool), 4 detachments; 1st Midlothian (Edinburgh), 3. 2nd Baty.—2nd Lancashire (Liverpool), 6. 3rd Baty.—5th Lancashire (Preston), 2; 8th Lancashire (Liverpool), 5. 4th Baty.—6th Lancashire (Liverpool), 6.

3rd Brigade.—Lieut.-Col. H. C. Gleadow, 2nd East York Artillery, commanding; Capt. R. Lauder, 4th Durham Artillery, adjt. 1st Baty.—2nd West York (Bradford), 4 detachments; 4th West York (Sheffield), 3. 2nd Baty.—1st East York (Whitby), 1; 1st East York (Bridlington), 1; 2nd East York (Hull), 5. 3rd Baty.—2nd East York (Hull), 6. 4th Baty.—2nd East York (Hull), 1; 1st North York (Middlesbrough), 4; 1st Edinburgh City (Edinburgh), 1. Major W. H. Marwood, 1st East York Artillery, major.

4th Brigade.—Major T. C. McKenzie, 2nd Durham Artillery, commanding; Capt. J. W. Cameron, 4th Durham Artillery, adjt. 1st Baty.—2nd Durham (Seaham), 7 detachments. 2nd Baty.—2nd Durham (Seaham), 7. 3rd Baty.—2nd Durham (Seaham), 4; 4th Durham (West Hartlepool), 2. 4th Baty.—4th Durham (West Hartlepool), 2; 1st Cheshire and Carnarvon (Chester), 4.

Unattached.—Canadian Artillery, 2 detachments.

The night passed without any other incident than the indiscretion of a non-commissioned officer of the Forfar corps, who, besides being out of camp after tattoo, refused to obey his officer, and created a disturbance. He was, of course, arrested, and subsequently dismissed the Camp. Firing opened on Monday morning with the 64-pounder Palliser rifled muzzle-loading gun (shell) for Sir Richard Wallace's prizes, nine silver cups, value £45; £20 by the Marquis of Londonderry, President of the Council; £15 5s. by the 2nd Middlesex Artillery and Lieut.-Col. Jefferis, late 1st Sussex A.V.; and £10 by the Directors of the Junior Army and Navy Stores. The conditions were the same as on previous occasions, each competing detachment firing four rounds of common shell at a 6-foot target, placed at a distance of 1,850 yards from the battery. Four banderols, each 20 feet in height, were so placed near the target as to make a parallelogram of 50 yards by 12 yards. Each competing detachment changed rounds after each of the first three rounds were fired, and 10 minutes were allowed for the competition. Shells with time-fuzes bursting within the parallelogram and at a height not exceeding 20 feet above the plane, counted 12 points; while those bursting higher had no value given to them. Blind shells, with time-fuzes, making a direct hit, also counted for 6 points. The competition was watched by Col. Strangways and other officers of the Royals, and the general impression appeared to be that the drill showed a decided improvement over that of last year, while the practice was undoubtedly better. Of the 506 rounds fired, 97 had the full value of 12 for a burst within the parallogram, and there were 3 direct hits with blind shells. One detachment scored the highest possible, 48, and there were 6 of 36, 12 of 24, 2 of 18, 43 of 12, and 3 of 6. Fifty-three detachments exceeded the time, and had to submit to a reduction of points, and 33 failed to score. The result of the contest was in favour of No. 13 Detachment of the 2nd Durham (Seaham Harbour) Brigade, which made 48 points, but exceeded the time by 1 min. 40 sec. It takes the first prize. The second was awarded to the West Hartlepool detachment (4th Durham), for 36 points, in 7 min. 22 sec.; the third to No. 9 Detachment, 2nd East York (Hull), 36 points, 7 min. 53 sec.; and the fourth to the 1st Cheshire and Carnarvon, 36 points, 9 min. 20 sec. Two other detachments of the 2nd East York also scored 36 points within the time, and were awarded certificates of merit.

On Tuesday the competition with the 40-pounder R.B.L. Armstrong was proceeded with at the Old, New, West, and Seawall batteries, all the detachments again taking part. The suggestion made by Gen. Hastings last year that the four rounds of shot should be fired at one target, and not at two at different ranges as heretofore, was adopted with what are believed to be satisfactory results, the firing showing an advance on that of last year, while a considerable saving of time was effected. Of the 506 shots at 1,600 yards, the direct hits were 66; hits or ricochet, 13; points for direction and elevation, 59. Banderols were placed at each target, one three yards to the right, one three yards to the left, one ten yards in front, and one 30 yards in rear, the whole forming a parallelogram 40 yards long by nine yards wide. Only six detachments exceeded the seven minutes allowed. The prizes were won as follows:—1. National Artillery Association Prize, £30, No. 4 Detachment, 8th. Lancashire (Liverpool), 36 points, 5 min. 46 sec. 2. Messrs. Elkington's Prize, £21, No. 12 Detachment, 2nd Durham (Seaham Harbour), 36 points, 6 min. 28 sec. 3. Capt. J. L. Rutley's Prize, £10, and £5 by the Association, No. 1 Detachment, 1st Lancashire (Liverpool), 33 points, 5 min. 47 sec. 4. National Artillery Association Prize of £10, No. 9 Detachment, 2nd Durham, 33 points, 5 min. 58 sec. There were three scores of 30 points, three of 27, nine of 24, three of 21, and 15 scores of 18.

On Wednesday, the 40-pounder Armstrong contest was resumed, in very unfavourable weather, the wind blowing half a gale from the right front. The range was 2,000 yards, and the number of rounds four. The first prize, nine silver cups, value £15, was won by No. 3 Detachment, 2nd East York, 39 points, 5 min. 8½ sec.; the second, £20, by No. 1 Detachment 4th Durham, 30 points, 4 min. 58¾ sec.; the third, 16 guineas, by No. 14 Detachment 2nd Durham, 30 points, 4 min. 59 sec.; and the fourth, by No 1 Detachment 7th Lancashire (Manchester), 30 points, 5 min. 24½ sec.

On Thursday, nineteen selected brigade detachments competed, at the Seawall Battery, with the 10-inch 18-ton gun, for the handsome challenge cup presented by the Corporation of London and City Companies, with money prizes amounting to £66 10s. This was the principal contest of the meeting, and created, as usual, a considerable amount of interest, the practice being witnessed by a good sprinkling of the officers and non-commissioned officers of the Royals. Each detachment fired three rounds (shot) at a nine by nine target, at a distance of 1,400 yards; and eight minutes were allowed, deductions being made for overtime. The drill was good, but the practice, considering the favourable atmospherical conditions, was hardly up to the anticipations which had been formed. One detachment of the 5th Lancashire was disqualified after firing the first shot, so that the number of rounds fired were 55, these being thus accounted for:—Direct hits, 17; hits on ricochet, 7; misses, 31. The principal scores were as follows:—

Corps.	Points.	Time.	Deduct.	Net Total.
4th Durham, 1st prize	36	6.18	0	36
4th West York, 2nd prize	24	5.46	0	24
2nd East York, 3rd prize	24	6.30	0	24
